 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

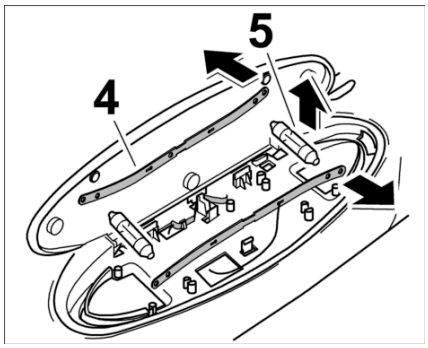
Disassembling sun visor

Removing mirror insert

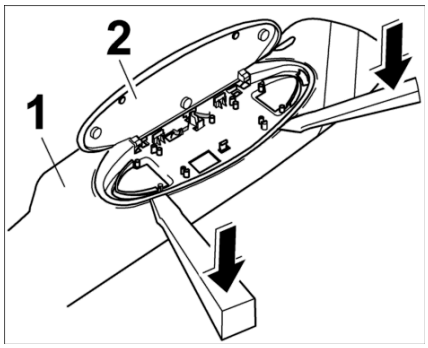
Unclipping mirror insert



1. Insert a narrow screwdriver between the mirror insert **-3-** and mirror housing **-2-** at the bottom centre, and unclip the mirror insert.

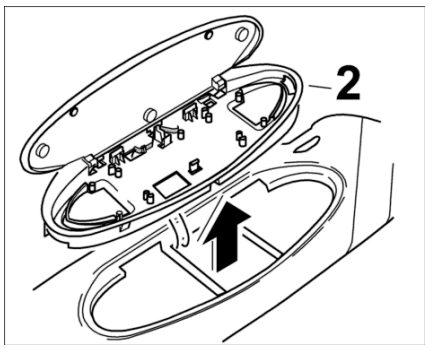
Removing mirror insert

2. Pull the mirror insert **-3-** upwards and remove from the mirror housing **-2-** .



Removing bulb and contact clips

Removing bulb and contact clips

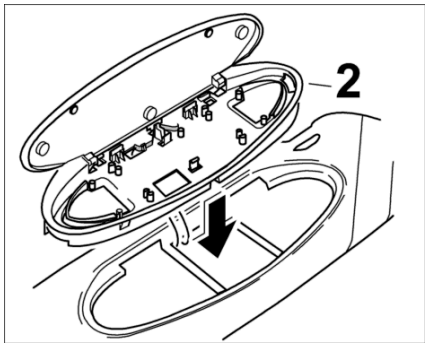


1. Remove bulb **-5-** from contact clips **-4-** . Take the contact clips upwards out of the holder.

Removing mirror housing

Unclipping mirror housing

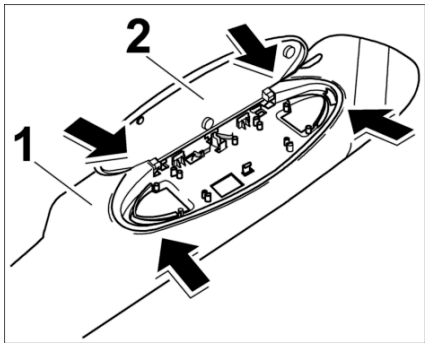
1. Insert a narrow plastic spatula between the mirror housing **-2-** and the sun visor **-1-** on the left and right and unclip the mirror housing.



Removing mirror housing

2. Take the electric lead out of the mirror housing **-2-** and detach the mirror housing from the sun visor.

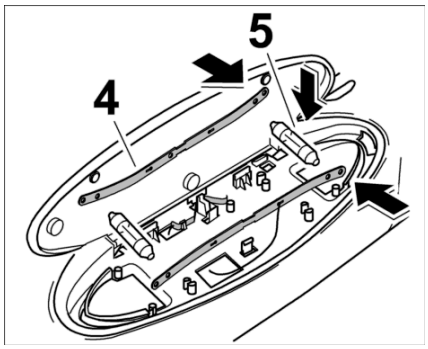
top of page



Assembling sun visor

Installing mirror housing

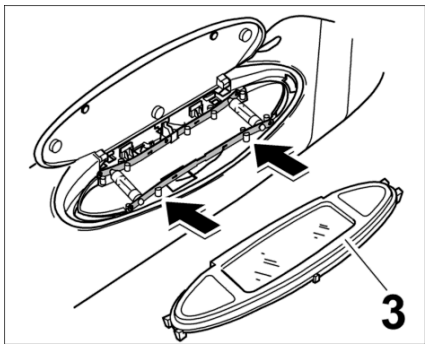
Positioning the mirror housing



1. Insert electric lead into the mirror housing **-2-** . Position the mirror housing in the sun visor.

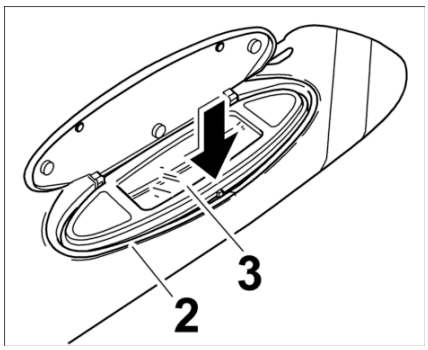
Press in mirror housing

2. Press the mirror housing **-2-** at all four corners until it locks into place.



Inserting contact clips and bulb

Inserting contact clips and bulb



1. Position the contact clips **-4-** in the mirror housing and fit under the lug. Insert bulb **-5-** .

Installing mirror insert

Positioning mirror insert

1. Position the lugs on the right and left of the mirror insert **-3-** in the mirror housing.

Clipping in mirror insert

2. Clip the mirror insert **-3-** into the mirror housing **-2-** on the left, right and in the middle.

69 01 01 Airbag diagnosis - as of MY 2005

- Airbag diagnosis

Tools

Designation	Type	Number	Explanation	
PIWIS tester	special tool	9718		

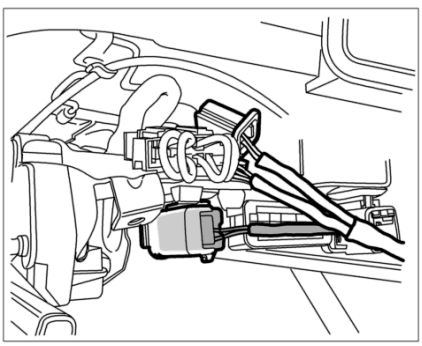
top of page

Airbag diagnosis

1. **Function test on airbag system:**

1.1. Connect and switch on the **PIWIS tester 9718**.

1.2. Switch on ignition.



1.3. Establish communication with the airbag control module.

1.4. Read out fault memory: No fault stored.

1.5. Select Drive link test menu.

1.6. Read out fault memory for all control units and erase if necessary.

1.7. Remove ignition key. Disconnect battery. Route or isolate the ground strap so that all contact with a ground carrier (e.g. body) is avoided. *→271000 Working instructions after disconnecting the battery*

Side airbag plug connection

ATTENTION

Danger of injury and material damage if airbag units are not handled correctly!

→ Always observe the safety regulations for handling airbag units *→69 Safety regulations for vehicles with airbag and belt tensioner*

→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

2. **Simulating the fault:**

Note

- *To check the operation of the airbag system, a plug connection is disconnected from an airbag unit. A fault code - Static fault - must then be stored in the Porsche System Tester.*

2.1. Simulate the fault using the side airbag, for example. Move seat all the way forward. Switch off ignition, disconnect the battery and wait for 1 minute.

2.2. Unlock and disconnect electric plug for the seat.

2.3. Connect the battery and switch on ignition.

2.4. Read out fault memory. Static fault present.

3. **Correcting the fault:**

3.1. Switch off ignition, disconnect the battery and wait for 1 minute.

3.2. Insert connector in plug socket until connector is felt to engage.

4. **Reading out and deleting faults:**

Note

- *Fault memory shows a sporadic fault.*

4.1. Connect the battery, switch ignition on and read out the fault memory with the Porsche System Tester.

4.2. Erase fault memory.

Carry out work instruction after disconnecting the battery. *→271000 Work instructions after disconnecting the battery*

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

General warning notes

Warning note for seat belts

 WARNING
Damage to seat belt system

- **Danger of material damage and injury**

→ After any accident, the seat belt system must be checked systematically for proper function and damage. If damage is found according to the test points, the entire seat belt system must be replaced.

 WARNING
Road test on public roads

- **Danger of material damage and injury**

→ For safety reasons, this driving test must be carried out on a traffic-free road, so that there is absolutely no danger to other road users.

top of page

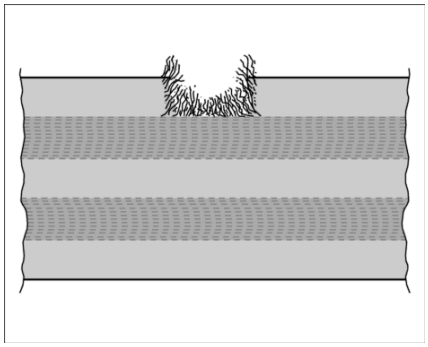
Checking seat belts

Checking procedure for seat belt

 **Note**

- *After any accident, the seat belt system must be checked systematically for proper function and damage. If damage is found according to the test points, the entire seat belt system must be replaced.*

Note

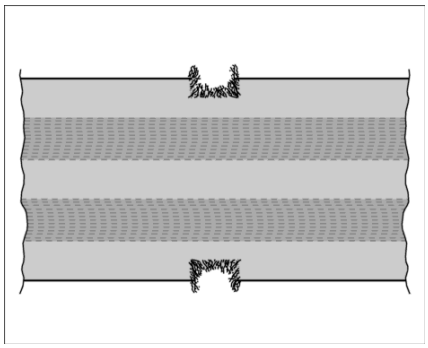


- *In the case of damage which does not occur as the result of an accident, e.g. wear, only the damaged part needs to be replaced.*

Note

- *The following requirements must be met when fitting the seat belt*
- *If one of the requirements listed below is not met, the seat belt or the buckle must be replaced.*

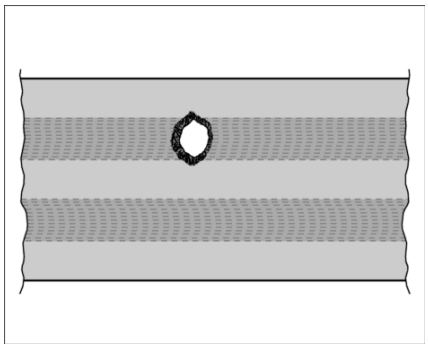
Checking belt strap



– Pull out the belt strap on the automatic belt device fully.
– Check the belt strap for soiling; clean, if necessary, with mild soap suds. When drying, avoid direct sunshine.

Damage type 1

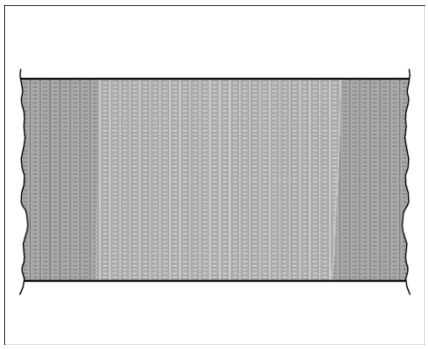
1. **Damage type 1**



1.1. If one of the damage types shown below **-damage type 1, 2-** is found on an vehicle involved in an accident, the seat belt and belt buckle must be replaced.

Damage type 2

2. **Damage type 2**



2.1. If damage such as damage type **-damage type 1, 2, 3-** is found on a vehicle not involved in an accident, it is sufficient to replace the damaged seat belt.

Damage type 3

3. **Damage type 3**

3.1. Burn marks from cigarettes, or similar.

Damage type 4

4. **Damage type 4**

4.1. The belt tensioner must always be replaced if it has been triggered. The seat belt is damaged by the deflector **-damage type 4-** .

Checking automatic belt device (locking effect)

The automatic belt device has two locking functions

- The first locking function is triggered by pulling the seat belt out quickly (belt extension acceleration).

Test

– Pull the seat belt out of the automatic belt device with a strong pull.

If no locking effect occurs, the entire seat belt and belt buckle must be replaced.
In the case of faults in the extension or retraction of the seat belt, check whether the locking tab of the automatic belt device is engaged correctly in the sheetmetal bracket on the body.

- The second locking function is triggered by a change in the sequence of vehicle movement (vehicle-dependent locking function).

Test

– Fasten the seat belt.

 WARNING

Road test on public roads

- **Danger of material damage and injury**

→ For safety reasons, this driving test must be carried out on a traffic-free road, so that there is absolutely no danger to other road users.

– Accelerate the vehicle to 20 km/h (12 mph) and then perform an emergency stop with the foot brake.

If the belt is not locked by the blocking mechanism during the braking phase, the entire seat belt and belt buckle must be replaced.

Checking look and operation of seat-belt buckle

– Inspect the belt buckle for crack formation and flaking.

In the case of damage, the entire seat belt and belt buckle must be replaced.

Check belt buckle

– Push the buckle into the belt buckle until it engages audibly. Check whether the lock mechanism has engaged by pulling strongly on the belt strap.

If the belt tongue fails to lock in the belt buckle even just once in at least 5 test procedures, the entire seat belt and belt buckle must be replaced.

Checking belt buckle release

– Release the seat belt by pressing with a finger on the button on the belt buckle.

Carry out the test procedure at least 5 times. If the belt tongue fails to jump out even just once, the entire seat belt and belt buckle must be replaced.

 **Note**

- *Lubricants must never be used to remedy noises or sluggishness of the buttons on the belt buckles.*

Checking sash guides

Plastic-coated covers show fine, parallel scores after the belt system has been subjected to stress (seat belt buckled during accident). On the other hand, wear caused by frequent use is indicated by a stripe-free, smooth surface.

– Inspect the sash guides for distortion, flaking and crack formation.

In the case of scoring and/or damage, the entire seat belt and belt buckle must be replaced.

Checking mounting elements and mounting points

- Check the belt buckle strap for distortion.
- Check the function of the height adjuster.
- Check the mounting points (seat, B-pillar, C-pillar, vehicle floor) for distortion or thread damage.

If damage is found on the parts, the entire seat belt and belt buckle must be replaced.
Replace damaged or distorted mounting points.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

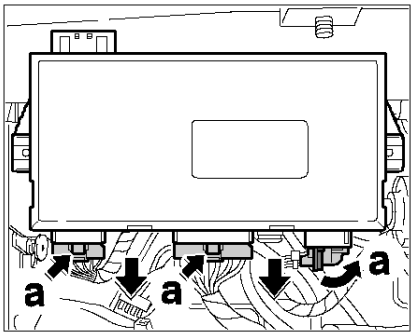
Removing front belt lock

Removing control unit for memory seat adjustment with support

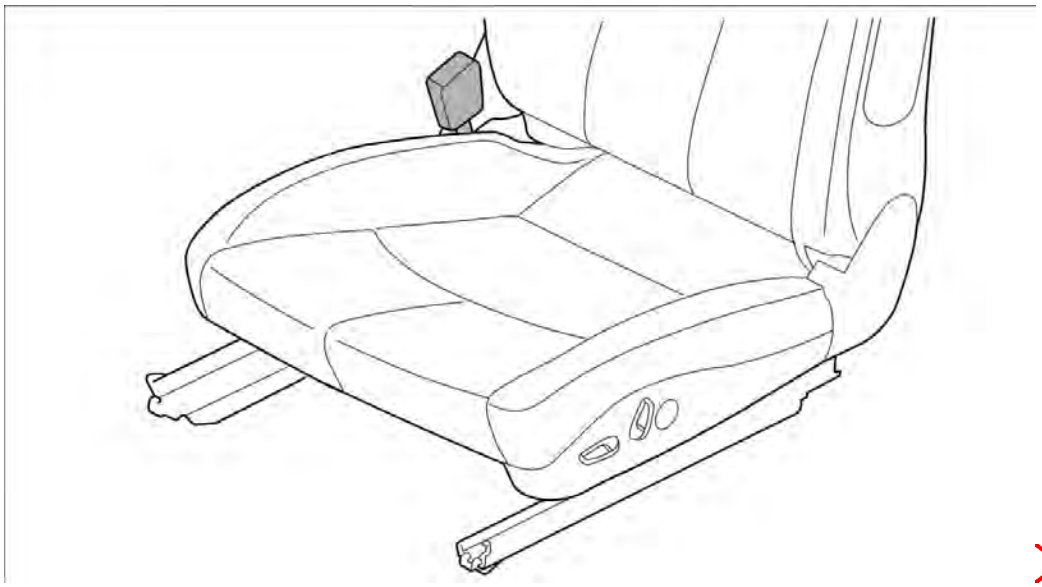
Installation Location:



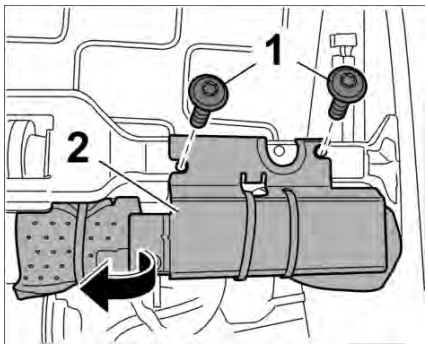
Installation position shown on the 911

Removing control unit for memory seat adjustment with support

1. Unscrew the two fastening screws **-1-** and remove control unit for memory seat adjustment together with the support **-2-** from the seat frame.



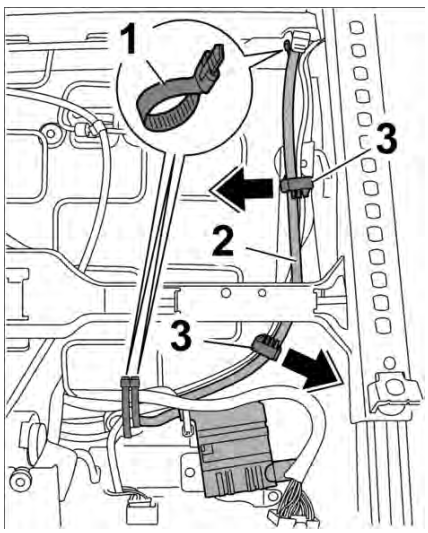
Pulling off connectors on control unit for memory seat adjustment



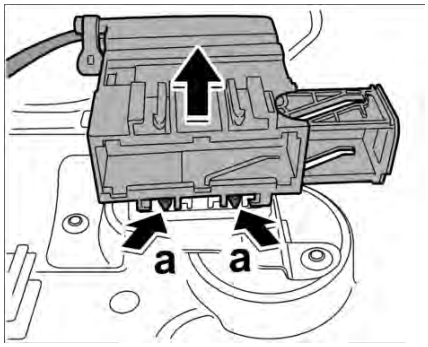
2. Unlock and pull off the three connectors on the control unit for memory seat adjustment **-arrows a-** .

Removing front belt lock

Installation Location:

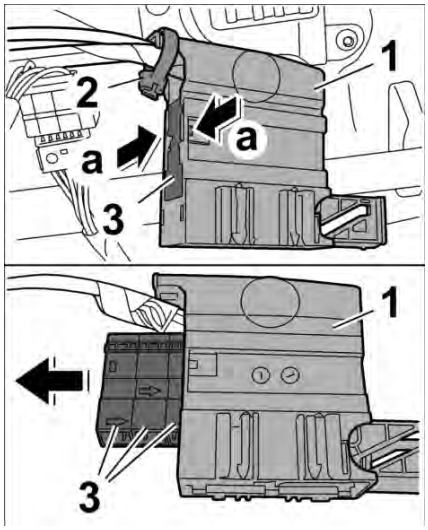


Installation position of front belt lock



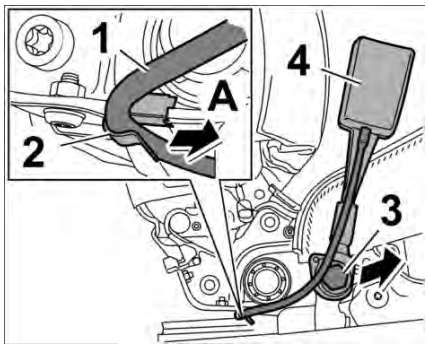
Loosening support with compressor and air distributor valve

1. Unscrew the two fastening screws **-1-** on the support **-2-** .
2. Set support **-2-** with connected motor and air cushion control valve aside.



Loosening wire harness

3. Remove the three tie-wraps **-1-** and take the wire harness **-2-** out of the two line holders **-3-** .

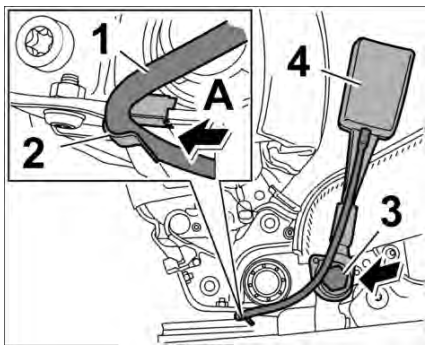


Pulling off connector socket

4. Release connector socket **-arrows a-** and pull out of holder.

Disassembling connector socket

5. Remove tie-wraps **-2-** on connector socket **-1-** .
6. Release connector socket **-1-** (**-arrows a-**) and remove the three individual connectors **-3-** .



Removing front belt lock

7. Pull wire harness **-1-** out of the metal clip **-2-** (**-arrow A-**).
8. Unscrew fastening screw **-3-** .
9. Pull off wire harness **-1-** and remove front belt lock **-4-** .

Installing front belt lock

Installing front belt lock

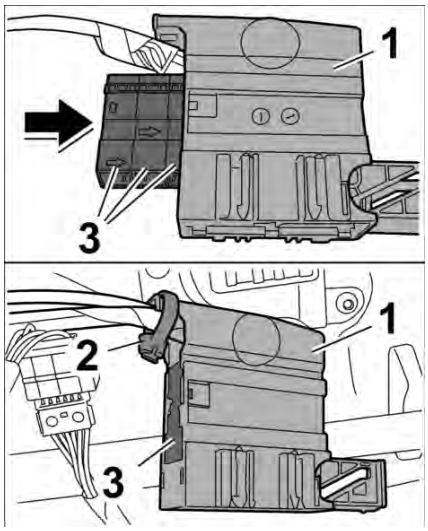
Installing front belt lock

DANGER

Loosen the safety-related threaded joint.

- **Danger of injury if belt lock is not screwed on correctly.**

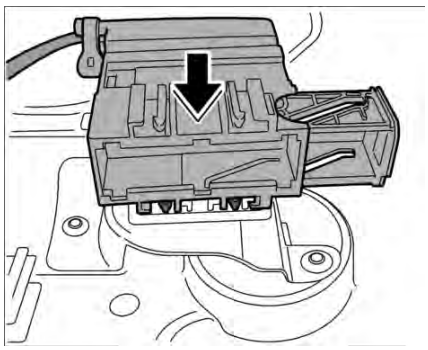
→ Always replace fastening screws for belt lock after customer service and reworking.



→ It is not permissible to make alterations to the microencapsulated screws (e.g. use lubricant, loosen bolts, and screw them down again).

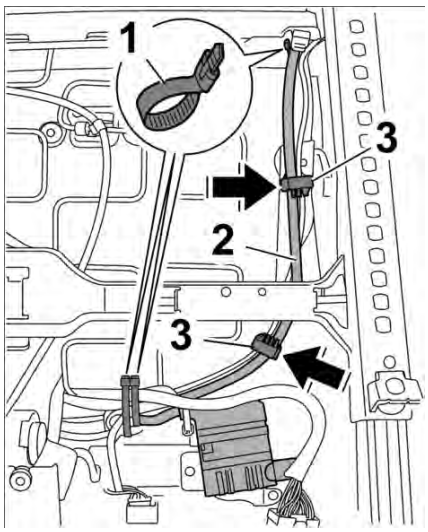
1. Position belt lock **-4-** and secure using the fastening screw **-3-** . →**Tightening torque: 50 (37 ftlb.) Nm**

Note



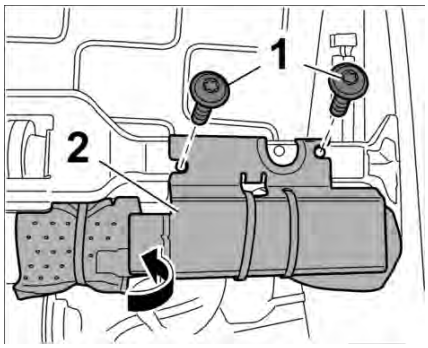
- *The electric lead must not be routed too tightly around the seat cushion.*

2. Lay wire harness **-1-** and press into the metal clip **-2-** (**-arrow A-**).



Assembling connector socket

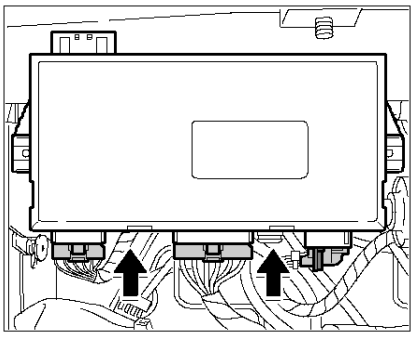
3. Press the three individual connectors **-3-** into the connector socket **-1-** until they engage firmly.
4. Secure new tie-wraps **-2-** on connector socket **-1-** .



Attaching connector socket

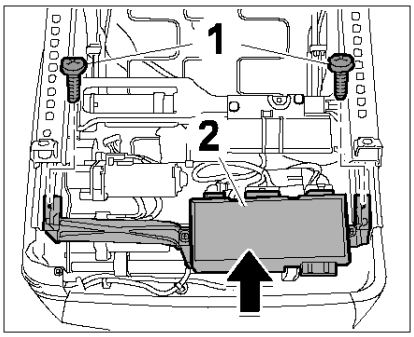
5. Attach connector socket to support until it clicks into place.

Securing wiring harness



6. Place wire harness **-2-** into the two line holders **-3-** and secure with three new tie-wraps **-1-** .

Securing support with compressor and air distributor valve



7. Position support **-2-** with connected motor and air cushion control valve and screw down with the two fastening screws **-1-** .

Installing control unit for memory seat adjustment with support

Attaching connectors on control unit for memory seat adjustment

1. Attach the three connectors on the control unit for memory seat adjustment until they are felt to engage.

Installing control unit for memory seat adjustment with support

2. Position control unit for memory seat adjustment with support **-2-** on seat frame and secure with both fastening screws **-1-** .

General warning notes

Safety instructions for airbag sensor

 ATTENTION

Incorrect triggering of airbag modules.

- **Danger of injury and material damage if airbag sensors are not handled correctly!**

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

→ Always wait one minute after disconnecting the battery before disconnecting the connector from the sensor.

→ The airbag sensor must not be removed with the plug plugged in!

→ The airbag sensors cannot be interchanged. Install the sensor listed in the Spare Parts Catalogue (PET).

→ Always replace fastening nuts and bolts of sensors after customer service and reworking.

→ Never make alterations to the micro-encapsulated nuts and bolts which have a negative effect on the bond (e.g. using lubricant, loosening bolts and screwing them down again).

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

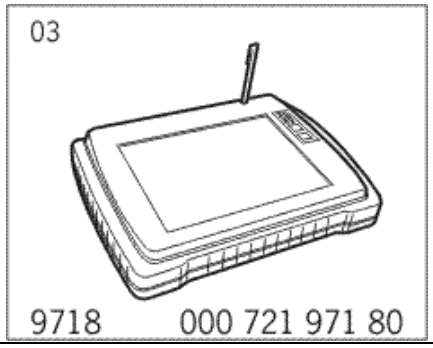
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

General warning notes

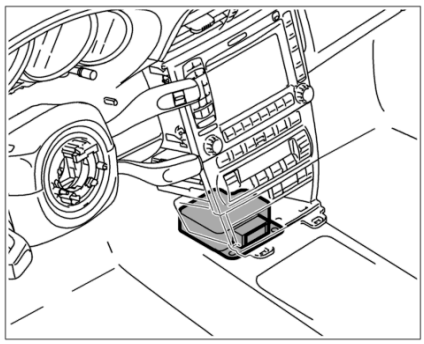
General warning notes for airbag triggering unit

WARNING

Incorrect triggering of airbag modules.

- **Danger of injury and material damage to as a result of incorrect handling of airbag units.**

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.. →*271000 A7* Work instructions after disconnecting the battery - chapter on "disconnecting and connecting"



→ Before disconnecting the airbag plug from the triggering unit, always wait for one minute after disconnecting the battery.

→ The airbag triggering unit must not be removed with the connector still plugged in!

Removing triggering unit for airbag

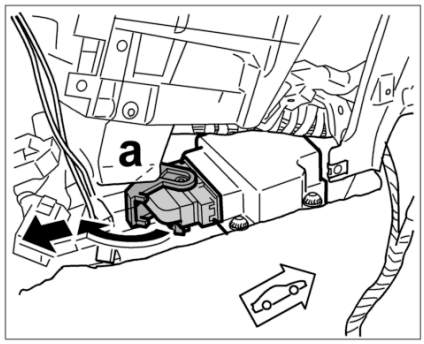
WARNING

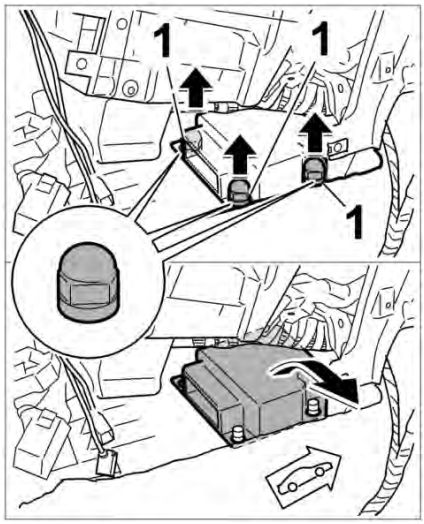
Incorrect triggering of airbag modules.



- **Danger of injury and material damage to as a result of incorrect handling of airbag units.**

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.. →*271000 A7* Work instructions after disconnecting the battery - chapter on "disconnecting and connecting"

→ Before disconnecting the airbag plug from the triggering unit, always wait for one minute after disconnecting the battery.



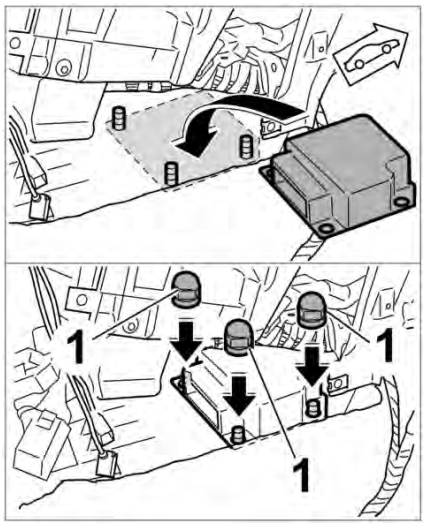
→ The airbag triggering unit must not be removed with the connector still plugged in!

Incorrect triggering of airbag modules.

Triggering unit plug

1. From the passenger's side, release electric plug **-a-** and open the latching lever **-arrow-** .

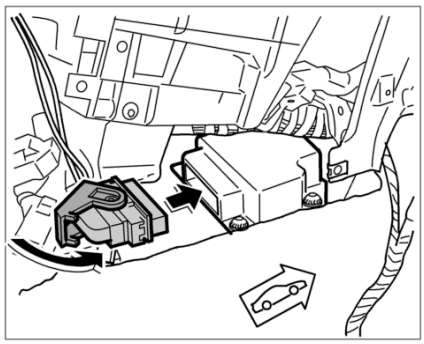
Unscrewing fastening screws



2. Unscrew the three fastening screws **-1-** .

3. Take off both ground straps **-2-** from the bolt for the triggering unit.
4. Remove triggering unit laterally.

top of page



Installing the triggering unit

Installing triggering unit

Installing triggering unit

1. Position triggering unit, move both ground straps **-2-** on the left fastening bolts and screw down with the three fastening nuts **-1-** . →**Tightening torque: 6 ftlb.**

Connecting electric plug

2. Connect electric plug and lock it until the lock engages.
3. If the triggering unit is new, lock the airbag triggering unit using the **PIWIS Tester 9718**. → *C1 Removing and installing triggering unit for airbag - coding*

top of page

Subsequent work

Subsequent work for triggering unit

1. If installed, install control unit for tilt sensor. →966319 Removing and installing control unit for tilt sensor - chapter on "Installing"
2. Connect battery. →*271000 Work instructions after disconnecting the battery*
3. Install centre console. →681719 Removing and installing centre console - chapter on "installing"
4. Install centre console cover. →681919 Removing and installing centre console cover - chapter on "installing"
5. Install left and right covers of console. →681419 Removing and installing centre console cover - chapter on "installing"

top of page

Programming triggering unit

Triggering unit - reading out and writing in data

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on ignition. >> Continue.
2. Select vehicle type using the cursor keys.

3. Move from vehicle type to the list of control units. Locking is only possible after an automatic control unit search.
4. Select **Posip** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press >> .
7. The message **Codes successfully read out** appears on the screen of the Porsche System Tester. Press >> .
8. Switch off ignition and replace control unit.
9. Switch on ignition. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
10. In the **Special functions** menu, erase **All fault memories** >> , compare **Vehicle identification number** and confirm.
11. With the cursor keys on **Posip - Replacing control unit**, after replacement of the control unit, the read-out data (see Section 6) are installed under the menu **Write in data** press >> .
12. System Tester displays **Codes successfully written in**. Press >> .
13. Locking is only possible after an automatic control unit search.

Lock triggering unit:

14. Change to the menu **Posip - lock** and press >> .
15. Select the country-specific **Equipment** and press >> .
16. Start **Lock** with F8 .
17. Observe message on Tester.
18. Quit menu, carry out a test drive, and read out fault memory.

General warning notes

General warnings for contact unit

ATTENTION

Danger of injury and material damage if airbag units are not handled correctly!

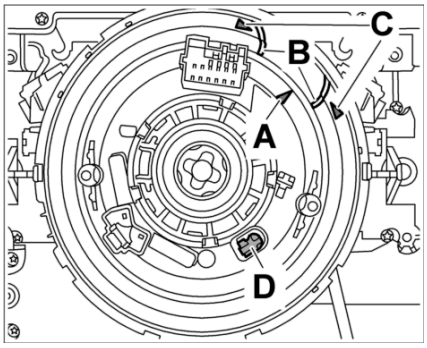
- **Incorrect triggering of airbag unit!**

→ Always observe the safety regulations for handling airbag units! → *Safety regulations for handling airbag and belt tensioner units*

WARNING

If the contact unit has been adjusted, proceed in accordance with the following work instruction:

- **Damage to the contact unit!**



→ To position the airbag contact unit in the central position, press the locking element and turn the rotor carefully to the left as far as it will go.

→ Then turn the rotor carefully to the right, approx. 3.5 to 3.75 revolutions, until the band printed on one side is visible in the window.

top of page

Removing contact unit for airbag

- General warning notes
- Removing driver's airbag unit
- Installing driver's airbag unit
- Reworking

Preliminary work for driver's airbag unit

Note

Operate the steering wheel with the battery disconnected. Before disconnecting the battery, observe the following points:

1. Insert ignition key into ignition lock, switch on ignition and then off again.
2. Leave ignition key inserted.
3. Disconnect battery. → *Work instructions after disconnecting the battery*

top of page

General warning notes

General warnings for driver's airbag unit

WARNING

Incorrect triggering of airbag module.

- **Danger of injury and damage to property as a result of incorrect handling of airbag units!**

→ The safety regulations → *Safety regulations for handling airbag and belt tensioner units* must be followed.

→ The airbag unit must always be stowed so that the airbag opening faces upwards!

→ If removed for an extended period, the airbag unit must be kept in a locked place!

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

ATTENTION

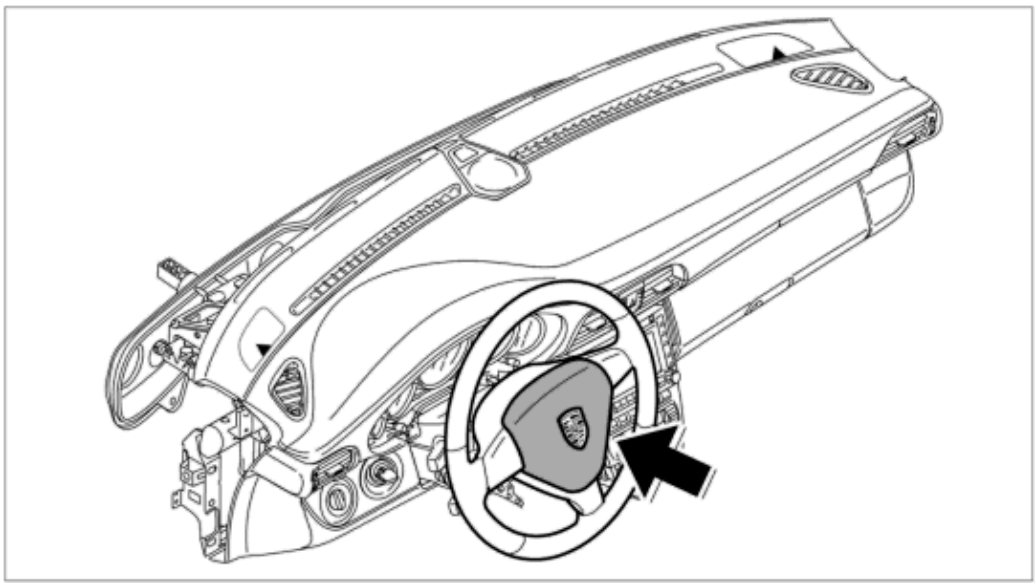
Incorrect release of airbag unit.

- **Danger of injury and material damage if airbag units are not installed correctly!**

→ Before installing the airbag unit, check whether the locking clip, the airbag unit mounting and/or the metal stop on the steering wheel are deformed. If there is deformation, replace the damaged component (steering wheel/airbag unit).

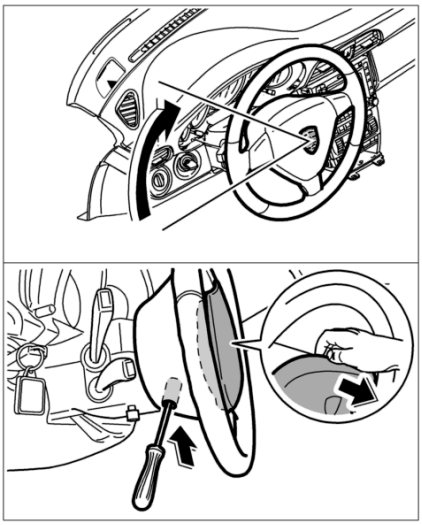
→ The airbag unit must only be installed with locking clips that are operational and are in the correct position.

→ The locking clip must not jam or grind.



→ Do not expose face and other parts of the body to the airbag unit.

top of page



Removing driver's airbag unit

Removing driver's airbag unit

Installation Location:

Overview of driver' airbag unit

Releasing driver's airbag unit

1. Turn steering wheel 90° and stick a T30 (Torx with handle) or medium-size screwdriver through the opening of the steering wheel.

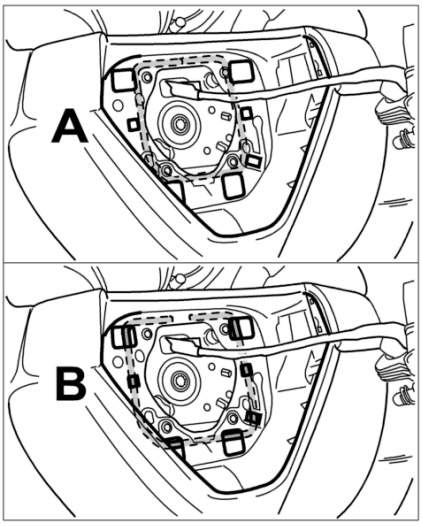
WARNING

Incorrect triggering of airbag module.

- **Danger of injury and damage to property as a result of incorrect handling of airbag units!**

→ The safety regulations → *Safety regulations for handling airbag and belt tensioner units* must be followed.

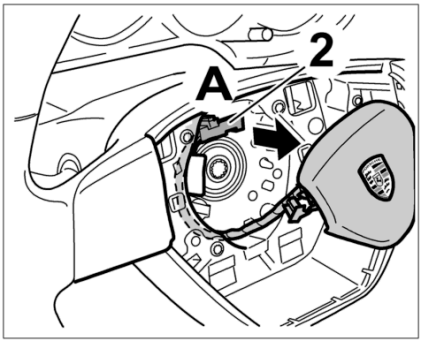
→ The airbag unit must always be stowed so that the airbag opening faces upwards!



→ If removed for an extended period, the airbag unit must be kept in a locked place!

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

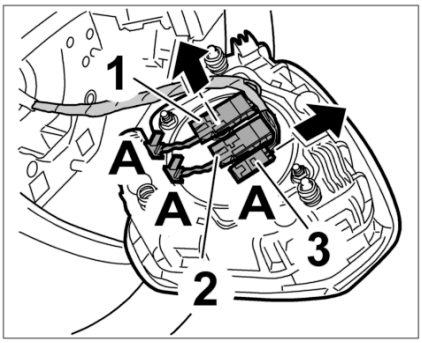
→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.



Incorrect triggering of airbag module.

2. Use the screwdriver or T30 to compress the locking clip and pull the airbag unit from the steering wheel with the fingers.

Locking clip



Locking clip compressed **-A-**
Locking clip relieved **-B-**

Unlocking connector for airbag wiring harness

3. Unlock electrical connector **-2-** on steering wheel **-A-** and remove.

Removing airbag lead:

Removing airbag lead

4. Unlock electrical connectors **-1, 2-** with a screwdriver and unplug.
5. Unplug electrical connector **-3-** .

top of page

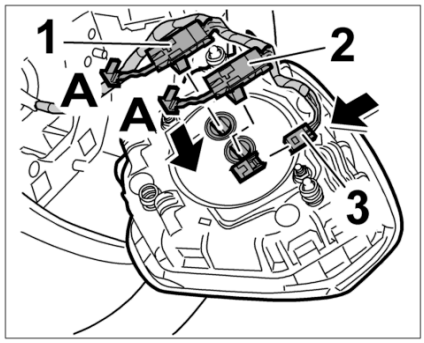
Installing driver's airbag unit

Installing driver's airbag unit

ATTENTION

Incorrect release of airbag unit.

- **Danger of injury and material damage if airbag units are not installed correctly!**

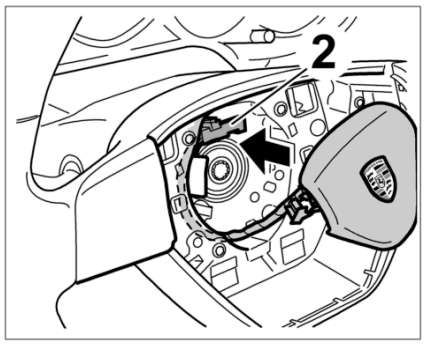


→ Before installing the airbag unit, check whether the locking clip, the airbag unit mounting and/or the metal stop on the steering wheel are deformed. If there is deformation, replace the damaged component (steering wheel/airbag unit).

→ The airbag unit must only be installed with locking clips that are operational and are in the correct position.

→ The locking clip must not jam or grind.

→ Do not expose face and other parts of the body to the airbag unit.

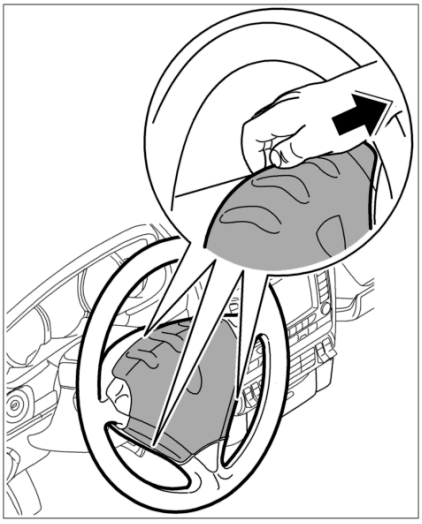


Installing airbag lead:

Installing airbag lead

1. Push in the electrical connector **-3-** until it clicks into place.
2. Press in the electrical connectors **-1, 2-** until they click into place, then clip the retainer into the electrical connectors **-1, 2-** .

Incorrect triggering of airbag module. → *AW Removing and installing driver's airbag unit - general warnings*



Inserting connector for airbag wiring harness

3. Insert electrical connector for the airbag wiring harness **-2-** until it clicks into place.

Engaging the airbag unit

4. Engage the airbag unit into the steering wheel with both hands using intermittent pressure.

Checking the airbag unit is positioned firmly:

5. Each time the airbag unit is fitted, it is important to check that it is installed correctly by **pulling** the airbag unit, **tapping** the steering wheel rim and performing a visual inspection (position of airbag unit on steering wheel).

top of page

Reworking

Work in wake of driver's airbag unit

1. Connect the battery . Carry out → *Work instructions after disconnecting the battery.*.

Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Preliminary work

Preliminary work - airbag unit, passenger's side

1. Disconnect battery. → *Working instructions after disconnecting the battery*
2. Remove glove compartment →681519 Removing and installing glove compartment - removing

Safety instructions, passenger's airbag unit

 WARNING

Incorrect triggering of airbag module.

- **Danger of injury and damage to property as a result of incorrect handling of airbag units!**

→ The safety regulations → *Safety regulations for handling airbag and belt tensioner units* must be followed.

→ The airbag unit must always be stowed so that the airbag opening faces upwards!

→ If removed for an extended period, the airbag unit must be kept in a locked place!

→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

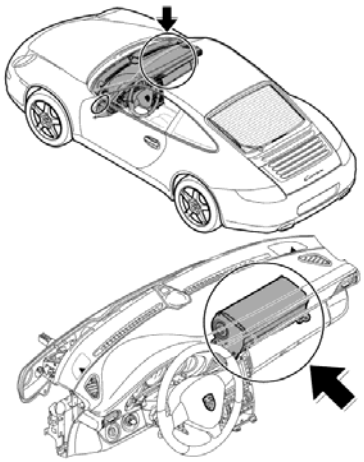
→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

 ATTENTION

Loosen the safety-related screw connection!

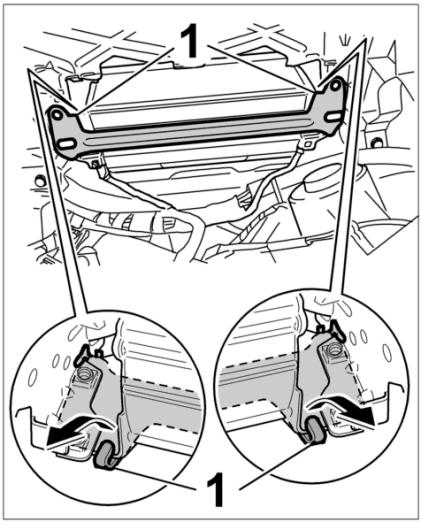
- **Danger of injury and material damage if the airbag module is screwed on incorrectly!**

→ Always replace fastening screws for the airbag unit after customer service and reworking.



→ It is not permissible to make alterations to the microencapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).

top of page



Removing passenger's airbag unit

Removing passenger's airbag unit

Removing passenger's airbag unit

Installation location illustrated on 997

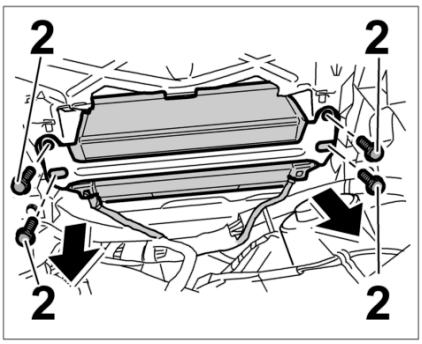
Bend up the reinforcing panel.

1. Bend up the curved metal straps **-1-** at the right and left of the reinforcing panel with a screwdriver.

WARNING

Incorrect triggering of airbag module.

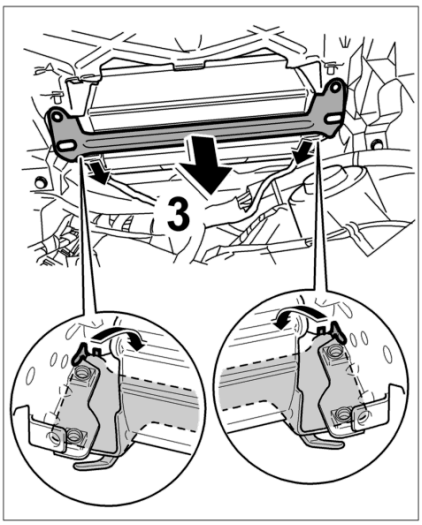
- **Danger of injury and damage to property as a result of incorrect handling of airbag units!**



→ The safety regulations → *Safety regulations for handling airbag and belt tensioner units* must be followed.

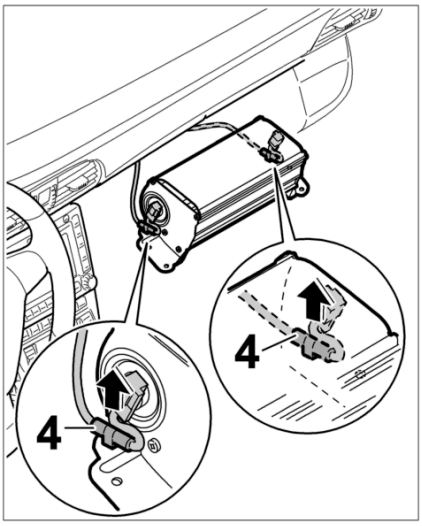
→ The airbag unit must always be stowed so that the airbag opening faces upwards!

→ If removed for an extended period, the airbag unit must be kept in a locked place!



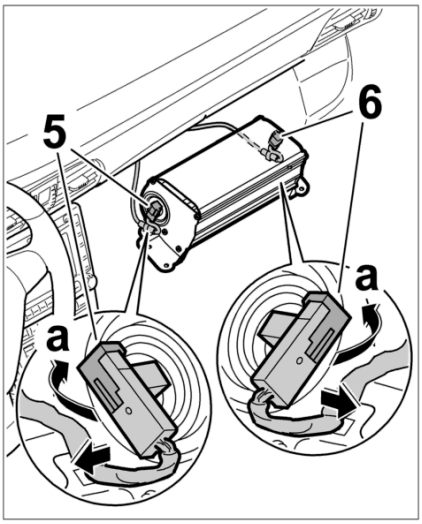
→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.



Screws for airbag unit

2. Unscrew the four fastening screws **-2-** for the airbag unit and carefully lower the airbag unit out a few centimetres.



Removing the reinforcing panel

3. Push the reinforcing panel **-3-** back so that it rests on the airbag unit and carefully lower the airbag unit out a few centimetres.

Connection of electric plugs

4. Unclip the electrical leads **-4-** to the left and right of the airbag unit.

Unfastening the plugs for the airbag

5. Carefully prise out the locking unit **-5-** and **-6-** the electrical plugs to the left and right with a screwdriver **-a-** and then pull the plugs out of the airbag unit.
6. Remove airbag unit and lay to one side in the appropriate manner.

top of page

Installing passenger's airbag unit

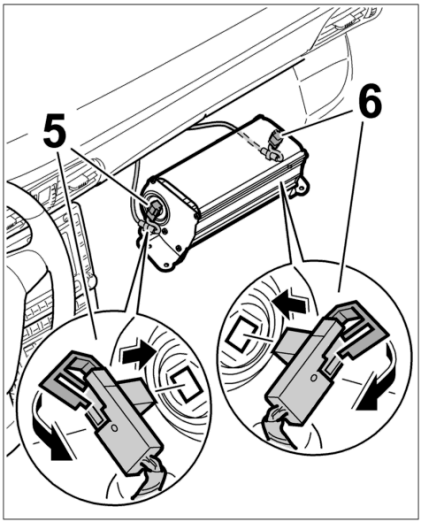
Installing passenger's airbag unit

Installing passenger's airbag unit

WARNING

Incorrect triggering of airbag module.

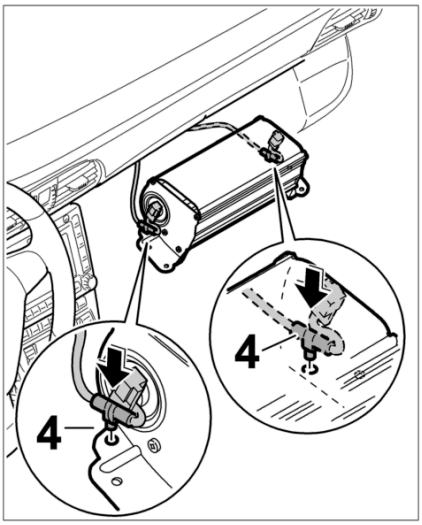
- **Danger of injury and damage to property as a result of incorrect handling of airbag units!**



→ The safety regulations → *Safety regulations for handling airbag and belt tensioner units* must be followed.

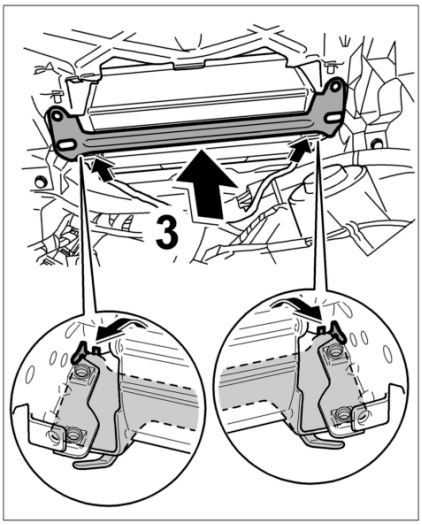
→ The airbag unit must always be stowed so that the airbag opening faces upwards!

→ If removed for an extended period, the airbag unit must be kept in a locked place!



→ Remove ignition key. Disconnect battery. Route or isolate ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided.

→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.



Locking plug for airbag

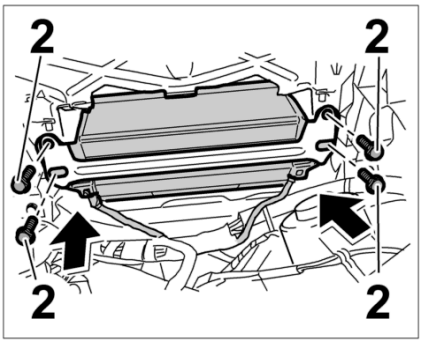
1. Lift the airbag unit under the dashboard and push in the plug **-5-** and **-6-** and lock.

Routing the electric plug

2. Clip in the electrical wire **-4-** on the left and right in the airbag unit.

Engaging the reinforcement plate

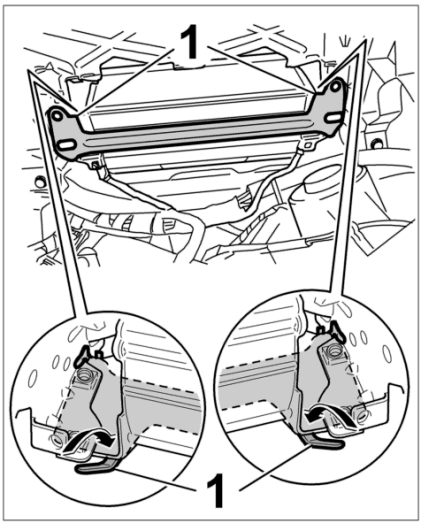
3. Position the airbag module from below on the mounting bracket and engage the reinforcement plate **-3-** on the airbag module.



ATTENTION

Loosen the safety-related screw connection!

- **Danger of injury and material damage if the airbag module is screwed on incorrectly!**



→ Always replace fastening screws for the airbag unit after customer service and reworking.

→ It is not permissible to make alterations to the microencapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).

Fastening screws for airbag module

4. Screw down the airbag module and reinforcement plate using the four fastening screws **-2-** . →**Tightening torque: 7 ftlb.**

5. Bend over both projecting tabs **-1-** .

Install right front seat. →720119 Removing and installing front seat - section on "Installing" [997110 997120 997310 997320 997410 997430 997610 997620]→720119 Removing and installing front seat - section on "Installing" [997111 997121 997311 997321 997411 997431 997611 997621]

Connect the battery and carry out work instructions after disconnecting the battery. →2706IN Work instructions after disconnecting the battery

1. If the AWS control unit has been replaced, the new AWS control unit must be taught and calibrated under **AWSControl unit replacement**. →696819 Removing and installing AWS control unit - section on "Programming" →6968K2 Calibrating AWS control unit - section on "Calibrating"

top of page

Programming AWS control unit

Reading and writing values for AWS control unit

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

1. Replace control unit. →696819 Removing and installing AWS control unit

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

2. Connect battery charger to the vehicle. Move passenger's seat longitudinally until flush with the seat rails and to its lowest position.
3. Connect the Porsche System Tester **PIWIS Tester 9718** to the vehicle and start the System Tester. Switch on ignition. Press >> to continue.
4. Select vehicle type.
5. Switch from the vehicle type to the list of control units >> .
6. Select **AWS** with the cursor keys and press the >> key.
7. Select **Control unit replacement** with the cursor keys and press the >> key.
8. The Tester displays several messages and instructions relating to the individual work steps until the message **Control unit replacement was completed successfully** appears. Press >> .
9. To check the system, select the **Actual values** menu under the **AWS** control unit. Then press >> .

9.1. Select the **Weight group (0-4)** and **Gross weight calibrated** options.

9.1.1. If there is **no weight** on the passenger's seat, compare values (see table below) using the PIWIS

Tester. The Passenger Airbag Off indicator light in the centre console **must not** come on.

9.1.2. Place the special tool **test weight P 9742** on the passenger's seat. The Passenger Airbag Off indicator light in the centre console **must** come on. Compare values (see table below) using the PIWIS Tester.

9.1.3. Get an assistant, for example, to sit on the passenger's seat. The Passenger Airbag Off indicator light in the centre console **must not** come on. Compare values (see table below) using the PIWIS Tester.

Test state	**Weight group (0-4)**	**Gross weight calibrated**
No weight on the passenger's seat.	0	**→Control value: 0 kg +/-1 kg**
Special tool **test weight P 9742** on passenger's seat	1	**→Control value: 6.7 kg +/-1 kg**
Get a person weighing at least 65 - 85 kg to sit on the passenger's seat.	2, 3 or 4	**→Control value: Weight of test person kg +/-1 kg**

10. Read out and erase the fault memories in the **Airbag** and **AWS** control unit, perform a test drive and then read out the fault memories again. If faults are found, determine the cause using the PIWIS Tester and correct the faults.

997110, 997111, 997120, 997121, 997310, 997311, 997320, 997321, 997410, 997411, 997430, 997431, 997610, 997611, 997620, 997621

as of MY 2005

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

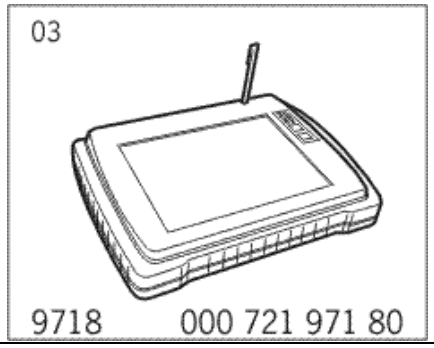
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

General warning notes

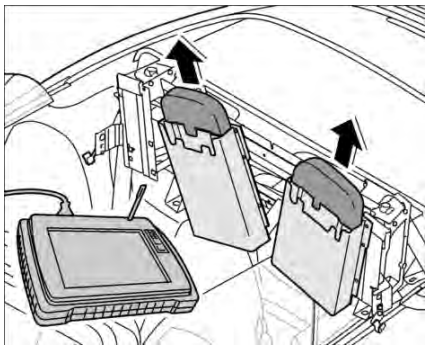
Safety instructions for work on the roll-over protection system

ATTENTION

Danger of injury when working on the roll-over protection system!

→ The movement range of the roll-over protection system must be kept clear.

→ Work on the roll-over protection system must only be performed with the ignition key withdrawn.



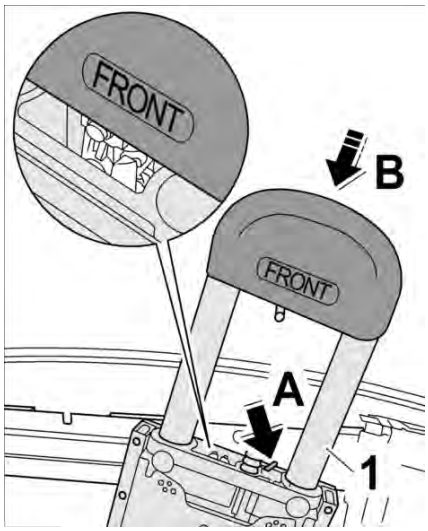
→ Attention: Do not begin assembly work until after a waiting time of 1 minute has elapsed.

→ Tools or other objects must not be placed in the extension area of the roll-over protection system.

→ Remove the roll-over bar modules only after the roll-over bar has been extended (triggered).

It is not permissible to perform repairs on the roll-over bar modules.
The roll-over bar modules must be replaced in the event of visible damage or pressure marks.
After assembly work on the roll-over protection system - but at least every 2 years - the function of the roll-over protection system must be tested by triggering it via the diagnostic interface of the **PIWIS tester 9718**.
Only perform the function test on the roll-over protection system with the hardtop and cap removed and the convertible top open.

Checking roll-over bar



Checking roll-over protection system

Note

Actuate the roll-over protection system only if:

- *the hardtop is removed*
- *the convertible top is open*
- *the caps are removed*

1. Connect the **PIWIS tester 9718** to the diagnostic socket. Switch on ignition. Select menu item "Roll-over protection", and select menu item "Drive links" in the command line which then appears. Press the key combination described in the Tester; the roll-over protection system triggers.

Pressing in the roll-over bar

2. Press locking levers outward **-Arrow A-** and press in the roll-over bar **-1-** **-Arrow B-** until it is felt to engage **-inset-** .

top of page

Subsequent work

Subsequent work

1. Install
   caps.
2. Close convertible top.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

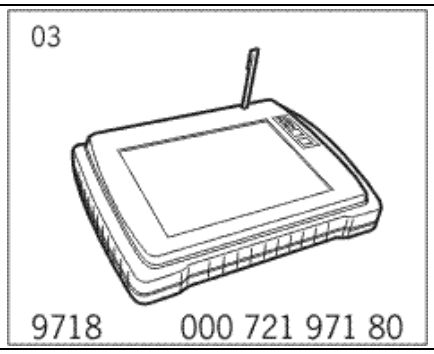
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Removing wing flange cover

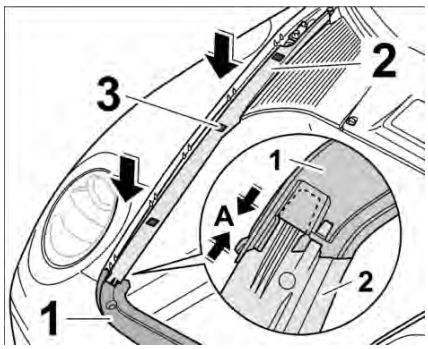
Removing cover for wing flange

1. Open front lid.

Removing cover for wing flange

2. Loosen cover for wing flange **-2-** at the Velcro fasteners **-3-** .
3. Lift cover for wing flange up slightly **-2-** , release the locking tab at the side from below **-arrow A-** and pull it out of the cover for the lock support **-1-** (**-arrows B-**).

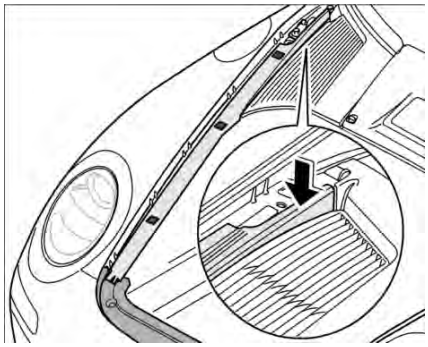
top of page



Installing wing flange cover

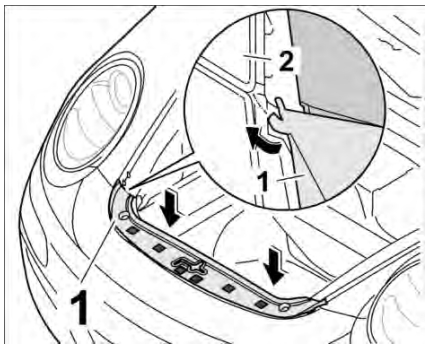
Installing cover for wing flange

Note



- *The Velcro fasteners must be removed and replaced when replacing the wing and cover for wing flange.*

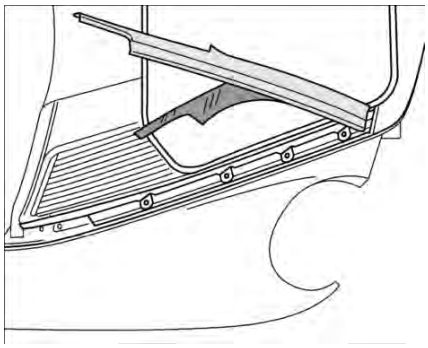
1. Check Velcro fasteners on wing and cover for wing flange and replace if necessary. See: Additional assembly instructions for replacing Velcro fasteners



Installing cover for wing flange

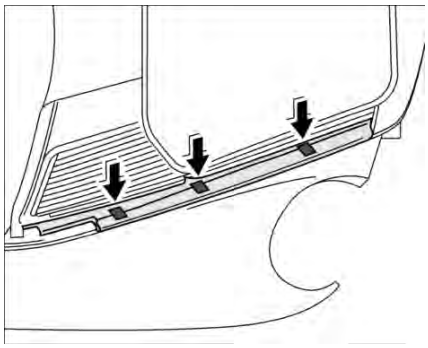
2. Insert cover for wing flange **-2-** sideways into the trim panel for the lock support **-1-** (**-arrows A-**).
3. Slide cover for wing flange **-2-** with the soft lip under the luggage compartment seal and press on Velcro fasteners **-3-** .

Locking cover for wing flange into place



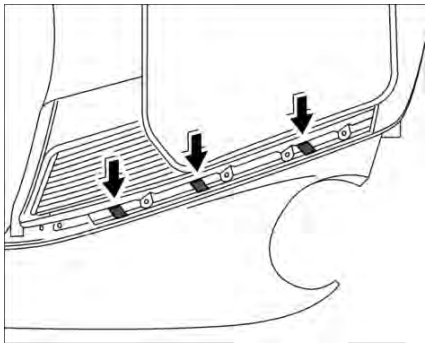
4. Lock cover for wing flange into place in plenum panel.

Securing trim panel



5. Insert locking lug for trim panel for lock support **-1-** into the wing at the side **-2-** .
6. Close front lid.

Additional assembly instructions for replacing Velcro fasteners



Pulling off protective film

1. Remove protective paper on the underside, push locking lug into the cover for lock support and press cover down onto the wing flange.

Pressing on Velcro fasteners

2. Press Velcro fasteners on at the positions indicated.

Securing Velcro fasteners

3. Lift off cover and press Velcro fasteners securely onto the wing flange again using a suitable tool.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though**

the display on the screen is correct.
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration**

puisse être erronée sur l'impression papier.
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

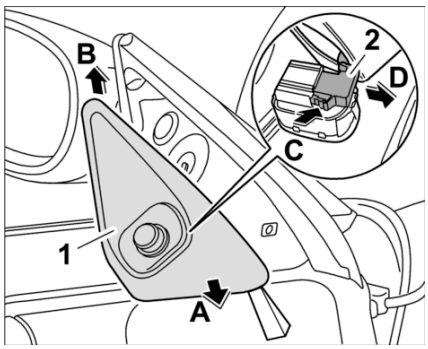
- Remove door trim panel
- Install door trim panel

top of page



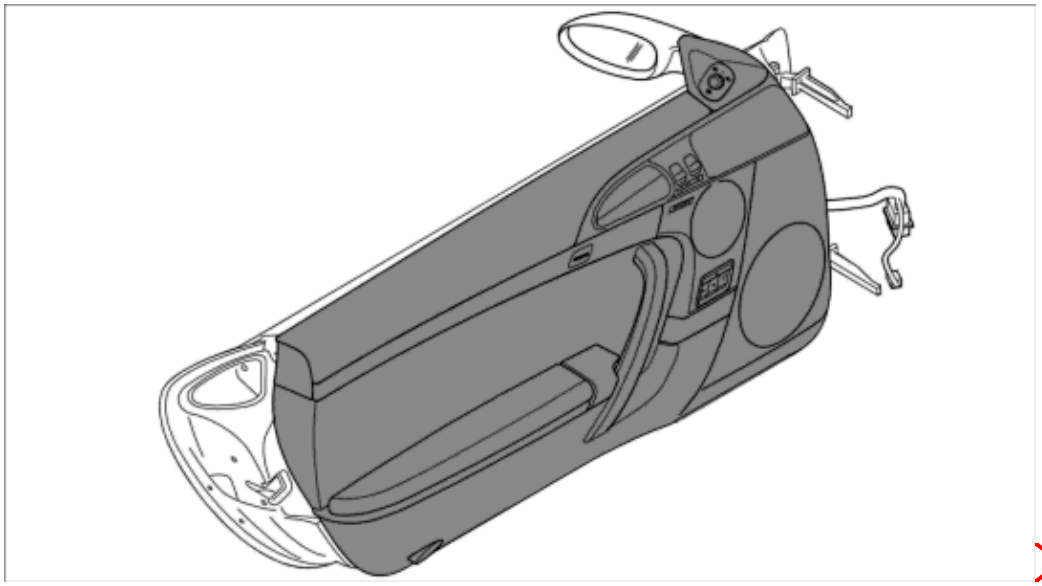
Remove door trim panel

Removing trim panel for mirror triangle

Installation Location:

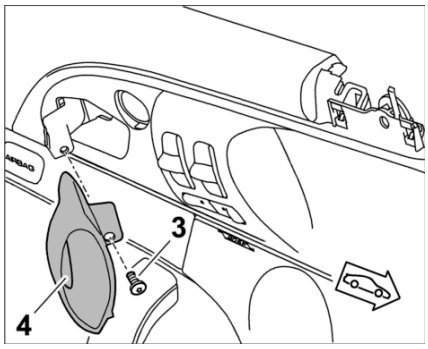
Overview, door trim panel

Removing trim panel for mirror triangle



1. Carefully lever out trim panel for mirror triangle **-1-** using plastic wedge **-arrow A-** and pull upwards

-arrow B- .

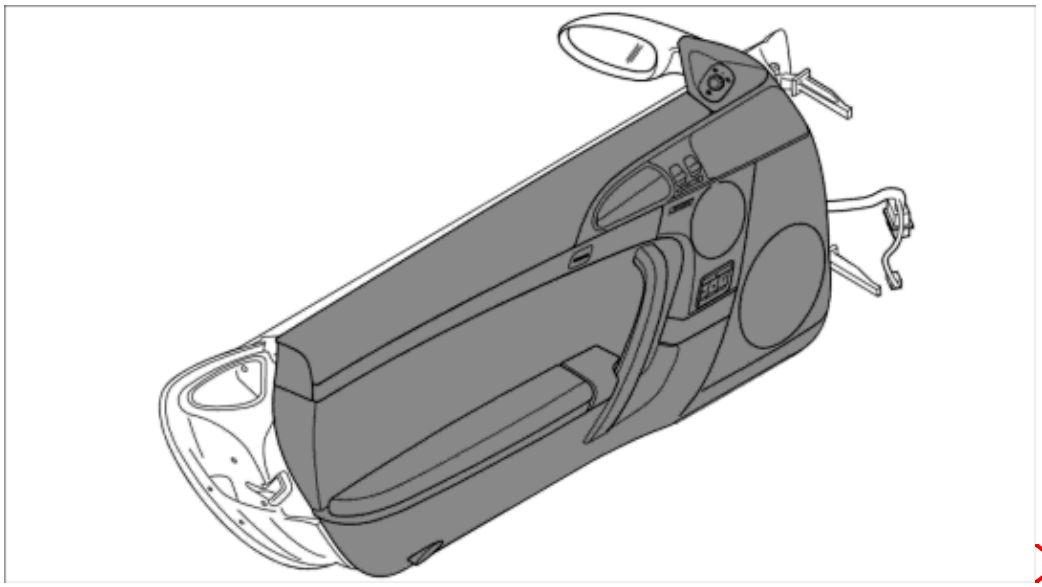


2. Press **-arrow C-** electrical plug connection **-2-** and pull off **-arrow D-** the plug **-2-** .
3. Remove trim panel for mirror triangle **-1-** .

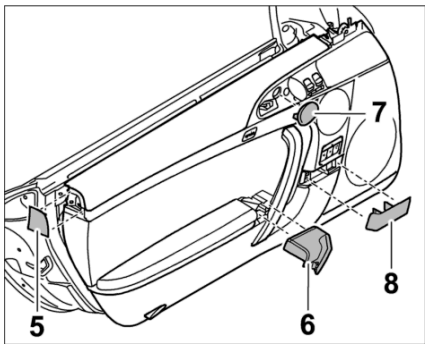
Removing lever for door handle

Installation Location:

Overview, door trim panel



Removing lever for door handle

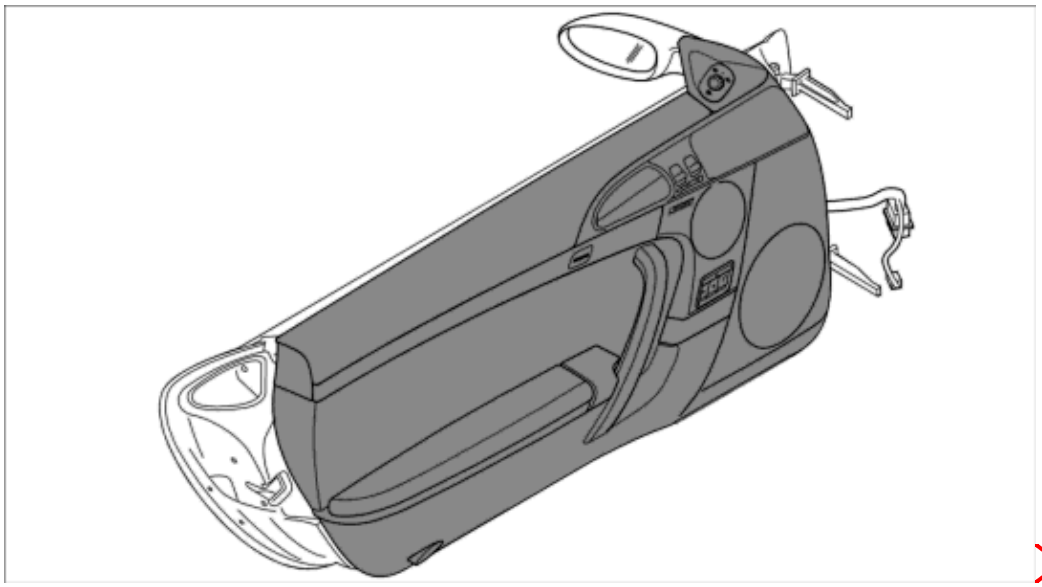


1. Unscrew fastening screw **-3-** and remove door handle **-4-** .

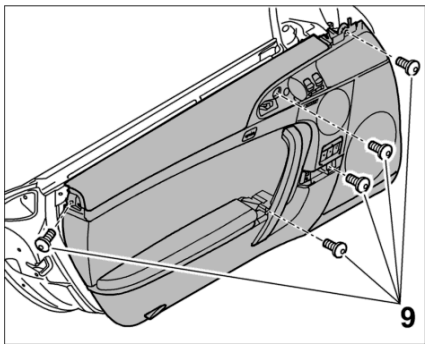
Removing covers for door trim panel

Installation Location:

Overview, door trim panel



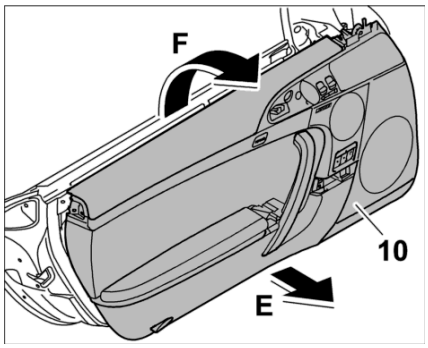
Removing covers



1. Carefully lever out covers **-5, 6, 7, 8-** using a plastic wedge and remove them.

Releasing door trim panel

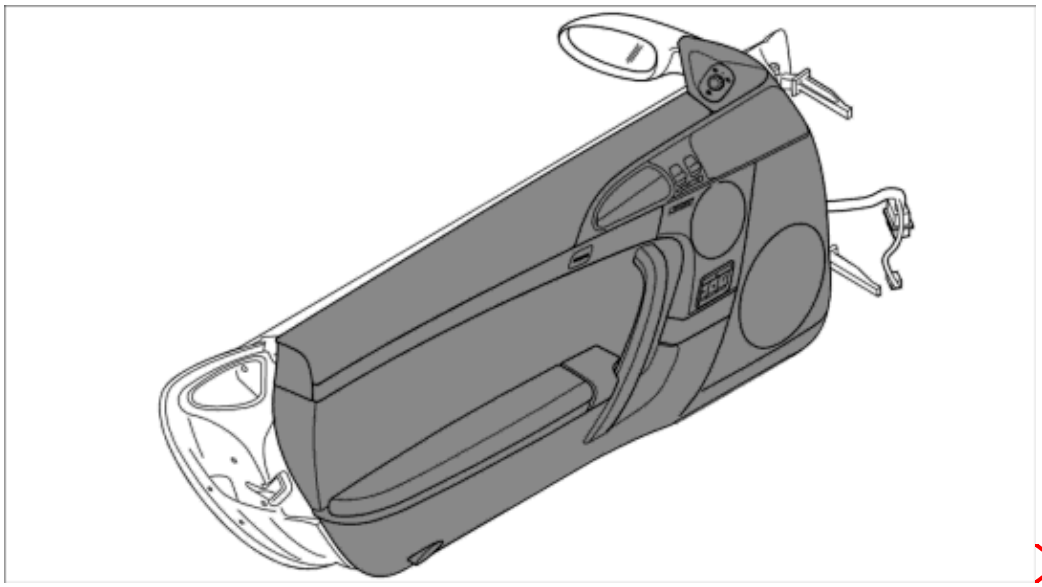
Installation Location:



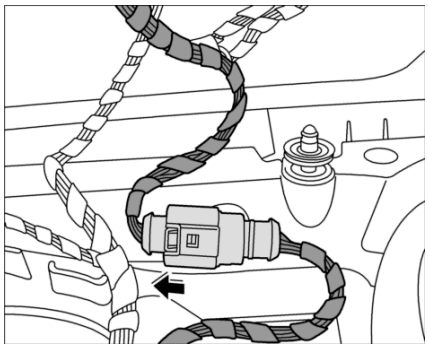
Overview, door trim panel

Releasing door trim panel

1. Undo fastening screws **-9-** .



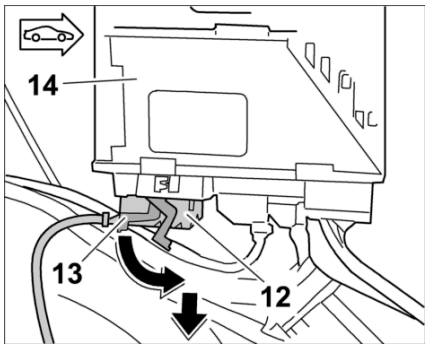
Clipping out door trim panel



2. Unclip front door trim panel **-10-** at bottom **-arrow E-** and unhook from sealing channel at top **-arrow F-** .

Disconnecting the electrical plug connections

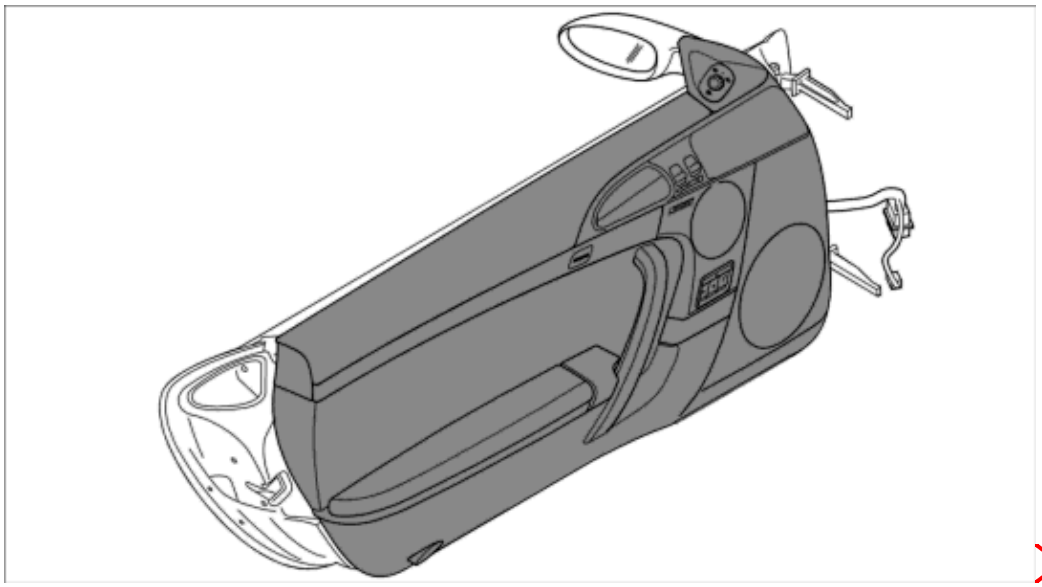
Installation Location:



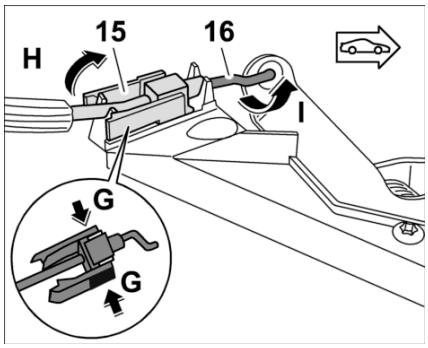
Overview, door trim panel

Disconnecting plug connection

1. Disconnect electrical plug connection **-arrow-** .



Unlocking plug connection on control module



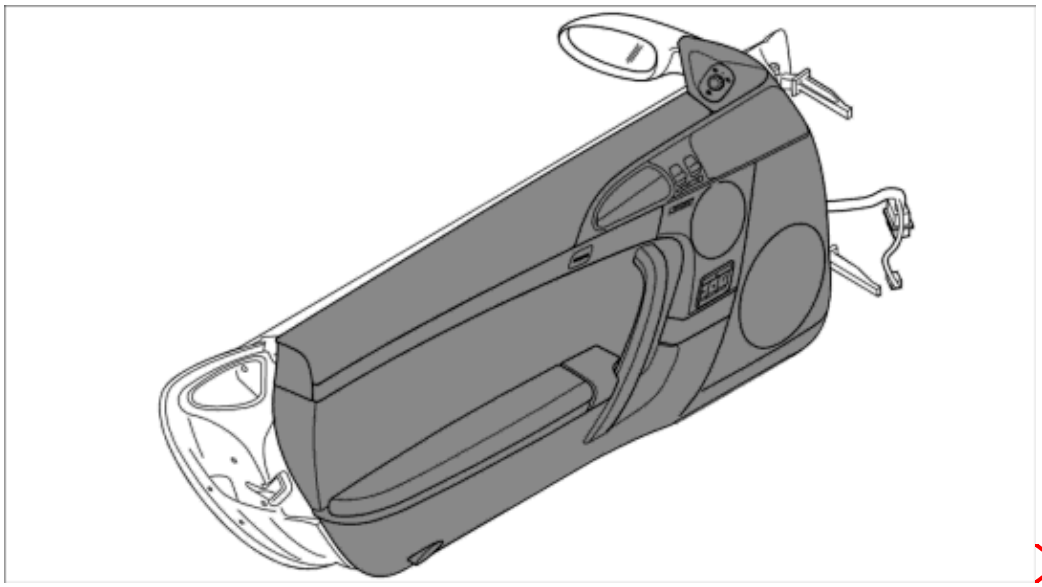
2. Unlock electrical plug connection **-12-** by operating locking lever **-13-** and remove from control module **-14-** .

Removing actuating cable for door lock

Installation Location:

Overview, door trim panel

Unhooking actuating cable

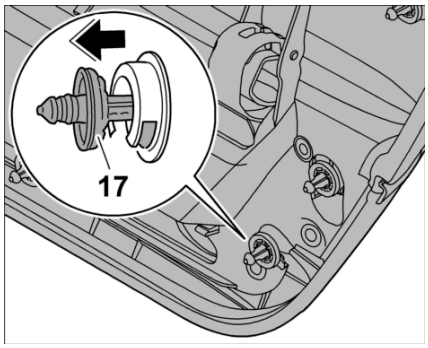


1. Unlock fastening clip for actuating cable for door lock **-15-** by pressing the locking hook arrows **-arrows G-** and disengage from the guide slot arrow **-arrow H-** .
2. Swivel pin **-16-** of actuating cable to the right by 90° **-arrow I-** and disengage.
3. Remove door trim panel.

top of page

Install door trim panel

Checking fastening clips

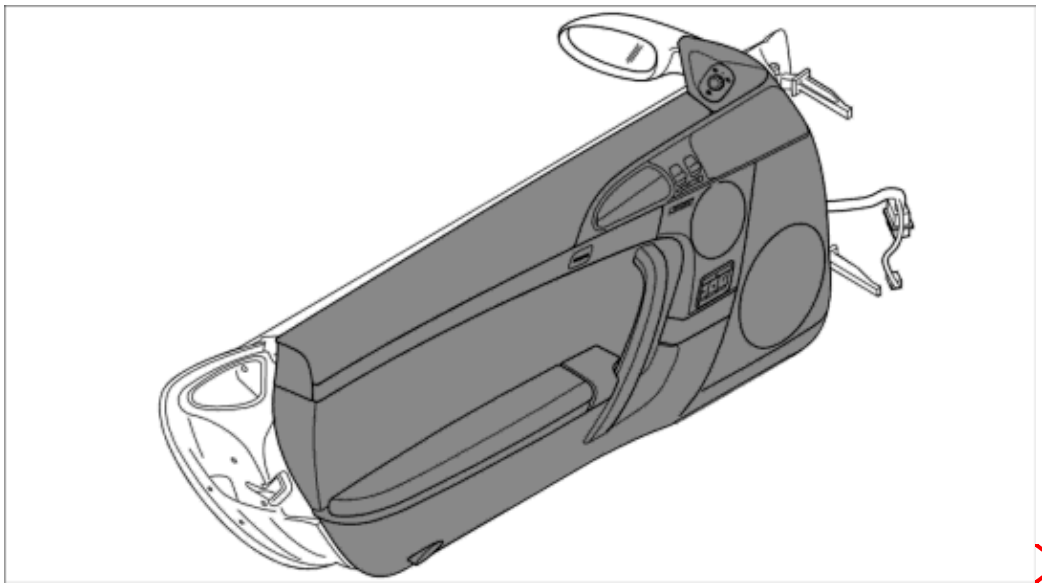


Installation Location:

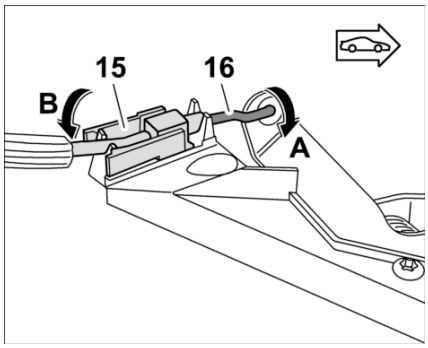
Overview, door trim panel

Note

- *The fastening clips have two settings. Before installing the front door trim panel, the fastening clips must be loosened fully because otherwise the door trim panel may not engage fully into the door unit carrier, possibly resulting in noises. The fastening clips must be pulled to the front position.*



Checking the fastening clips

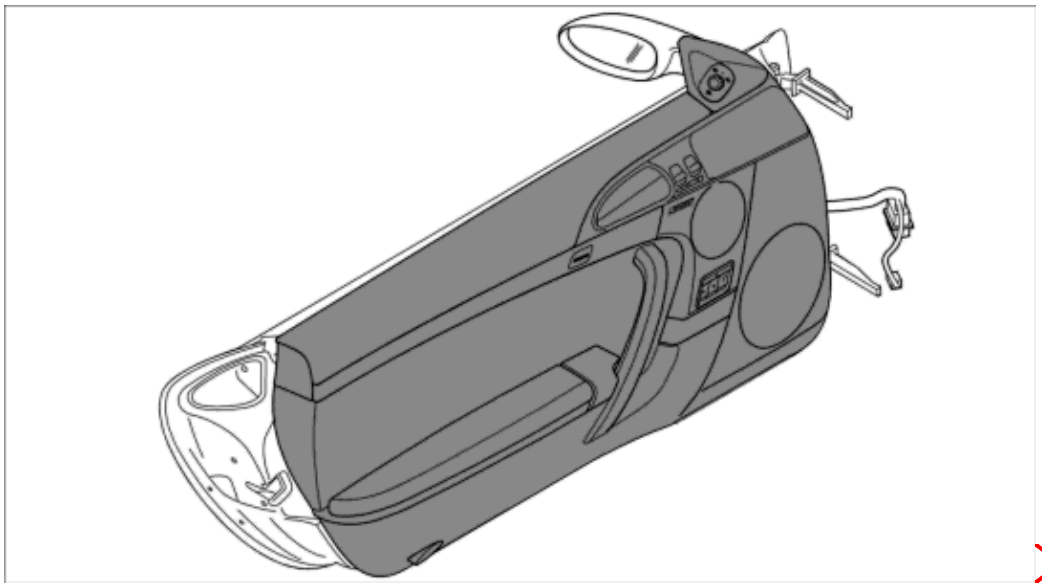


1. Check fastening clips **-17-** for deformation, replace if necessary.
2. Pull fastening clips **-17-** to the front position so that they are fully loosened.

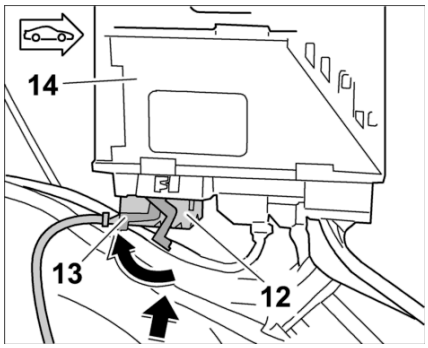
Installing actuating cable for door lock

Installation Location:

Overview, door trim panel



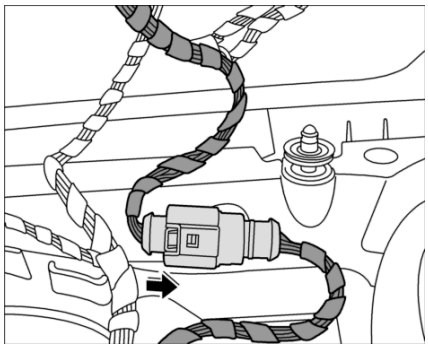
Engaging actuating cable



1. Engage pin **-16-** of the actuating cable and swivel to the left by 90° **-arrow A-** .
2. Insert T-tread of fastening clip **-15-** into the square hole **-arrow B-** .
3. Push fastening clip **-15-** forward and lock the locking hook.

Locking electrical plug connections

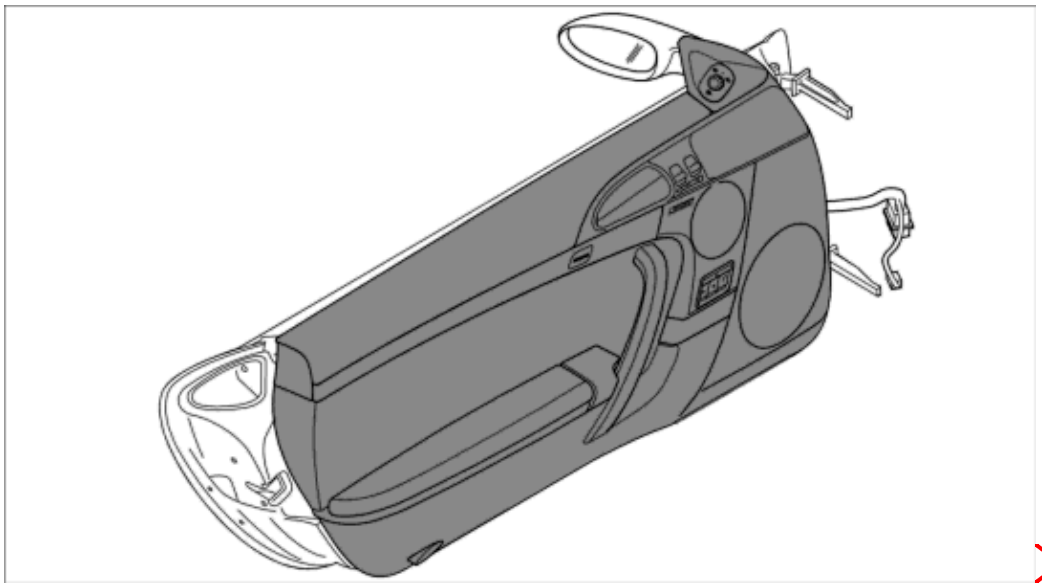
Installation Location:



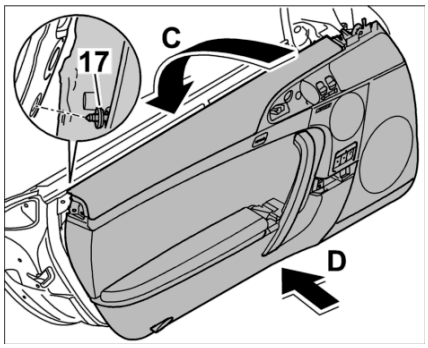
Overview, door trim panel

Lock plug connection to control module.

1. Connect electrical plug connection **-12-** to control module **-14-** by operating locking lever **-13-** and lock.



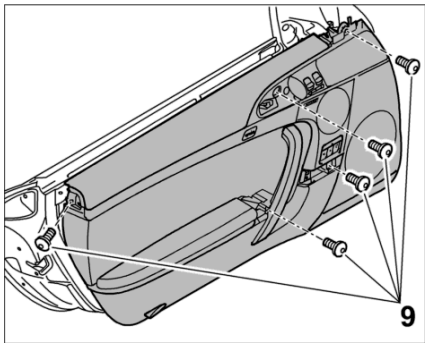
Locking plug connection



2. Lock electrical plug connection **-arrow-** until it engages audibly.

Installing door trim panel

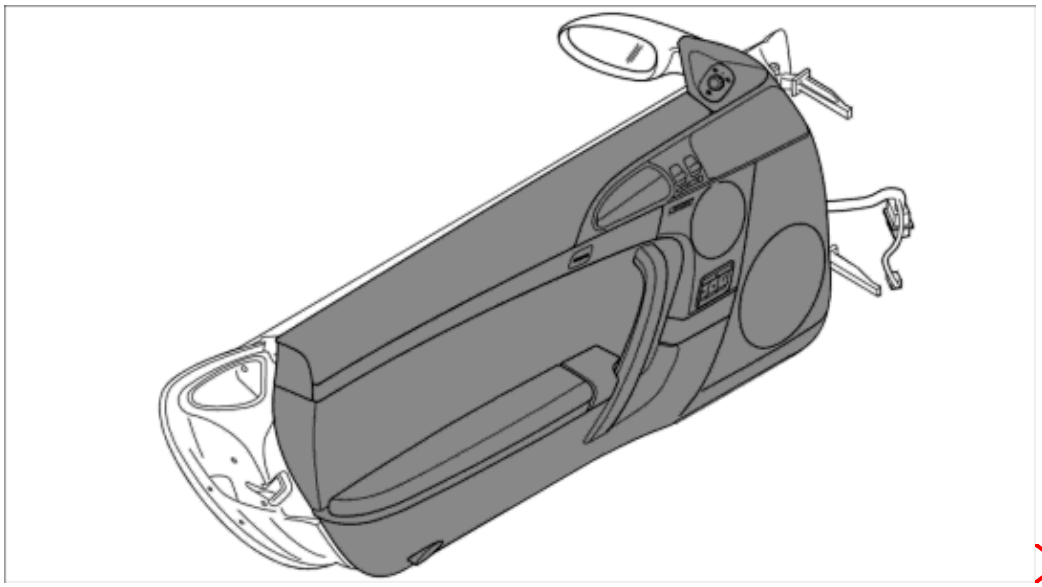
Installation Location:



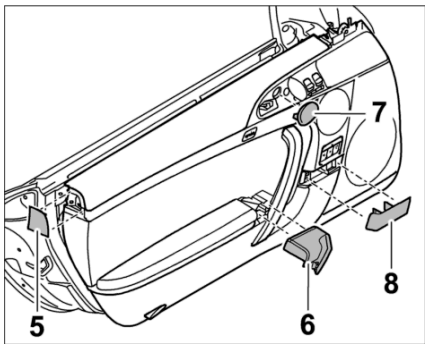
Overview, door trim panel

Clipping door trim panel into place

1. Hook front door trim panel in sealing channel at top **-arrow C-** and clip in at bottom **-arrow B-** . Make sure that the fastening clips **-17-** engage in the unit carrier.



Fastening door trim panel

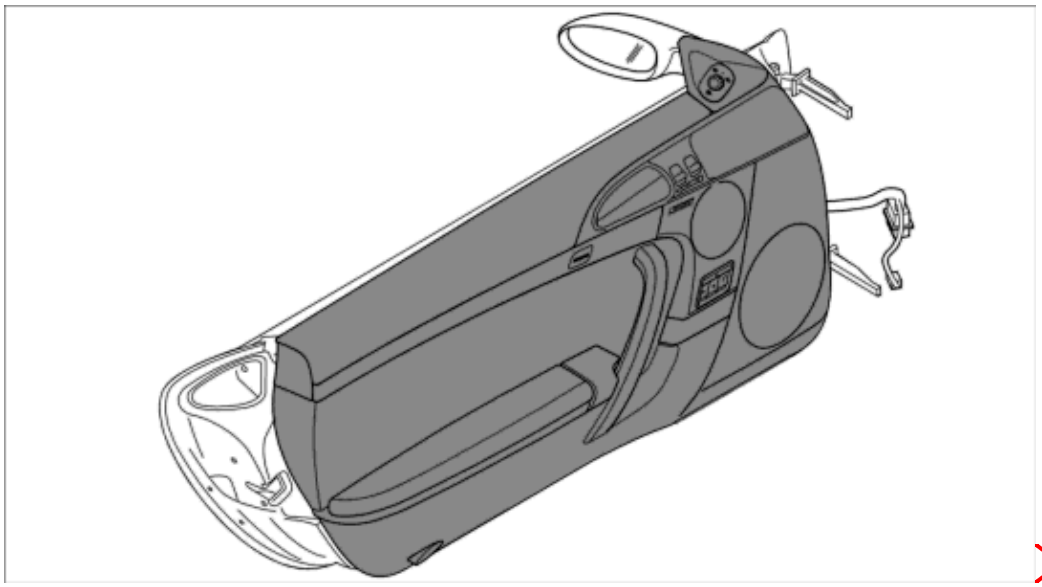


2. Tighten fastening screws **-9-** . Tightening torque →**: 5.5 + 0.5 ftlb.**

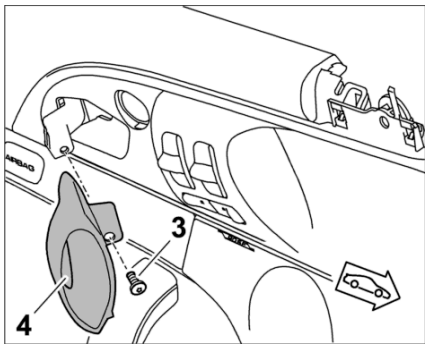
Installing covers for door trim panel

Installation Location:

Overview, door trim panel



Installing covers

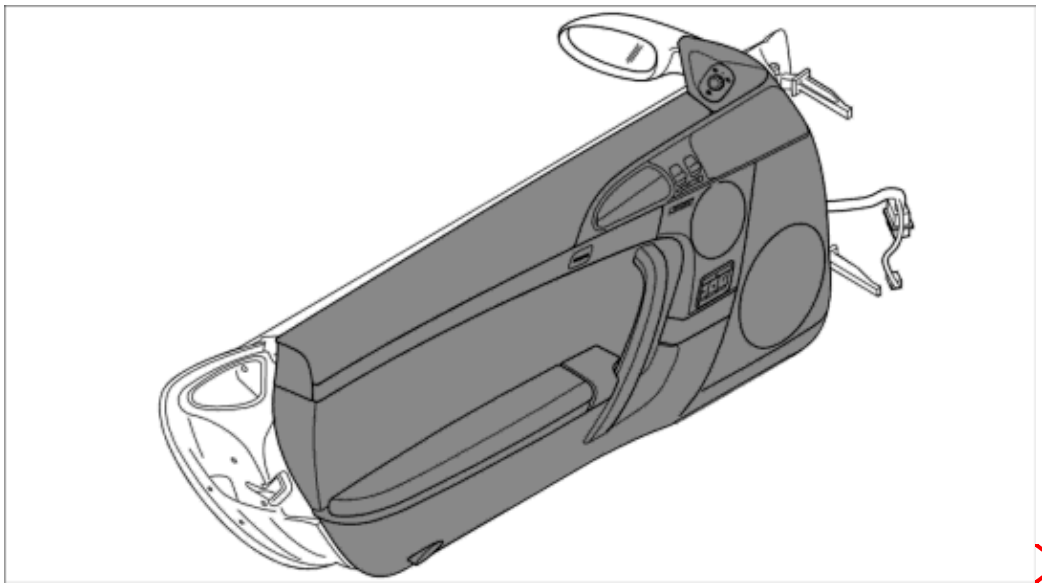


1. Clip covers **-5, 6, 7, 8-** into place on the door trim panel until it is felt to engage.

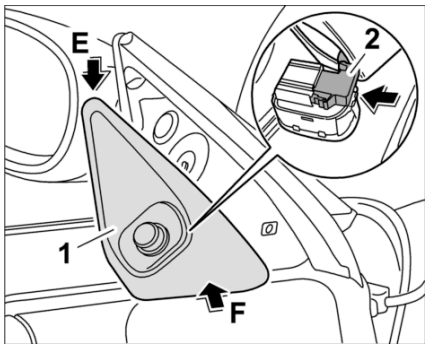
Installing lever for door handle

Installation Location:

Overview, door trim panel



Installing lever for door handle



1. Screw down fastening screw **-3-** to door handle **-4-** . Tightening torque →**: 1.5 + 0.2 ftlb.**

Installing trim panel for mirror triangle

Installation Location:

Overview, door trim panel

Installing trim panel for mirror triangle

1. Press in electrical plug connection **-2-** until it engages audibly.
2. Hook cover **-1-** into the door triangle from above **-arrow E-** and press into the fastening clips on the underside until it engages audibly **-arrow F-** .

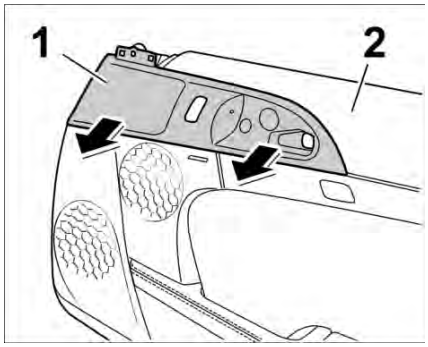
3. Remove door handle. →574519 Removing and installing door handle - section on "Removing"

Removing cover for door trim panel

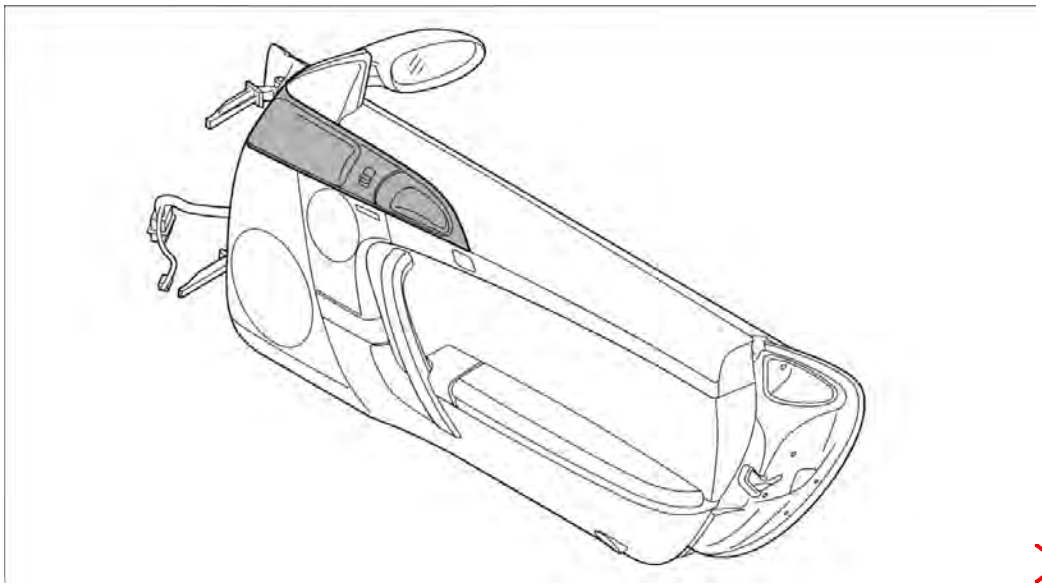
Installation Location:



Installation position of cover

Drilling out pins

1. Drill out the nine fastening pins **-arrows-** on the cover with a 4.5-mm drill bit, starting at the back of the door trim panel.

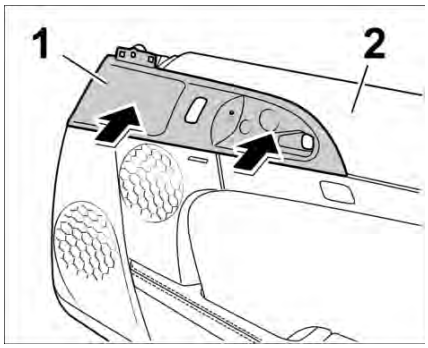


Removing cover

2. Remove cover **-1-** outwards from the door trim panel **-2-** (**-arrows-**).

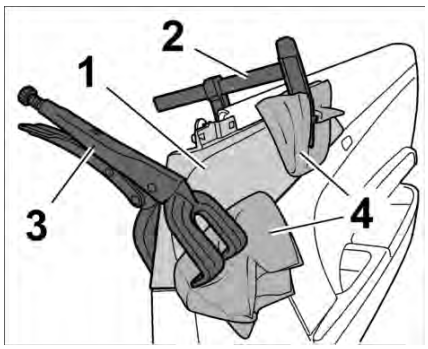
Installing cover for door trim panel

Installation Location:



Installation position of cover

Note

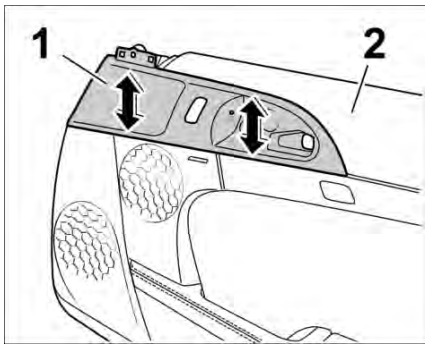


To ensure that the new cover fits correctly, the fastening holes on the inner door trim panel must be countersunk from the inside using an 8-mm drill bit.

1. Countersink the nine fastening holes on the inner door trim panel with an 8-mm drill bit.

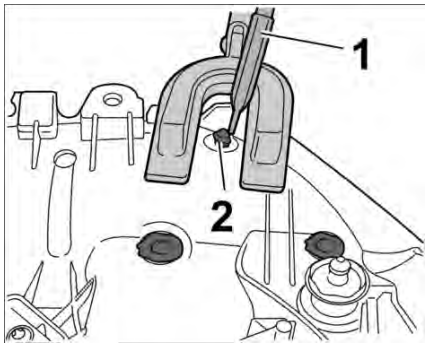
Fitting the cover

2. Position cover **-1-** on the door trim panel **-2-** from outside (**-arrows-**).



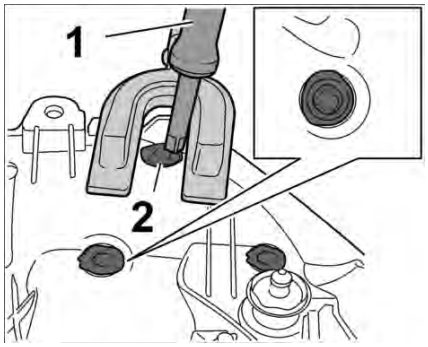
Attaching the cover

Note



When attaching the cover with a screw clamp and vice-grip wrench, always protect the outside of the door trim panel with fabric protection. A flat metal piece (flat iron, etc.) must be placed on the inside of the door trim panel so that the tools can be positioned better.

3. Position cover **-1-** and secure with a screw clamp **-2-** and vice-grip wrench **-3-** **vice-grip wrench lowered NR.127**. Always use sufficiently thick fabric **-4-** to protect the door trim panel.



Checking joint

4. Check that the joint between the cover **-1-** and door trim panel **-2-** is uniform all the way round and align the cover as required **-arrows-** .

Securing the cover

5. Use a plastic welder **-1-** **TRIAC S plastic welder WE1120** to heat up the fastening pins **-2-** for the cover until visco-elasticity is achieved.

Pressing in fastening pins

6. Use an 8-mm round stock **-1-** to press the fastening pins **-2-** in evenly on the door trim panel.

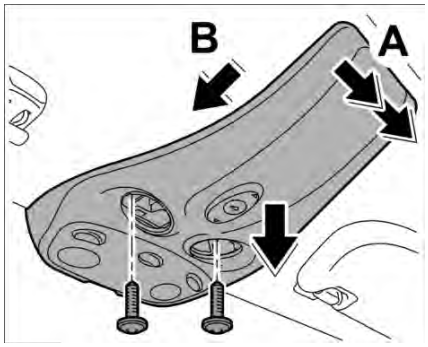
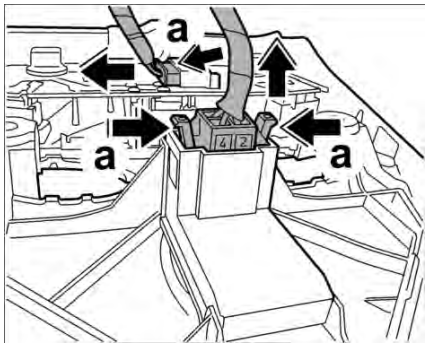
Removing roof lining

Removing cover for motor for sliding roof



1. Switch off ignition and remove ignition key.

Unclipping cover for fastening screws

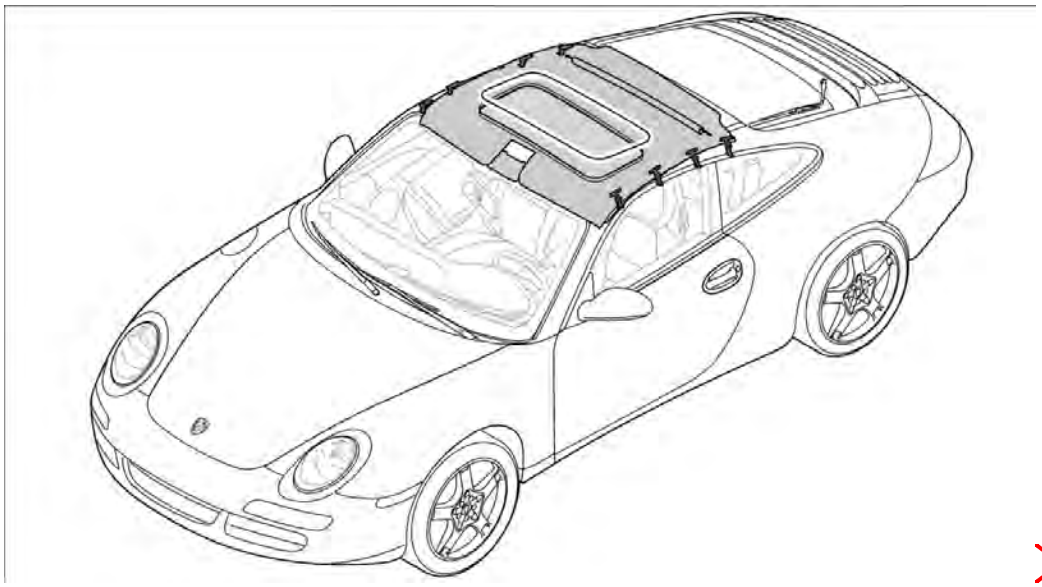


2.

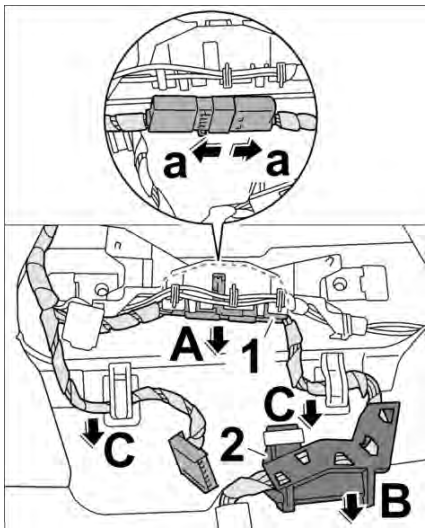
Using a small screwdriver, carefully unclip and remove the cover for the fastening screws at the openings **-arrows-** provided.

Unclipping cover for motor for sliding roof

3. Unscrew the two fastening screws.
4. Unclip cover for motor for sliding roof at the rear to the left and right **-arrows A-** and push it out to the front towards the windscreen **-arrow B-** .



Removing connectors at sliding roof switch and interior light

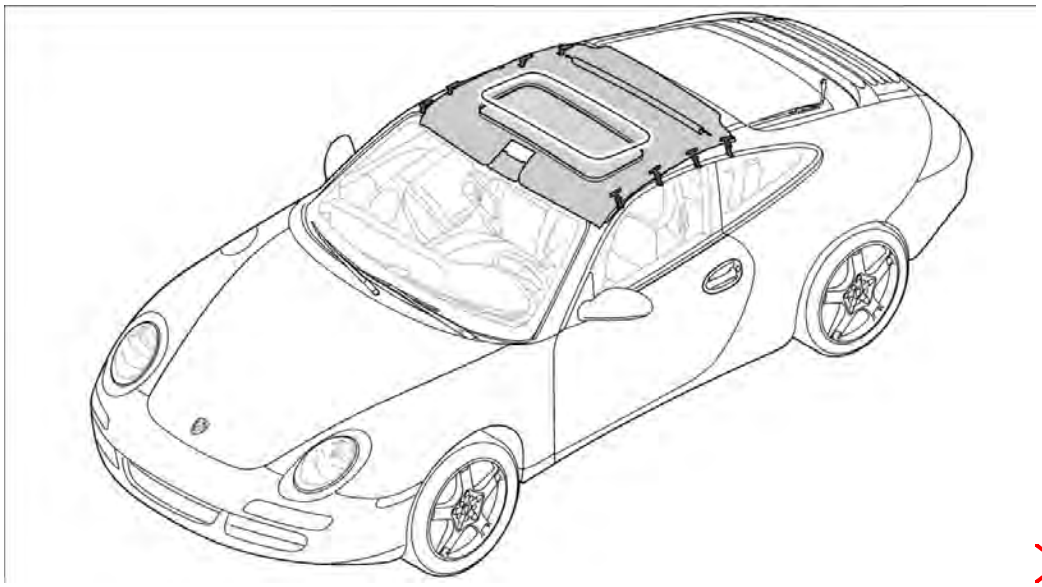


5. Release connecters at sliding roof switch and at the interior light **-arrows a-** and remove them. Remove cover for motor for sliding roof.

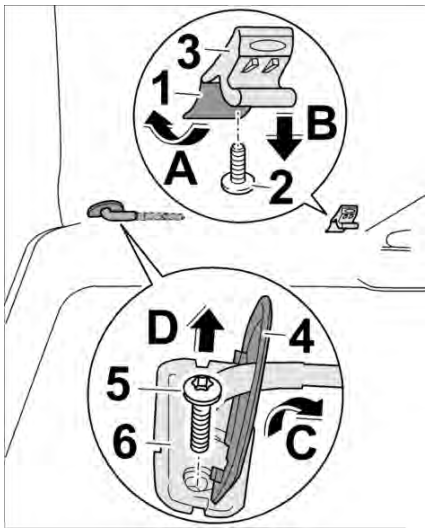
Disconnecting electric plug connection

Installation Location:

Installation position for headliner



Disconnecting plug connection

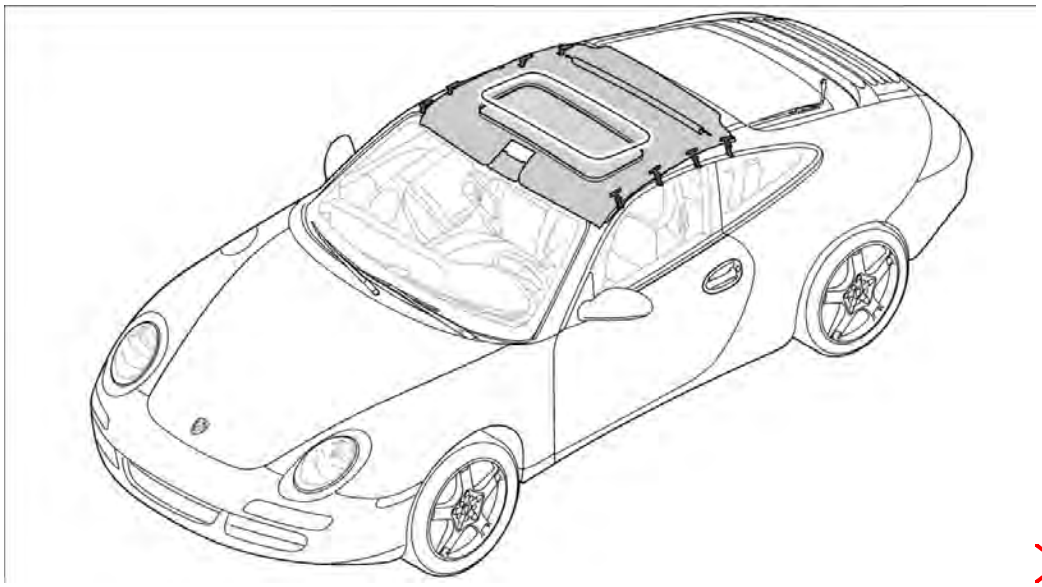


1. Unclip plug connection for interior mirror **-1-** from the support **-arrow A-** and disconnect connector **-arrows a-** .
2. Unclip support for wire harness **-2-** **-arrow B-** and disengage electric lines **-arrows C-** .

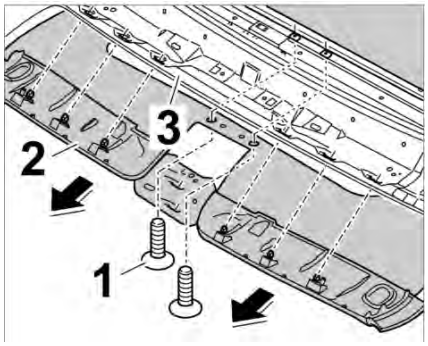
Removing mounting saddle and pivot bearing for sun visor

Installation Location:

Installation position for headliner



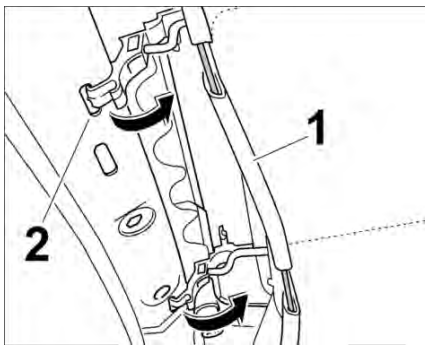
Removing mounting saddle and pivot bearing



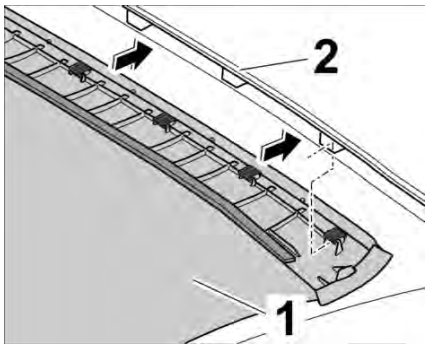
1. Unclip cap on the mounting saddle **-1-** with a screwdriver and open **-arrow A-** .
2. Unscrew fastening screw **-2-** and remove mounting saddle **-3-** **-arrow B-** .
3. Carefully insert a screwdriver between headliner and pivot bearing and release cover **-4-** **-arrow C-** .
4. Unscrew fastening screw **-5-** and remove pivot bearing **-6-** **-arrow D-** .

Removing headliner

Installation Location:

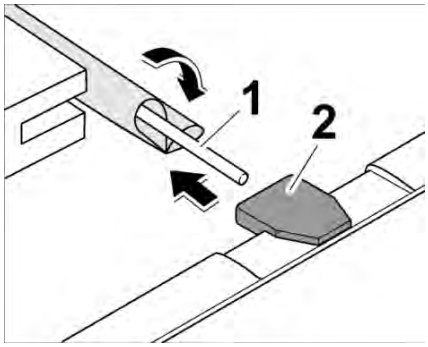


Installation position for headliner



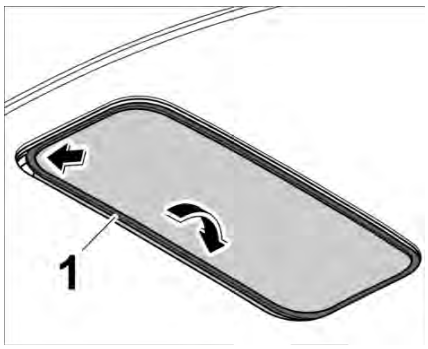
Undoing headliner at the front

1. Unscrew fastening screws **-1-** at the front in the headliner **-2-** and unclip the headliner from the cowl panel frame **-3-** in a downward direction at the left and right.



Disengaging headliner at the sides

2. Unclip the metal strut of the roof liner **-1-** from the plastic clips **-2-** at the right and left.



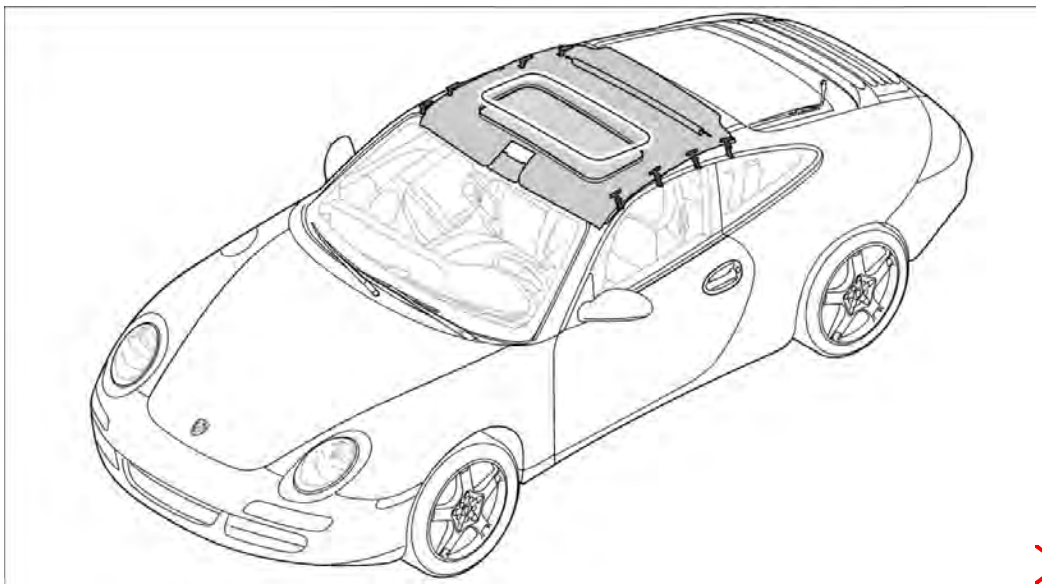
Disengaging headliner at the rear

3. Pull the rear headliner **-1-** towards the rear out of the roof frame **-2-** evenly on the left and right and disengage.

Disengaging the metal strut

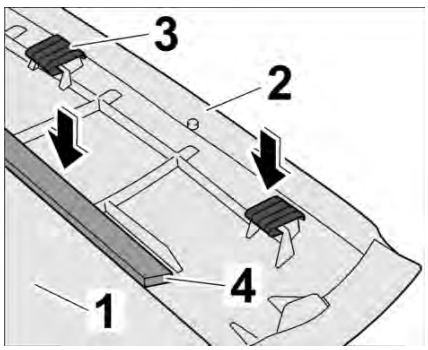
4. Pull the metal brace contained in the fabric pocket **-1-** down in the centre so that it bends. Pull the metal strut **-1-** out of the bracket **-2-** on the left and right.

Disengaging frame



5. Pull the frame of the sliding roof cut-out backwards and downwards in the centre at the front, so that the frame overlap at the corners is reduced and it is possible to pull it out in a downward direction. Then pull out the roof frame **-1-** diagonally via the sliding roof cut-out inwards into the passenger compartment.

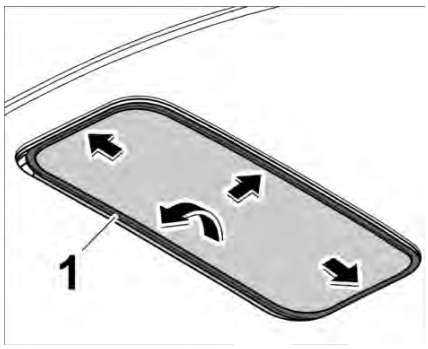
top of page



Installing roof lining

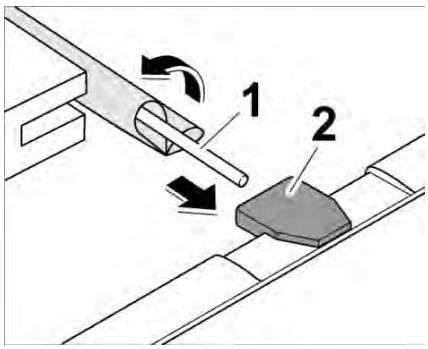
Fitting headliner

Installation Location:



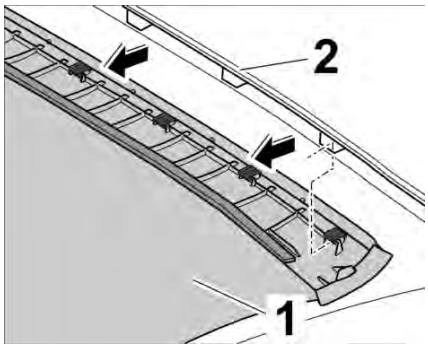
Installation position for headliner

Checking roof lining



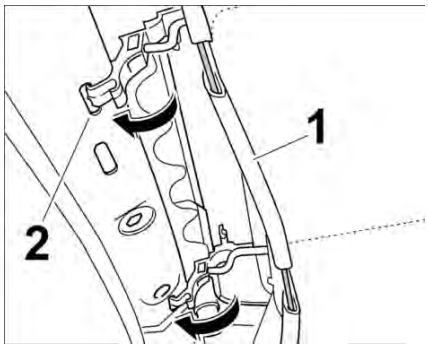
1. Before installing the headliner **-1-** , carry out a visual inspection of the rear plastic lining **-2-** to check that the Styrofoam cover **-4-** and the self-adhesive fabric parts **-3-** on the locking peg are completely seated.

Fitting frame



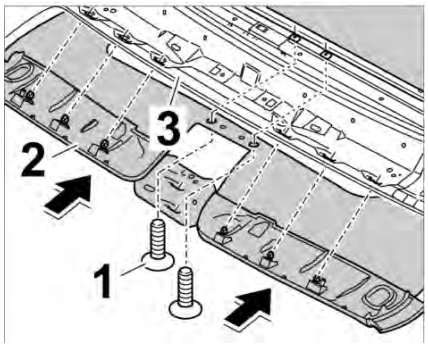
2. Insert the roof frame **-1-** diagonally from the inside via the sliding roof cut-out of the passenger compartment. At the same time, pull the frame backwards in the centre at the front of the sliding

roof cut-out, so that the frame overlap at the corners is reduced and it is possible to insert the frame into the sliding roof cut-out.



Engaging metal strut

3. Pull the metal brace contained in the fabric pocket **-1-** down in the centre so that it bends. Engage the metal strut in the bracket **-2-** on the left and right.

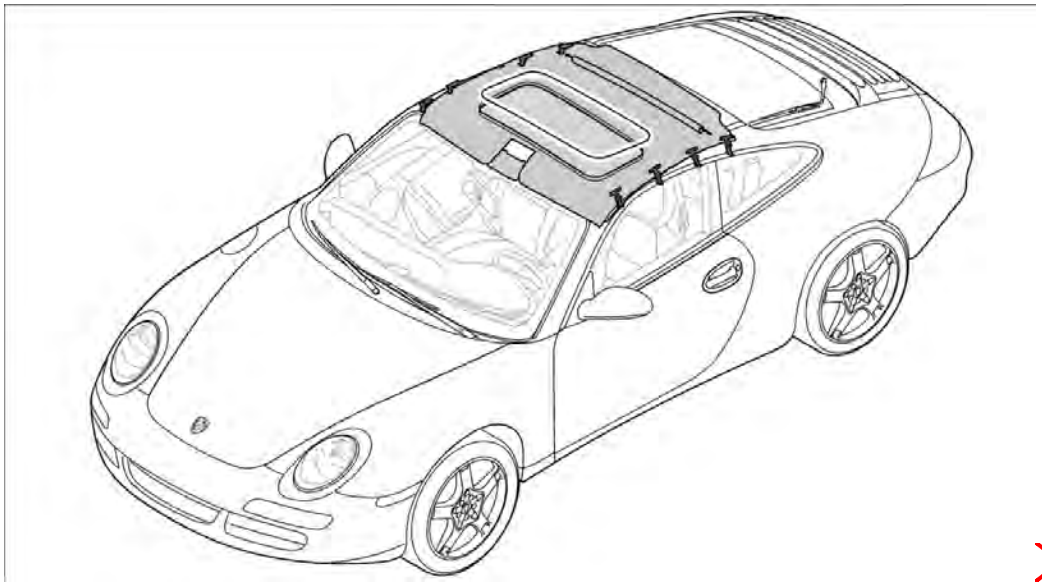


Engaging headliner at the rear

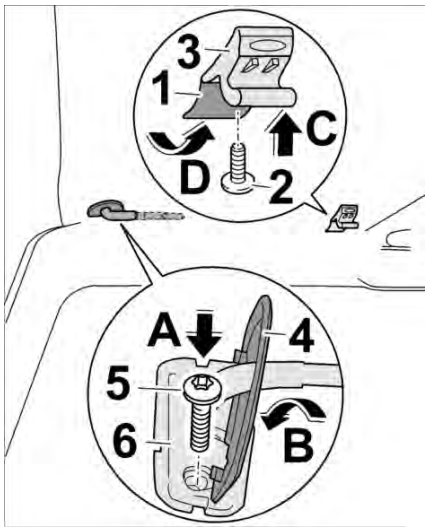
4. Engage the headliner towards the rear into the roof frame evenly on the left and right.

Engaging headliner at the sides

5. Engage the metal strut of the roof liner **-1-** in the plastic clips **-2-** at the left and right.



Clipping in headliner at the front

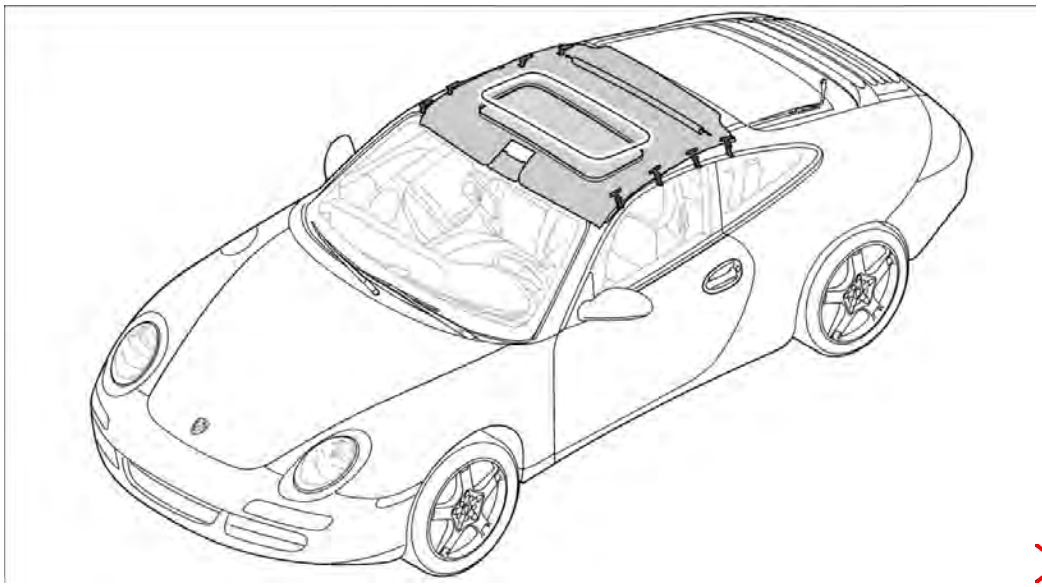


6. Position the headliner **-2-** at the left and right on the cowl panel frame **-3-** and clip in. Tighten fastening screws **-1-** .

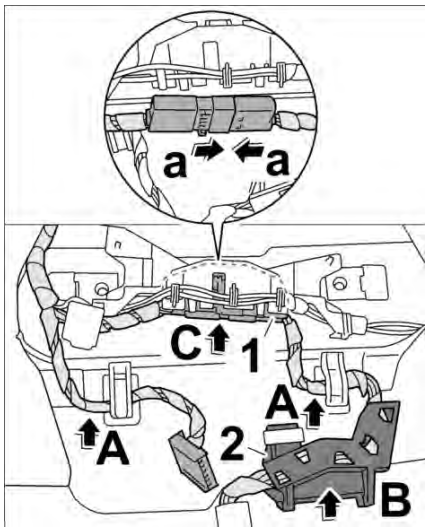
Installing mounting saddle and pivot bearing for sun visor

Installation Location:

Installation position for headliner



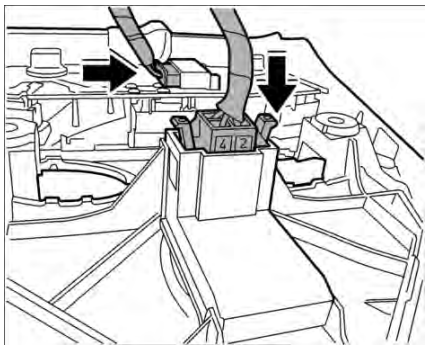
Installing mounting saddle and pivot bearing



1. Press in pivot bearing **-6-** until it clicks into place **-arrow A-** and tighten with fastening screw **-5-** . Tightening screw →**Tightening torque: 5 (3.5 ftlb.) Nm +0.5 (0.5 ftlb.) Nm**
2. Press in cover for pivot bearing **-4-** **-arrow B-** .
3. Position mounting saddle **-3-** at the top on the roof liner **-arrow C-** and secure using the fastening screw **-2-** . Tightening torque →**Tightening torque: 2.5 (2 ftlb.) Nm +0.5 (0.5 ftlb.) Nm**
4. Press in cap **-1-** on mounting saddle **-arrow D-** .

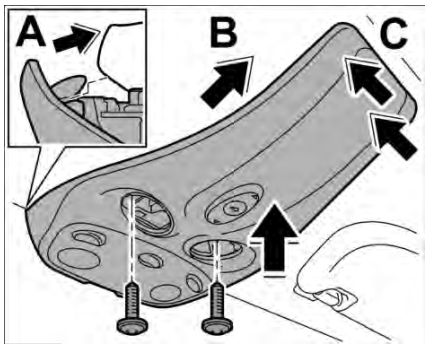
Locking electric plug connection

Installation Location:



Installation position for headliner

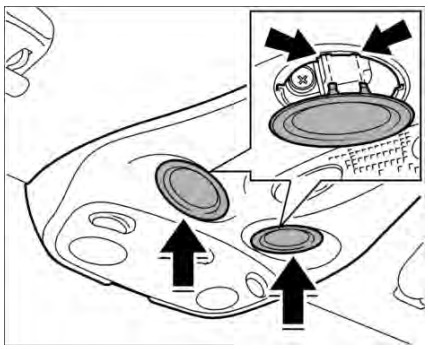
Locking plug connections



1. Engage electric lines **-arrows A-** and clip in support for wire harness **-2-** **-arrow B-** .
2. Connect electric plug connection for interior mirror **-1-** **-arrows a-** and clip into the support **-arrow C-** .

Installing cover for sunroof motor

Plugging in connectors on interior light and sunroof switch



1. Position cover for sunroof motor. Plug in the connectors on the interior light and the sunroof switch until they are felt to engage.

Clipping in cover of sunroof motor

2.

Using the clips, engage cover for sunroof motor on roof frame **-arrow A-** , push back towards sunroof **-arrow B-** and clip in at the rear to the left and right **-arrows C-** .

Clipping in cover for fastening screws

3. Insert cover of fastening screws into the mounts on the sunroof motor cover **-arrows-** and clip it in.
4. Switch on ignition and check that sunroof switch and interior light are working.

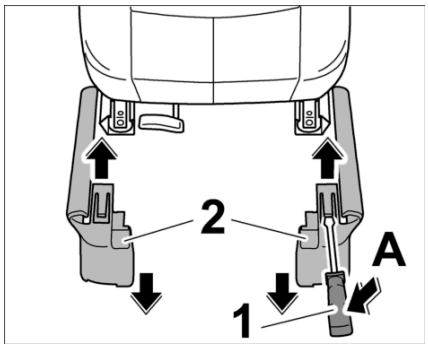
- Removing front seat
- Installing front seat

top of page

Removing front seat

Removing seat rail cover

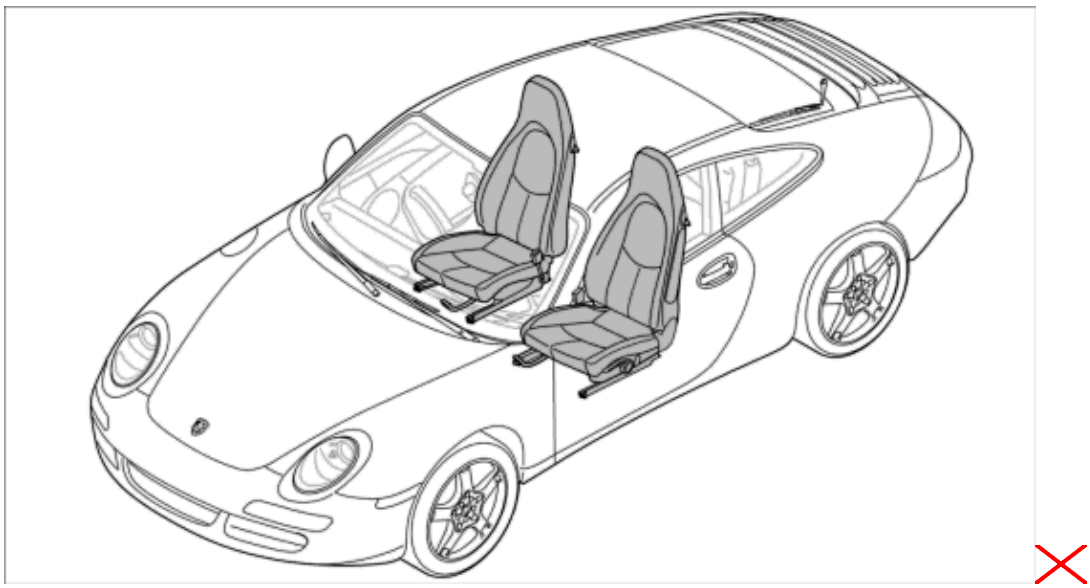


Installation Location:

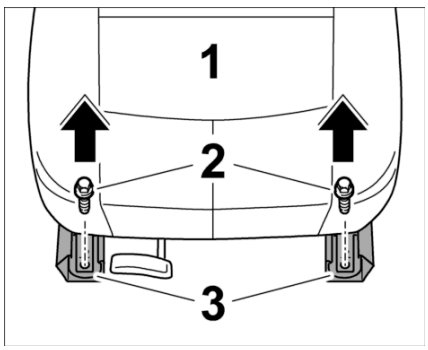
Overview, removing and installing front seat

Note

Caution! Locking lugs can break.



Removing seat rail cover

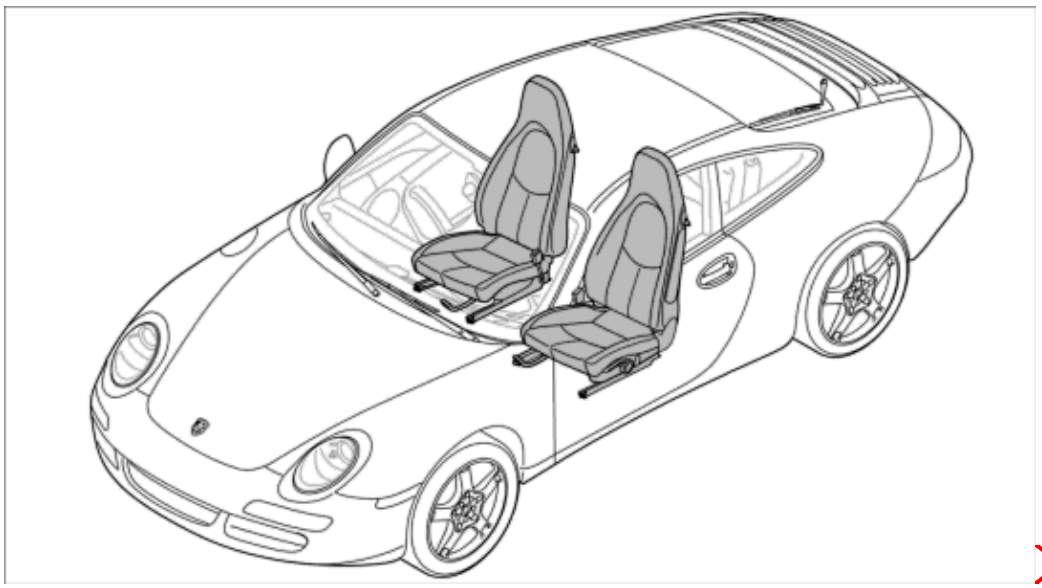


1. Insert a screwdriver **-1-** under the lugs and press upwards slightly **-arrow A-** .
2. Pull seat rail covers **-2-** on right and left seat rails off in forward direction.

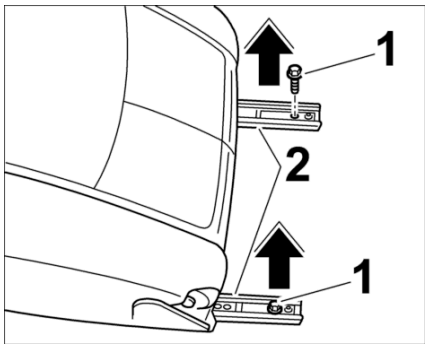
Undoing seat screws at front

Installation Location:

Overview, removing and installing front seat



Undoing seat screws at front

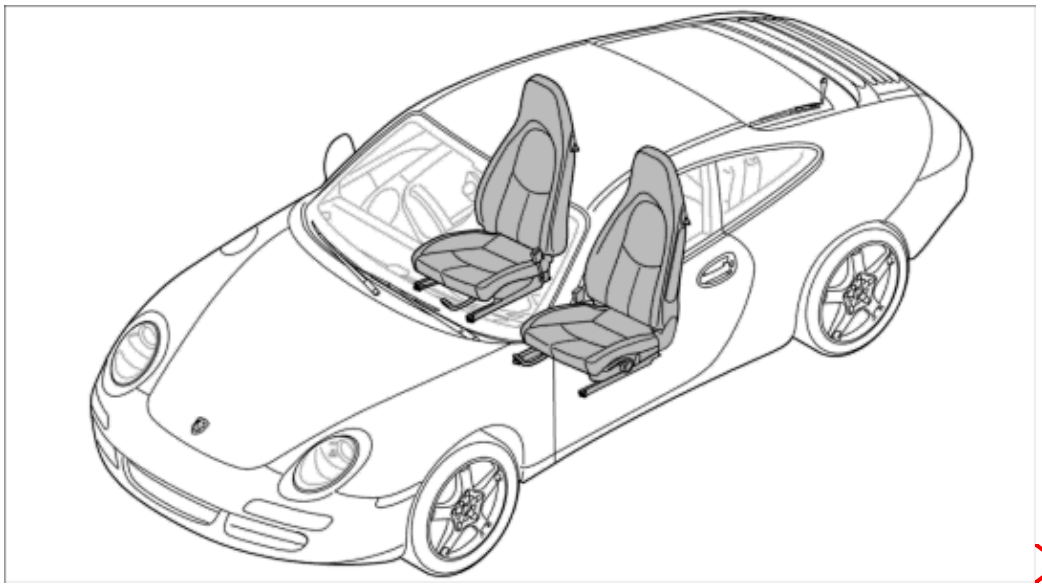


1. Move seat **-1-** to its rear limit position and undo the front fastening screws **-2-** from the right and left seat rails **-3-** .

Undoing seat screws at rear

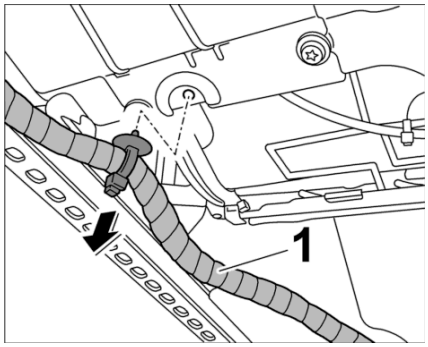
Installation Location:

Overview, removing and installing front seat



Undoing seat screws at rear

1. Move seat to its front limit position and undo the fastening screws **-1-** from the right and left seat rails **-2-** .

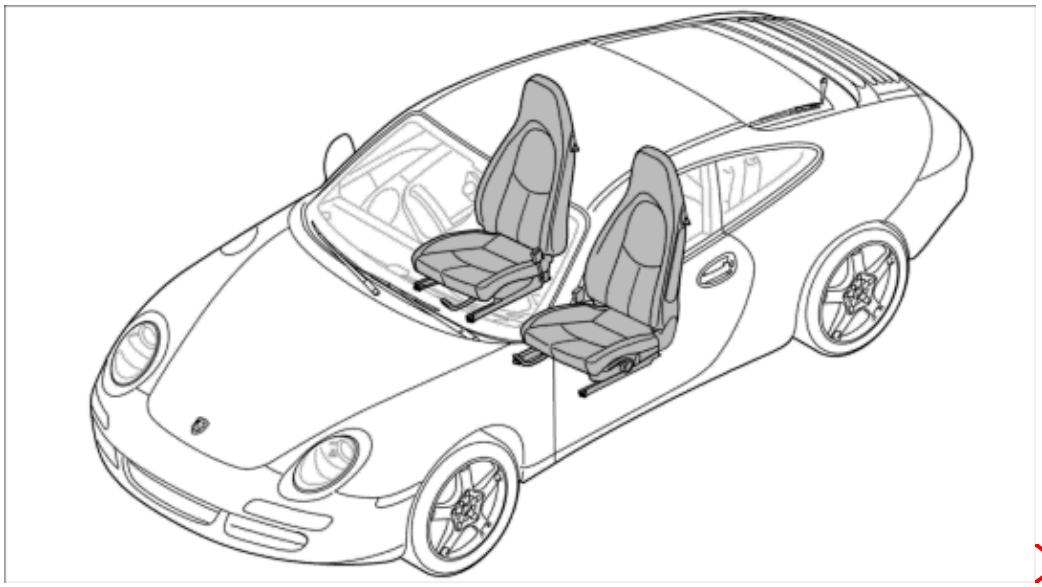


Releasing electrical wire

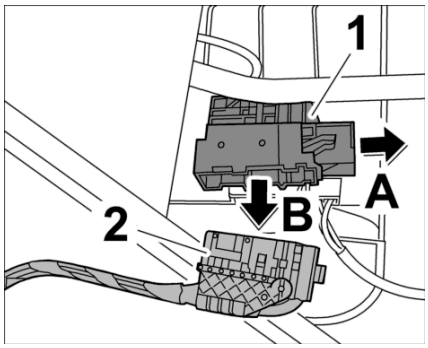
Installation Location:

Overview, removing and installing front seat

1. Disconnect battery. *→271000 Work instructions after disconnecting the battery*



Releasing electrical wire

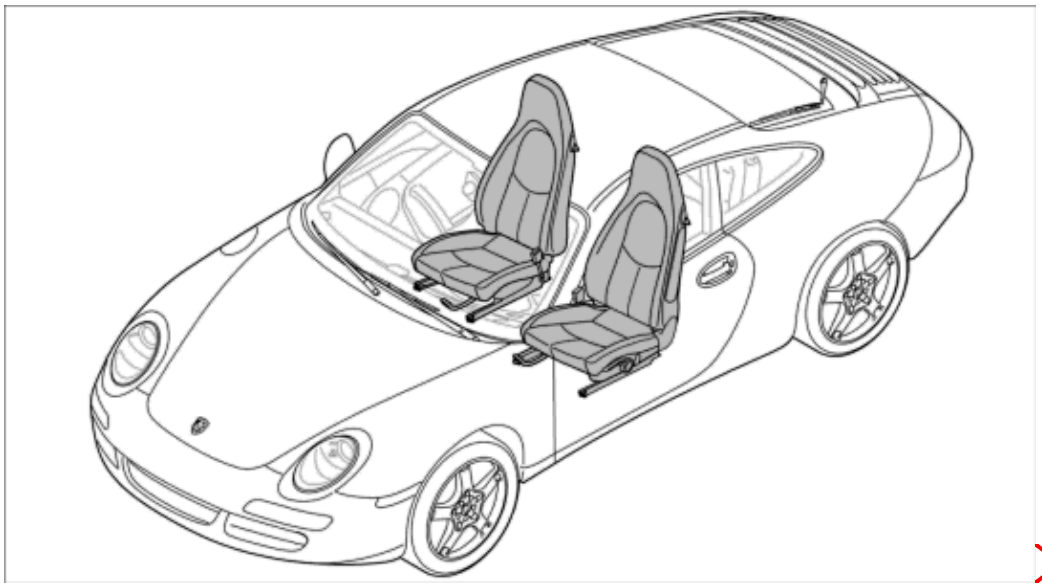


2. Tilt seat backwards.
3. Unclip wiring harness **-1-** .

Disconnecting central plug

Installation Location:

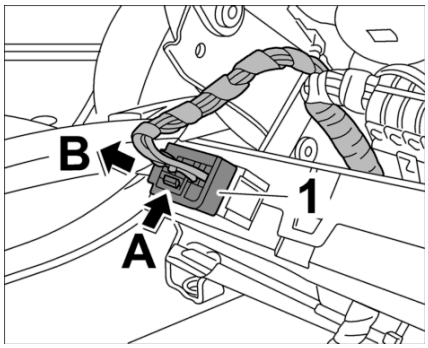
Overview, removing and installing front seat



Disconnecting central plug

1. Release plug connector locking device **-1-** on the side **-arrow A-** and separate the plug connection **-2- -arrow B-** .

Disconnecting electrical plug connection (power seat)



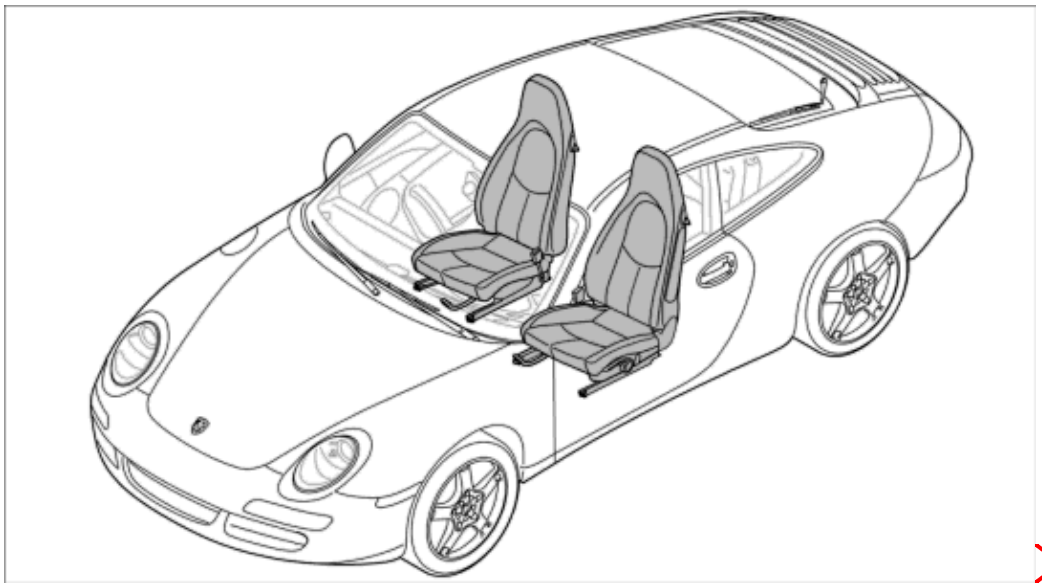
Installation Location:

Overview, removing and installing front seat

Note

Only for vehicles with electrically adjustable seat

Disconnecting seat memory plug connection



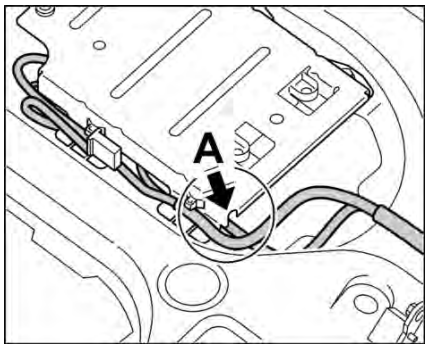
1. Release electrical plug connection **-1-** by activating the locking tab **-arrow A-** and remove from seat memory control module **-arrow B-** .
2. Remove front seat.

top of page

Installing front seat

Fastening electric line

Installation Location:



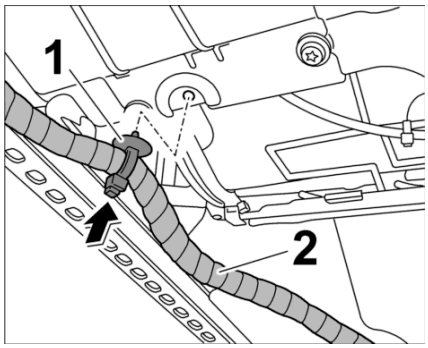
Overview, removing and installing front seat

WARNING

If the wiring at the telephone holder is not routed correctly, the wires can catch at the seat.

- **Danger of destroying/damaging wire harness for the telephone control unit**

→ The wire harness at the telephone holder must not be routed over the edge.



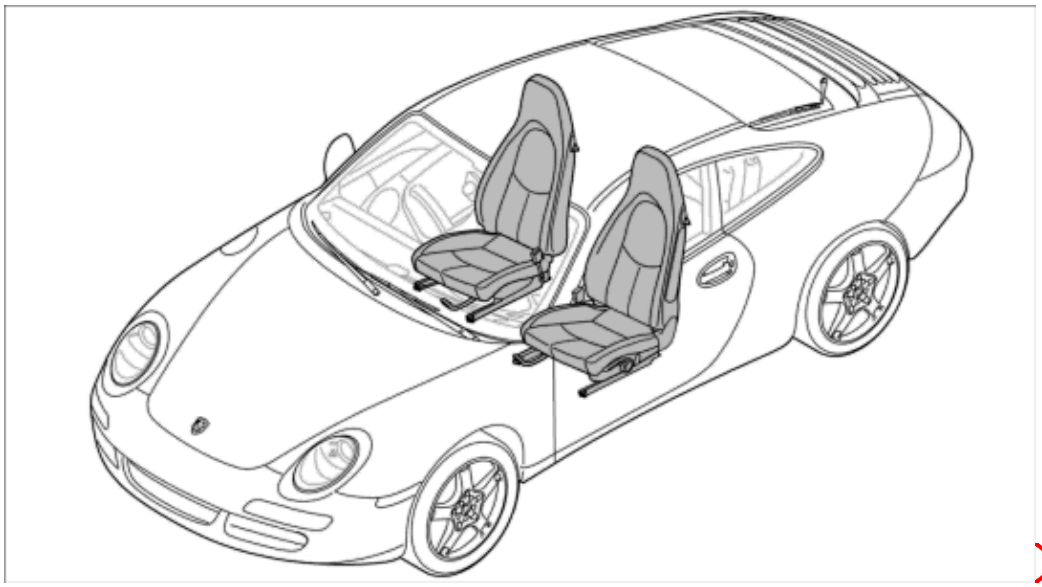
Routing of wire harness

Note

The routing of the wire harness for the control unit must be checked before installing the seat.
The wire harness must not be routed over the cover, but should be laid along side the cover **-A-** .

Note

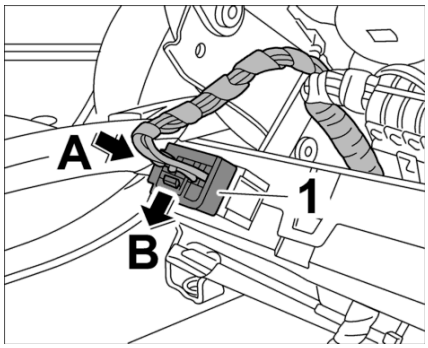
Before installing and securing the front seat, make sure the electric lines are not pinched or damaged.



Fastening electric line

1. Place front seat in car and tilt backwards.
2. Check tie-wrap **-1-** , replace tie-wrap **-1-** if necessary.
3. Clip wire harness **-2-** into place.

Connecting electrical plug connection (power seat)

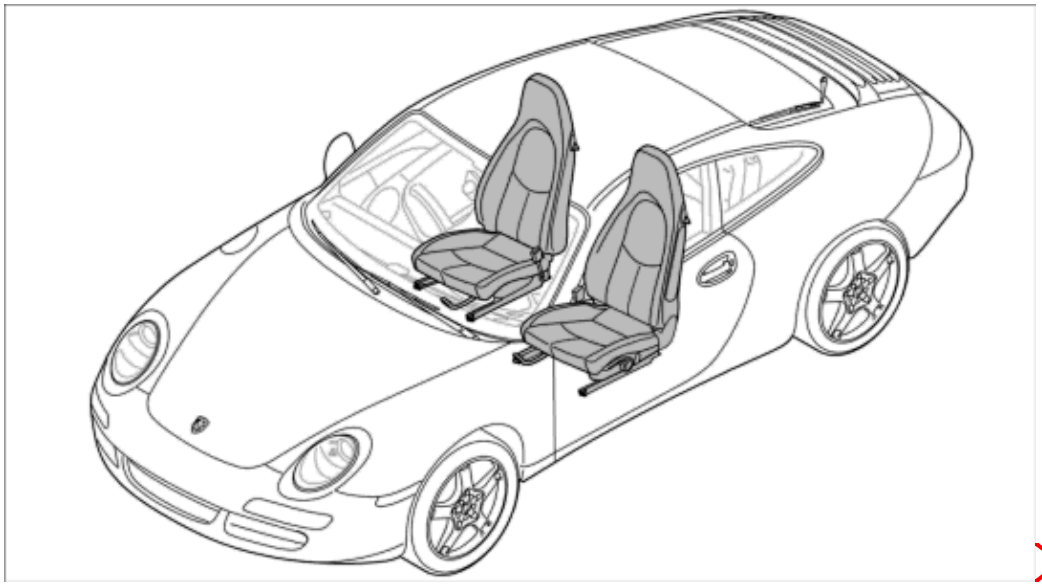


Installation Location:

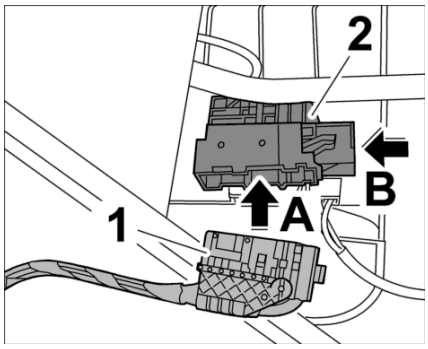
Overview, removing and installing front seat

Note

Only for vehicles with electrically adjustable seat



Locking plug connection for seat memory

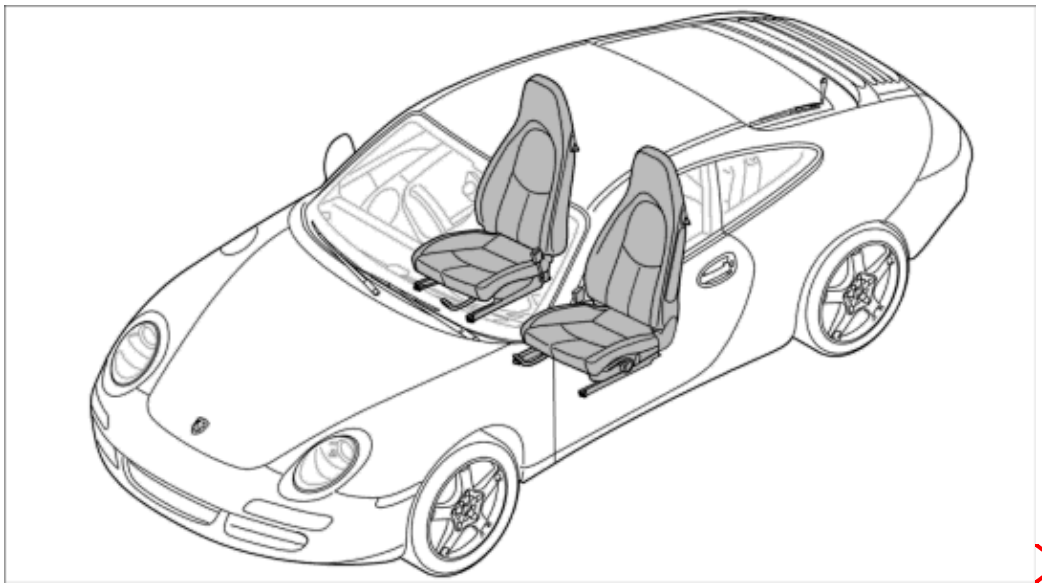


1. Push in electrical plug connection **-1-** **-arrow A-** until the locking tab audibly engages **-arrow B-** .

Locking central plug

Installation Location:

Overview, removing and installing front seat



Locking central plug

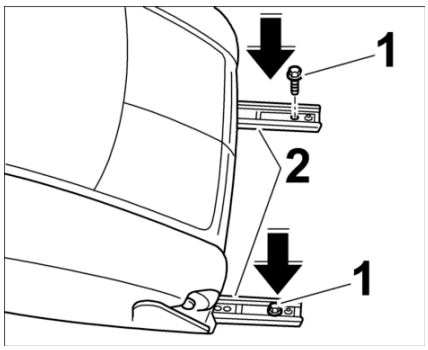
1. Join the plug connection **-1-** **-arrow A-** , press in plug connector locking device **-2-** on the side **-arrow B-**

.

Tightening seat screws at rear

Installation Location:

Overview, removing and installing front seat



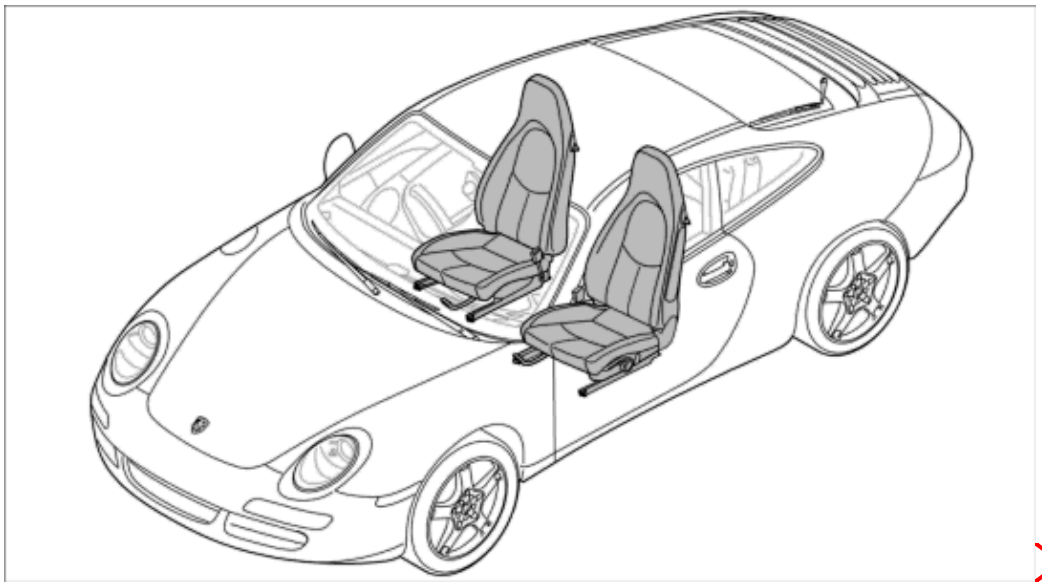
DANGER

Loosen the safety-related threaded joint.

- **Danger of injury if front seat is not screwed down correctly.**

→ Always replace fastening screws for the front seat after customer service and reworking.

→ It is not permissible to make alterations to the micro-encapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).



Tightening seat screws at rear

1. Tip seat forwards and position seat rails on the seat baseframe.

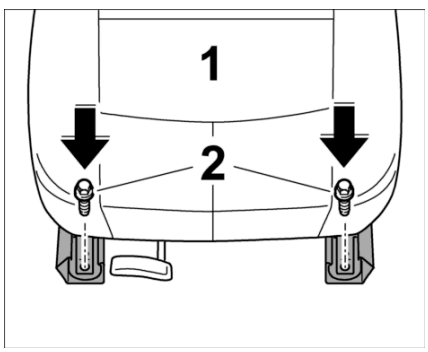
2. Screw left and right fastening screws **-1-** into seat bracket **-2-** and tighten to specified tightening torque → **Micro-encapsulated: 50 (37 ftlb.) Nm** .

Tightening seat screws at the front

Installation Location:

Overview, removing and installing front seat

DANGER



Loosen the safety-related threaded joint.

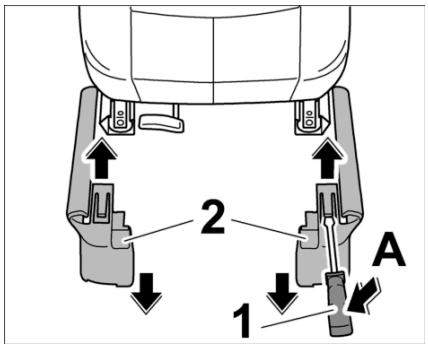
Removing front seat

Removing seat rail cover

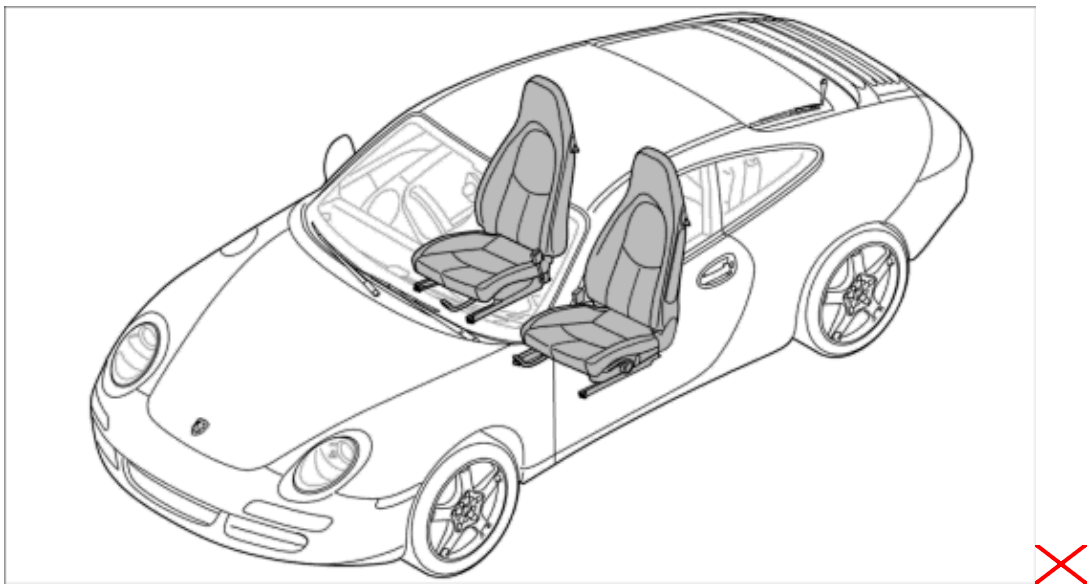


Installation Location:

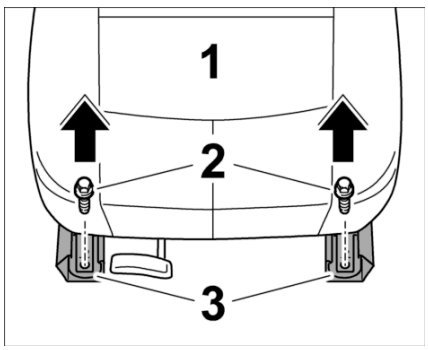
Overview, removing and installing front seat

Note

Caution! Locking lugs can break.



Removing seat rail cover

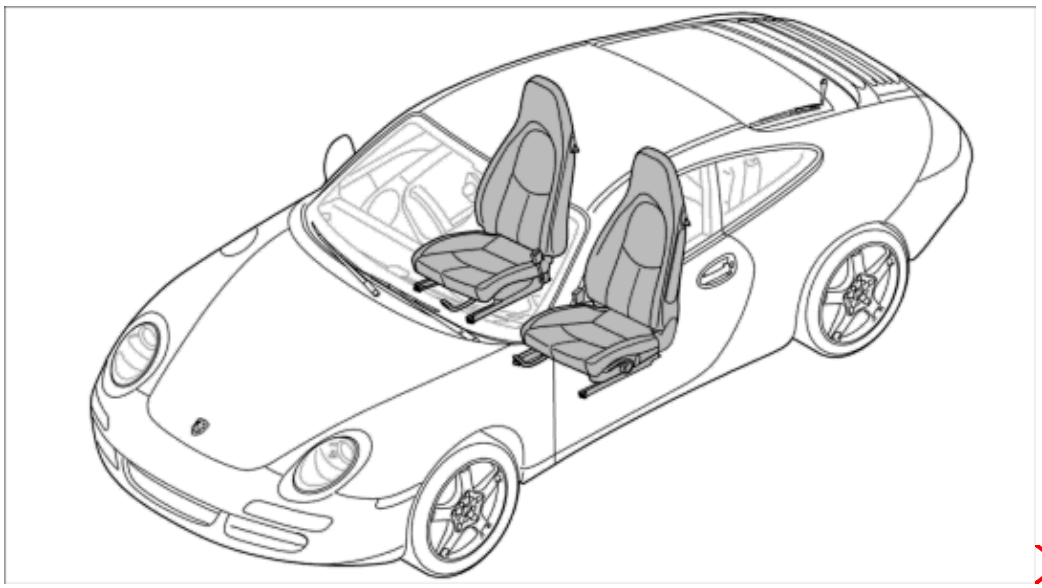


1. Insert a screwdriver **-1-** under the lugs and press upwards slightly **-arrow A-** .
2. Pull seat rail covers **-2-** on right and left seat rails off in forward direction.

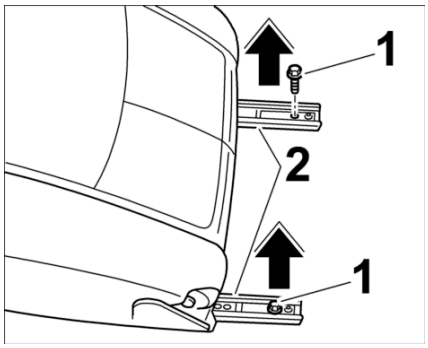
Undoing seat screws at front

Installation Location:

Overview, removing and installing front seat



Undoing seat screws at front

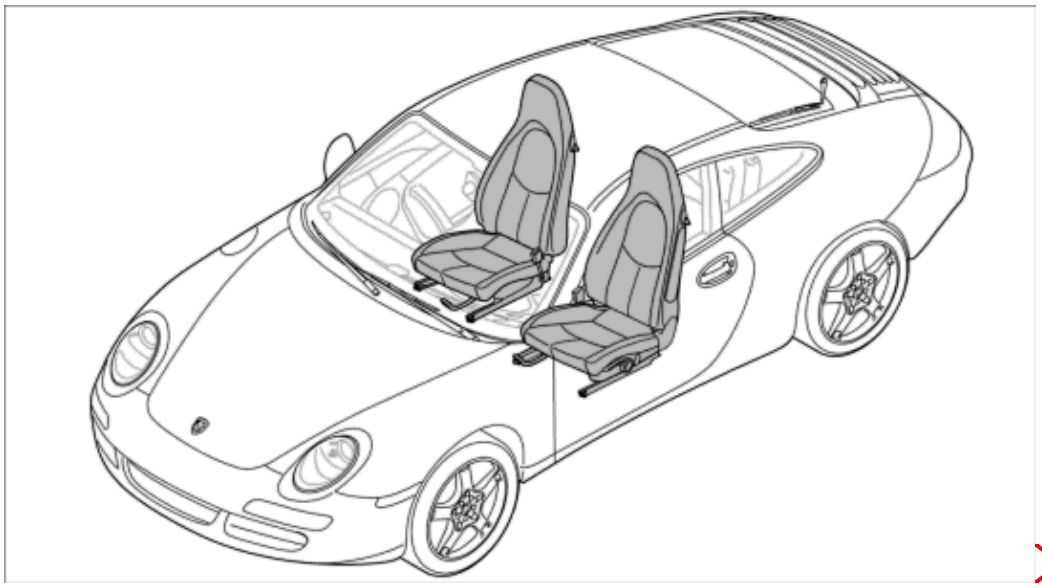


1. Move seat **-1-** to its rear limit position and undo the front fastening screws **-2-** from the right and left seat rails **-3-** .

Undoing seat screws at rear

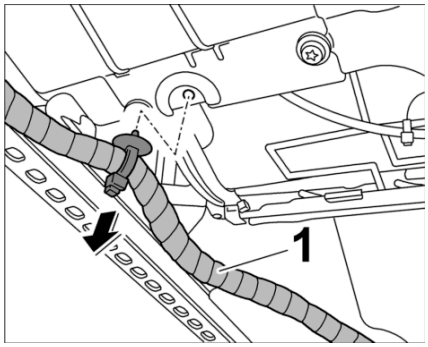
Installation Location:

Overview, removing and installing front seat



Undoing seat screws at rear

1. Move seat to its front limit position and undo the fastening screws **-1-** from the right and left seat rails **-2-** .

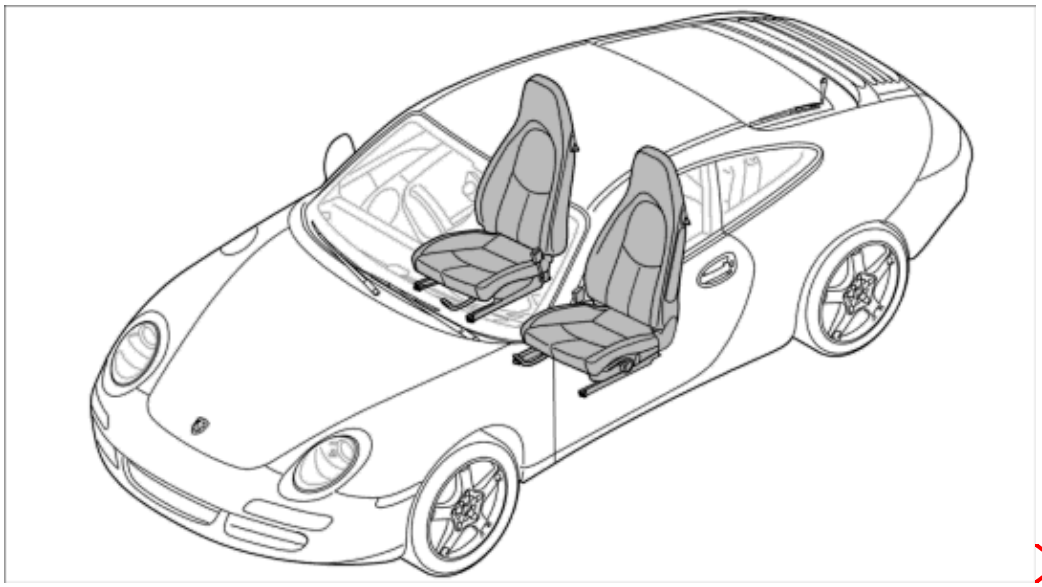


Releasing electrical wire

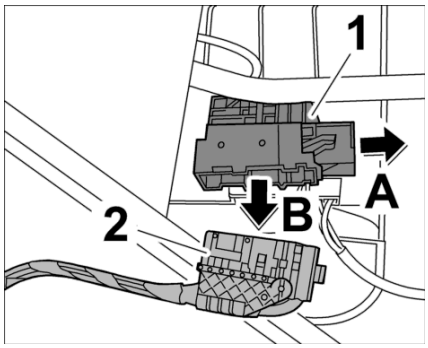
Installation Location:

Overview, removing and installing front seat

1. Disconnect battery. *→271000 Work instructions after disconnecting the battery*



Releasing electrical wire

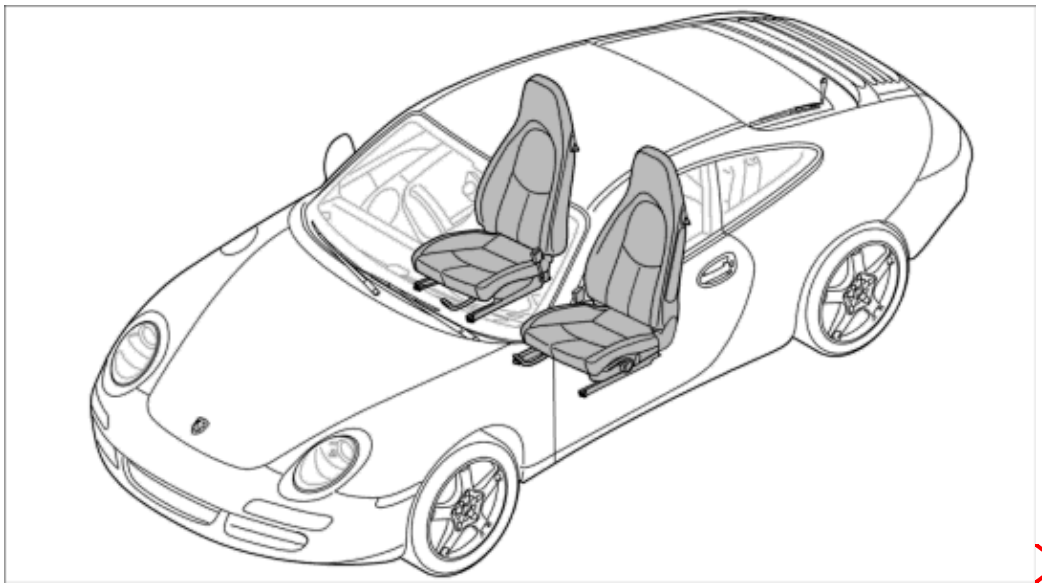


2. Tilt seat backwards.
3. Unclip wiring harness **-1-** .

Disconnecting central plug

Installation Location:

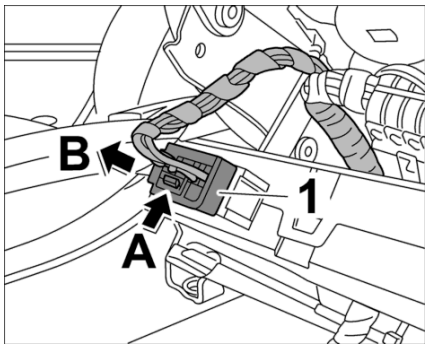
Overview, removing and installing front seat



Disconnecting central plug

1. Release plug connector locking device **-1-** on the side **-arrow A-** and separate the plug connection **-2- -arrow B-** .

Disconnecting electrical plug connection (power seat)

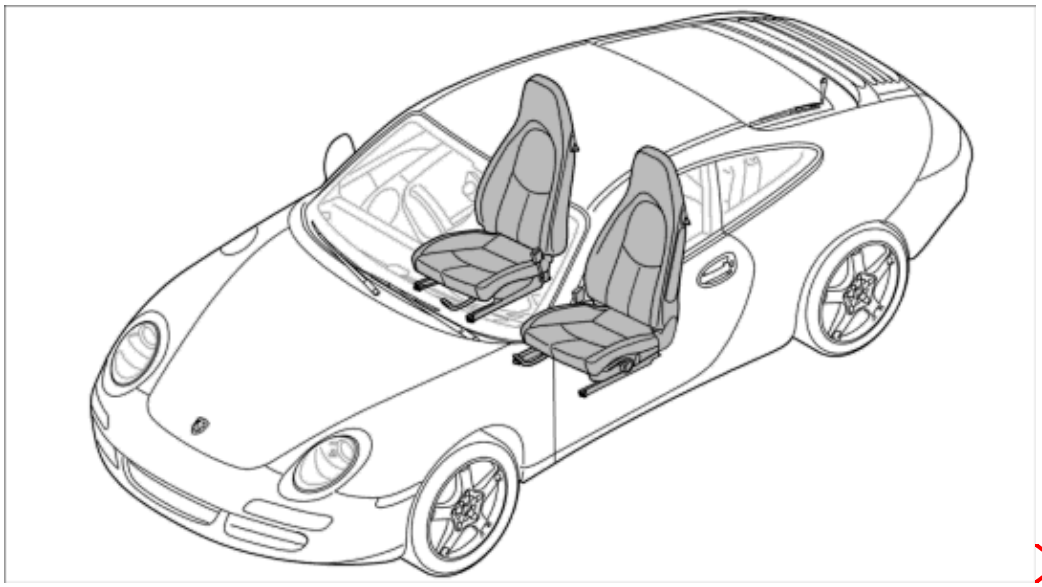


Installation Location:

Overview, removing and installing front seat

Note

Only for vehicles with electrically adjustable seat

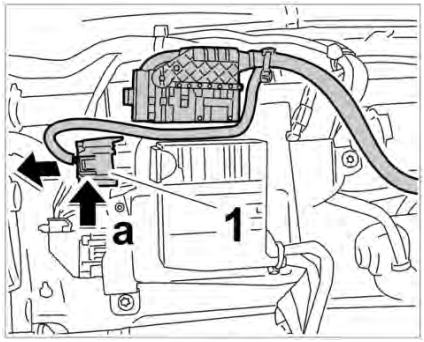


Disconnecting seat memory plug connection

1. Release electrical plug connection **-1-** by activating the locking tab **-arrow A-** and remove from seat memory control module **-arrow B-** .
2. Remove front seat.

Disconnecting the electrical plug connection of the AWS control module

Installation Location:



Overview, removing and installing front seat

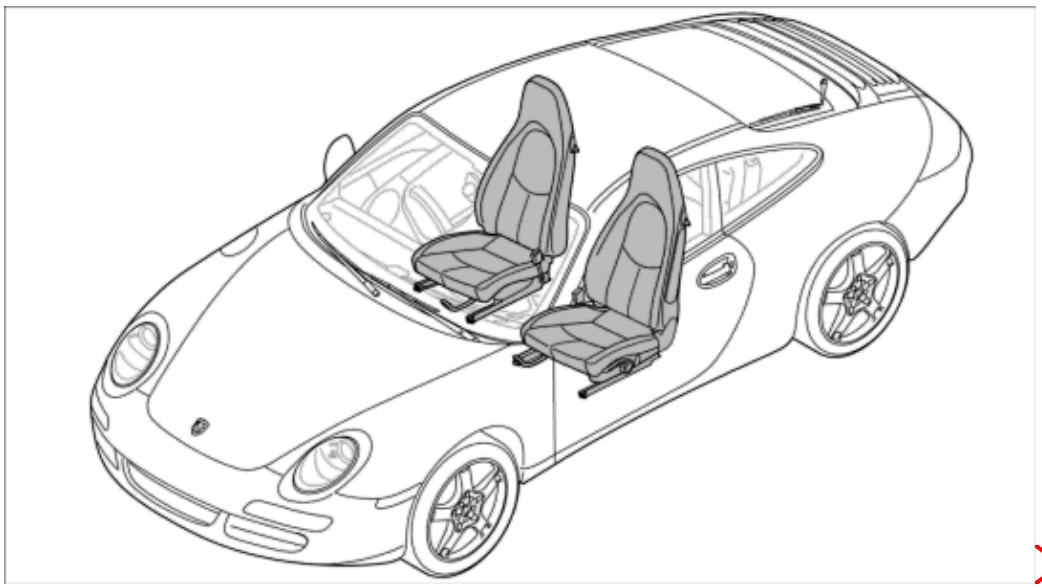
Note

- *Only for USA/Canada version vehicles.*

Note

- *Passenger's seat only.*

Disconnecting the plug connection of the AWS control module



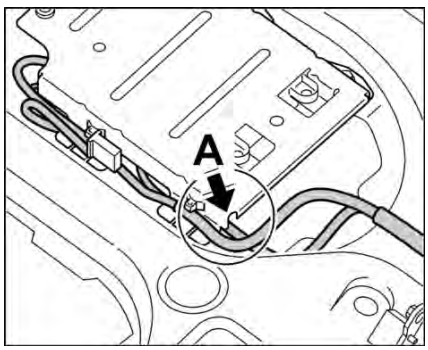
1. Release electric connector **-1-** by pressing the lug **-arrow a-** and pull off from control module.

top of page

Installing front seat

Fastening electric line

Installation Location:



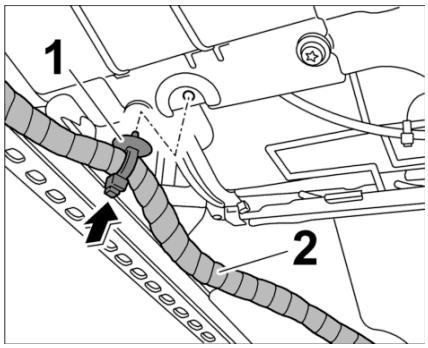
Overview, removing and installing front seat

WARNING

If the wiring at the telephone holder is not routed correctly, the wires can catch at the seat.

- **Danger of destroying/damaging wire harness for the telephone control unit**

→ The wire harness at the telephone holder must not be routed over the edge.



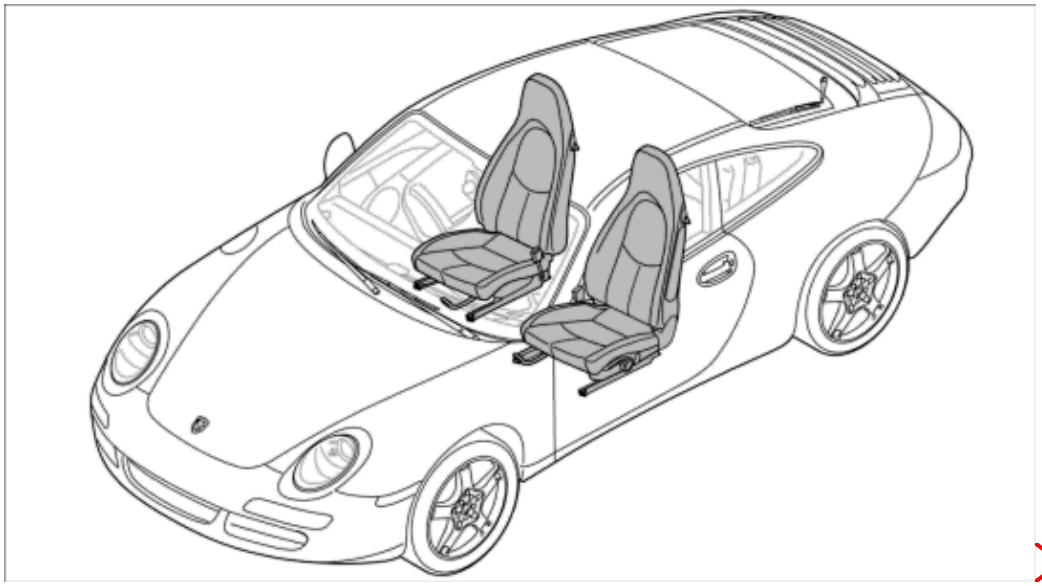
Routing of wire harness

Note

The routing of the wire harness for the control unit must be checked before installing the seat.
The wire harness must not be routed over the cover, but should be laid along side the cover **-A-** .

Note

Before installing and securing the front seat, make sure the electric lines are not pinched or damaged.

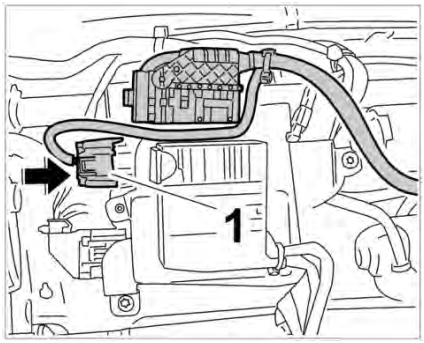


Fastening electric line

1. Place front seat in car and tilt backwards.
2. Check tie-wrap **-1-** , replace tie-wrap **-1-** if necessary.
3. Clip wire harness **-2-** into place.

Locking the electrical plug connection of the AWS control module

Installation Location:



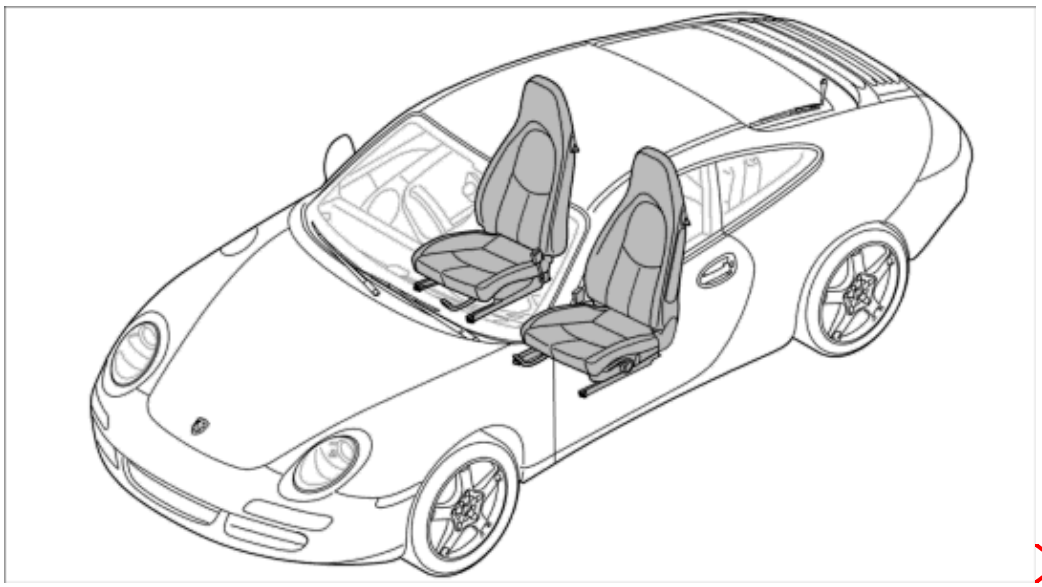
Overview, removing and installing front seat

Note

- *Only for USA/Canada version vehicles.*

Note

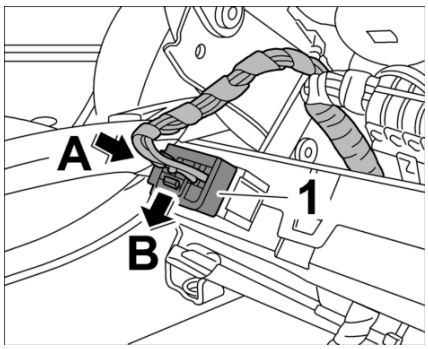
- *Passenger's seat only.*



Locking the plug connection of the AWS control module

1. Push electric connector **-1-** onto AWS control module until it is felt to engage.

Connecting electrical plug connection (power seat)

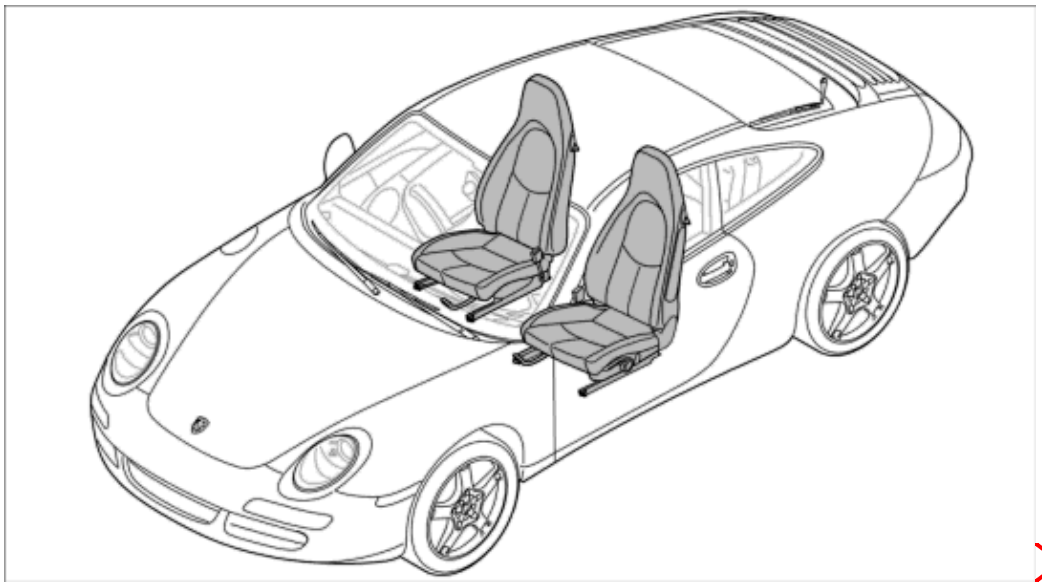


Installation Location:

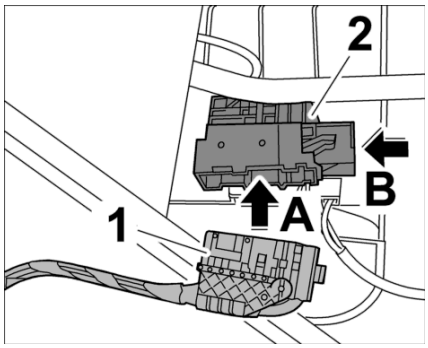
Overview, removing and installing front seat

Note

Only for vehicles with electrically adjustable seat



Locking plug connection for seat memory

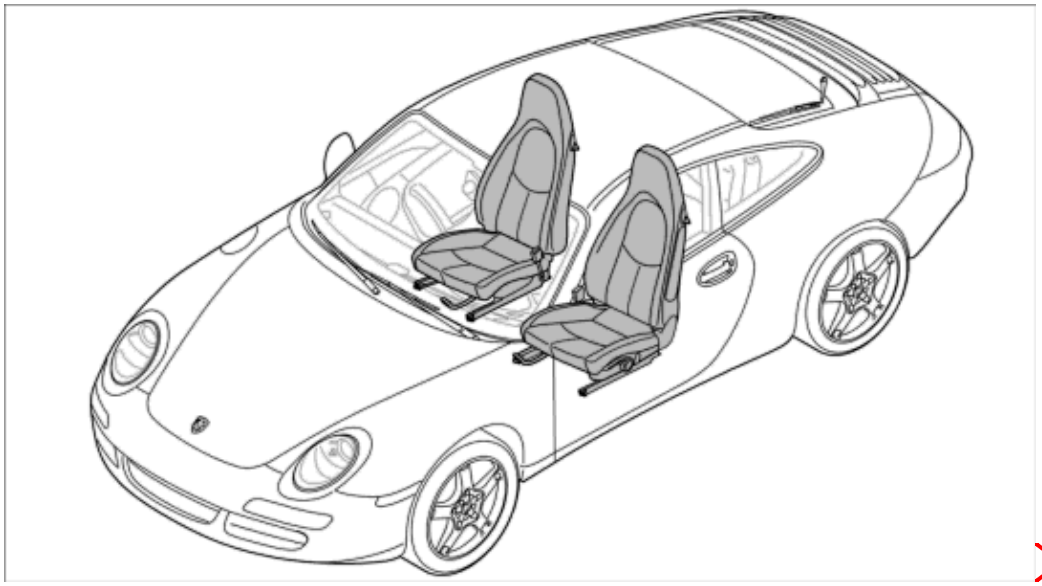


1. Push in electrical plug connection **-1-** **-arrow A-** until the locking tab audibly engages **-arrow B-** .

Locking central plug

Installation Location:

Overview, removing and installing front seat



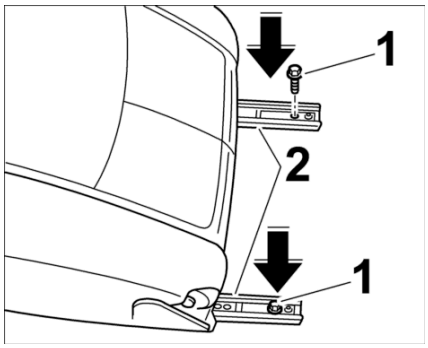
Locking central plug

1. Join the plug connection **-1-** **-arrow A-** , press in plug connector locking device **-2-** on the side **-arrow B-** .

Tightening seat screws at rear

Installation Location:

Overview, removing and installing front seat



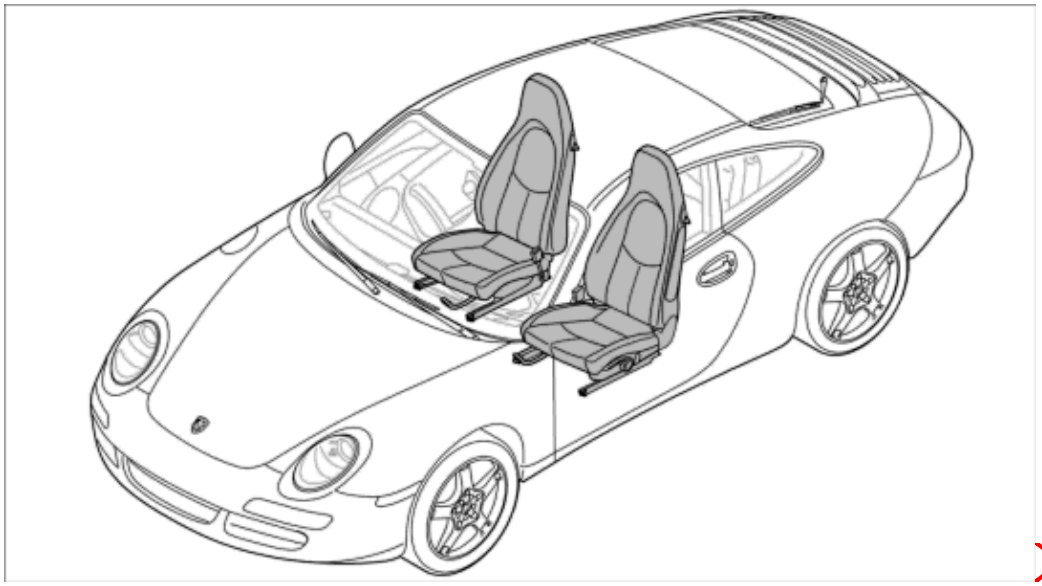
DANGER

Loosen the safety-related threaded joint.

- **Danger of injury if front seat is not screwed down correctly.**

→ Always replace fastening screws for the front seat after customer service and reworking.

→ It is not permissible to make alterations to the micro-encapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).



Tightening seat screws at rear

1. Tip seat forwards and position seat rails on the seat baseframe.
2. Screw left and right fastening screws **-1-** into seat bracket **-2-** and tighten to specified tightening torque → **Micro-encapsulated: 50 (37 ftlb.) Nm** .

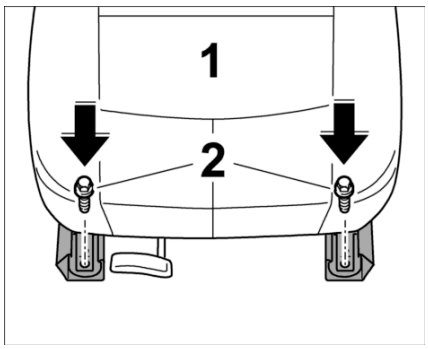
Tightening seat screws at the front

Installation Location:

Overview, removing and installing front seat

DANGER

Loosen the safety-related threaded joint.



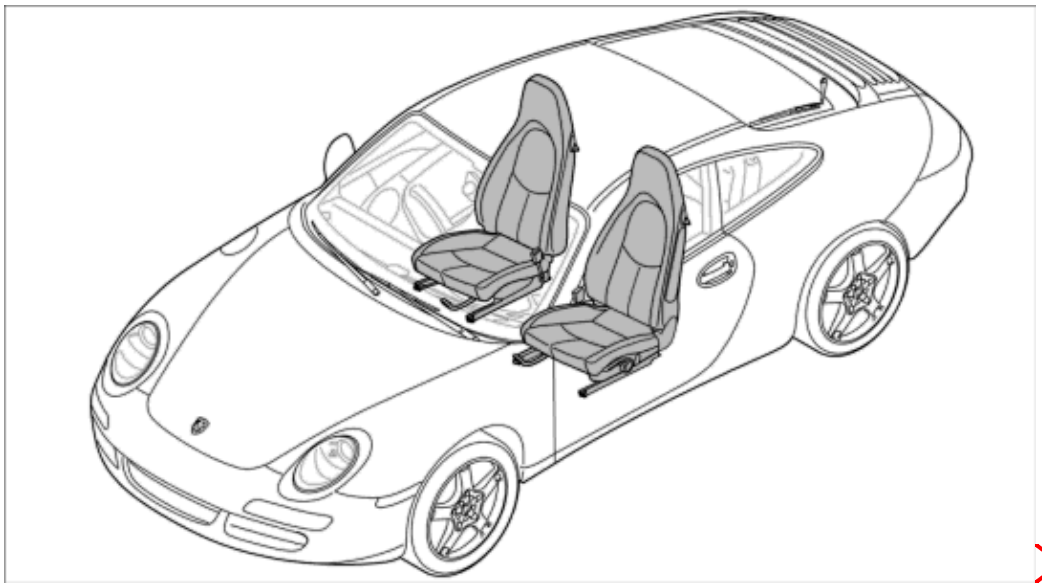
- **Danger of injury if front seat is not screwed down correctly.**

→ Always replace fastening screws for the front seat after customer service and reworking.

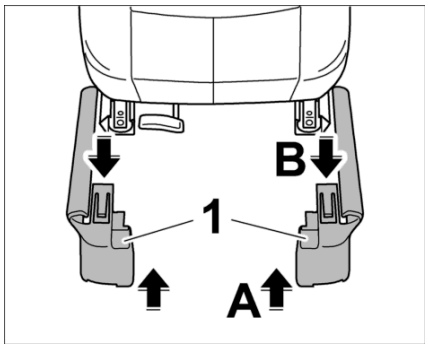
→ It is not permissible to make alterations to the micro-encapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).

1.

Connect the battery . → *Work instructions after disconnecting the battery*



Tightening seat screws at the front



2. Move seat **-1-** to rear end position and screw down front fastening screws **-2-** to specified tightening torque →**Micro-encapsulated: 50 (37 ftlb.) Nm** .

Fit seat rail cover

Installation Location:

Overview, removing and installing front seat

Fitting seat rail cover

1. Push seat rail cover **-1-** into front end of the left and right seat rails **-arrow A-** until the locking tab audibly engages **-arrow B-** .

top of page

Subsequent work

Subsequent work

DANGER
Incorrect information for AWS control module.

- **Passenger's airbag is triggered differently.**

→ If the passenger's seat was removed and re-installed, the AWS control module must be calibrated.
→ If the seat bracket was replaced, the AWS control module must be calibrated.
→ If the AWS control module was replaced, the AWS control module must be calibrated.

Note

- *Only for USA/Canada version vehicles.*

1. Calibrate the AWS control module. →6968K2 Calibrating AWS control module

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

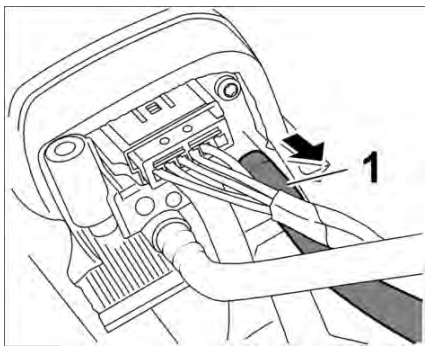
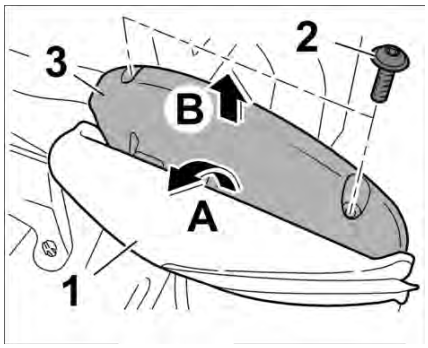
Removing air cushion for seat

Removing air cushion for seat

Installation Location:

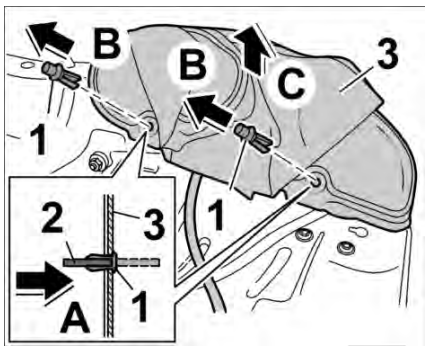


Installation position of air cushion for seat



Loosening support with compressor and air distributor valve

1. Unscrew the two fastening screws **-1-** on the support **-2-** .
2. Set support **-2-** with connected motor and air cushion control valve aside.

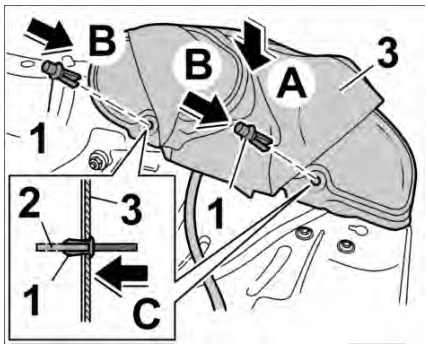


Pulling hose off the air cushion control valve

3. Pull the white hose **-1-** off the air cushion control valve.

Unscrewing fastening screws on the air cushion support plate

4. Fold the air cushion for the seat **-1-** aside **-Arrow A-** and unscrew the two fastening screws **-2-** on the air cushion support plate **-3-** .
5. Take air cushion support plate **-3-** off **-Arrow B-**



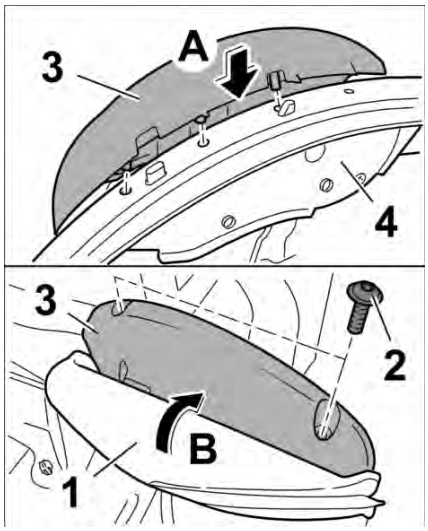
Removing air cushion for seat

6. Push the pins **-2-** of the two expanding clips **-1-** back (**-Arrow A-**) and remove the expanding clips **-1-** **-Arrows B-** .
7. Remove air cushion for seat (**-3-**).

top of page

Installing air cushion for seat

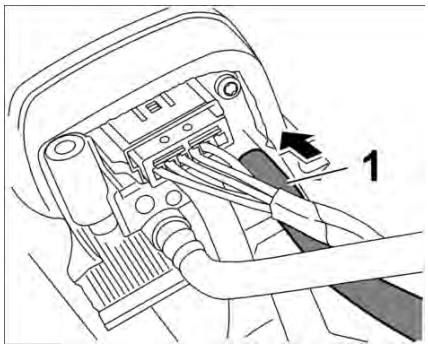
Installing air cushion for seat



Installing air cushion for seat

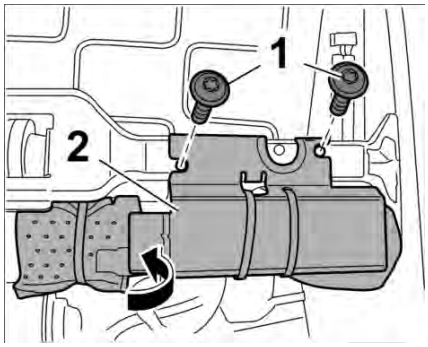
1. Position air cushion for seat **-3-** on the air cushion support plate **-Arrow A-** .

Note



The air cushion for the seat is fastened only with the rear air cushion on the air cushion support plate.

2. Secure the air cushion for the seat **-3-** . Use the two expanding clips **-1-** to fasten **-Arrows B-** it. To do this, the pins **-2-** must be forced into the expanding clips **-1-** by pressing **-Arrow C-** .



Tightening the fastening screws on the air cushion support plate

3. The air cushion support plate **-3-** must be fitted into the seat frame **-4-** by inserting **-Arrow A-** the guides into the seat frame.
4. Fasten the air cushion support plate **-3-** with the two fastening screws **-2-** .
5. The air cushion for the seat **-1-** must be folded over **-Arrow B-** and aligned with the air cushion support plate **-3-** .

Pushing hose onto the air cushion control valve

6. Push the white hose **-1-** onto the air cushion control valve.

Securing support with compressor and air distributor valve

7. Position support **-2-** with connected motor and air cushion control valve and screw down with the two fastening screws **-1-** .

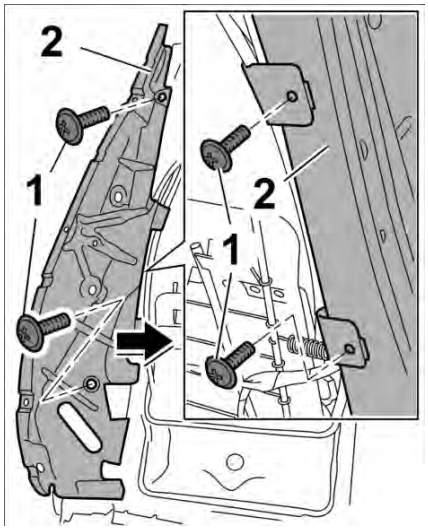
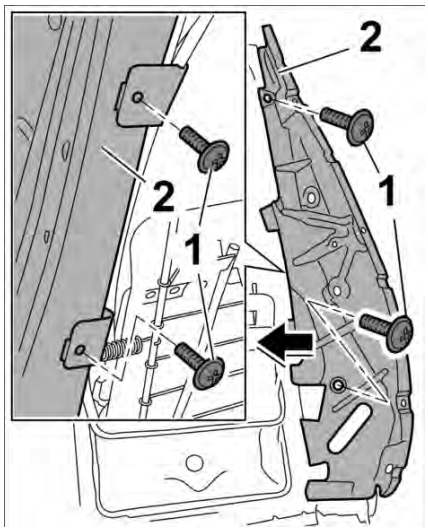
Disassembling backrest frame



Removing foam part

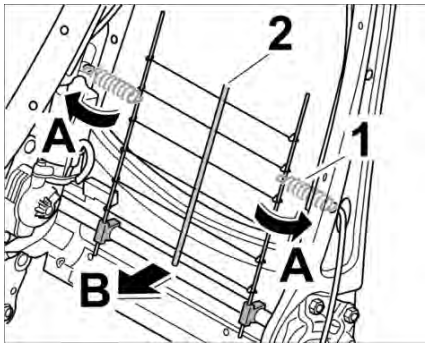
Taking off foam part



1. Remove foam part **-1-** at the headrest.

Removing supports for backrest side parts

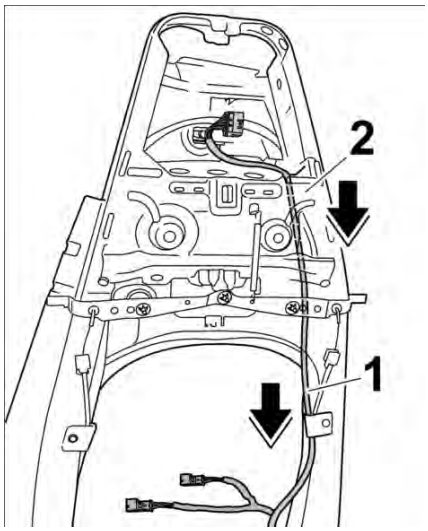
Removing support for right backrest side part



1. Unscrew fastening screws **-1-** and remove support for right backrest side part **-2-** .

Removing support for left backrest side part

2. Unscrew fastening screws **-1-** and remove support for left backrest side part **-2-** .



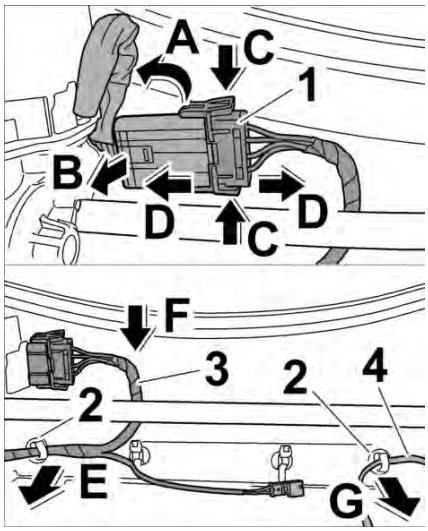
Removing inner spring on backrest frame

Removing inner spring on backrest frame

1. Disengage tension springs **-1-** at left and right on inner spring **-2-** (**-arrows A-**).
2. Unclip inner spring **-2-** on backrest frame at the drive shaft **-arrow B-** and remove inner spring.
3. Disengage tension springs **-1-** on the backrest frame.

Disconnecting wire harnesses on backrest frame

Pulling out wire harness for backrest



Note

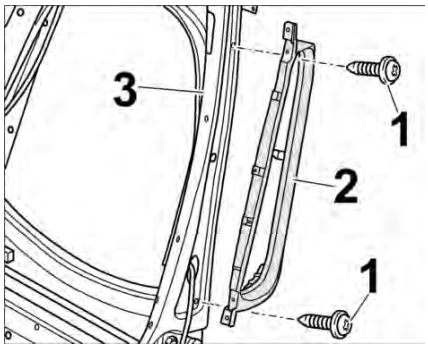
Only for vehicles with lumbar support.

Note

Make sure not to trap or damage the wire harness when pulling it through.

1. Pull wire harness for backrest **-1-** down out of the backrest frame **-2-** .

Disconnecting plug connection

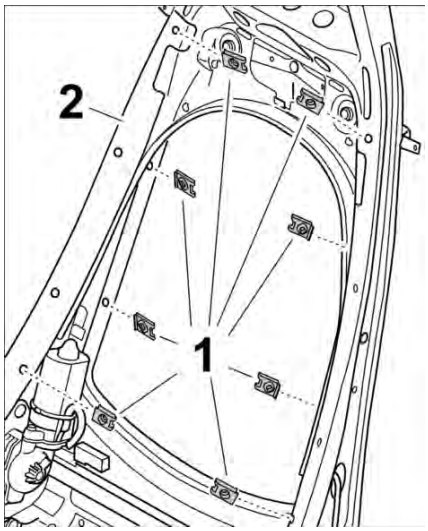


2. Turn plug connection **-1-** approx. 90° anti-clockwise **-arrow A-** and pull it off the backrest frame **-arrow B-** .
3. Release plug connection **-arrows C-** and disconnect it **-arrows D-** .

Note

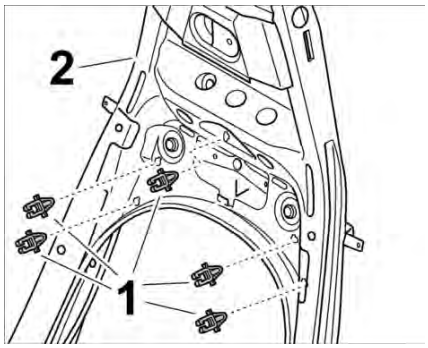
Make sure not to trap or damage the wire harness when pulling it through.

4. Press locking tabs on fixing clip **-2-** together and unclip it **-arrow E-** . Pull wire harness for backrest **-3-** down and out **-arrow F-** .
5. Press locking tabs on fixing clip **-2-** together and unclip wire harness for side airbag **-4-** from the backrest frame **-arrow G-** .



Removing frame for side airbag

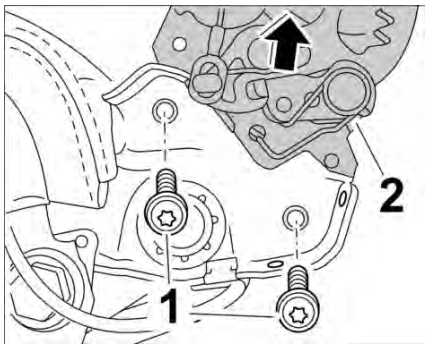
Removing frame for side airbag



1. Unscrew fastening screws **-1-** and unclip frame for side airbag **-2-** from the backrest frame **-3-** .

Disassembling backrest frame

Removing fastening nuts



1. Remove fastening nuts **-1-** from the backrest frame **-2-** , check them and replace if necessary.

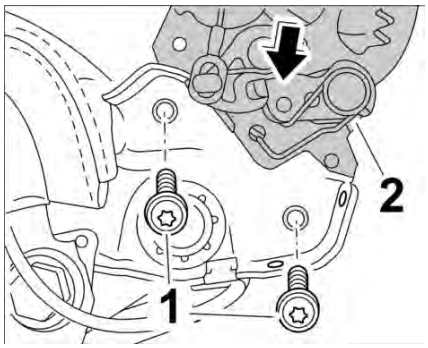
Removing fixing clips

2. Unclip fixing clips **-1-** from the backrest frame **-2-** , check them and replace if necessary.

Removing backrest frame

Removing backrest frame

Note



Two persons are needed to remove and install the backrest frame.

1. Secure backrest frame **-2-** in upright position.
2. Unscrew fastening screws **-1-** on left and right and remove backrest frame **-2-** up out of the seat frame.

top of page

Assembling backrest frame

Installing backrest frame

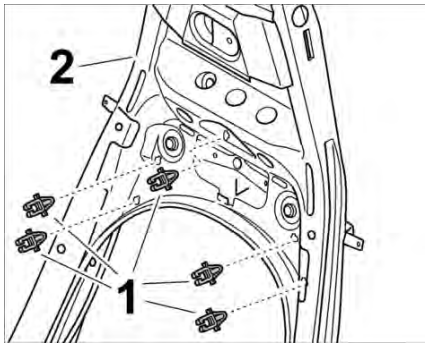
Installing backrest frame

DANGER

Loosen the safety-related threaded joint.

- **Danger of injury if front seat is not screwed down correctly.**

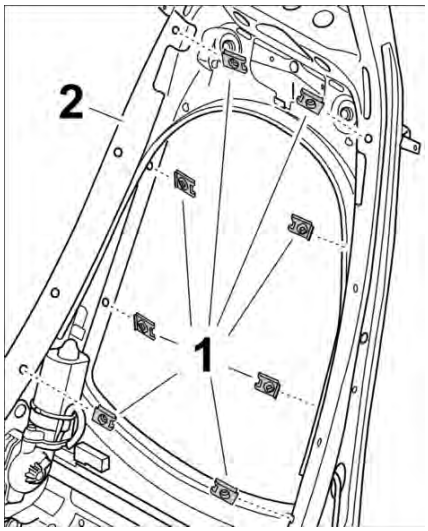
→ Always replace fastening screws for the front seat after customer service and reworking.



→ It is not permissible to make alterations to the micro-encapsulated screws (e.g., use lubricant, loosen bolts, and screw them down again).

Note

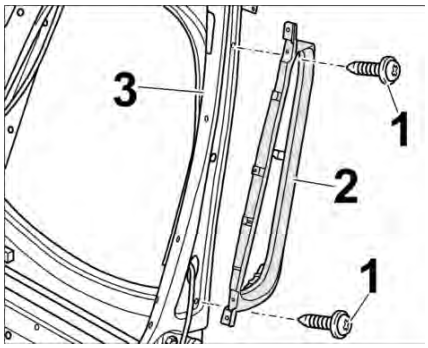
Two persons are needed to remove and install the backrest frame.



1. Fit backrest frame **-2-** into the seat frame, position it correctly and secure with the fastening screws **-1-** . Tightening torque →**Tightening torque: 34 (25 ftlb.) Nm +/-4 (3 ftlb.) Nm**

Assembling backrest frame

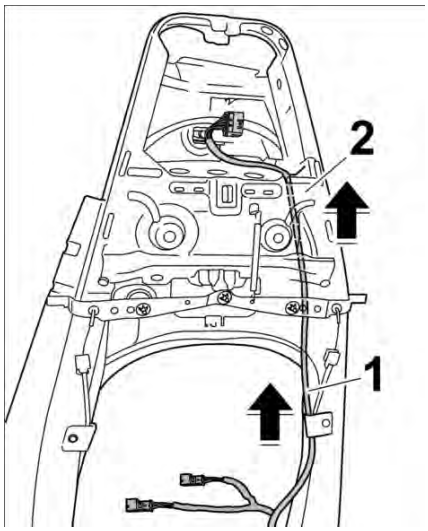
Pressing in fixing clips



1. Press in fixing clips **-1-** on the backrest frame **-2-** .

Screwing on fastening nuts

2. Screw fastening nuts **-1-** onto the backrest frame **-2-** .



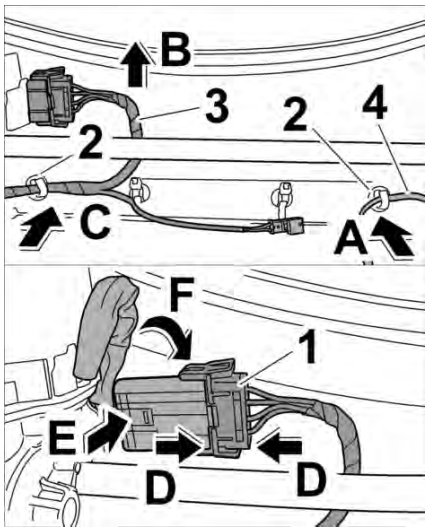
Installing frame for side airbag

Installing frame for side airbag

1. Clip frame for side airbag **-2-** to backrest frame **-3-** and secure with the fastening screws **-1-** .

Securing wire harnesses on backrest frame

Pulling through wire harness for backrest



Note

Only for vehicles with lumbar support.

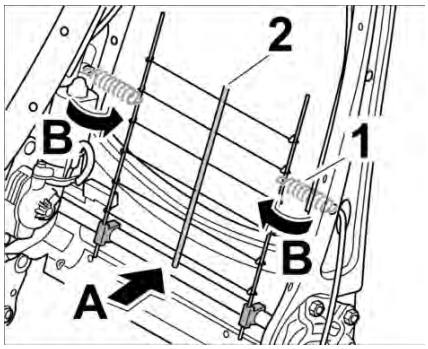
Note

Make sure not to trap or damage the wire harness when pulling it through.

1. Pull wire harness for backrest **-1-** up into the backrest frame **-2-** .

Securing wire harness for backrest

2. Press fixing clip **-2-** on wire harness for side airbag onto the backrest frame **-arrow A-** .

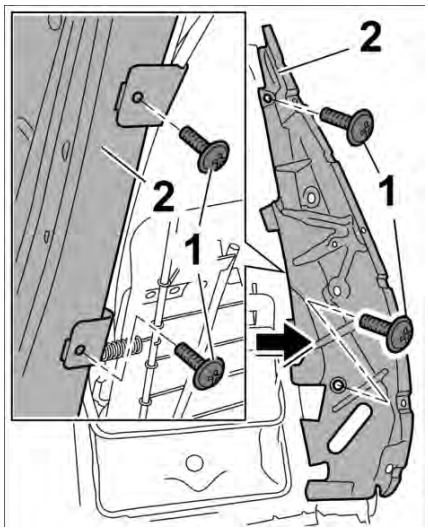


Note

Make sure not to trap or damage the wire harness when pulling it through.

3. Pull wire harness for backrest **-3-** through **-arrow B-** and press in fixing clip **-2-** (**-arrow C-**).
4. Push plug connection **-1-** together **-arrows D-** until it engages securely.

5. Insert plug connection **-1-** into the backrest frame **-arrow E-** and turn it clockwise by approx. 90° **-arrow F-** .

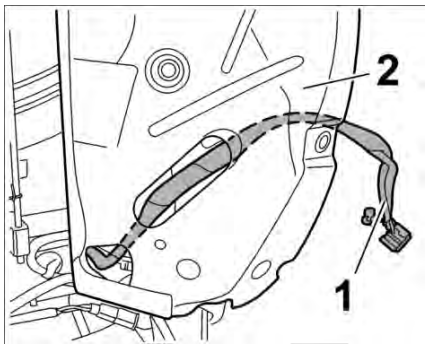


Installing inner spring on backrest frame

Engaging inner spring on backrest frame

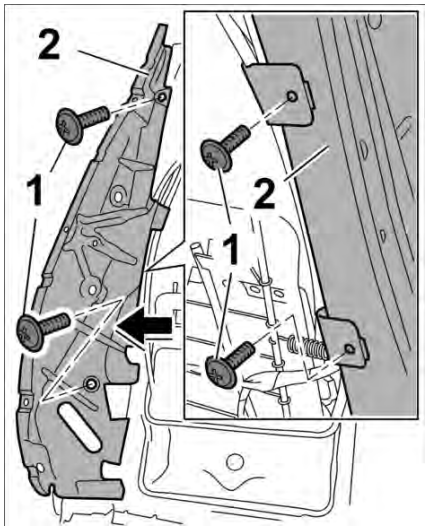
1. Engage tension springs **-1-** in the backrest frame.
2. Clip in inner spring **-2-** on lower part of backrest frame at the drive shaft **-arrow A-** .
3. Engage tension springs **-1-** in the inner spring **-2-** on the backrest frame **-arrow B-** .

Installing supports for backrest side parts



Installing support for left backrest side part

Note

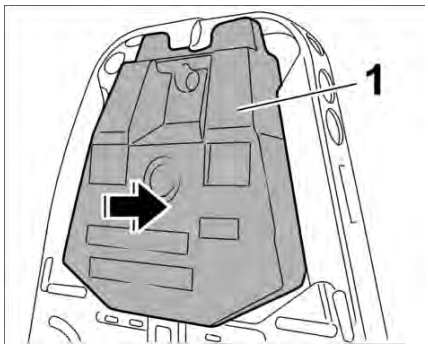


Observe hose routing!
In vehicles with lumbar support, make sure the hoses are routed correctly in the area of the backrest side support.

1. Insert support for left backrest side part **-2-** and secure with the fastening screws **-1-** .

Routing wire harness for side airbag

2. Route wire harness for side airbag **-1-** as shown behind the backrest side part support **-2-** .



Installing support for right backrest side part

Note

Observe hose routing!
In vehicles with lumbar support, make sure the hoses are routed correctly in the area of the backrest side support.

3. Insert support for right backrest side part **-2-** and secure with the fastening screws **-1-** .

Fitting foam part

Fitting foam part

1. Fit foam part **-1-** to the headrest.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

Installing air cushion control valve

Installing air cushion control valve

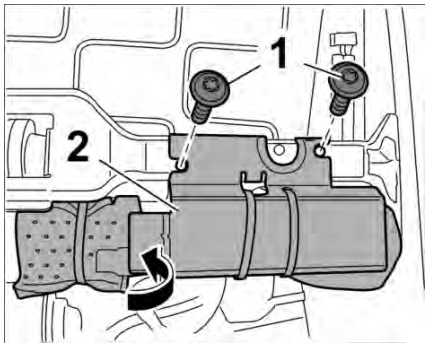
1. Position air cushion control valve **-2-** and tighten with the fastening screw **-1-** .



Pushing on connector and hoses onto air cushion control valve

Note

Observe the installation position of the hoses!
Push on the blue hose onto the connection marked **B** and push on the red hose onto the connection marked **R**.

2. Push on the three hoses **-2-** onto the air cushion control valve.
3. Push on connector **-1-** onto air cushion control valve until this engages audibly.

Securing support with compressor and air distributor valve

4. Position support **-2-** with connected motor and air cushion control valve and screw down with the two fastening screws **-1-** .

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der**

Zusammenhang von Text und zugehörigem Bild verloren geht.
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Programming control unit

Reading out and printing out values

 WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

 **Note**

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select the **vehicle type**.
3. Move from **vehicle type** to the list of **control units** and press >> .
4. Select the relevant **control unit** using the cursor keys and press >> .

5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press the >> key.
7. The message **Codes successfully read out** appears on the screen of the Porsche System Tester. Press >> .
8. Switch off ignition and replace control unit.
9. Switch on ignition. Select the vehicle type, choose the **Special functions** menu, start **Vehicle handover** and follow the instructions on the Tester.
10. Erase **All fault memories**.
11. Using the >> key, move from the vehicle type to the list of control units. Perform the automatic control unit search.
12. After replacing the control unit, the data that was previously read out (see Item 6) is reloaded under the **Write in data** menu. Press >> .
13. The System Tester displays the message **Coding write-in complete**. Press >> .
14. Go to the **Coding** menu by pressing >> , compare the coding with the vehicle equipment and code it if necessary.
15. Check the operation of the memory switch, read out the fault memory and erase it if necessary.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration**

puisse être erronée sur l'impression papier.
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Installation Location:

Installation position of padding

Note

Sealing surface of padding must be clean and free of grease.

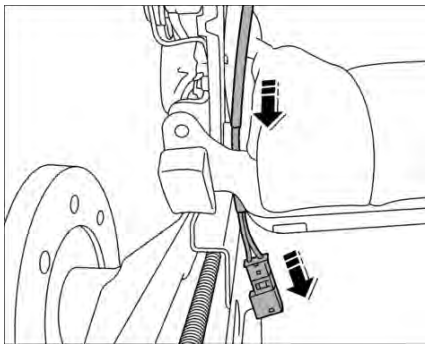
Applying adhesive

1. Apply adhesive **-1-** to the marked area of the padding **-2-** .

Installing padding

2. Place padding **-2-** on the cushion carrier **-3-** and align it with the cushion carrier.
3. Engage padding **-1-** in the cushion carrier at the sides.

Securing wire harness for backrest seat heating

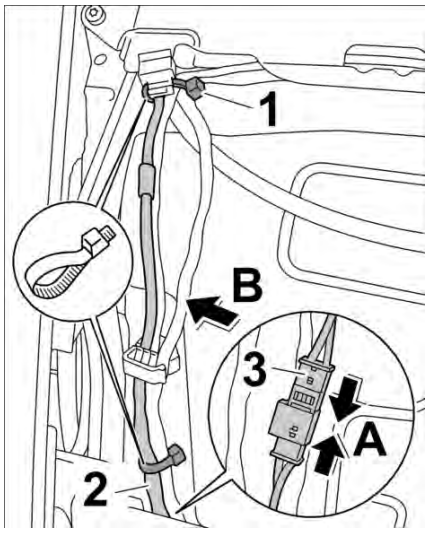


Installation Location:

Installation position of padding

Note

Make sure not to trap or damage the wire harness when pulling it through.

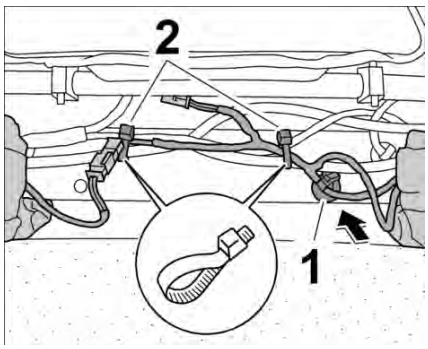


Pulling wire harness through

Note

Only for vehicles with heated seats.

1. Pull wire harness through the seat and backrest frame.



Securing wire harness on seat frame

2. Secure wire harness on seat frame.

2.1. Connect electric plug connection **-3-** for backrest seat heating **-arrows A-** .

2.2. Engage wire harness **-2-** (**-arrow C-**) and secure with new tie-wraps **-1-** .

Securing wire harness on backrest frame

3.

Secure wire harness on backrest frame.

3.1. Press in fixing clip **-1-** .

3.2. Secure wire harness with new tie-wraps **-2-** .

Checking seat following removal

1. Connect the removed seat to the vehicle's wiring harness via **test cable 9745** and **test cable 9745/1**.
2. Connect electric plug to control module trim panel. →721619 Removing and installing control module trim panel - section on "Installing"
3. Connect the battery. →2706IN IN -Work instructions after disconnecting the battery
4. Switch on ignition.
5. Carry out a function check on the seat components.
6. Switch off ignition after function test and disconnect battery.
7. Disconnect **test cable 9745** and **test cable 9745/1**.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

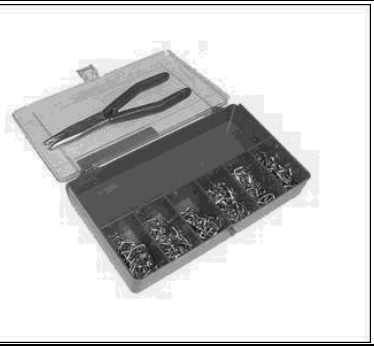
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Subsequent work

Removing creases in the cover

ATTENTION

Danger of material damage if excessive heat is applied.

→ If creases have formed, only short partial warming with the hot-air gun is permissible.

→ The hot-air temperature of approx. 50 degrees Celsius (122 Fahrenheit) must always be observed.

If creases have formed in areas of the cover, partially heat them with the hot-air gun and smooth out with the tool.

Subsequent work

Removing creases in the cover

 ATTENTION

Danger of material damage if excessive heat is applied.

→ If creases have formed, only short partial warming with the hot-air gun is permissible.

→ The hot-air temperature of approx. 50 degrees Celsius (122 Fahrenheit) must always be observed.

If creases have formed in areas of the cover, partially heat them with the hot-air gun and smooth out with the tool.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

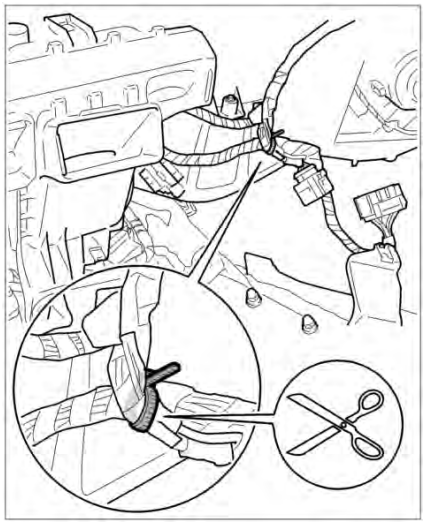
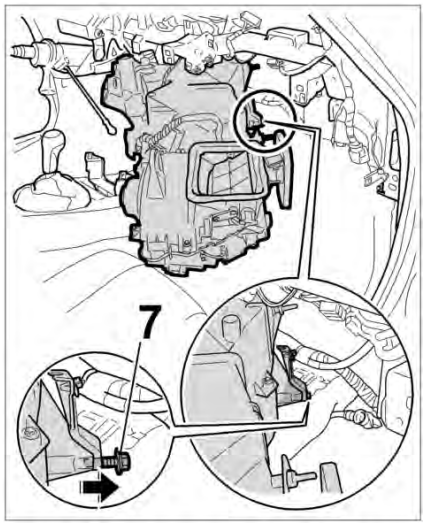
Lifting heater/air-conditioning unit forward under the dashboard bracket

13. Carefully lift heater/air-conditioning unit forward with a screwdriver under the right side of the dashboard bracket.



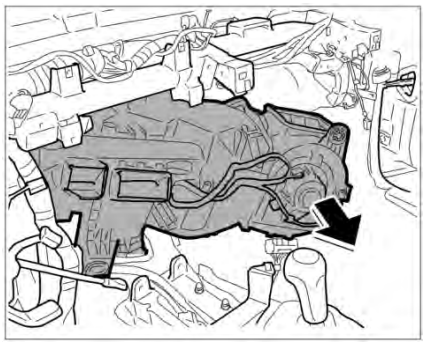
Releasing electric plug connection

14. Release lower plug connection on heater/air-conditioning unit **-a-** and unplug.



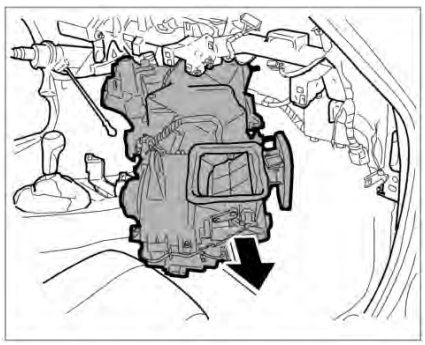
Releasing electric plug connection

15. Release upper plug connection on heater/air-conditioning unit **-a-** and unplug.



Cutting tie-wraps

16. Cut tie-wraps of electric line (vehicle wire harness to heater/air-conditioning unit wire harness) with side cutters. Remove vehicle wire harness.



Unscrewing holder for B+ line

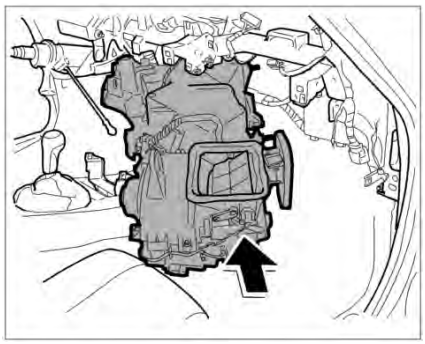
17. Pull air conditioner forward on the right side, unscrew fastening screw -7- for B+ line holder and remove holder for heater/air-conditioning unit.

Pulling out heater/air-conditioning unit

18. Pull/push heater/air-conditioning unit as far as possible in direction of passenger's seat.

Heating/air-conditioning unit

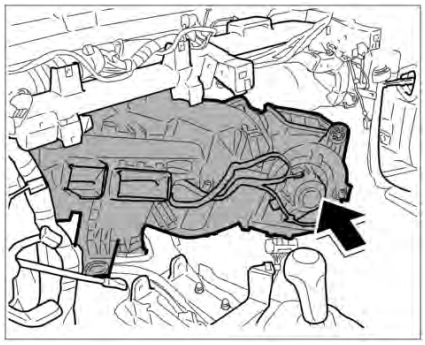
19. Remove heater/air-conditioning unit from passenger compartment via passenger's door.



top of page

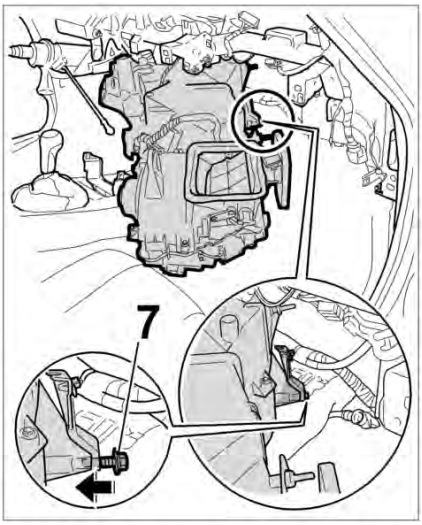
Installing heating/fresh air unit.

Installing heating/fresh air unit



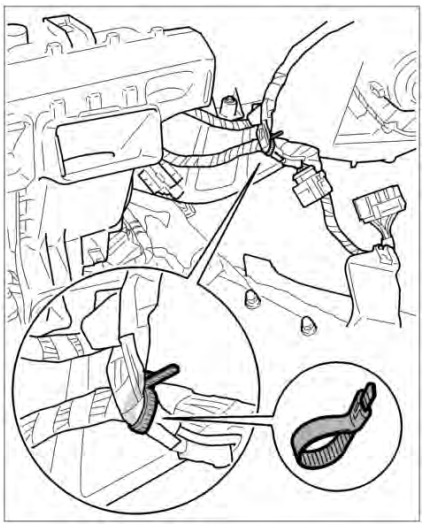
Note

Do not remove the plugs until just before installing the expansion valve.
Check the condition of foam parts for damage; if in doubt replace.



Placing heater/air-conditioning unit in the vehicle

1. Insert heater/air-conditioning unit in the vehicle over the passenger's side.

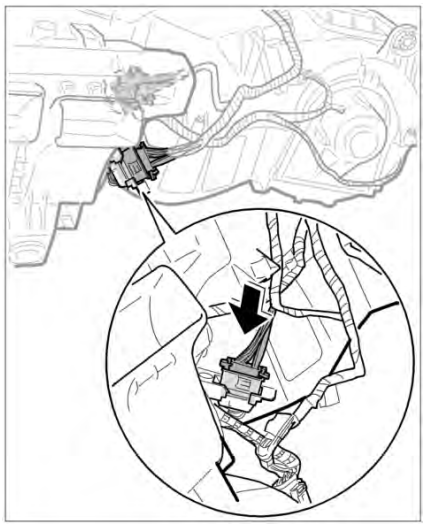


Positioning heater/air-conditioning unit

2. Lift heater/air-conditioning unit over the centre console and position under dashboard bracket.

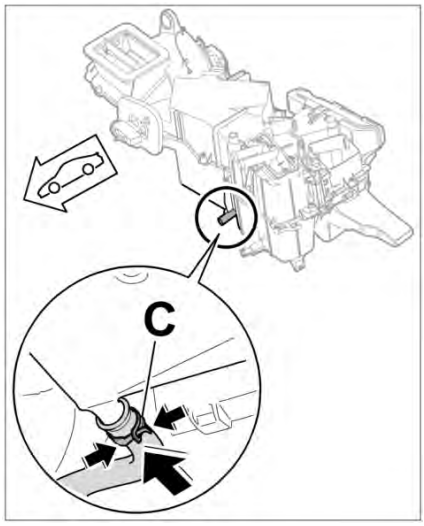
Tightening holder for B + lead

3. Position holder for the B+ line on the heater/air-conditioning unit and tighten with the fastening screw -7- . →**Tightening torque: 1.7 (1.5 ftlb.) Nm**



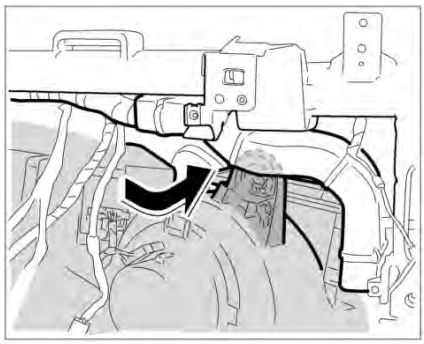
Fastening electric line

4. Lay electric line from vehicle wire harness to heater/air-conditioning unit wire harness and fix with a tie-wrap.



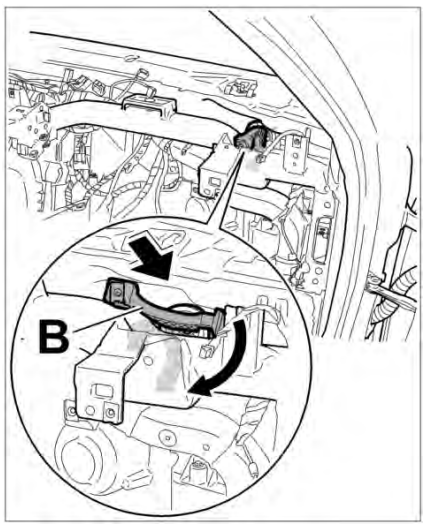
Connecting upper electrical plug connection

5. Connect upper electric plug connection at heater/air-conditioning unit until it is felt to engage.



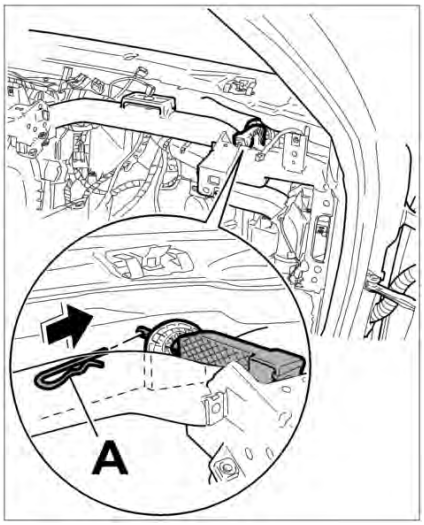
Connecting lower electrical plug connection

6. Connect upper electric plug connection at heater/air-conditioning unit until it is felt to engage.



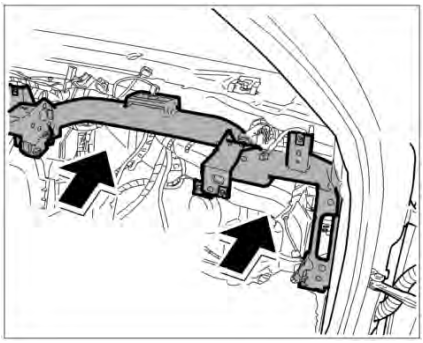
Fixing water drain hose

7. Check water drain hose for damage; if drain hose shows no sign of damage, connect hose to the drain on heater/air-conditioning unit and fix with the clamp **-C-** .



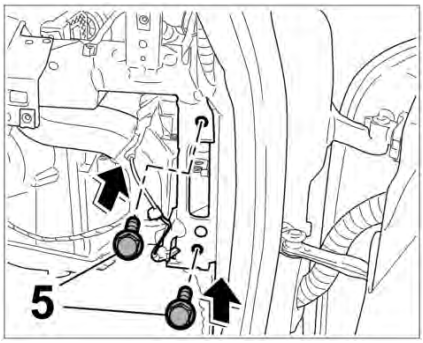
Positioning heater/air-conditioning unit

8. Push heater/air-conditioning unit into position under right side of dashboard bracket in the direction of firewall.



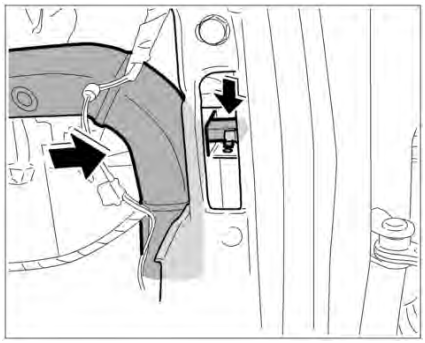
Positioning holder for heater/air-conditioning unit

9. Guide holder **-B-** for the heater/air-conditioning unit over the dashboard bracket, push through the mounting of the heater/air-conditioning unit and turn through 90°.



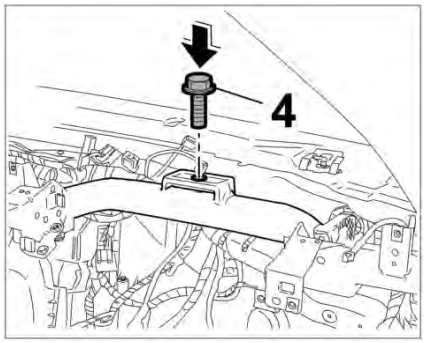
Holder for heater/air-conditioning unit

10. Fix holder for heater/air-conditioning unit with cotter pin **-A-** .



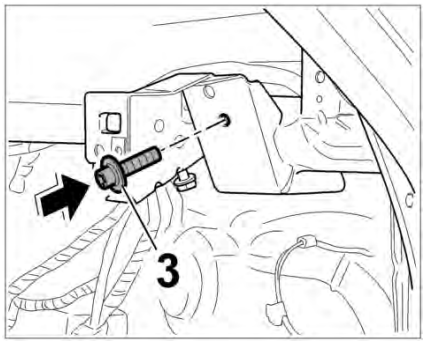
Pushing dashboard bracket forwards

11. Push dashboard bracket forwards while lifting the heater/air-conditioning unit and taking care that no electric lines get trapped.



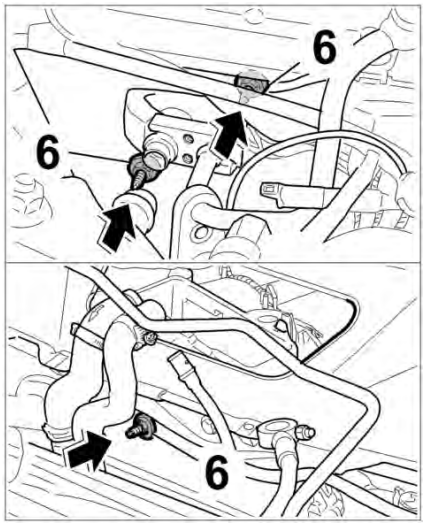
Securing dashboard bracket

12. Screw down dashboard bracket with the two fastening screws **-5-** . →**Tightening torque: 23 (17 ftlb.) Nm**



Clipping in plastic holders

13. Clip in the plastic holders for the electric main wire harness to the dashboard bracket.

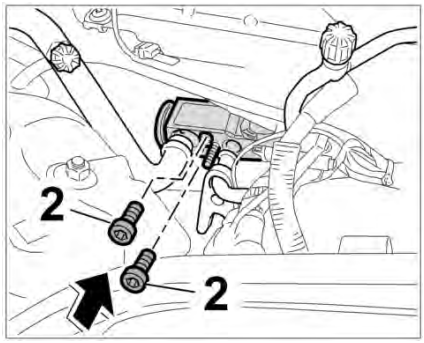


Securing dashboard bracket

14. Secure dashboard bracket with the fastening screw **-4-** . →**Tightening torque: 9.7 (7.0 ftlb.) Nm**

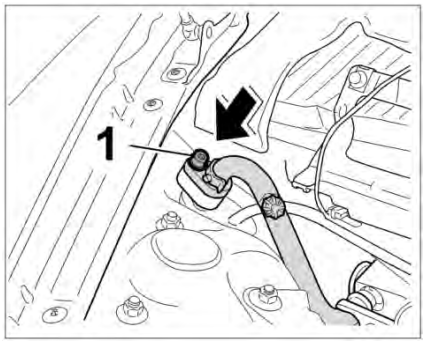
Securing holder for heater/air-conditioning unit

15. Screw down holder of heater/air-conditioning unit with the fastening screw **-3-** . →
    Tightening torque: 3.5 (2.5 ftlb.) Nm



Securing heater/air-conditioning unit to firewall

16. Slide the fastening bolts of the heater/air-conditioning unit through the firewall lid and tighten with the three fastening nuts **-6-** . →**Tightening torque: 9.7 (7.0 ftlb.) Nm**



Note

Do not remove the plugs until just before installing the expansion valve.
Check the condition of foam parts for damage; if in doubt replace.

Installing expansion valve

17. Install expansion valve and tighten with the two fastening screws **-2-** , replace sealing rings for refrigerant lines and wet them with refrigerant. →877019 Removing and installing expansion valve - chapter on "Installing" →**Tightening torque: 9 (6.5 ftlb.) Nm**

Positioning and securing refrigerant lines

18. Replace sealing rings for refrigerant lines and wet with refrigerant. Position refrigerant line and tighten with fastening screw **-1-** . →**M8: 14 (10.5 ftlb.) Nm**

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Subsequent work for the air-conditioning system regulator

1. Install left and right side cover for centre console. → *23 Removing and installing centre console cover - installing*

top of page

Coding air-conditioning regulator

Coding the air-conditioning control

Note

If the control unit for the air-conditioning control is replaced, it must be programmed using the **PIWIS Tester 9718**. This is to adapt the control unit to the vehicle and equipment.
During coding, it is essential to guarantee the power supply for the **PIWIS Tester 9718**. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The **PIWIS Tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the Porsche System Tester.

1. Connect the **PIWIS Tester 9718** to the vehicle and start the System Tester. Switch on ignition. >> continue.
2. Select vehicle type using the cursor keys. >> continue.
3. Select **air conditioner** with the cursor keys and press the >> key.
4. Select **Control unit replacement** with the cursor keys and press the >> key.
5. Select **Read out values** (codings) with the cursor keys and press the >> key.
6. The message **Codes successfully read out** appears on the screen of the Porsche System Tester. Press >> .
7. Switch off ignition, replace air conditioning control.
8. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
9. In the **Special functions** menu, erase **All fault memories** by pressing >> .
10. Carry out automatic search of control units.
11. In the menu **Write in data** >> , the data read-out is installed.
12. System Tester displays **Codes successfully written in**. Press >> .
13. Select **System test** with the cursor keys and press the >> key.
14. The Tester starts the **system test**, follow the instructions on the Tester.
15. Quit menu, carry out a test drive, and check operation of the air conditioning control. Read out fault memory.

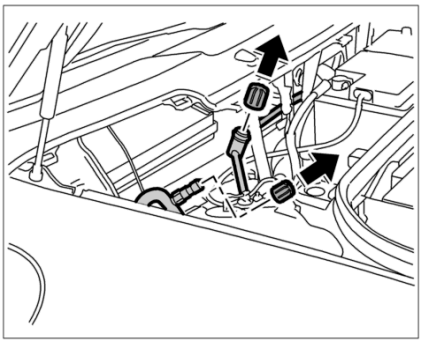
Draining and filling in refrigerant

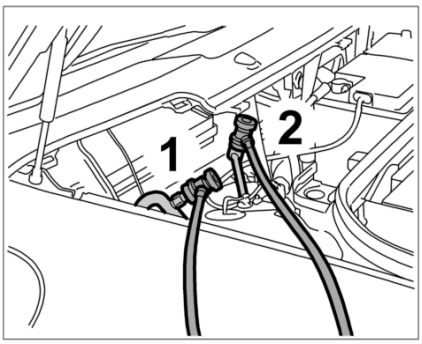


Assembly work involving the refrigerant system

Note

During all work on the air-conditioning system which necessitates opening the refrigerant system, the system contents must first be disposed of correctly!
Dirt and moisture must be kept out of the air-conditioning system's pipe system!
Thorough cleanliness must be ensured during all work!
System components must never be cleaned on the inside with hot steam!
Use only nitrogen for cleaning purposes!
When replacing a component, all openings must be closed off with suitable plugs!

General assembly sequence



The charging valves are located in the radiator tank at the front right.

Protective caps on charging valves

1. Screw off the protective caps on the charging valves.

Pay attention to sealing rings when disconnecting or connecting the hose connections!

Service connection

Before connecting the high-pressure **-2-** and low-pressure lines **-1-** to the vehicle, remove any refrigerant remaining in the lines by suction.

2. Connecting the high-pressure and low-pressure lines of the air-conditioning unit

Note

In the case of service units with transparent oil separator, read and take note of the oil level before removing the refrigerant.
Do not carry out this step with empty air-conditioning systems (pressure gauge approx. 0 bar), otherwise air will get into the refrigerant bottle.
In the case of cold vehicles, it may be necessary to repeat the suction procedure until all refrigerant has been removed from the air-conditioning system. This step is carried out automatically with some units.

2.1.

2.2. Let the engine run for a short while with the air-conditioning on, then connect the high-pressure and low-pressure lines of the air-conditioning unit.

2.3. Open the valves of the high-pressure and low-pressure lines.

3. Remove refrigerant by suction.

3.1. In the case of cold vehicles, it may be necessary to repeat the suction procedure until all refrigerant has been removed from the air-conditioning system. This step is carried out automatically with some units.

3.2. Wait for approx. 2 minutes after the service unit has switched itself off. If the pressure gauge reading rises above 0 bar, repeat the suction process.

3.3. The vehicle air-conditioning system is now completely empty. Necessary repairs, such as removing and fitting the dryer, can now be carried out.

3.4. The open air-conditioning system should not be left open unnecessarily, but must be closed again as quickly as possible after being opened.

3.5. Drain the extracted refrigerant oil into a measuring cup on the service unit and determine the volume.

4. Carrying out repairs

4.1. If the air-conditioning system has been open for a long time, a new dryer must be fitted. →875519 Removing and installing dryer

4.2. If necessary, reconnect high-pressure and low-pressure lines.

5. Evacuate the system and check it for leaks.

5.1. If the air-conditioning system has been opened, evacuation should last at least 20 minutes so that the moisture can evaporate and be removed by suction.

5.2. If the air-conditioning system has been open for a long time, evacuation can be carried out for up to 120 minutes.

5.3. Observe the pressure gauge for approx. 2 minutes. If the pressure rises, air is entering the vehicle air-conditioning system. The leak must be located and repaired. If the pressure remains constant, add refrigerant oil.

6. Adding refrigerant oil

6.1. For units without oil filling system:

6.2. Start the vacuum pump. At the start of this vacuum phase, add the measured quantity of refrigerant oil using an oil injector or a hose disconnected from the service unit. Reconnect the hose to the service unit immediately after adding the oil.

6.3.

For units with oil filling system: Add the measured quantity of refrigerant oil and wait for it to be taken in.

6.4. Do not allow any air to be taken in, otherwise point 5 must be repeated.

7. Evacuate.

7.1. If the air-conditioning system has been opened, evacuation should last at least 20 minutes so that the moisture can evaporate and be removed by suction.

7.2. If the air-conditioning system has been open for a long time, evacuation can be carried out for up to 120 minutes.

7.3. In the case of units with fitted oil filling system, add refrigerant oil now.

8. Filling the air-conditioning system

8.1. Using the service unit, add the refrigerant quantity stated in the manual into the air-conditioning lines. → *Technical data for air-conditioning system*

8.2. As refrigerant usually flows instead of being pumped, it may not be possible - especially if the vehicle is warm and the service unit cold - to add the entire quantity. If this is the case, switch the engine and the air-conditioning on. Wait for the suction pressure to fall below 2 bar. Now open the low-pressure valve on the unit slowly and carefully until the remaining quantity has been added.

 ATTENTION

Low-pressure reading too high in refrigerant circuit.

- **Destruction of air-conditioning compressor.**

→ Do not allow the low-pressure gauge to exceed 3 bar, otherwise liquid refrigerant can get onto the suction side of the compressor and destroy it.

8.3.

9. Add the refrigerant from both connection hoses to the air-conditioning system in the vehicle.

9.1. The refrigerant in the high-pressure and low-pressure lines belongs to the filling capacity of the refrigerant in the air-conditioning system in the vehicle.

9.2. Close the valve on the high-pressure line and disconnect it from the vehicle.

9.3. Start the engine and air-conditioning system. When the pressure on both pressure gauges sinks below 2 bar, close the valve on the low-pressure line and disconnect it from the vehicle.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

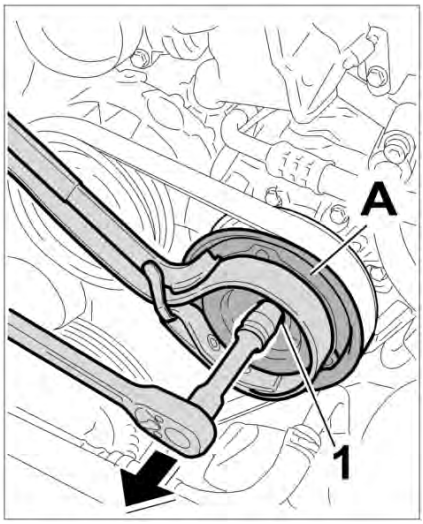
Remove drive belt. →137819 Removing and installing drive belt - chapter on "Removing"

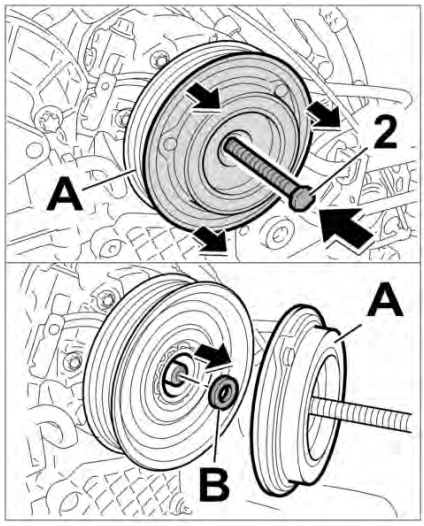
top of page

Removing the magnetic coupling



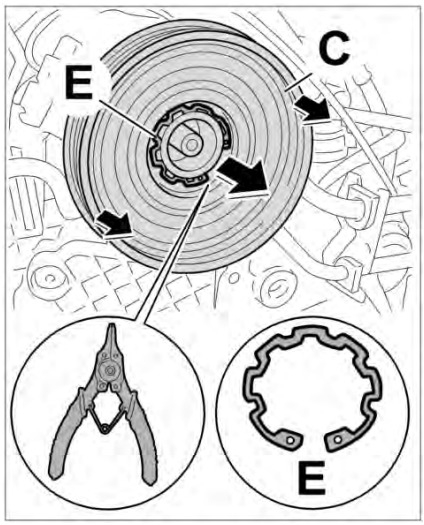
Removing the magnetic coupling

Installation Location:



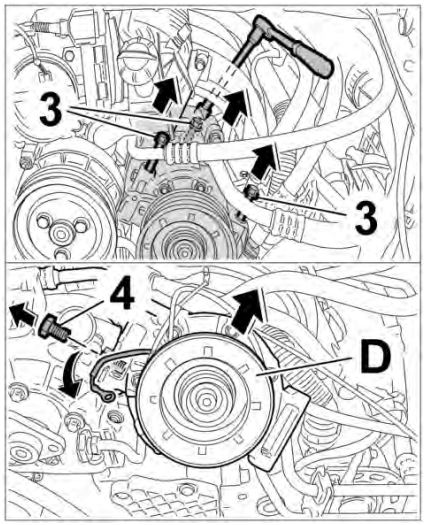
Overview

A - Pressure plate
B - Spacer
C - Pulley
D - Solenoid coil
E - Seeger circlip ring for pulley
F - Seeger circlip ring for solenoid coil



Loosen pressure plate mount

1. Use a commercially available strap wrench to securely hold the pressure plate **-A-** on the air-conditioning compressor, and undo the fastening screw **-1-** .

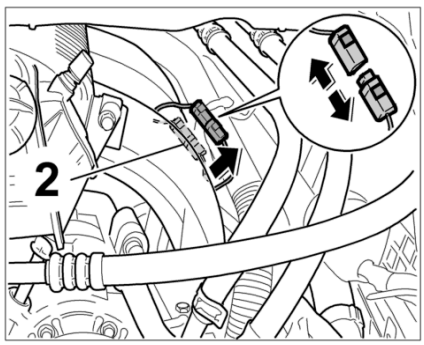


Removing pressure plate

2. Screw in an M8 screw **-2-** into the thread of the pressure plate until the pressure plate **-A-** can be removed by hand.
3. Take off spacers **-B-** behind the pressure plate.

Removing Seeger circlip ring for pulley

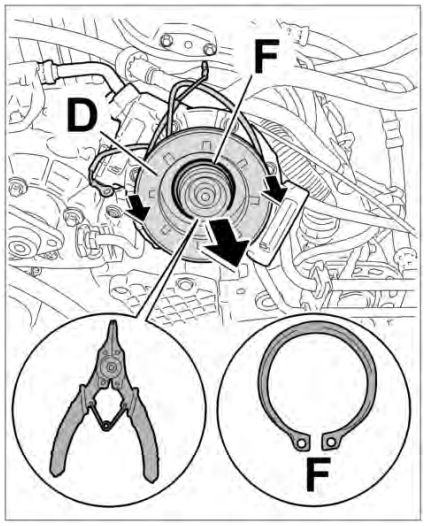
4. Use a Seeger circlip ring pliers to remove the Seeger circlip ring **-E-** on the pulley **-C-**.
5. Remove pulley **-C-** on the compressor.



Screwing on electric line to compressor

6. Unscrew electric line of solenoid coil on the compressor:

6.1. Remove the three fastening screws holding the air-conditioning compressor **-3-** .



6.2. Remove the air-conditioning compressor and lift upwards, now the fastening screw **-4-** for the solenoid coil line is accessible.

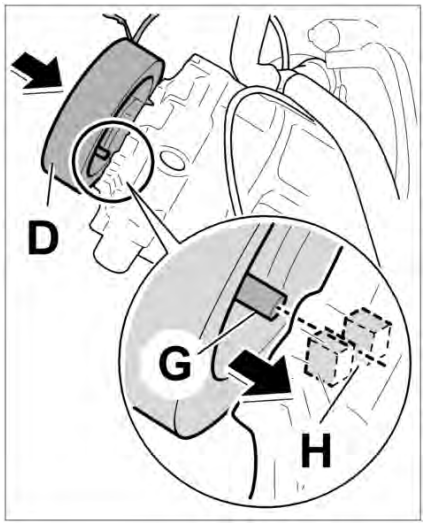
6.3. Unscrew the fastening screw **-4-** for the solenoid coil line.

Disconnecting compressor plug connection

7. Take out the electric connector **-2-** for the compressor from between the intake pipes and pull apart.

Removing solenoid coil

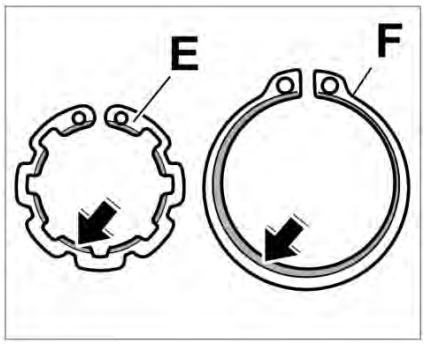
8. Remove Seeger circlip ring **-F-** for the solenoid coil with the Seeger circlip ring pliers. Remove the solenoid coil from the compressor housing.



top of page

Installing the magnetic coupling

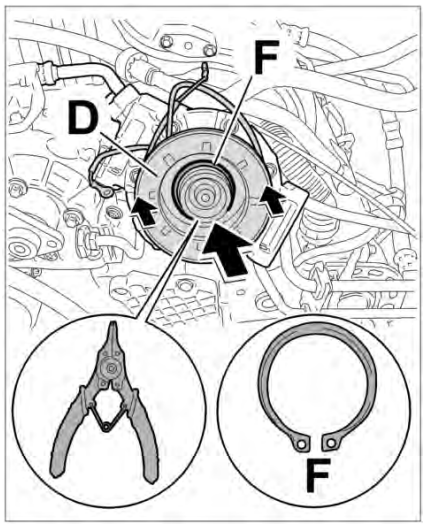
Installing magnetic clutch



Note

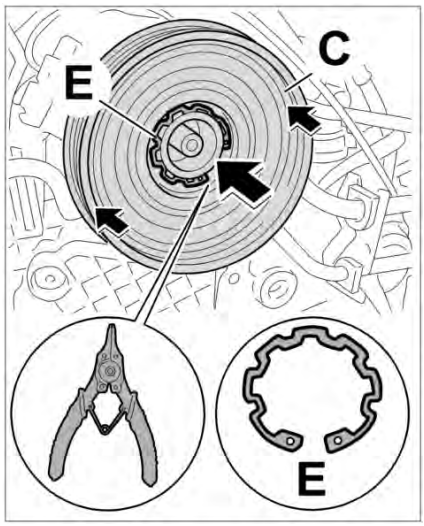
If a new magnetic clutch is installed, the air gap between pressure plate and pulley must be checked with a depth gauge. →872719 Removing and installing magnetic clutch - chapter on "Checking"

Engaging lock pin



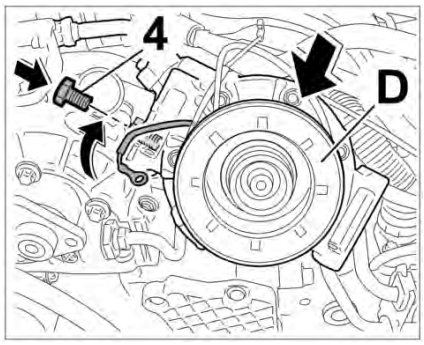
1. Place solenoid coil **-D-** on the compressor housing. The lock pin **-G-** must engage in the locking hole **-H-** .

Seeger circlip ring installation position



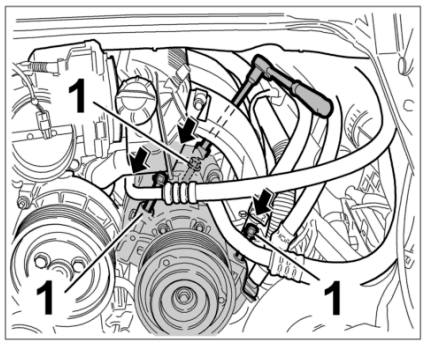
Note

When installing the Seeger circlip ring, the slanted surface of the Seeger circlip ring must point forward.



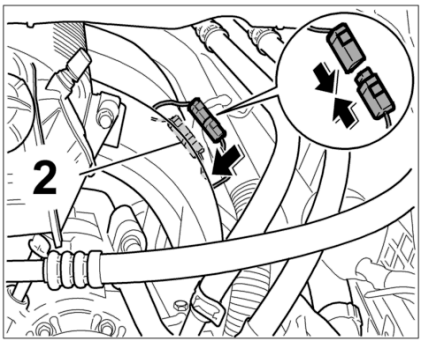
Installing Seeger circlip ring for solenoid coil

2. Position Seeger circlip ring **-F-** for solenoid coil **-D-** and fit using Seeger circlip ring pliers.



Installing pulley

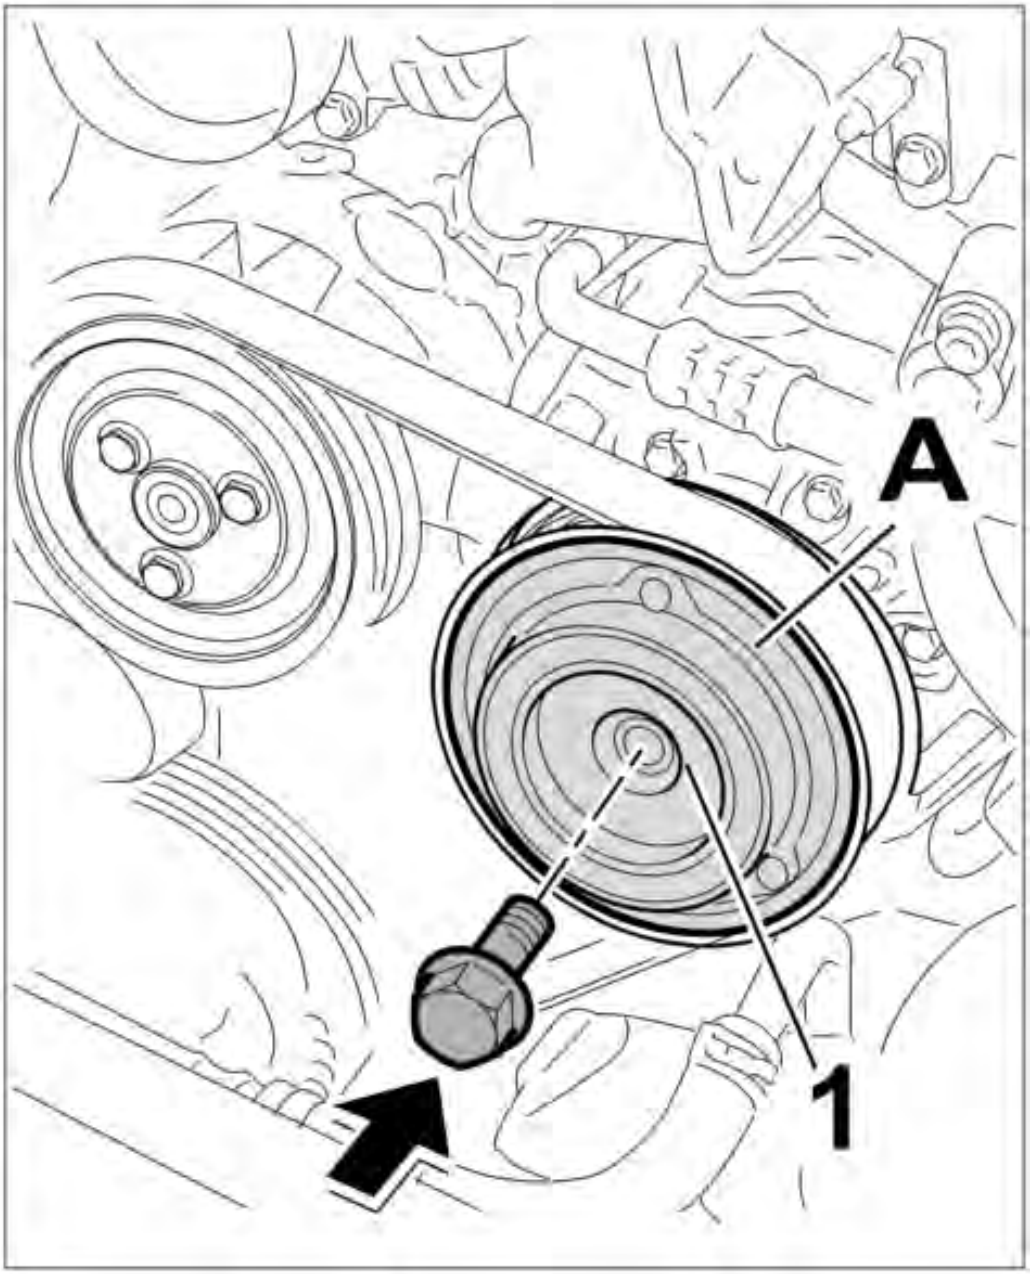
3. Position pulley **-C-** and fit with Seeger circlip ring **-E-** .



Screw down electric line for compressor.

4. Secure electric line to compressor with fastening screw **-4-** .
5. Re-fit compressor to the engine and tighten with fastening screws.

Screwing down air-conditioning compressor

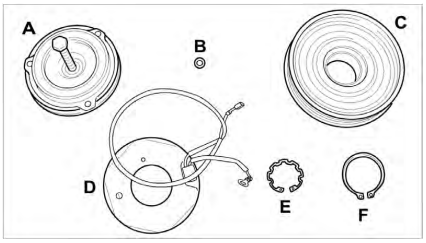


5.1. Fit air-conditioning compressor to engine housing with the rear fastening screws and tighten with the three fastening screws **-1-** . →**M8: 23 (17 ftlb.) Nm**

Connecting the compressor plug connection

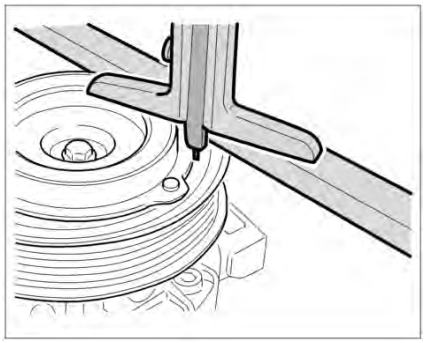
5.2. Connect the connector and position between the pipes of the intake system.

6. Position the pressure plate **-A-** and tighten with the fastening screw **-1-** . →**Tightening torque: 14 (10.5 ftlb.) Nm**



Tightening pressure plate

top of page



Checking the magnetic coupling

Check air gap of magnetic clutch

Overview

A - Thrust plate
B - Spacer washer
C - Pulley
D - Solenoid coil
E - Seeger circlip ring for pulley
F - Seeger circlip ring for solenoid coil

Check air gap of magnetic clutch

1. Check the air gap between the pressure plate and belt pulley with a depth gauge.
2. Place a rule on the outer edge of the belt pulley. Use a depth gauge to measure up to the pressure plate. Apply battery voltage to the magnetic coupling and measure the distance (air gap) to the attracted pressure plate. Always measure at least three points on the pressure plate in order to obtain a mean value. Distance: 0.5 mm ± 0.15 mm
3. If the air gap is not in the tolerance range, it must be adjusted with the aid of the spacer washers **-B-** .

top of page

Subsequent work

Subsequent work for magnetic clutch

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

- General warning notes
- Tools and materials
- Removing air-conditioning compressor
- Installing air-conditioning compressor
- Subsequent work
- Checking refrigerant oil in "new" air-conditioning compressor

top of page

Preliminary work

Preliminary work for air-conditioning compressor

1. Drain refrigerant for air-conditioning system with a refrigerant pump.
2. Remove drive belt. → *21 Removing and installing drive belt - removing*.

top of page

General warning notes

General warning notes for air-conditioning compressor

 WARNING

Safety regulations should be strictly observed when working on air-conditioned vehicles and dealing with refrigerant.

- **Danger of injury.**

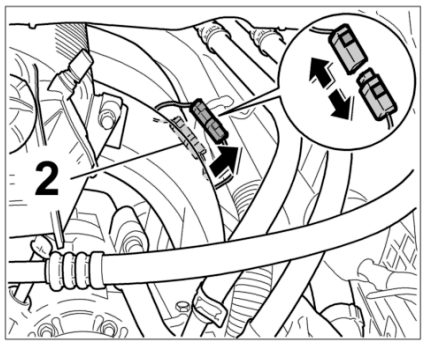
→ → *Safety regulations for working on air-conditioned vehicles and handling refrigerant*

→ → *Safety regulations for extraction and filling systems*

→ → *Instructions for repairing air-conditioning systems and storing spare parts*

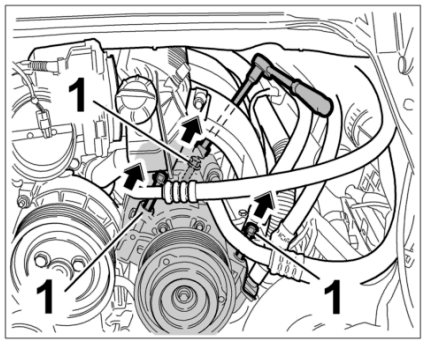
top of page

Tools and materials



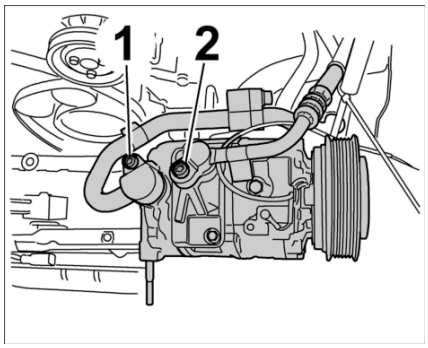
Tools for air-conditioning compressor

Air-conditioning service unit, refer to Special Tools, Commercially Available Tools, Chapter 2.4, No. 96-2)



top of page

Removing air-conditioning compressor



Removing the air-conditioning compressor

1. Take out the connector for the compressor from between the intake pipes and pull apart.

2. Remove the three fastening screws **-1-** from the air conditioning compressor. The rear screw can only be pulled out after removal.
3. Lift the air-conditioning compressor with the rear fastening screw and pull out of the engine.

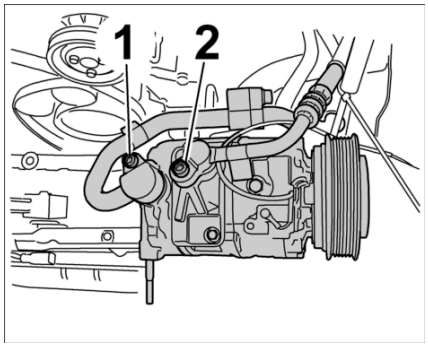
4. Place the air-conditioning compressor with the lines on the rear support plate and remove the two fastening screws **-1, 2-** .
5. Immediately close off connections and lines with suitable plugs.

top of page

Installing air-conditioning compressor

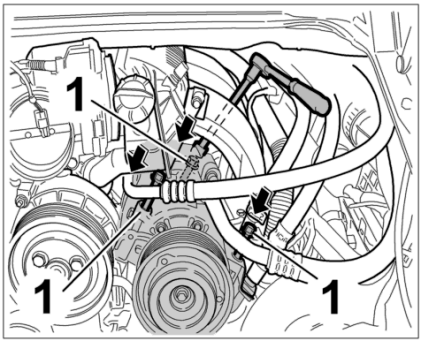
Installing the air-conditioning compressor

ATTENTION



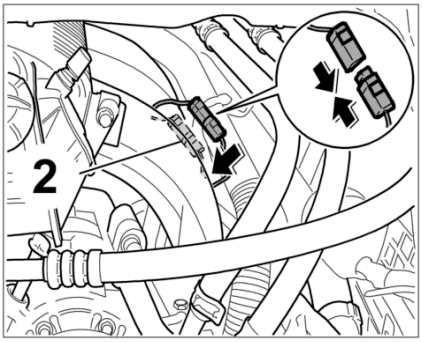
Risk of damaging the air-conditioning compressor.

→ The engine must not be started until the air-conditioning system has been filled.



Note

- *New compressors are pressurised and are filled with the required amount of oil for the refrigerant circuit!*
- *The remaining oil quantity in the individual components must therefore be taken into account!*
- *Refrigerant oil from the compressor or refrigerant oil removed by suction from a previously run air-conditioning system may no longer be used (special-category waste)!*



1. If a new compressor is installed, first correct the refrigerant oil quantity in the air-conditioning compressor.
2. Replace O-rings for the refrigerant lines and wet the new rings with refrigerant oil.
3. Do not remove the plugs for the lines and compressor connection until shortly before installation.

4. Connect the lines and secure with the fastening screws **-1, 2-** . →**M8: 15 ftlb** →**M8: 15 ftlb**
5. Insert the rear fastening screw into the air-conditioning compressor.

6. Place the air-conditioning compressor with the rear fastening screw on the engine housing and screw down with the three fastening screws **-1-** . →**M8: 17 ftlb**

7. Connect the plug and place between the pipes of the intake system.

top of page

Subsequent work

Subsequent work for the air-conditioning compressor

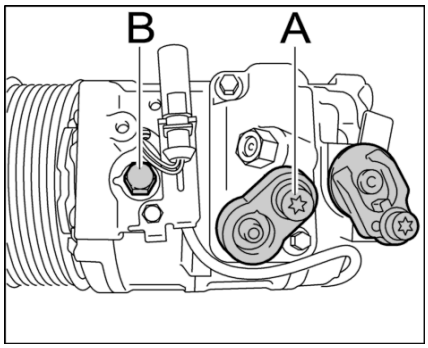
Install drive belt. → *23 Removing and installing drive belt - installing*.

Fill refrigerant on the air-conditioning system in accordance with regulations. →870317 Draining and filling in refrigerant
Open air outlet nozzles on the instrument panel, and set blower to at least 75 %.
After allowing the system to stabilise at idle speed (approx. 5 sec.), switch on air conditioning and allow the engine to run uninterrupted for at least 2 minutes at 1500 rpm.
Switch off the air-conditioning system again. Do not drive until the air-conditioning system has been filled.

top of page

Checking refrigerant oil in "new" air-conditioning compressor

Correct the refrigerant oil level in the "new" air-conditioning compressor



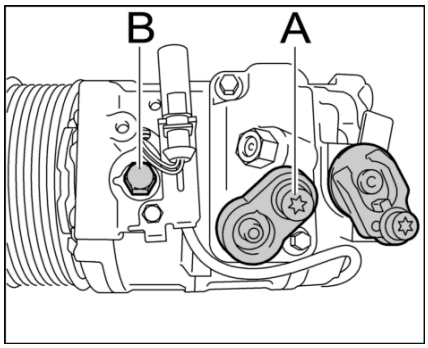
WARNING
A new air-conditioning compressor contains the oil quantity for the complete air-conditioning circuit.

- **Risk of damaging the air-conditioning compressor by excessive refrigerant oil in the air-conditioning circuit.**

→ If a new air-conditioning compressor or a component in the circuit is replaced, the oil quantity must be determined and adjusted.
→ Insufficient refrigerant oil causes a lack of lubrication, resulting in the failure of the air-conditioning compressor.
→ Too much refrigerant oil results in reduced refrigerant performance.

Note
All connection points must be completely dirt-free.
The air-conditioning compressor must be dry (washing the vehicle) and the air-conditioning compressor and lines must be free of moisture.
The connection points must be closed after they have been opened. Use the original transport caps.
A clean measuring cylinder with a capacity of approx. 300 ml is required.

Determining oil quantity on the "old" air-conditioning compressor



Caps

1. First, open the cap on the high-pressure side and relieve the pressure from the compressor **-A-** .
2. Open the oil filler screw **-B-** on the compressor.
3. Fill the refrigerant oil from the air-conditioning compressor into the measuring cylinder. Turn the pressure plate on the air-conditioning compressor (not the belt pulley) when emptying the refrigerant oil.

The amount of refrigerant oil is referred to as "V_{old}" in the formula below.

4. Always replace the sealing ring for the oil filler plug.
5. Screw oil filler plug **-B-** into the compressor. →**Tightening torque: 30 (22 ftlb.) Nm**

Oil filler screw

Determining the oil quantity at the "new" oil filler screw of the air-conditioning compressor

1. To drain refrigerant oil:

1.1. First, open the cap on the high-pressure side and relieve the pressure from the compressor **-A-** .

1.2. Open the oil filler screw **-B-** on the compressor.

1.3. Drain the refrigerant oil from the air-conditioning compressor.

The refrigerant oil must not be re-used, but must be disposed of properly.

2. To determine the refrigerant oil quantity:

2.1. V_{total} = "$V_{removed}$" + "V_{old}" + 20 cm^3

2.2. V_{total}= Total volume for the new air-conditioning compressor

2.3. $V_{removed}$ = Volume of refrigerant oil removed by suction

2.4. V_{old} = Volume of refrigerant oil in the old air-conditioning compressor

2.5. 20 cm^3 = Additional safety volume

3. To fill the air-conditioning compressor:

3.1. Fill the determined refrigerant oil volume V_{total} into the air-conditioning compressor.

3.2. Always replace the sealing ring for the oil filler plug.

3.3. Screw oil filler plug **-B-** onto the compressor. →**Tightening torque: 30 (22 ftlb.) Nm**

3.4. Install air-conditioning compressor. →873419 Removing and installing compressor - Installing

Removing the condenser-condenser line

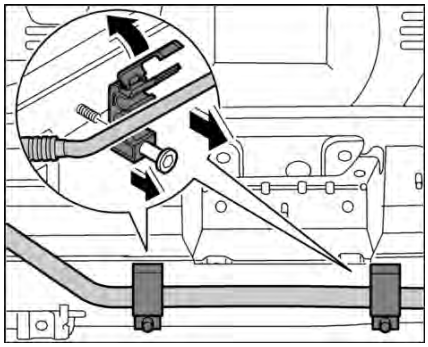
Installation Location:

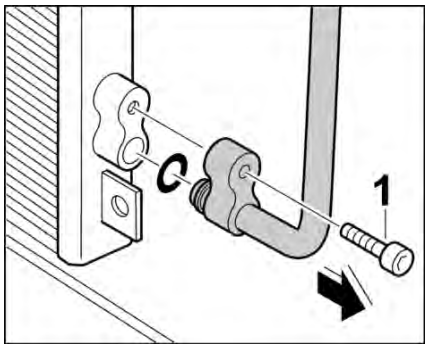


Installation location for line condenser-condenser

Air guide for condenser

1. Unscrew the two fastening screws **-1-** holding the air guide for the condenser.
2. Pull the air guide forward and disengage it at the condenser **-A-** .

Releasing and opening up the mount



3. Unscrew the fastening nuts for both holders line, open the holder and take out the line.

Note

- *When loosening or tightening the M8 refrigerant lines on the condenser, always counter with a 21-mm open-ended wrench.*

Note

Before re-installing the component, check the O-rings of the refrigerant lines for damage and replaced them if necessary.
Wet the O-rings of the refrigerant lines with refrigerant oil.
Do not open the plugs for the lines and connections until shortly before installation.
Close off all lines and connections using suitable plugs during removal.

Unscrew condenser fastening screw

4. Unscrew the fastening screws **-1-** of the line condenser-condenser and pull the line out of both condensers.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der

Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**

- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

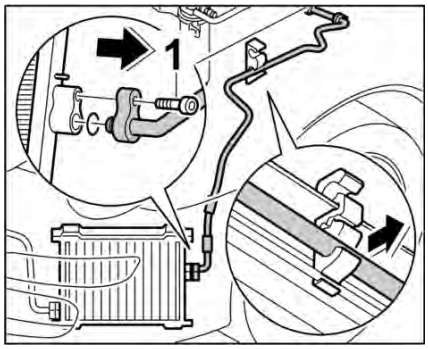
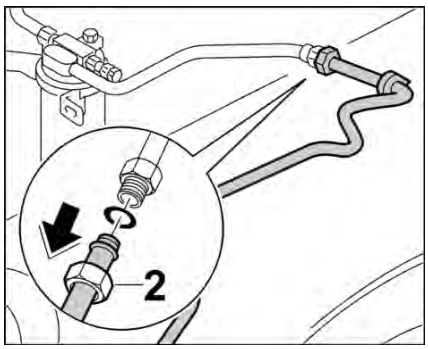
Removing the condenser-fluid tank line

Removing the condenser-fluid tank line



Installation Location:

Installation location for line condenser-fluid tank

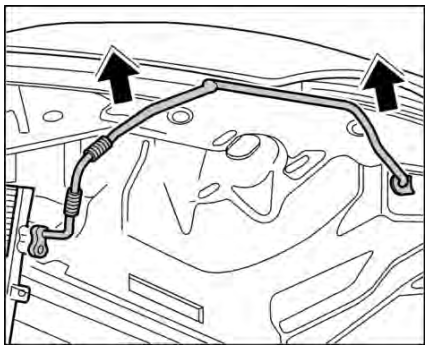


Note

When loosening or tightening the M8 refrigerant lines on the condenser, always counter with a 21-mm open-ended wrench.

Unscrew condenser fastening screw

1. Unscrew the fastening screw **-1-** for the line condenser and pull the line out of the condenser.
2. Pull the line out of the line holder.

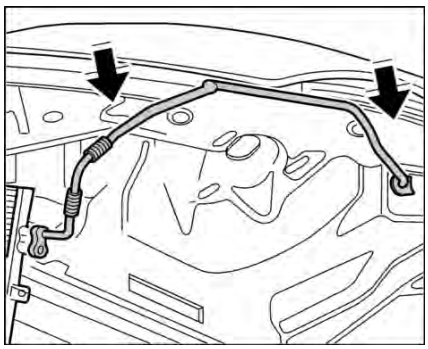


Open threaded joint

3. Counter the fastening nuts **-2-** and open carefully.

Note

Before re-installing the component, check the O-rings of the refrigerant lines for damage and replaced them if necessary.
Wet the O-rings of the refrigerant lines with refrigerant oil.
Do not open the plugs for the lines and connections until shortly before installation.
Close off all lines and connections using suitable plugs during removal.



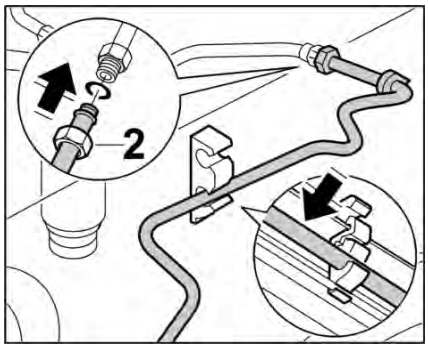
Remove line

4. Pull the line and the rubber sleeve out of the passage to the plenum panel over the wheel housing.

top of page

Installing the condenser-fluid tank line

Installing the condenser-fluid tank line

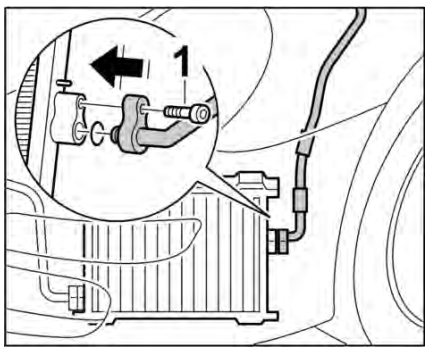


Insert line

1. Push line into the plenum panel via the wheel housing and press rubber sleeve into place. Ensure that rubber sleeve is fitted correctly.

Note

When loosening or tightening the M8 refrigerant lines on the condenser, always counter with a 21-mm open-ended wrench.



Screw down line on the condenser

2. Clip line into the line holder at the top, insert line into the condenser and screw down with **-2-** fastening screw. →**Tightening torque: 14 (10.5 ftlb.) Nm**

Note

Before re-installing the component, check the O-rings of the refrigerant lines for damage and replaced them if necessary.
Wet the O-rings of the refrigerant lines with refrigerant oil.
Do not open the plugs for the lines and connections until shortly before installation.
Close off all lines and connections using suitable plugs during removal.

Screw on line

3. Push together line in plenum panel and screw on with the **-1-** fastening screws. →**Tightening torque: 20 (15 ftlb.) Nm**

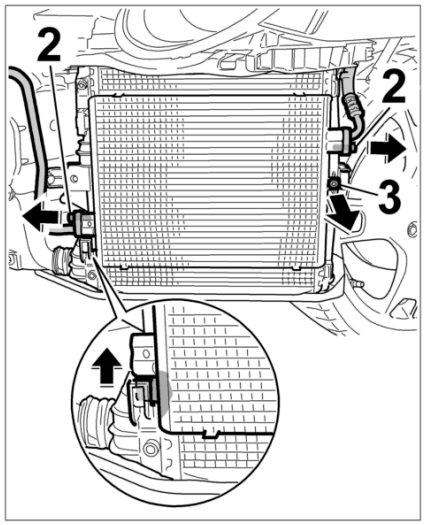
Removing the condenser

Removing the condenser

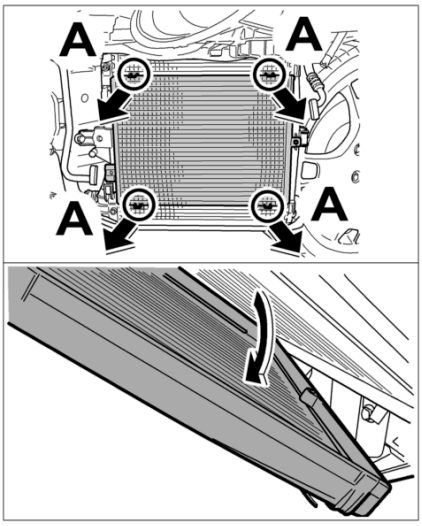
Installation Location:



Installation position

Air guide for condenser

1. Unscrew the two fastening screws **-1-** holding the air guide for the condenser.
2. Pull the air guide forward and disengage it at the condenser **-A-** .



Refrigerant lines on condenser

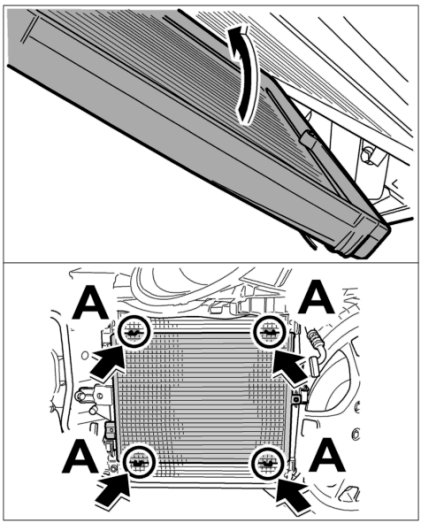
Note

- *When loosening or tightening the M8 refrigerant lines on the condenser, always counter with a 21-mm open-ended wrench.*

3. Unscrew the two fastening screws **-2-** for the refrigerant lines.
4. Unscrew fastening screw **-3-** , lift the condenser and disengage from radiator bracket.

Unclipping condenser

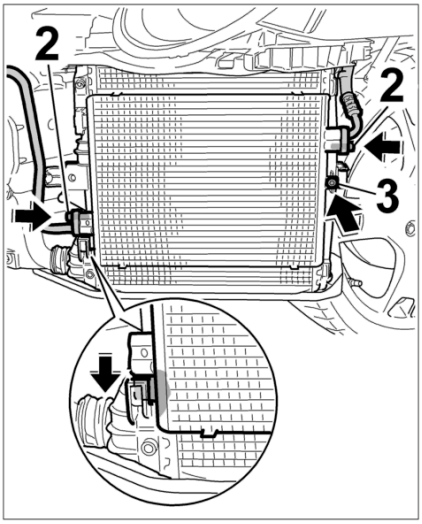
Note



Before re-installing the component, check the O-rings of the refrigerant lines for damage and replaced them if necessary.
Wet the O-rings of the refrigerant lines with refrigerant oil.
Do not open the plugs for the lines and connections until shortly before installation.
Close off all lines and connections using suitable plugs during removal.

5. Unclip the condenser from the four brackets **-A-** and lift it out of the retaining bracket **-arrow-** .

top of page



Installing the condenser

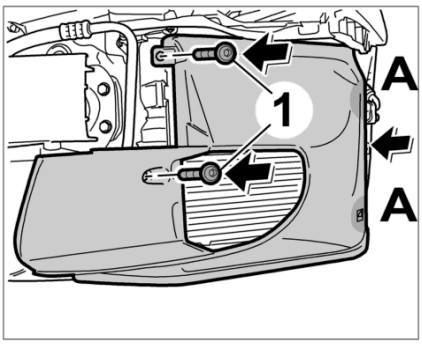
Installing the condenser

Clipping in condenser

1. Insert condenser into the retaining bracket and clip it into place **-A-** .

Refrigerant lines on condenser

2. Engage the condenser on the radiator bracket and secure with the fastening screw **-3-** . →**tightening torque: 4 (3) Nm (ftlb.)**



Note

- *When loosening or tightening the M8 refrigerant lines on the condenser, always counter with a 21-mm open-ended wrench.*

Note

Before re-installing the component, check the O-rings of the refrigerant lines for damage and replaced them if necessary.
Wet the O-rings of the refrigerant lines with refrigerant oil.
Do not open the plugs for the lines and connections until shortly before installation.
Close off all lines and connections using suitable plugs during removal.

3. Carefully insert refrigerant lines into the condenser and secure with the fastening screws **-2-** . → **tightening torque: 14 (10.5) Nm (ftlb.)**

Air guide for condenser

4. Engage air guide on condenser **-A-** and screw down using the two fastening screws **-1-** . →**tightening torque: 4 (3) Nm (ftlb.)**

WARNUNG
Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**

- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Reading out and writing stopwatch values

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

1. Connect the Porsche System tester to the vehicle and start the System tester. Switch on ignition. >> Continue.
2. Select the vehicle type.
3. Switch from the vehicle type to the list of control units.
4. Select **Stopwatch** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.

6. Select **Read out values** (codings) with the cursor keys and press >> .
7. The message **Codes successfully read out** appears on the screen of the Porsche System tester. Press >> .
8. Switch off ignition and replace control unit.
9. Switch on ignition, switch to the **Special functions** menu and perform the **Vehicle handover** using the F8 key.
10. In the **Special functions** menu, erase **All fault memories** by pressing >> .
11. Carry out automatic search of control units.
12. In the menu **Write in data** >> , the data read-out is installed.
13. System tester displays **Coding write-in complete** >> .
14. Quit menu, check operation of stopwatch and read out fault memory.

Coding stopwatch

 WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

 **Note**

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

 **Note**

The procedure described must be applied when a control unit has to be replaced and the tester function **Control unit replacement** cannot be used.

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Select the **vehicle type**.
3. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
4. In the **Special functions** menu, erase **All fault memories** by pressing >> .
5. Carry out automatic search of control units.
6. Using the >> key, move from the vehicle type to the list of control units.

7. Select **Stopwatch** with the cursor keys and press the >> .

Note

The codings will be optimised with later versions of the tester software; the coding scope documented here serves as a guide.

8. Select **Stopwatch** with the cursor keys and press the >> .

Illumination settings:	Default
	Illumination off
Time constant brighter	Reference value >> 3.2
Time constant darker	Reference value >> 12.8

9. Quit menu, check operation of stopwatch and read out fault memory.

top of page

Programming instrument cluster

Reading and printing values

Note

If the instrument cluster is replaced or exchanged, the instrument cluster must be programmed and coded using the **PIWIS Tester 9718**. This is done to adapt the instrument cluster to the vehicle and equipment.
If possible, before the instrument cluster is removed and replaced, a read-out of the vehicle data should be obtained using the Porsche System Tester.
During coding, it is essential to guarantee the power supply for the Porsche System Tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The Porsche System Tester instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the Porsche System Tester.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on ignition. >> Continue.
2. Select vehicle type >> .
3. Switch from the vehicle type to the list of control units.
4. Select **Instrument cluster** and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press the >> key.
7. The message Coding read-out complete will appear on the screen of the Porsche System Tester >> .
8. Switch off ignition and replace instrument cluster. *→ 21 Removing and installing instrument cluster - removing.*
9. Switch on ignition. After replacement of the control unit, the vehicle data is installed under the menu **Write in data** (see Point 6) > > .
10. System Tester displays Coding write-in complete . Press the >> key.
11. Go to the **Special functions** menu and start the **Vehicle handover** also; follow the instructions on the Tester.
12. Erase **All fault memories**.
13. Go to the **Instrument clusterCoding** menu again and check the coding in accordance with the vehicle equipment.
14. Carry out a test drive and read out fault memory again.

General warning notes

General warnings for gateway control module

WARNING

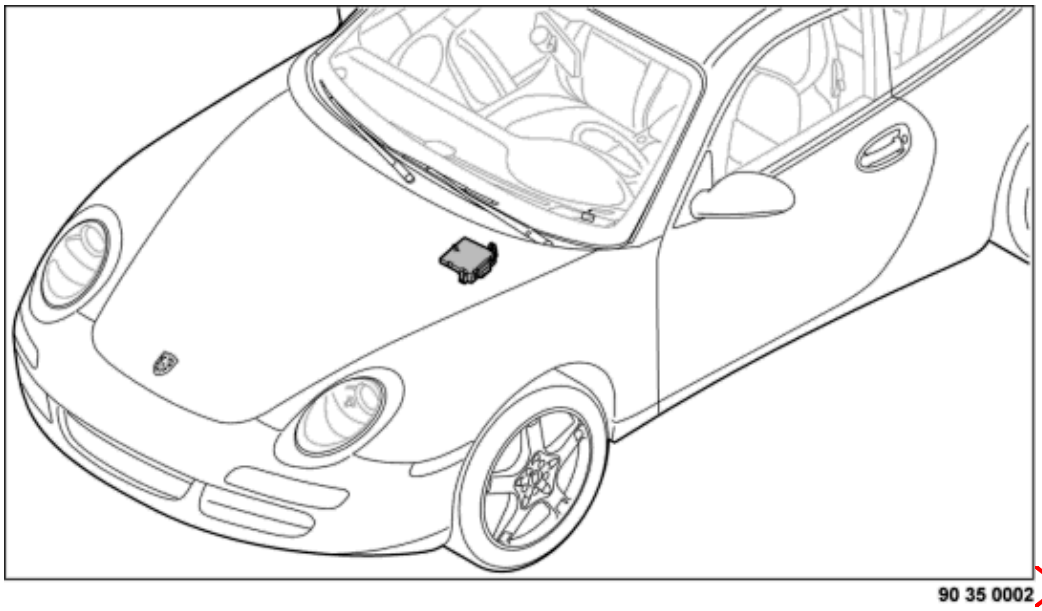
Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

top of page



Removing gateway control unit

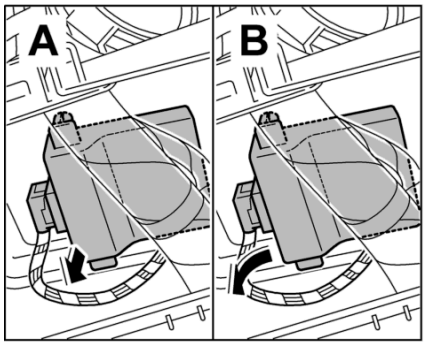
Removing gateway control unit

Note

The gateway control module is located under the radiator tank, accessible from inside the vehicle near to the driver.

Installation Location:

Installation location of gateway control unit



WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Coding gateway control unit

Coding the gateway control unit

Note
If the gateway control module is replaced, the gateway control module must be coded using the **PIWIS tester 9718**. This is to adapt the Gateway control module to the vehicle and equipment.
If possible, before the gateway control module is removed and replaced, a read-out of the vehicle data should be obtained from the Porsche System Tester.
During coding, it is essential to guarantee the power supply for the Porsche System Tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The Porsche System Tester instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the Porsche System Tester.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select vehicle type using the cursor keys.
3. Move from vehicle type to the list of control units >> .
4. Select **Gateway** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press the >> key.
7. The message Coding read-out complete will appear on the screen of the Porsche System Tester. Press the >> key.
8. Switch off ignition and replace Gateway control unit. → *21 Removing and installing gateway control unit - removing*
9. System Tester displays Coding write-in complete . Press the >> key.
10. Follow the instructions on the Tester .
11. Quit menu, switch off ignition, lock then unlock vehicle and read out fault memory once more.
12. In the **Gateway** menu, select **Required & actual configuration** >> .
13. Check the list for both **Required** and **Actual** for the same **+** or **-**. If there are deviating specifications, first check if the components are installed on this vehicle.

14. If necessary, change to the **Coding** menu, and select the non-matching components (e.g., Tyre pressure monitoring system) and code the components with F8 .
15. In the **Gateway** menu, select **Required & actual configuration** >> and check the list once again.
16. Read out and erase fault memory.

Programming gateway control unit

Note

If the "old" control module can no longer be read out, the coding must be performed "manually" with the **PIWIS tester 9718**. This is to adapt the Gateway control module to the vehicle and equipment.
During coding, it is essential to guarantee the power supply for the Porsche System Tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The Porsche System Tester instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the Porsche System Tester.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select vehicle type using the cursor keys.
3. Move from vehicle type to the list of control units >> .
4. Select **Gateway** with the cursor keys and press the >> key.
5. Select the **Coding** menu >> .
6. Select the individual systems/components in turn and code the vehicle-dependent equipment with F8 .
7. In the **Gateway** menu, select **Required & actual configuration** >> .
8. Check the list for both **Required** and **Actual** for the same **+** or **-**. If there are deviating specifications, first check if the components are installed on this vehicle.
9. If necessary, change to the **Coding** menu, and select the non-matching components (e.g., Tyre pressure monitoring system) and code the components with F8 .
10. In the **Gateway** menu, select **Required & actual configuration** >> and check the list once again.
11. In the menu **Vehicle type**, select **Control units** and then select the menu **Special functions**.
12. Perform**Vehicle handover** and follow the instructions of the tester.
13. Read out and erase fault memory.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**

- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

top of page

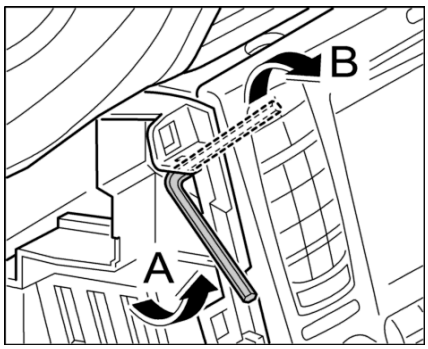
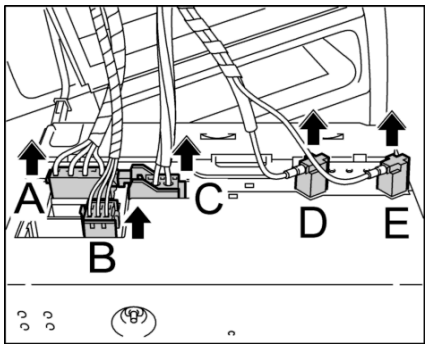
Removing PCM display and control unit



Removing display for the PCM operator control unit

Switch off ignition and remove ignition key.

PCM screw locking lacquer

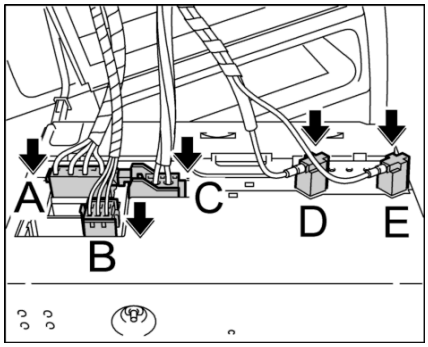


1. Loosen the side fastening screw a few turns.

Fastening the PCM

2. Insert a hexagon-socket wrench sideways into the screw connection of the PCM detent hooks.
3. Close the detents (2 each side) with an Allen key **-A-** and carefully pull out the PCM.
4. For reinstallation, open the detents with the hexagon-socket wrench **-B-** .

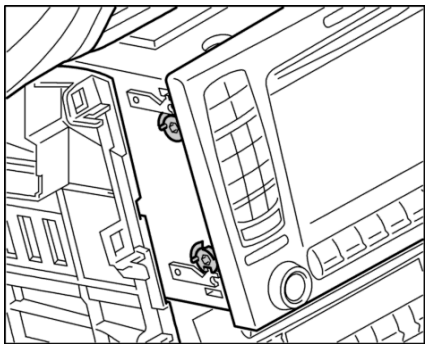
The number of plug connections will vary, depending on the I No. (CD changer, amplifier, etc.).
The variant without additional audio components (external Most control units) has a jumper (output to input) connected to the optical waveguide plug.



PCM plug connections

5. Unlock antenna plug **-D, E-** and remove.
6. Unlock and disconnect the electrical plug connections in the order **-A, B, C-** .

top of page



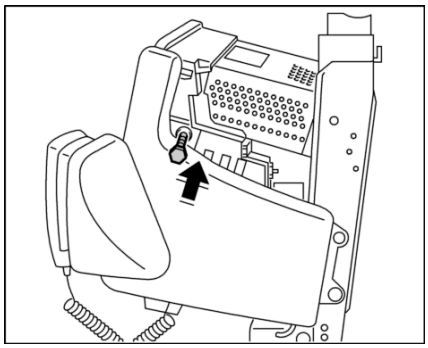
Installing PCM display and control unit

Installing display and PCM operator control unit

PCM plug connections

1. Push on the electrical plug connections for the display and operator control unit in the sequence **-C, B, A-** and the antenna amplifiers **-D, E-** until the plugs are felt to engage.

Locking tabs on the PCM



2. Check that the locking tabs on the PCM are out, open the lock with an Allen key if necessary.

Note

Before sliding the PCM/radio into the installation slot, make sure that the electric lines are not trapped by the PCM/radio or damaged .

After installation of a new display and PCM/radio operator control unit, the system must be activated with the **PIWIS tester 9718**. →911019 Removing and installing display and PCM operator control unit - programming

3. Push the navigation unit into the installation slot until the locks engage on the PCM housing.

PCM screw locking lacquer

4. Screw in the locking screw for the PCM and tighten it.

Reading out PCM display and control unit

Reading from and writing to the PCM display and operator control unit

Note

- *When installing a new PCM/CDR in a vehicle, the PCM/CDR code specified in IPAS should be present. Normally, the code is stored in the instrument cluster, and is read out from the PCM/CDR.*
- *You can get the codes from IPAS or from your importer by specifying the vehicle identification number.*
- *During coding, there should be a guaranteed power supply for the **PIWIS tester 9718**. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.*
- *The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.*

- *The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.*

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Select the vehicle type.
3. Using the >> key, move from the vehicle type to the list of control units.
4. Select **PCM-MMI** and press the >> .
5. In the menu **PCM-MMI**, select **Control unit replacement** and press the >> .
6. Select **Read coding** and press >> .
7. On the screen of the PIWIS tester appears the message **Coding read-out complete** >> .
8. Switch off ignition and replace the PCM. →911019 Removing and installing PCM display and operator control unit
9. Switch on ignition << return to **vehicle type**, for the **control units** select **Special functions** and start the **vehicle handover** with F8 .
10. Read out and erase all fault memories.
11. Using the >> change from **vehicle type** to **control units**.
12. Select **PCM-MMI** and press the >> .
13. In the menu **PCM-MMI**, select **Control unit replacement** and press the >> .
14. Under the menu **Write coding**, the data read out (see Section 7) is installed >> .
15. PIWIS tester displays **Coding write-in complete** >> .
16. In the menu **PCM-MMI**, select **Required & Actual Configuration** and press the >> .
17. Compare the Actual/Required listing. Use F8 to start **Mapping**. All installed audio components will now be listed with a plus under Actual/Required.
18. Read out the fault memory again and erase as necessary.
19. PCM is now taught.

top of page

Programming PCM display and control unit

Programming the display and operator control unit

Note

The procedure described must be applied when a control unit has to be replaced and the tester function **Control unit replacement** cannot be used.

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Switch on ignition << return to **vehicle type**, for the **control units** select **Special functions** and start the **vehicle handover** with F8 .

3. Read out and erase all fault memories.
4. Switch from the vehicle type to the list of control units >> .
5. Select **PCM** and press the >> .
6. In the menu PCM, select **PCM2 MMI** und press the >> .
7. Select **Control unit replacement** with the cursor keys and press the >> key.
8. Select **Write coding** and write in the coding. (Even if no coding data was read out, the required data is loaded for the control unit.)
9. Select **Coding** and press >> .
10. Select **Equipment** and press >> .

The following codings can be performed:

Note

- *When installing a new PCM/CDR in a vehicle, the PCM/CDR code specified in IPAS should be present. Normally, the code is stored in the instrument cluster, and is read out from the PCM/CDR.*
- *You can get the codes from IPAS or from your importer by specifying the vehicle identification number.*
- *During coding, there should be a guaranteed power supply for the **PIWIS tester 9718**. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.*
- *The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.*
- *The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.*

11. If the **PCM code** is not displayed with an *****, then select the **PCM code**, enter, and code with F8 .
12. Select **Country coding** and the relevant country, and code with F8 .
13. Select **Vehicle type vehicle coding** and code with F8 .

Vehicle type vehicle coding
911 (997)
Boxster (987)

14. Select **Vehicle version vehicle coding** and code with F8 .

Vehicle version vehicle coding
Coupé
Cabriolet
Targa

15. Select **Air conditioner** and code with F8 .

Air conditioner
Without air conditioner
With air conditioner

16. Select **Units** and code with F8 .

Units
RoW (°C, litre, km)
UK (°C, gal, mph)
USA (°F, gal, mph)

17. Select **Right/left-hand drive vehicle coding** and code with F8 .

Right/left-hand drive vehicle coding
Right-hand drive
Left-hand drive

18. Select **Windscreen wiper/washer system** and code with F8 .

Targa

35. Select **Air conditioner** and code with F8 .

Air conditioner
Without air conditioner
With air conditioner

36. Select **Right/left-hand drive vehicle coding** and code with F8 .

Right/left-hand drive vehicle coding
Right-hand drive
Left-hand drive

37. Select **Tuner parameters** and code with F8 .

Tuner parameters
Europe
USA
South America
Australia
Asia
(South) Africa
Japan

38. Press << to quit the menu **PCM**.
39. Read out fault memory of all control units and erase if required.
40. PCM is now taught.
41. If the PCM/vehicle equipment does not have a DVD navigation unit, then adjust the time/date using the **SET** button on the PCM and in the menu **PCM system**.

42. For vehicle equipment with DVD navigation unit, switch on the PCM in clear surroundings (to load GPS almanac); as soon as four satellites are identified the almanac will reload. The time is updated again when there is a plausible GPS reception (four satellites). The date and time are also adopted once the GPS almanac has been loaded; it may be necessary to change over to summer time (daylight-saving time). This time is transferred to the instrument cluster. If the time is then manually changed by means of the instrument cluster, this time is adopted by the PCM and synchronised with GPS time.
43. For vehicle equipment with telephone, the telephone is enabled again when the telephone PIN code is entered with the SIM telephone card inserted.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

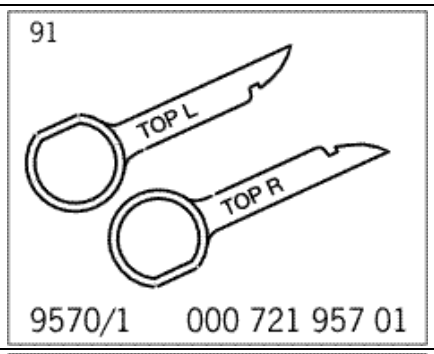
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

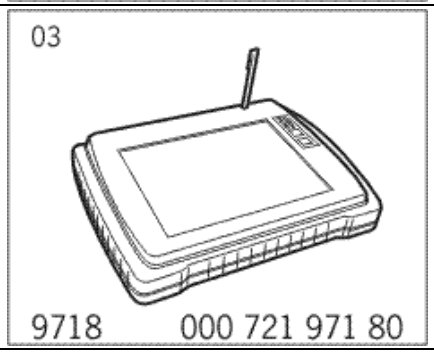
- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.





- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

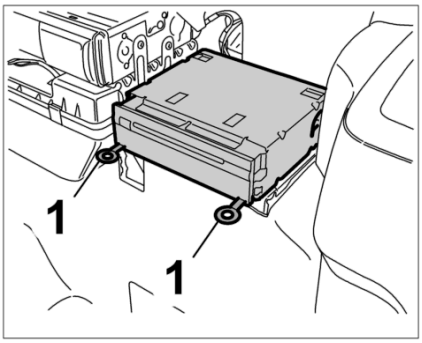
Removing navigation unit

Removing navigation unit

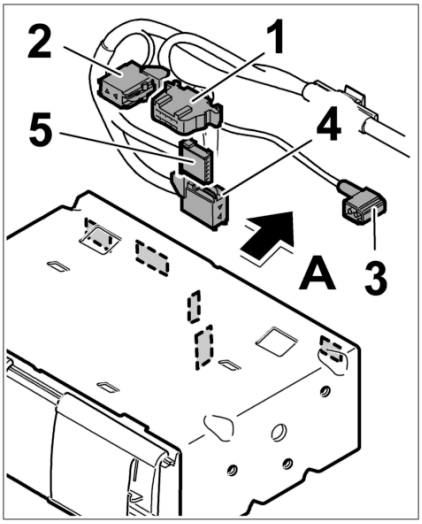
Note

If the navigation unit has to be replaced, the coding must be read out prior to removal using the **PIWIS tester P 9718**.



Installation Location:

Installation position



Remove ignition key.

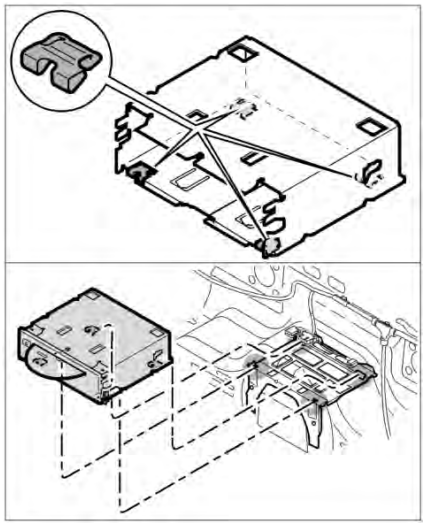
Depending on the equipment I No., the navigation unit is located next to or on the CD - changer.

Unlocking the navigation unit

1. Push the **removal tool 9570/1** **-1-** into the navigation unit and pull the navigation unit forward.

Electrical plug

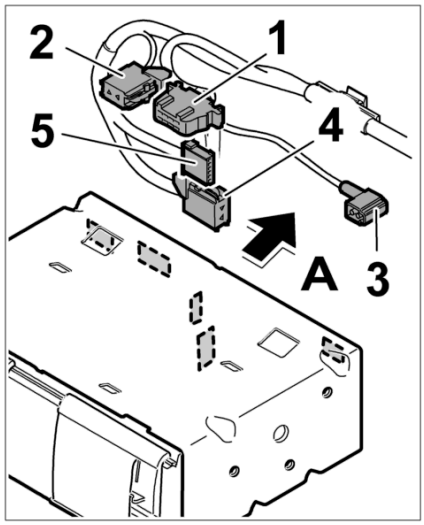
2. Unlock the electrical plug **-1, 2, 3-** on the navigation unit and pull out the navigation unit.



Removing the navigation unit with retaining bracket

Note

If the navigation unit has to be replaced, the coding must be read out prior to removal using the **PIWIS tester P 9718**.

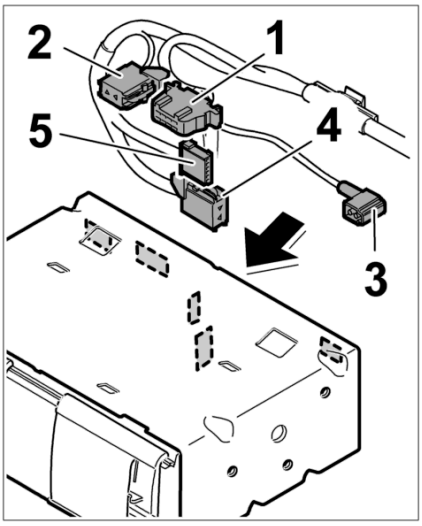


Note

If the navigation unit is removed with the retaining bracket, then new clips must be used before reinstallation.

Removing the navigation unit with retaining bracket

1. Give the navigation unit with the retaining bracket a pull forward, and lever out the clips with a screwdriver if necessary.



Electrical plug

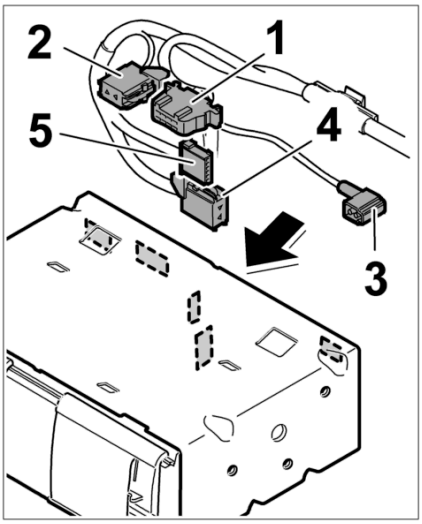
2. Unlock the electrical plug **-1, 2, 3-** on the navigation unit and remove the navigation unit with holder.

top of page

Installing navigation unit

Installing navigation unit

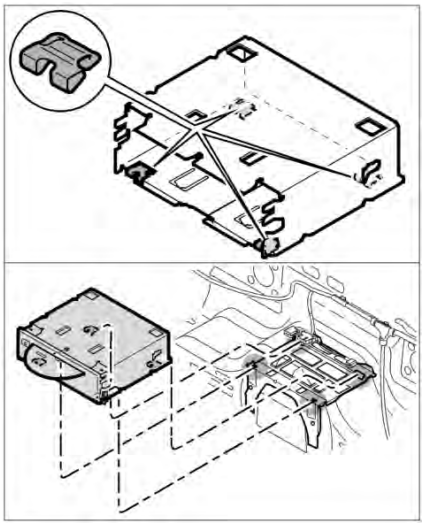
Electrical plug



1. Insert the navigation unit into the retaining bracket and plug into the electrical plug connections **-1, 2, 3-** until the plug is felt to click into place.
2. Slide the navigation unit further into the retaining bracket until the navigation unit is felt to click into place.

Installing the navigation unit with retaining bracket

Note



If the navigation unit is removed with the retaining bracket, then new clips must be used before reinstallation.

1. Install new clips , push in the navigation unit in the retaining bracket until the navigation unit is felt to engage.

Electrical plug

2. Push in electrical plug connections **-1, 2, 3-** until plugs are felt to engage.

Installing the navigation unit with retaining bracket

3. Position the navigation unit with retaining bracket on the body and push into the four holders. Check proper seating of holder by pulling up on the retaining bracket.

Reading out and writing values for navigation unit

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

1. Connect the Porsche System tester to the vehicle and start the System tester. Switch on ignition. >> Continue.
2. Select the vehicle type.
3. Switch from the vehicle type to the list of control units.
4. Select **PCM 2.1**, **Navigation** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out codings** (codings) with the cursor keys and press >> .
7. The message **Codes successfully read out** appears on the screen of the Porsche System tester. Press >> .
8. Switch off ignition and replace control unit.
9. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
10. In the **Special functions** menu, erase **All fault memories** by pressing >> .
11. Carry out automatic search of control units.
12. In the menu **Write in codings** >> the data read-out are installed.
13. System tester displays **Coding write-in complete** >> .
14. Quit menu, insert navigation CD, switch off ignition and lock the vehicle, then unlock, switch on ignition and load navigation CD.
15. Perform navigation during the test drive and afterwards read out fault memory.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

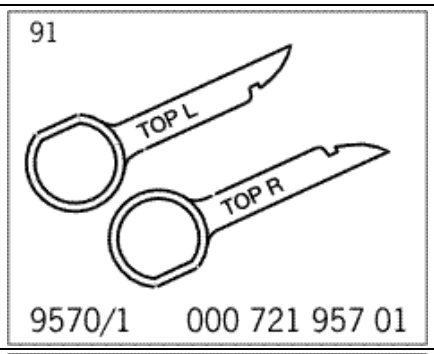
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

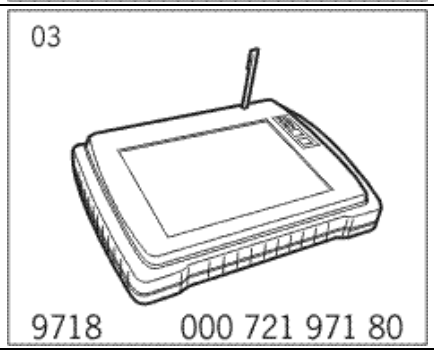
- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.





- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

91 24 19 Removing and installing car radio CD player - as of MY 2005

- Preliminary work
- Removing the car radio
- Installing the car radio
- Subsequent work
- Reading out car radio
- Programming car radio

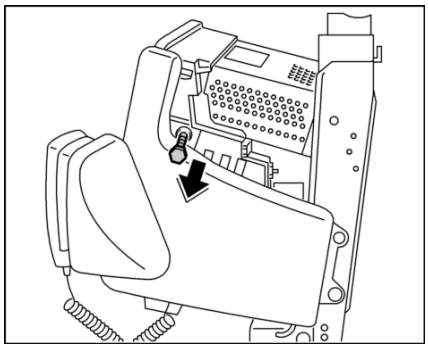
Tools

Designation	Type	Number	Explanation	
PIWIS tester	special tool	9718		

top of page

Preliminary work

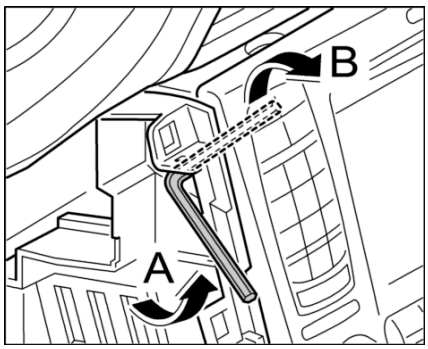
Preliminary work for car radio



Remove both covers on centre console. *→ 21 Removing and installing centre console cover - removing*

top of page

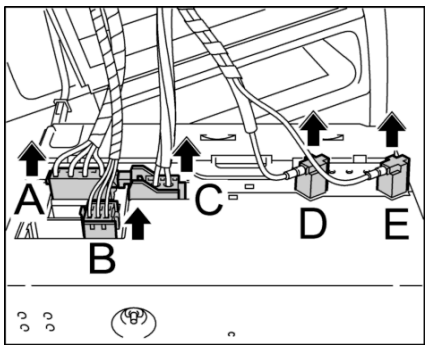
Removing the car radio



Removing the car radio

Switch off ignition and remove ignition key.

Screw locking device

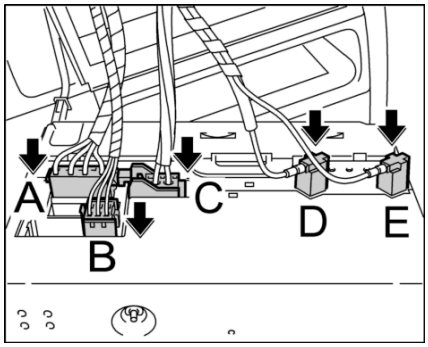


1. Loosen the side fastening screws a few turns.

Mounting of the radio

2. Insert an Allen key sideways into the screw connection of the radio latch hooks.
3. Close the latches (2 each side) with an Allen key **-A-** and carefully pull out the radio.
4. For reinstallation, open the latches with the Allen key **-B-** .

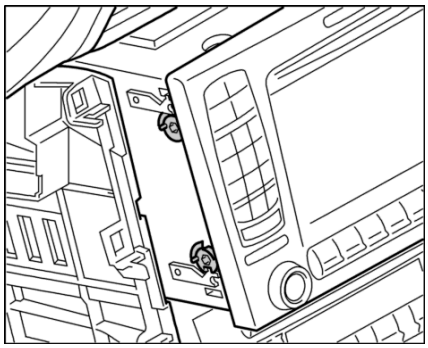
The number of plug connections will vary, depending on the I No. (CD changer, amplifier, etc.).
The variant without additional audio components (external Most control units) has a jumper (output to input) connected to the optical waveguide plug.



Radio plug connections

5. Unlock antenna plug **-D, E-** and remove.
6. Unlock and disconnect the electrical plug connections in the order **-A, B, C-** .

top of page

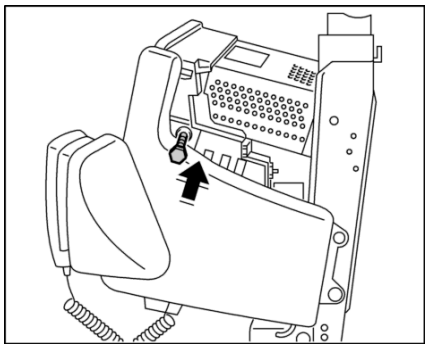


Installing the car radio

Installing the car radio

Plug connections

1. Connect the electric plug connections in the sequence **-C, B, A-** and the antenna amplifiers **-D, E-** so that the plugs are felt to engage.



Locking tabs shown on the PCM

2. Check that the locking tabs on the radio are out, opening the locking mechanism with an Allen key if necessary.

Note

Before sliding the PCM/radio into the installation slot, make sure that the electric lines are not trapped by the PCM/radio or damaged .
After installation of a new display and PCM/radio operator control unit, the system must be activated with the **PIWIS tester 9718**. →911019 Removing and installing display and PCM operator control unit - programming

3. Push the radio into the installation slot until the locking mechanisms engage on the radio housing.

Screw locking device

4. Screw in the locking screw for the radio and tighten it.

top of page

Subsequent work

Subsequent work for car radio

Install both covers on centre console. → *23 Removing and installing centre console panel - installing*

top of page

Reading out car radio

Reading out and transferring car radio codes

Note

- *When installing a new PCM/CDR in a vehicle, the PCM/CDR code specified in IPAS should be present. Normally, the code is stored in the instrument cluster, and is read out from the PCM/CDR.*
- *You can get the codes from IPAS or from your importer by specifying the vehicle identification number.*
- *During coding, there should be a guaranteed power supply for the **PIWIS tester 9718**. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.*
- *The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.*

- *The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.*

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Select vehicle type using the cursor keys.
3. Using the >> key, move from the vehicle type to the list of control units.
4. Select **CDR24** with the cursor keys and press the >> .
5. In the menu **CDR24**, select **Control unit replacement** and press the >> .
6. Select **Read codes** and press >> .
7. On the screen of the PIWIS tester appears the message **Coding read-out complete** >> .
8. Switch off ignition and replace radio. →912419 Removing and installing car radio "CD player" - chapter on "Removing" →912419 Removing and installing car radio "CD player" - chapter on "Installing"
9. Switch on ignition. After replacement of the radio, the data previously read out (see Item 7) is reloaded under the menu **Write in codes**. >> .
10. PIWIS tester displays **Coding write-in complete** >> .
11. In the menu **CDR24**, select **Required & Actual installed components list** and press >> .
12. Compare the Actual/Required listing.
13. Remove ignition key, close and lock vehicle, then unlock and switch on ignition
14. Read out the fault memory again and erase as necessary.
15. Car radio is now taught.

top of page

Programming car radio

Programming the car radio

Note

The procedure described must be applied when a control unit has to be replaced and the tester function **Control unit replacement** cannot be used.

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Select **vehicle type** using the cursor keys.
3. Using the >> key, move from the vehicle type to the list of control units.
4. Select **CDR24** with the cursor keys and press the >> .
5. Select **Coding** and press the >> .

The following codings can be performed:

Note

- *When installing a new PCM/CDR in a vehicle, the PCM/CDR code specified in IPAS should be present. Normally, the code is stored in the instrument cluster, and is read out from the PCM/CDR.*
- *You can get the codes from IPAS or from your importer by specifying the vehicle identification number.*
- *During coding, there should be a guaranteed power supply for the **PIWIS tester 9718**. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.*
- *The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.*
- *The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.*

6. Select **PCM code**, enter and code with F8 .
7. Select **Traffic broadcast loudspeaker boost** and code with F8 .
8. Select **GAL (NLB)** and code with F8 .
9. Select **Vehicle type vehicle coding** and code with F8 .

Vehicle type vehicle coding
911 (997)
Boxster (987)

10. Select **Vehicle version vehicle coding** and code with F8 .

Vehicle version vehicle coding
Coupé
Cabriolet
Targa

11. Select **Air conditioner** and code with F8 .

Air conditioning
Without air conditioning
With air conditioning

12. Select **Tuner parameters** and code with F8 .

Tuner parameters

Europe
USA
South America
Australia
Asia
(South) Africa
Japan

13. Select **ASK amplifier** and code with F8 .

ASK amplifier
Not installed
Installed

14. Select **Loudness** and code with F8 .

Loudness
off
on

15. Select **Factory settings** and code with F8 .

Factory settings
no
yes

16. In the menu **CDR24**, change to **MOST actual installed components list**; here a version (e.g. CD changer) installed in the vehicle must be displayed
17. Change to **MOST required installed components list**; here too the same version (e.g. CD changer) must be displayed - if this is not the case, select the version and code with F8 .
18. Select **Required & Actual configuration** and press the >> .
19. Compare the Actual/Required listing. Use F8 to start **Mapping**. All installed audio components must now be listed with a plus under Actual/Required. If this is not the case, the versions in the **MOST actual installed components list** or **MOST required installed components list** must be coded manually.
20. Read out fault memory and erase if required.
21. Use << to quit the menu **CDR24**.
22. Remove ignition key, close and lock vehicle, then unlock and switch on ignition
23. In the menu **CDR24** select **Control unit replacement** and perform the functions **Read codes** and **Write codes**.
24. Read out the fault memory again and erase as necessary.

25. Car radio is now taught.

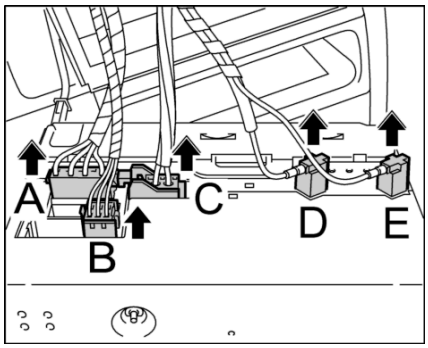
Installing the antenna leads

Installing antenna leads

 ATTENTION

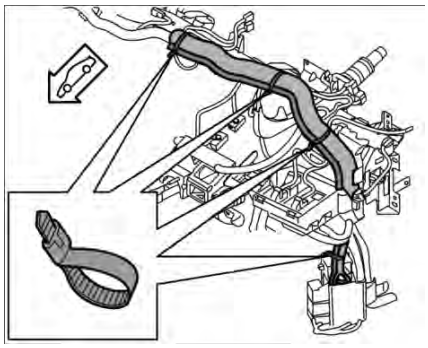


Risk of destruction when removing electric components with the ignition on.

→ Switch off ignition and remove ignition key.

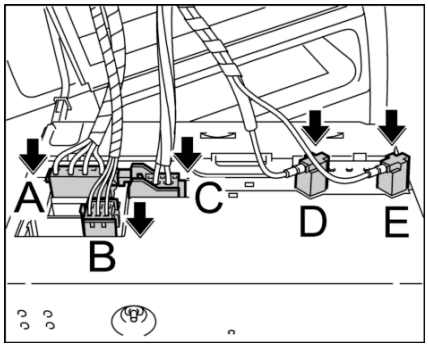
Overview of antenna leads, shown on the 911

A - PCM/radio
B - Antenna control unit
C - Antenna amplifier, left
D - Antenna amplifier, right
E - KESSY/PAS control unit
F - Rod antenna
G - Navigation unit
H - GPS antenna



PCM plug connections

Note



- *The number of plugs can vary, depending on the vehicle equipment.*

1. Release and pull off connectors **-D and E-** on the damaged antenna lead on the affected components. The illustration shows the connectors for the PCM display and operator control unit as an example.
2. Cut off the connectors on the damaged antenna lead, then insulate it and tie it to the main wire harness.

Securing antenna lead to the main wire harness

3. Route the new antenna lead along the main wire harness, guide it through the existing cable ducts and tie it to the main wire harness using tie-wraps.

PCM plug connections

4. Connect the connectors **-D and E-** for the new antenna lead to the affected components until the connectors are felt to engage. The illustration shows the connectors for the PCM display and operator control unit as an example.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Programming loudspeaker amplifier

Reading out and writing to the BOSE loudspeaker amplifier

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→

During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select the **vehicle type**.
3. Using the >> key, move from **Vehicle type** to the list of **Control units** and perform the automatic control unit search.
4. Select **PCM2** with the cursor keys and press the >> key.
5. Select **External BOSE amplifier** with the cursor keys and press the >> key.
6. Select **Coding** using the cursor keys and press >> .
7. Select **Read out coding** (codings) with the cursor keys and press >> .
8. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
9. In the **Special functions** menu, erase **All fault memories** by pressing >> .
10. Carry out automatic search of control units.
11. In the menu **Write in coding** >> , the data read out are installed.
12. In **Coding** select the version and follow the instructions of the Tester.
13. Read out and erase fault memory.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

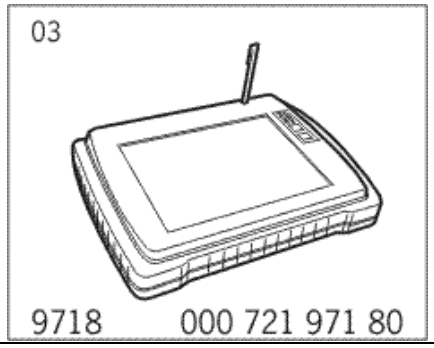
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

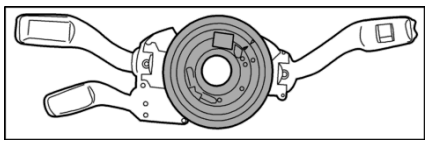
Removing control unit for steering wheel electronics

Removing control unit for steering wheel electronics

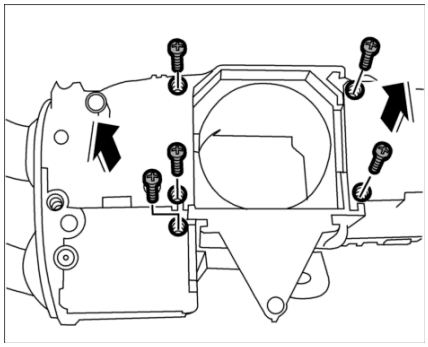
Note



The control unit for steering wheel electronics is bolted to the steering-column switch.
Before the ground strap of the battery is disconnected, the data in the control unit for steering wheel electronics must be read out using the Porsche System Tester.

Position of markings

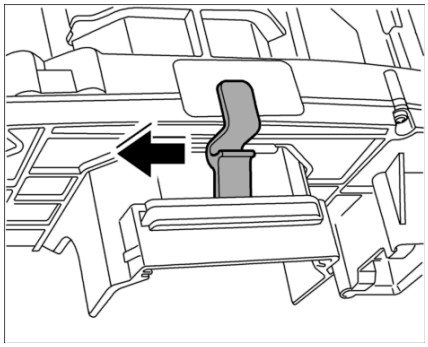
Note



- *Ensure that the arrow **-A-** of the rotor is positioned between the markings **-B-** of the arrows **-C-** of the airbag contact unit and that the latch **-D-** is engaged.*

Removing contact unit

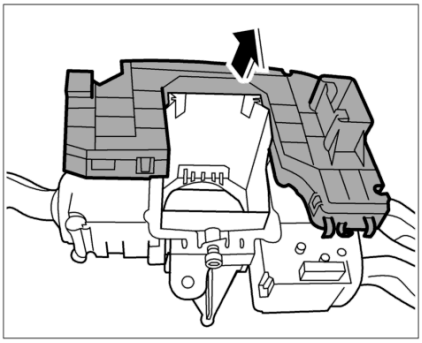
1. Remove contact unit.



1.1. Carefully lift up the three retaining tabs and remove airbag contact unit.

Unscrewing fastening screws

2. Unscrew fastening screws for steering wheel electronics control unit.



2.1. Unscrew the five fastening screws.

Pushing out the line holder

3. Push out the line holder.

3.1. Push line holder down and out of the steering-column switch.

Removing control unit for steering wheel electronics

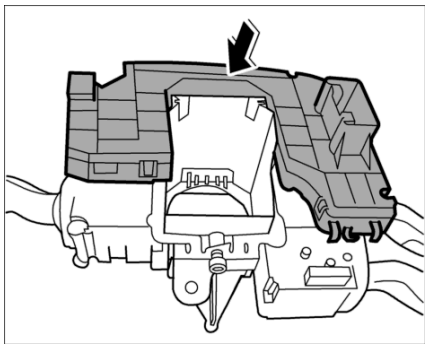
4. Remove control unit for steering wheel electronics.

4.1. Turn steering column switch round and remove control unit for steering wheel electronics.

top of page

Installing control unit for steering wheel electronics

Installing control unit for steering wheel electronics

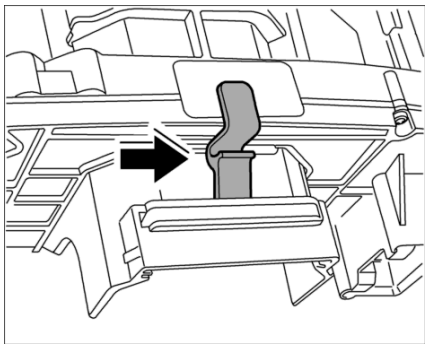


WARNING

Risk of damaging airbag contact unit.

- **If the airbag contact unit has been adjusted, proceed in accordance with the following work instruction:**

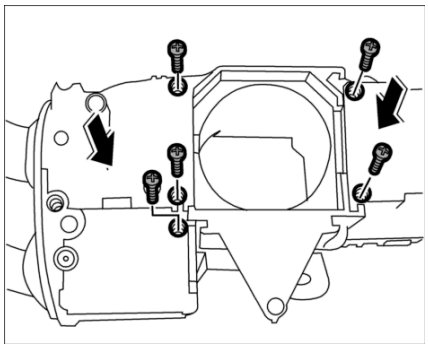
→ To position the airbag contact unit in the central position, press the locking element and turn the rotor carefully to the left as far as it will go.



→ Then turn the rotor carefully to the right, approx. 3.5 to 3.75 revolutions, until the band printed on one side is visible in the window.

Mounting control unit for steering wheel electronics

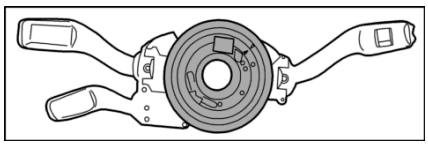
1. Install control unit for steering wheel electronics.



1.1. Position control unit for steering wheel electronics on the steering-column switch.

Pushing on line holder

2. Push on line holder.



2.1. Push line holder onto steering-column switch.

Screwing in the fastening screws

3. Unscrew fastening screws for steering wheel electronics control unit

3.1. Turn the steering column switch round and screw in the five fastening screws.

Engaging contact unit

4. Install contact unit.

4.1. Position airbag contact unit and press onto the steering column switch until the three tabs are felt to engage.

top of page

Subsequent work

Subsequent work

1. Install steering column switch. →945019 Removing and installing steering column switch - section on "Installing"

3. Install steering wheel. →481019 Removing and installing steering wheel - section on "Installing"
4. Install driver's airbag unit. →695819 Removing and installing driver's airbag unit - section on "Installing"
5. Read data into the control unit for steering wheel electronics.
6. Calibrating steering angle sensor

top of page

Reading data out of and writing data into the control unit for steering wheel electronics.

Reading and printing values

Note

- *If reading out the data is not possible, the new control unit for steering wheel electronics must be*

coded. →916219 Removing and installing control unit for steering wheel electronics - chapter on "Coding"

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on ignition. >> Continue.
2. Select the vehicle type.
3. Switch from the vehicle type to the list of control units.
4. Select **steering wheel electronics** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press the >> key.
7. The message **Codes successfully read out** appears on the screen of the Porsche System Tester. Press >> .
8. Switch off ignition and replace control unit. →916219 Removing and installing control unit for steering wheel electronics - section on "Removing"
9. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.

Coding control unit for steering wheel electronics

Coding control unit for steering wheel electronics

Note

The procedure described must be applied when a control unit has to be replaced and the tester function **Control unit replacement** cannot be used.

Note

The **PIWIS tester 9718** instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured in general terms; different text or additions may appear in the **PIWIS tester 9718**.

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

1. Connect the **PIWIS tester 9718** to the vehicle and start it. Switch on the ignition. >> Continue.
2. Select the **vehicle type**.
3. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
4. In the **Special functions** menu, erase **All fault memories** by pressing >> .
5. Carry out automatic search of control units.
6. Using the >> key, move from the vehicle type to the list of control units.
7. Select the control unit **Steering wheel electronics** and activate with the >> key.
8. Select **Coding** and activate with the >> key.
9. Select the respective equipment versions and code them.

Coding	Setting
Tiptronic	yes/no
Multi-function steering wheel	yes/no
Cruise control	yes/no

Headlight washing system	yes/no
Push-to-talk	yes/no
Rear wiper/washer system	yes/no

10. Follow the instructions on the Tester.
11. Calibrate steering angle sensor . →916219 Remove and install control unit for steering wheel electronics - section on "Calibration"
12. Carry out a test drive and read out fault memory.

top of page

Calibrating steering-angle sensor

Calibrating steering-angle sensor

Note

- *The steering-angle sensor must be recalibrated on the measuring platform following repairs to or work on the chassis/steering or if the steering-angle sensor/steering column switch/hydraulic unit is replaced.*
- *In order to be able to calibrate the steering angle sensor correctly, the vehicle must be on the measuring platform, the wheel alignment values correct and the steering in the straight-ahead position.*
- *The security code is displayed in the Porsche System Tester under menu **PSM**, **Actual values**, **Security code**.*

The steering angle sensor must be calibrated using the menu with PIWIS tester under the specified test conditions:

1. Switch on ignition.
2. Turn wheels or steering wheel to straight-ahead position. In the straight-ahead position, the steering wheel must deviate by no more than ± 2.0° from the horizontal position (steering centre position).
3. Before calibrating, first turn the steering wheel from the straight-ahead position approx. 20° to the left and 20° to the right (past straight-ahead position).
4. Turn wheels or steering wheel to straight-ahead position and calibrate the steering-angle sensor in the menu **PSM**, **Calibration**. To calibrate, you must enter the security code in the actual values menu**PSM**, **Actual values**.
5. Enter security code and confirm with F7 .
6. Turn steering-wheel to Tester default position.

7. Tester confirms **Calibration successful**.
8. Carry out a test drive and read out fault memory.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration**

puisse être erronée sur l'impression papier.
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Coding control unit for telephone

Coding the telephone control unit

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select the **vehicle type**.
3. Using the >> key, move from **Vehicle type** to the list of **Control units** and perform the automatic control unit search.

4. Select **PCM2** with the cursor keys and press the >> key.
5. Select **Telephone** with the cursor keys and press the >> key.
6. Select **Coding** using the cursor keys and press >> .
7. Select **Read out coding** (codings) with the cursor keys and press >> .
8. Switch to the **Special functions** menu and perform the **vehicle handover** using the F8 key.
9. In the **Special functions** menu, erase **All fault memories** by pressing >> .
10. Carry out automatic search of control units.
11. In the menu **Write in coding** >> , the data read out are installed.
12. In **Coding** select the version and follow the instructions of the Tester.
13. Read out and erase fault memory.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

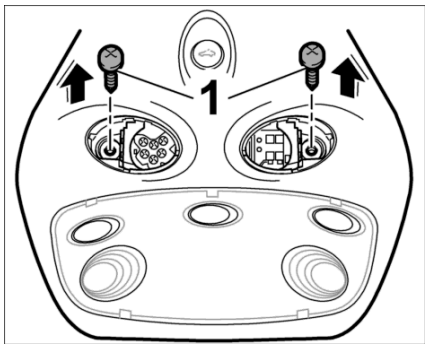
- Removing rain sensor
- Installing rain sensor

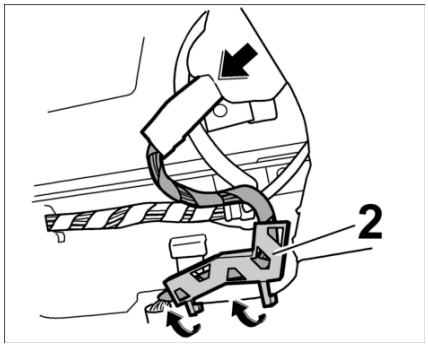
top of page



Removing rain sensor

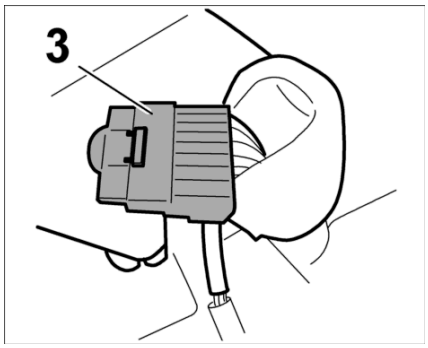
Removing rain sensor

Note



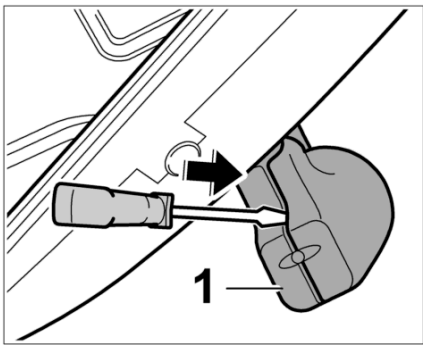
- *An adhesive pad must be used when reinstalling the rain sensor. See PET, main group 9, sub-group 04.*
- *When fitting the adhesive pad, make sure there is no air trapped between the windscreen and the adhesive pad or between the adhesive pad and the rain sensor.*
- *When installing the adhesive pad, the temperature of the windscreen, rain sensor and adhesive pad must be approx 20 °C. Carefully heat the windscreen with a hot-air gun for example.*
- *Do not touch the adhesive surface of the sensor with your fingers.*
- *If the sensor is new, remove the protection cap before sticking the sensor on to the windscreen.*
- *When sticking on a new sensor, make sure that no air pockets are caught between the gel and the windscreen. Air pockets could impair the function of the sensor.*
- *Sensor, orientation lights, wires and wiring ducts are spare parts.*

Limited functionality of the rain sensor if the following points are not observed: →Please observe note *"An adhesive pad must be used when reinstalling the rain sensor. See PET, main group 9, sub-group 04."*



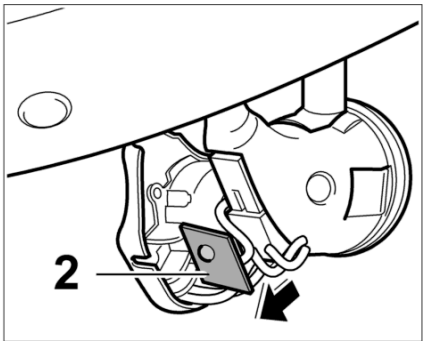
Removing roof console

1. Unclip the two covers on the roof console and unscrew both fastening screws **-1-** .



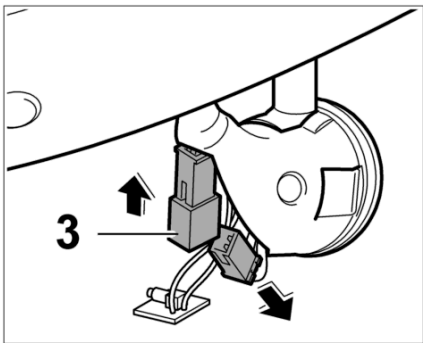
Wire routing

2. Disengage holder **-2-** for the wire **-arrow-** and pull wire forward behind the roof liner.



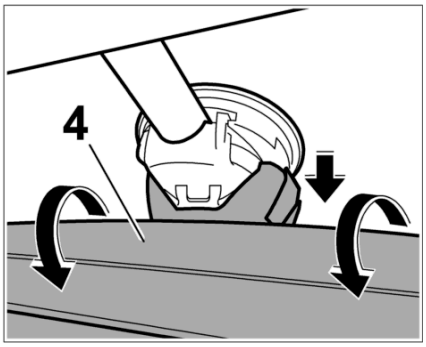
Disconnecting plug connection

3. Release and pull electrical plug apart **-3-** .



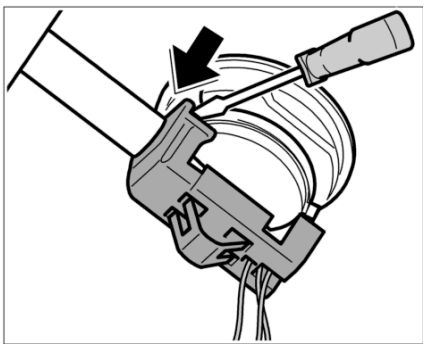
Removing cover of rain sensor

4. Carefully unclip the cover **-1-** from the rain sensor from above using a narrow screwdriver.



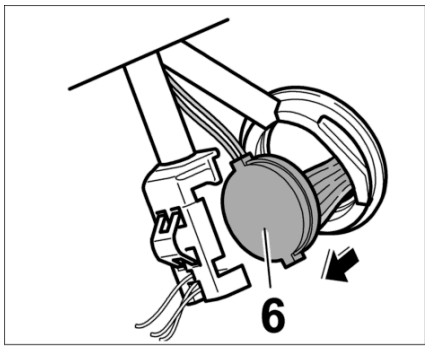
Removing orientation lights

5. Remove orientation lights **-2-** .



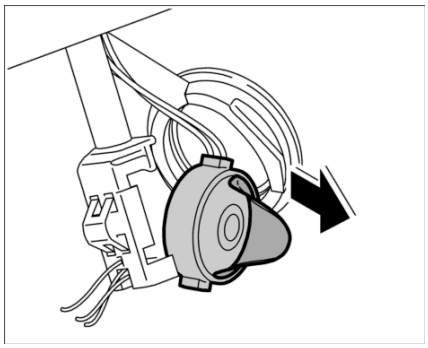
Disconnecting plug connection

6. Carefully pull the plug connection **-3-** out of the holder and pull it apart.



Pushing mirror down from mirror holder

7. Fold mirror downwards **-4-** and push down from the front windscreen bracket.



Unclipping rain sensor holder

8. Carefully unclip holder from rain sensor at the top, bottom left and right.

Removing rain sensor from windscreen

9. Slowly remove rain sensor **-6-** from the windscreen.

Pulling off adhesive pad

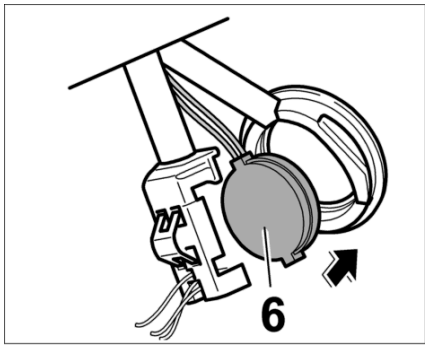
10. If the rain sensor is to be reinstalled, then slowly pull the adhesive pad **-7-** off the rain sensor.

top of page

Installing rain sensor

Installing rain sensor

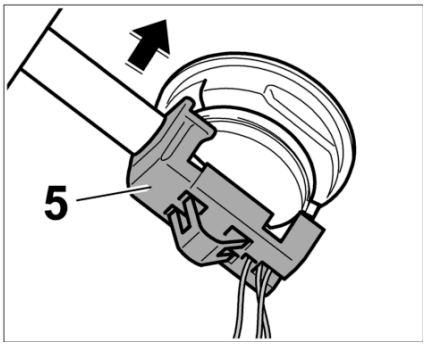
Note



- *An adhesive pad must be used when reinstalling the rain sensor. See PET, main group 9, sub-group 04.*
- *When fitting the adhesive pad, make sure there is no air trapped between the windscreen and the adhesive pad or between the adhesive pad and the rain sensor.*

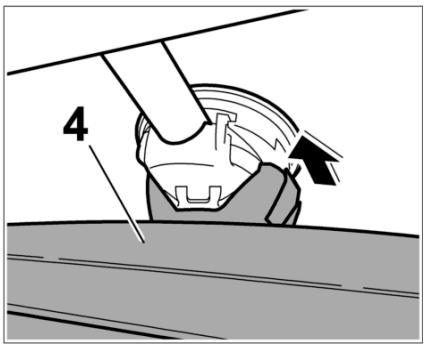
- *When installing the adhesive pad, the temperature of the windscreen, rain sensor and adhesive pad must be approx 20 °C. Carefully heat the windscreen with a hot-air gun for example.*
- *Do not touch the adhesive surface of the sensor with your fingers.*
- *If the sensor is new, remove the protection cap before sticking the sensor on to the windscreen.*
- *When sticking on a new sensor, make sure that no air pockets are caught between the gel and the windscreen. Air pockets could impair the function of the sensor.*
- *Sensor, orientation lights, wires and wiring ducts are spare parts.*

Limited functionality of the rain sensor if the following points are not observed: →Please observe note *"An adhesive pad must be used when reinstalling the rain sensor. See PET, main group 9, sub-group 04."*



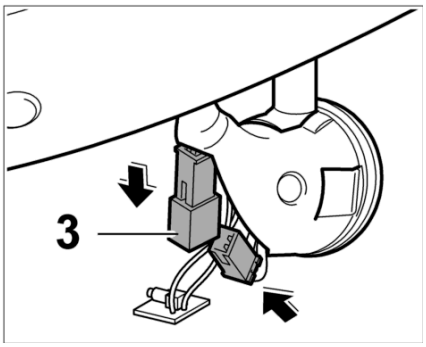
Note

- *If the removed rain sensor is to be reinstalled, the surfaces must be free of adhesive residues. Do not use harsh cleaning agents. Stick the adhesive pad onto the rain sensor at a temperature of approx. 20 °C.*



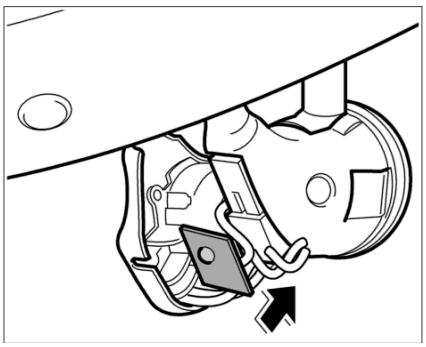
Sticking on rain sensor

1. Press the rain sensor **-6-** onto the windscreen.



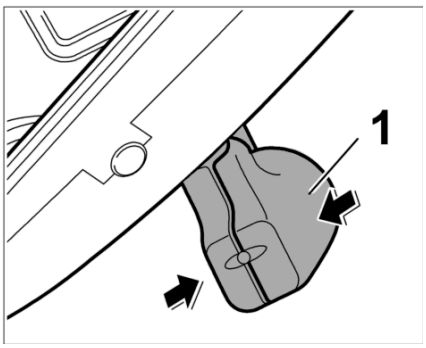
Clipping in holder

2. Push and press holder **-5-** onto the rain sensor until it engages.



Pushing on rear-view mirror

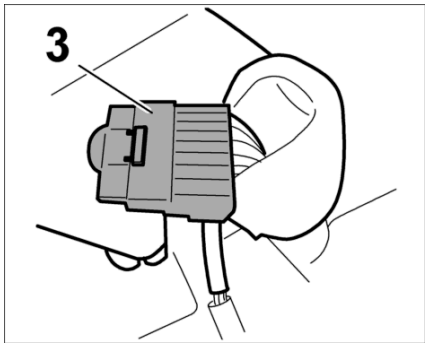
3. Push rear-view mirror **-4-** onto the mirror holder from below.



Plugging in connector

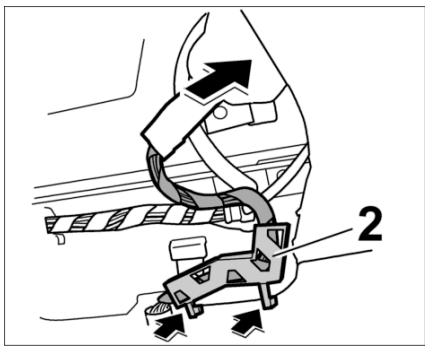
4. Join the plug connection **-3-** and insert it into the mirror base.

Inserting orientation lights



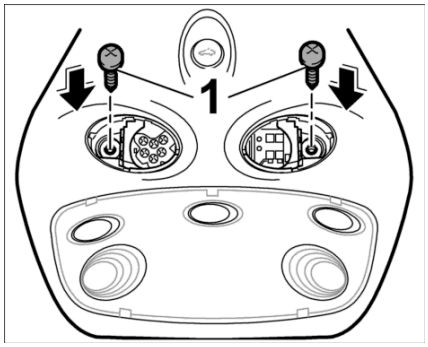
5. Insert orientation light into the cover.

Attaching mirror base cover



6. Join both covers **-1-** , ensuring that the orientation light is positioned

correctly.



Connecting the plug connection

7. Push the electrical plug connection together **-1-** until the plug is felt to engage.

Wire routing

8. Engage holder **-2-** for the electric wire and push wire in behind the roof liner.

Tightening fastening screws

9. Tighten fastening screws **-1-** and clip in both covers.

- Preliminary work
- Adjusting wiper arm
- Subsequent work

Tools

Designation	Type	Number	Explanation	
Adjustment device	special tool	9737		

top of page

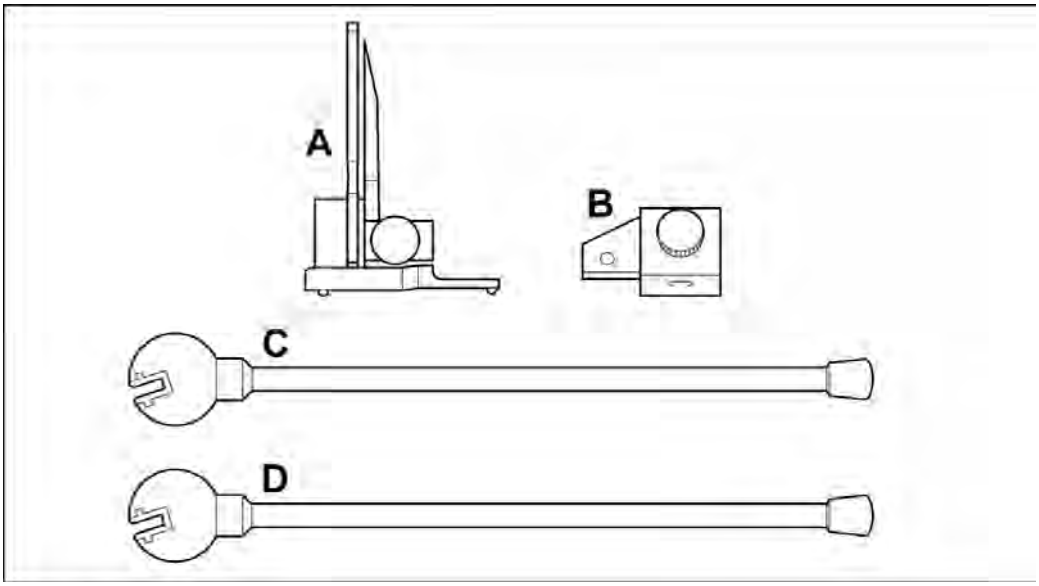
Preliminary work

Preliminary work for adjusting wiper arm attack angle

Note

The wiper arm attack angle will need to be checked and adjusted if the customer complains of: rubbing or hesitation of wiper, noises when wiping or uneven wiping area.
It is important that the wiper blades are inspected for wear and the windscreen is free of contamination.

1. Check condition of windscreen and clean off any contamination.
2. Remove wiper blade. →922719 Removing and installing wiper blade - chapter on "Removing"
3. Inspect condition of wiper blade and replace if necessary.



top of page

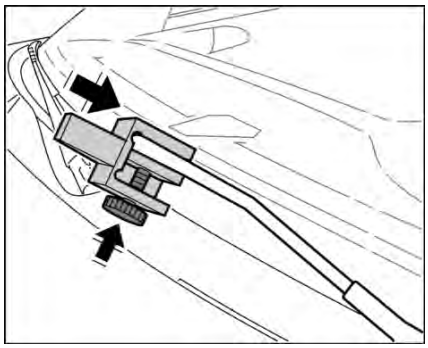
Adjusting wiper arm

Adjusting wiper arm attack angle

Special tools: **Adjustment device 9737**

Installation Location:

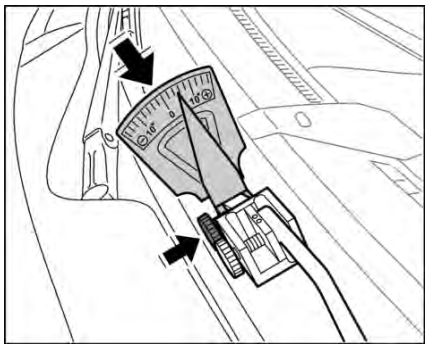
Tools overview



A - Angle measuring device
B - Adapter
C - Angle adjusting tool - holder
D - Angle adjusting tool - arm bracket

Note
Wiper system must be in the parking position. Before starting work, allow the wiper system to run 2 - 3 times with water spray.

WARNING
Unexpected switching on of wiper system while working on the wiper arms.

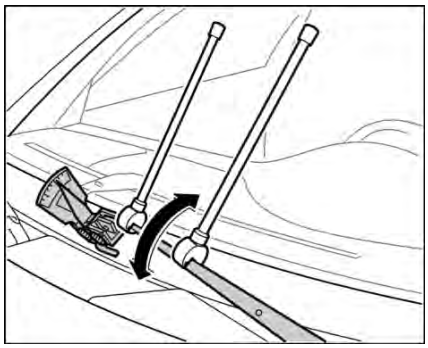


- **Danger of trapping from wiper arms.**

→ Switch off ignition and remove ignition key.

Screw adapter onto wiper arm

1. Fit adapter **-B-** for the sports car flush on the wiper and tighten with the knurled screw.



Screwing angle measuring device to adapter

2. Mount the angle measuring device **-A-** on the adapter and tighten with the knurled screw.
3. Read off wiper arm attack angle using the angle measuring device and compare with the nominal values.

Wiper position	Nominal angle	Tolerance
Parking position on driver's side	+ 5°	+/- 2°
Parking position on passenger's side	+ 3°	+/- 2°

4. If the nominal values are not achieved, the wiper arm must be adjusted using the two adjusting tools.

Adjusting wiper arm angle to nominal value

5. Mount both adjusting tools on the wiper arm and adjust the angle to the nominal value by turning the front adjusting tool.

top of page

Subsequent work

Subsequent work for adjusting wiper arm attack angle

1. Install wiper blade. →922719 Removing and installing wiper blade - chapter on "Installing"
2. Check wiper function of wiper system.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**

- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

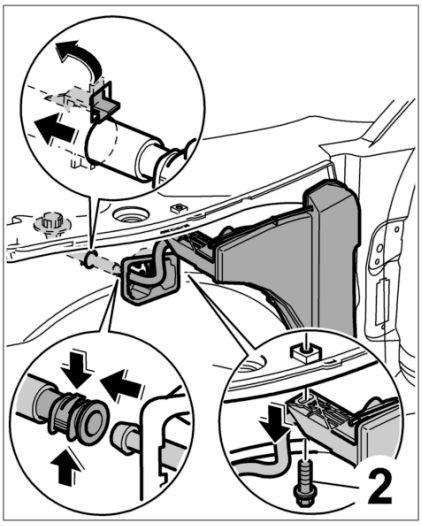
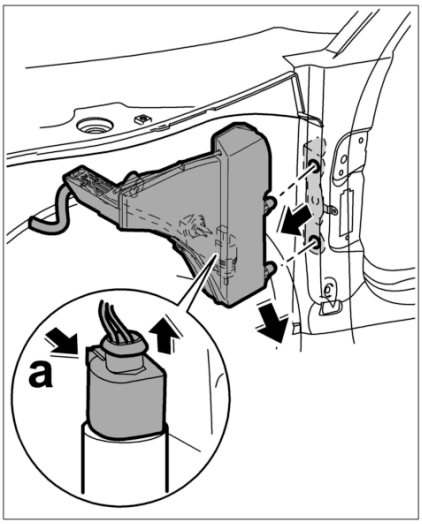
Removing reservoir for windscreen washer system

Removing tank for windscreen washer system



Installation Location:

Installation position



A - 2.5 l tank

B - 6.5 l tank (M288)

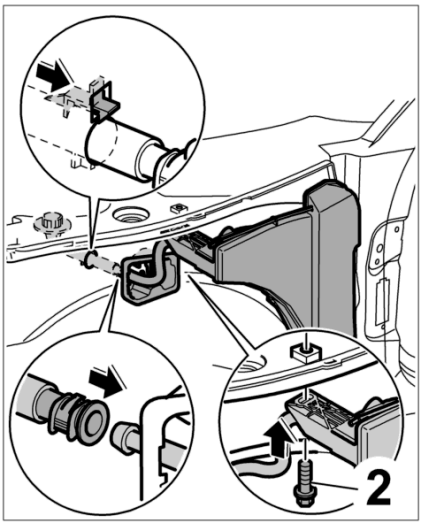
Removing tank

1. Lift lever on water filler neck and pull out the filler neck.
2. Release water connection for the windscreen washer spray nozzles and pull apart.
3. Release water connection for the headlight washer spray nozzles and pull apart.
4. Unscrew fastening screw **-2-** and pull the tank from the mounting point on the A-pillar.

Removing tank from the A-pillar and disconnecting the electrical plug connections

5. Release the electrical plugs **-a-** and pull them off.

top of page



Installing reservoir for windscreen washer system

Installing tank for windscreen washer system

Connecting the plugs and engaging the tank at the A-pillar

1. Retain the tank in the wheel housing and push in electrical plug connections until plugs are felt to engage.

Installing tank:

2. Engage the windscreen washer tank in the A-pillar and secure with the fastening screw **-2-** . → **Tightening torque: 15 ftlb.**
3. Engage the electrical leads in the windscreen washer tank.
4. Connect water connection for the windscreen washer spray nozzles.
5. Connect water connection for the headlight washer spray nozzles.
6. Route and engage the water lines to the tank.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

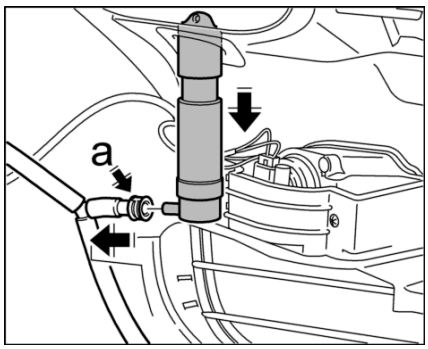
Removing spray nozzle for headlight washer system

Removing spray nozzle for headlight washer system

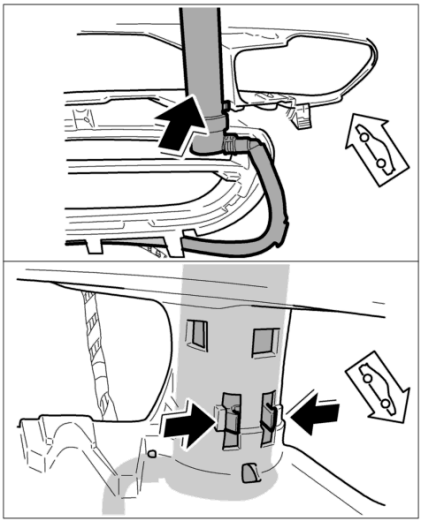
Installation Location:



Installation position for the 911 Carrera

Pressing retaining lugs of spray nozzles together

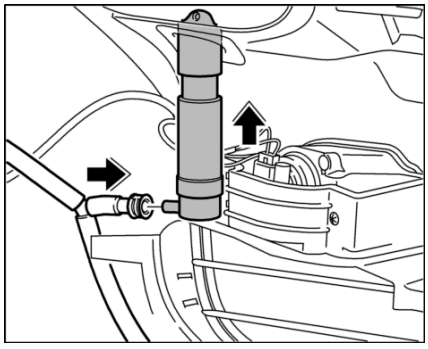
1. Press both retaining lugs of spray nozzle together and remove it from front apron.



Pressing quick-connecting lock and removing water connection

2. Release quick-connecting lock of water connection **-a-** and pull away from the spray nozzle.

top of page



Installing spray nozzle for headlight washer system

Installing spray nozzle for headlight washer system

Inserting spray nozzle in front apron

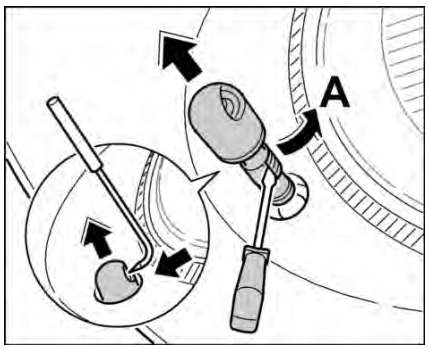
1. Insert spray nozzle in front apron until it engages.

Inserting spray nozzle in front apron and connecting hose line

2. Push water hose onto the spray nozzle until it is felt to engage.

top of page

Subsequent work

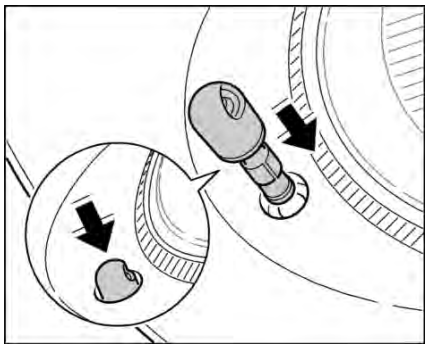


Subsequent work for spray nozzle of headlight washer system

1. Install fog lights. → *23 Removing and installing fog lights - chapter on "Installing"*
2. Install front apron. → *N0 Removing and installing front apron - chapter on "Installing"*
3. Bleed the spray nozzles. The system is bled by activating the spray nozzles for the headlight washer multiple times. Depending on whether it is a left or right spray nozzle, or whether the water reservoir for the headlight washer was completely emptied or not, the bleeding process can require frequent activations of the spray nozzle.

top of page

Removing and installing spray nozzle head



Removing spray nozzle head

Pulling out spray nozzle

1. Insert an angled scriber, for example, into the opening on the nozzle head and pull the spray nozzle up and out.
2. Hold the nozzle head at the top and disengage the catch on the spray nozzle with a small screwdriver **-A-** . The nozzle head is released from the spray nozzle and the spray nozzle moves back into place.

Installing spray nozzle head

Pressing nozzle head into place

1. Insert the nozzle head into the opening on the spray nozzle and slide it in as far as it will go. The nozzle head clicks into place in the spray nozzle.
2. Check function of spray nozzle and spray range.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

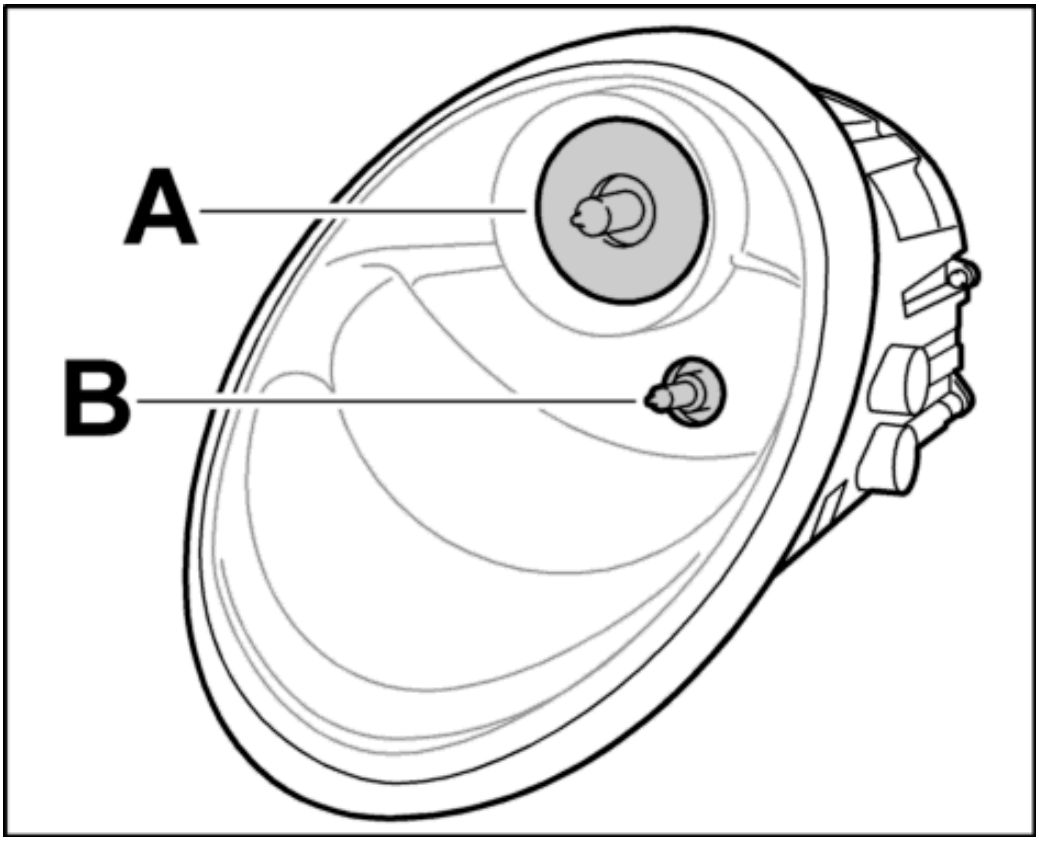
Removing halogen bulb

Removing cap of main headlight

Fastening screws for cap

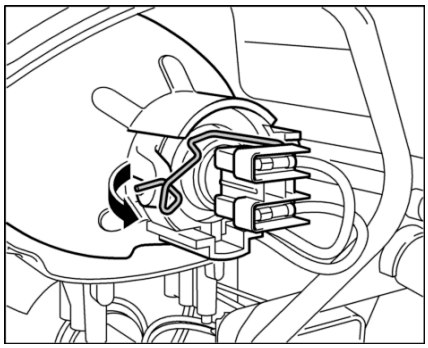
1. Unscrew four fastening screws **-1-** from the cap.



Releasing cap

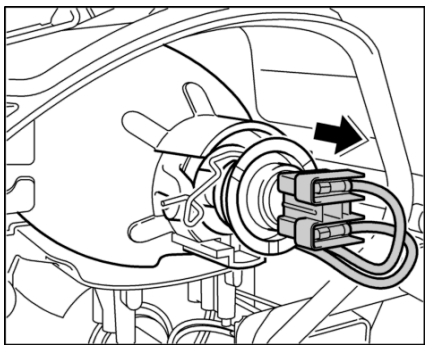
2. Release cap once at the top and twice at the bottom **-a-** and remove from the main headlight.

Removing halogen bulb



Installation Location:

Installation position

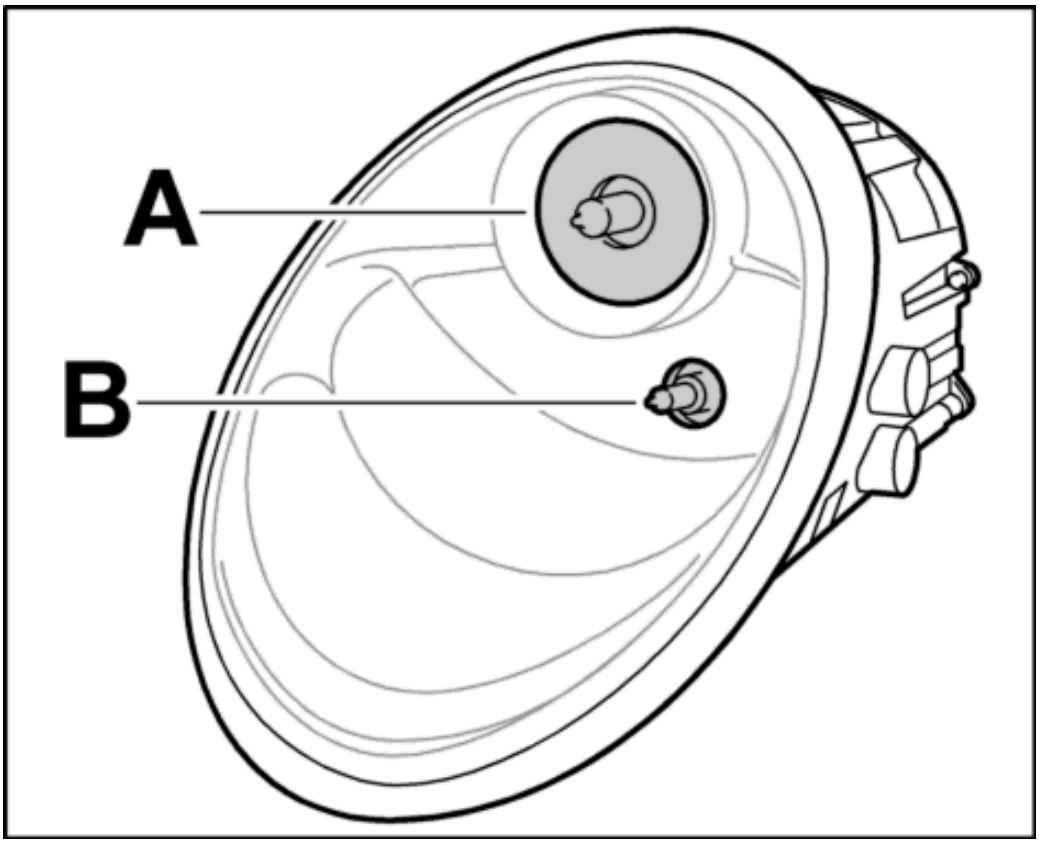


A - Halogen bulb

B - High beam bulb

Disengaging securing clip

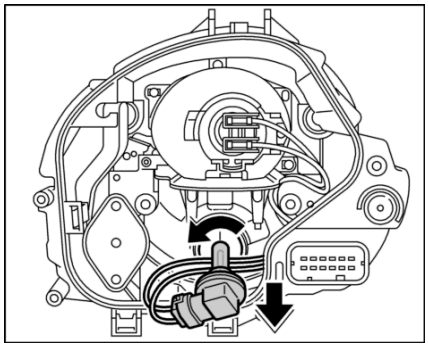
1. Disengage securing clip.



Pulling off electrical connector

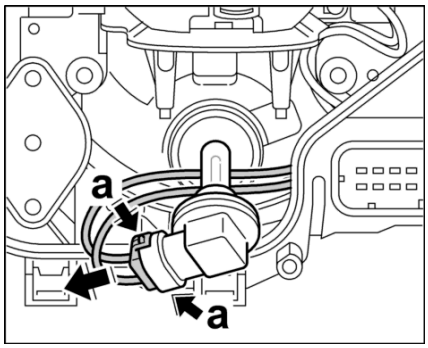
2. Pull electrical connector off bulb and remove bulb.

Removing high beam halogen bulb



Installation Location:

Installation position



A - Halogen bulb

B - High beam bulb

Unscrewing bayonet lock

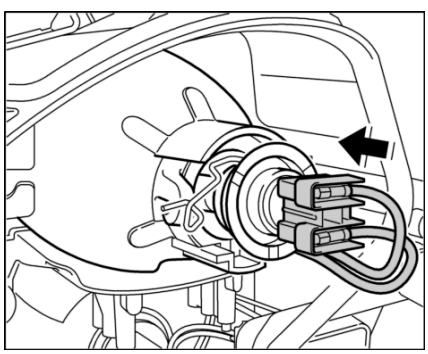
1. Unscrew high beam bulb, bayonet lock counter-clockwise.

Unplugging electrical connector

2. Unclip electrical connector **-a-** and unplug.

top of page

Installing halogen bulb



Installing halogen bulb

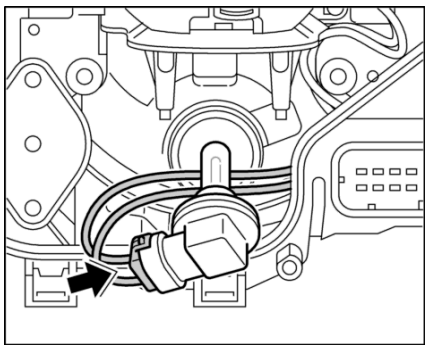
Installing halogen bulb

ATTENTION

Danger of injury! Danger of material damage if bulbs are used or handled incorrectly!

→ When installed, the headlight has a high voltage.
→ Only bulbs specified in the bulb table may be used!
→ Bulbs with a higher wattage may damage the bulb housing!
→ To prevent short circuits, the load in question must be switched off when changing bulbs!
→ New bulbs must be clean and free of grease. Therefore, never touch bulbs with your bare hands! To change the bulbs, use a cloth or soft paper.
→ Observe the safety instructions when replacing a bulb in a Bi-Xenon headlight.
→ In certain states, it is compulsory to carry spare light bulbs.

Pushing connector onto bulb



1. Push the electrical connector fully onto the bulb.
2. Engage locking clip.

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

WARNING
Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select **vehicle type**.
3. From **vehicle type**, change to **control units** >> .
4. Select required **control unit** with the cursor keys and press >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read out values** (codings) with the cursor keys and press the >> key.
7. The message **Codes successfully read out** appears on the screen of the Porsche System Tester. Press >> .
8. Switch off ignition and replace control unit.
9. Switch on ignition. After replacement of the control unit, the data previously read out (see Item 6) is reloaded under the menu **Write in codes**. Press >> .
10. System Tester displays Coding write-in complete . Press the >> key.
11. Leave menu, read out all control units and erase fault memories.
12. Select **front end** on the control unit, carry out **calibration** menu.
13. Check headlight setting and adjust if necessary.

Coding the front end control unit

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select vehicle type, select the **special functions** menu, start the **vehicle handover** and follow the instructions of the tester.
3. **Erase all fault memories**.
4. Using the >> key, move from the vehicle type to the list of control units. Perform the automatic control unit search.
5. Select **front end** with the cursor keys and press >> key.
6. Select **coding** with the cursor keys and press the >> key.
7. Select the variants required for the vehicle and follow the instructions of the tester.
8. Read out and erase fault memory.
9. Select **front end** on the control unit, carry out **calibration** menu.
10. Check headlight setting and adjust if necessary.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Removing steering-column switch

Removing steering column switch

Installation Location:

Install location

WARNING

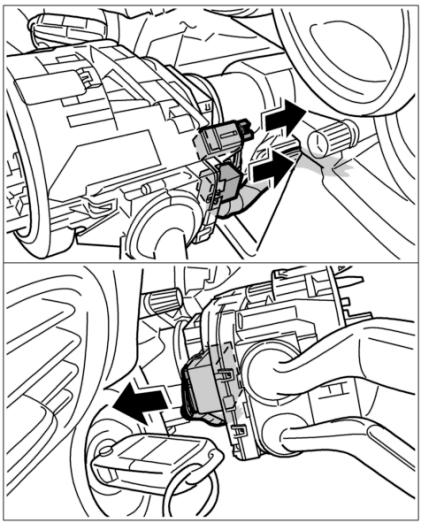
Incorrect adjustment of the contact unit may cause the airbag contact unit to be destroyed when the steering wheel is turned all the way.

- **Risk of destroying airbag contact unit.**

→ When removing and installing steering column switch, the steering wheel must be pulled off in the straight-ahead position. This ensures that the airbag contact unit is locked in the central position.

→ If the setting has accidently changed (locking element released, airbag contact unit out of adjustment), the airbag contact unit must be adjusted as follows.

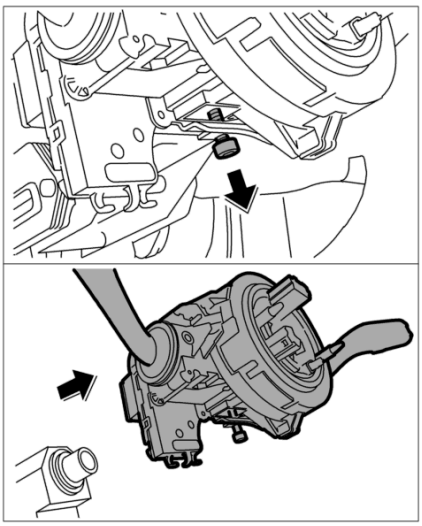
→ To position the airbag contact unit in the central position, press the locking element and turn the rotor carefully to the left as far as it will go.



→ Then turn the rotor carefully to the right, approx. 3.5 to 3.75 revolutions, until the locking element engages. The rotor arrow marking must be positioned between the arrow markings of the contact unit.

WARNING

Risk of damage to electronic control modules.



- **If care is not taken, electrical and electronic components may be destroyed.**

→ Before removing the control module, switch off the ignition and remove the ignition key.

Releasing electrical plug

1. Press locking element for the electrical plug and pull off the plug.

Undoing fastening screw

2. Loosen fastening screw and pull steering column switch downwards from the steering column.

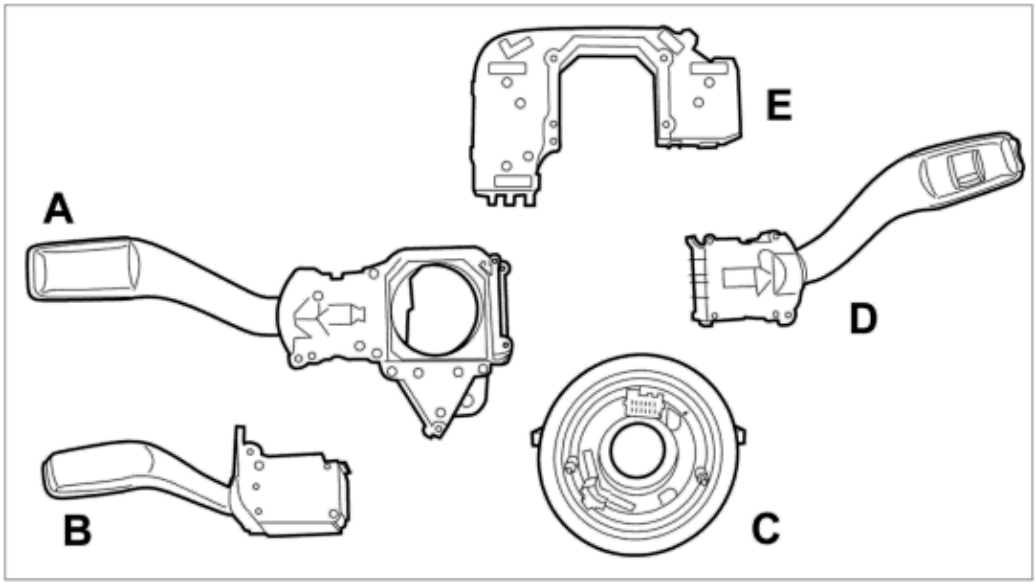
Disassembling and assembling steering column switch

Disassembling steering column switch



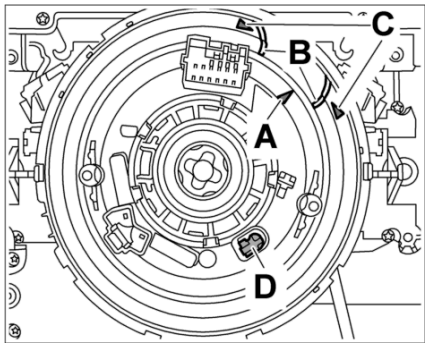


Diagram of steering column switch
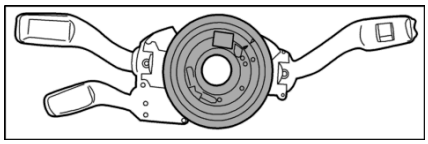
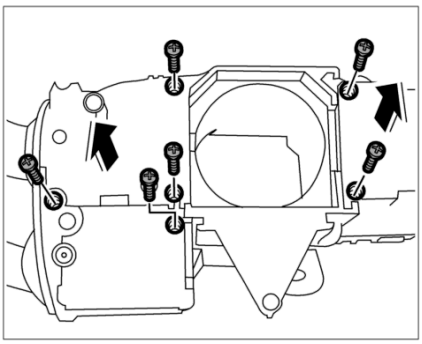
-A- - Direction indicator switch



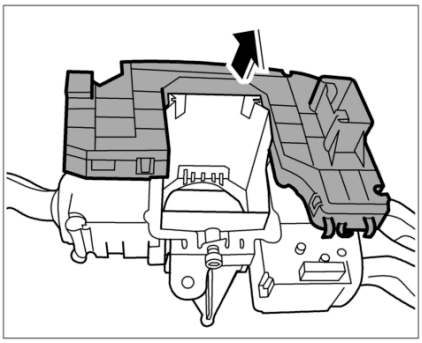
-B- - GRA switch
-C- - Contact unit for airbag
-D- - Switch for wiper and washer system
-E- - Electronic unit

Airbag contact unit marking



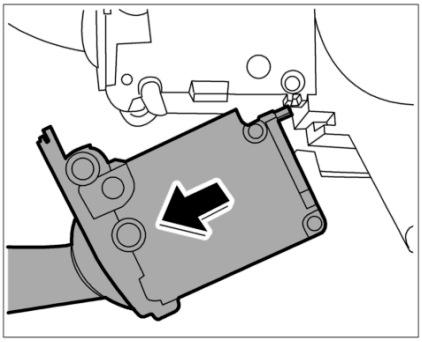
Note

Ensure that arrow **-A-** of the rotor is positioned between the markings **-B-** of the arrows **-C-** of the airbag contact unit and that the locking element **-D-** is engaged.



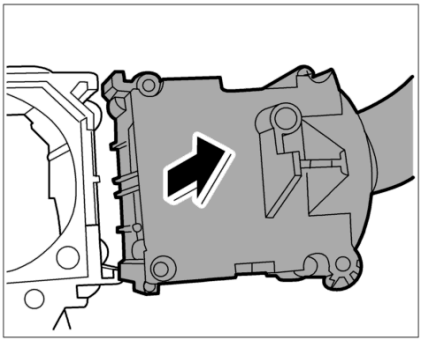
Airbag contact unit locking tabs

1. Carefully lift up the three retaining tabs and remove airbag contact unit **-C-** .



Fastening screws

2. Unscrew the six fastening screws.



Electronic unit

3. Turn the steering column switch round and remove the electronic unit **-E-** .

GRA switch

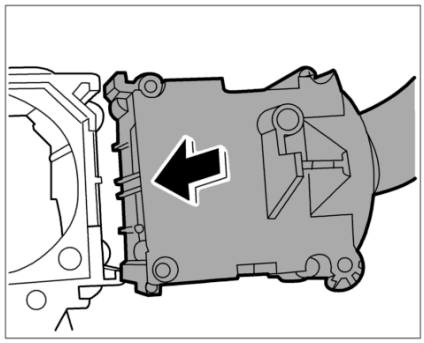
4. Pull the GRA switch **-B-** downward and disengage.

Switch for wiper and washer system

5. Pull switch for wiper and washer system **-D-** up and out of the mount.

Assembling steering column switch

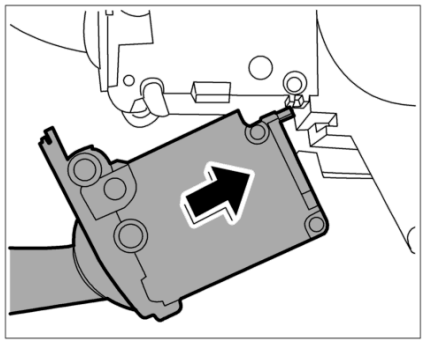
WARNING



Risk of damage to airbag contact unit!

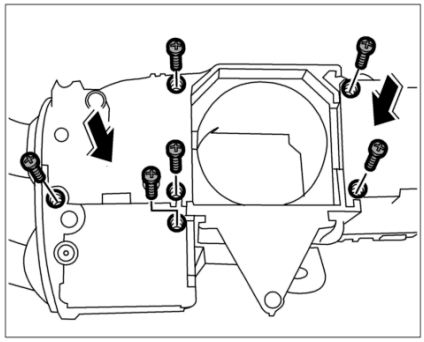
- **If the contact unit has been adjusted, proceed in accordance with the following work instruction:**

→



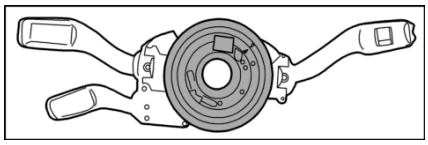
To position the airbag contact unit in the central position, press the locking element and turn the rotor carefully to the left as far as it will go.

→ Then turn the rotor carefully to the right, approx. 3.5 to 3.75 revolutions, until the locking element engages. The rotor arrow marking must be positioned between the arrow markings of the contact unit



Switch for wiper and washer system

1. Insert switch for wiper and washer system **-D-** into the mount.



GRA switch

2. Attach the GRA switch **-B-** and fold it upwards.
3. Turn the steering column switch and position the electronic unit.

Screw in 6 fastening screws.

4. Turn the steering column switch round again and screw in the six fastening screws.

Position airbag contact unit

5. Position airbag contact unit and press onto the steering column switch until the three tabs engage **-arrows-** .

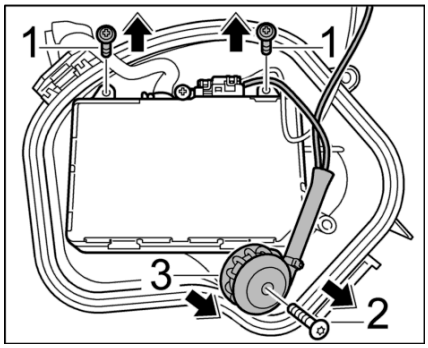
Removing control unit for gas discharge

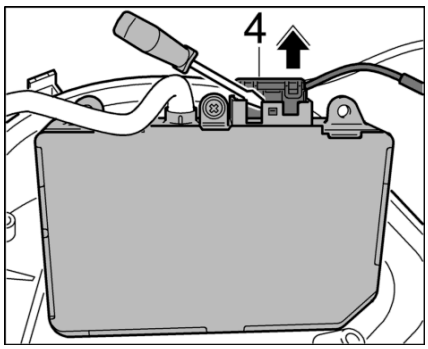
Removing cap of main headlight

Fastening screws for cap



1. Unscrew four fastening screws **-1-** from the cap.

Releasing cap

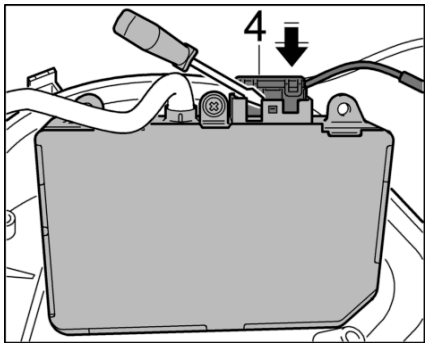


2. Release cap once at the top and twice at the bottom **-a-** and remove from the main headlight.

Removing control unit for gas discharge

Unscrewing fastening screws and pulling out coil

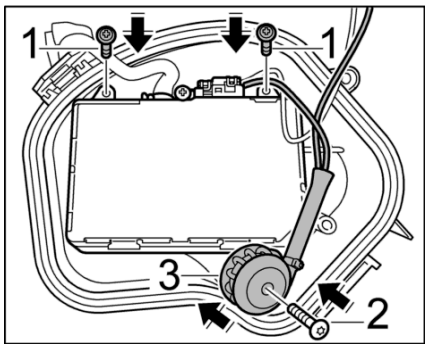
1. Unscrew the fastening screw **-2-** for the coil and pull the coil **-3-** out of the cap.
2. Unscrew the two fastening screws **-1-** and remove the control unit.



Releasing electrical connector with screwdriver

3. Using a screwdriver, carefully release the electrical connector on the screwdriver and lever it out.

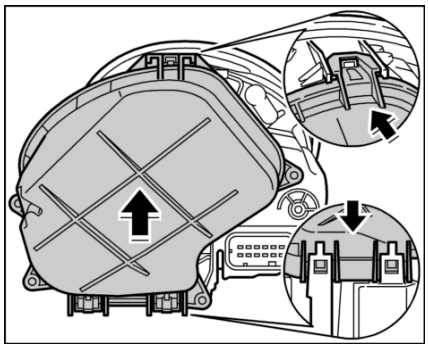
top of page



Installing control unit for gas discharge

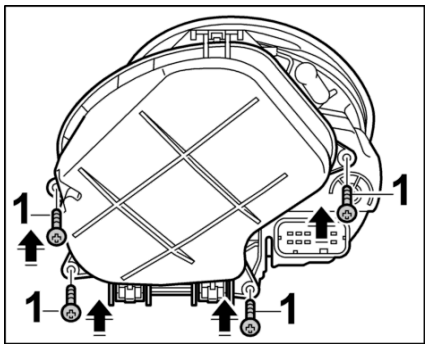
Installing control unit for gas discharge

Connecting electric plug



1. Press in the electrical connector for the gas-discharge control unit until it clicks into place.

Screwing down the fastening screws and the coil



2. Insert the control unit in the headlight cap and screw down with both fastening screws **-1-** .
3. Push on the coil and screw it down with the fastening screw.

Installing main headlight cap

Positioning cap

1. Position cap on main headlight and press into place, making sure that the cap engages once at the top and twice at the bottom.

Screwing in the fastening screws

2. Screw in four fastening screws **-1-** for the cap.

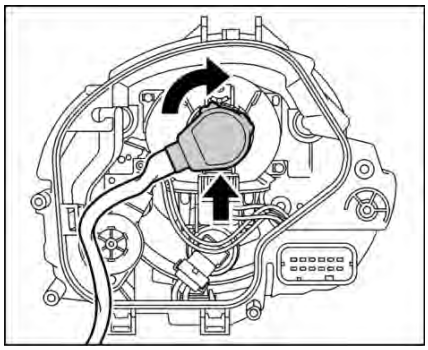
ATTENTION

Danger of injury! Danger of material damage if bulbs are used or handled incorrectly!

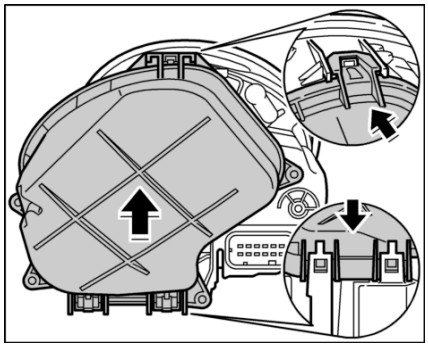


→ When installed, the headlight has a high voltage.
→ Only bulbs specified in the bulb table may be used!
→ Bulbs with a higher wattage may damage the bulb housing!
→ To prevent short circuits, the load in question must be switched off when changing bulbs!
→ New bulbs must be clean and free of grease. Therefore, never touch bulbs with your bare hands! To change the bulbs, use a cloth or soft paper.
→ Observe the safety instructions when replacing a bulb in a Bi-Xenon headlight.
→ In certain states, it is compulsory to carry spare light bulbs.

1. Replace faulty lamp. Ensure that the lamp is seated correctly when doing so.

Inserting retaining bows

2. Insert both retainng bows.



Positioning electric connector

3. Position electric connector and turn to the right as far as it will go (bayonet lock).

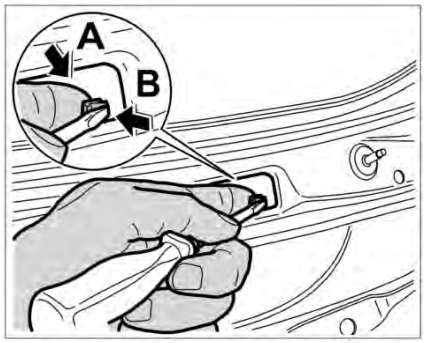
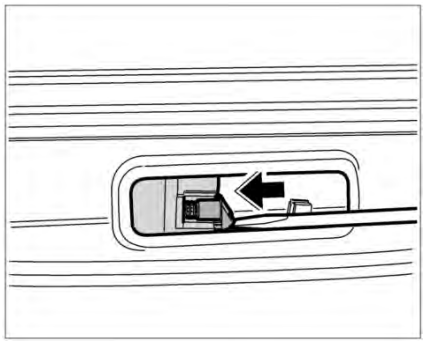
Removing auxiliary stop light in rear centre panel

Preliminary work for auxiliary brake light in rear centre panel



Remove rear centre panel. →512119 Removing and installing rear centre panel - section on "Removing"

Removing auxiliary brake light in rear centre panel



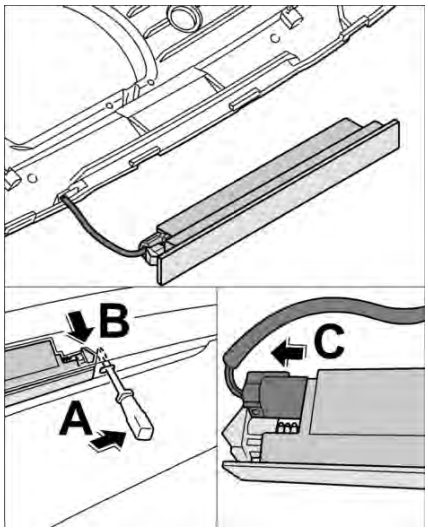
Releasing connector with screwdriver

1. Raise rear centre panel away from the vehicle, release the electric connector using a small screwdriver **-A-** and unplug it.
2. Turn the rear centre panel over and set it down on a suitable protective base.

Releasing fastening clips

3. The auxiliary brake light is clipped into the rear centre panel six times in total. Starting from the outside, put your finger through the openings in the rear centre panel and release the clips from behind **-A-** . At the same time, release the clips from the front using the screwdriver **-B-** and pull the ends of the auxiliary brake light carefully out of the rear centre panel.

Pushing left and right locking mechanisms together with a screwdriver



4. Push the two locking mechanisms for the auxiliary brake light (centre) together with a screwdriver and pull the brake light out of the rear centre panel.

top of page

Removing auxiliary stop light in rear spoiler

Removing auxiliary brake light in rear spoiler

1. Remove the spoiler.

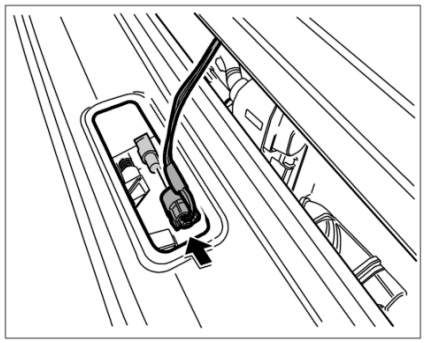
Removing auxiliary brake light

2. Insert a screwdriver through the openings in the rear spoiler from below, press the locking mechanism **-B-** for the auxiliary brake light together **-A-** and carefully pull out the brake light.
3. Repeat the procedure on the other side if necessary.
4. Release the electric plug connection **-C-** and disconnect it from the brake light.

top of page

Installing auxiliary stop light in rear centre panel

Installing auxiliary brake light in rear centre panel



Note

Check the six clips on the auxiliary brake light for damage. If the brake light holders are damaged, the light must be replaced.

Inserting brake light

1. Position the auxiliary brake light in the rear centre panel and carefully clip it into the rear centre panel, starting from the centre out.
2. Check that the auxiliary brake light is fitted securely.

Plugging in connector

3. Connect the electric plug connection to the auxiliary brake light until it clicks into place.

On installing a new auxiliary headlight, the adjustment must be checked with a headlight adjustment unit and adjusted if necessary.

Adjusting auxiliary headlight

Use hexagon socket wrench insert size 4 through opening in front spoiler and adjust the auxiliary headlight.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

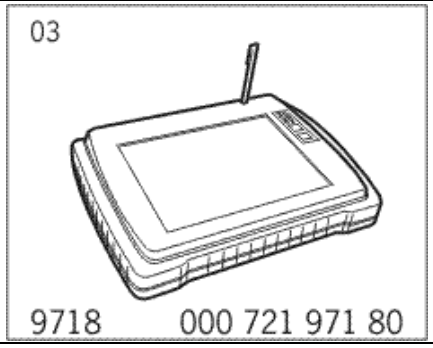
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

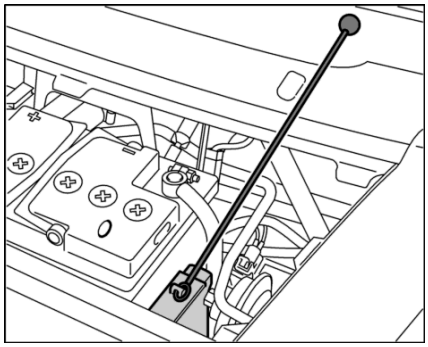
Information

Vehicle electrical system - switching on



Battery disconnect switch with external switch lever

The battery disconnect switch, which is supplied via the positive terminal, is closed manually using the external switch lever and locked electromagnetically. The luggage compartment lid must not be open when doing this.

Vehicle electrical system - switching off

The vehicle electrical system switches off:
If the battery voltage falls below 12.6 V for approx. 10 min.
Immediately, if the voltage supply of the main power supply switch (battery disconnect switch) is disconnected from the positive terminal.

Vehicle electrical system - switching off

Immediately, if the main power supply switch (battery disconnect switch) is mechanically released.

96 62 25 Teaching hand-held transmitter - as of MY 2005

Teaching hand-held transmitter

Note

If an additional hand-held transmitter is to be taught, for example, all original keys/remote controls must also be used and taught.
If a new hand-held transmitter is taught for a vehicle, the Teach Enable Code (TEC), Transponder password and Transponder Secret Key specified in IPAS must be entered.
You can get the codes from IPAS or from your importer by specifying the vehicle identification number.
During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The Porsche System Tester instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured generally, different text or additions may appear in the Porsche System Tester.

Note

- *Only new hand-held transmitters or those already adapted to the immobiliser system on the vehicle can be taught.*
- *Hand-held transmitters that are already adapted are overwritten, and so all hand-held transmitters that will later be used on the vehicle must be taught.*
- *Teaching of keys is protected over a time period. Once this time has elapsed, teaching is aborted.*

1. Ignition off. Connect the Porsche System Tester to the vehicle and start the System Tester. Select vehicle type.
2. Switch on warning indicator light; this will activate CAN and ensure that the KESSY control unit is identified.
3. Select **PAS** control unit and press >> .
4. Select the **Teaching function** menu >> .
5. Select the **Teach keys** menu >> .
6. Enter the Teach Enable Code **TEC** from IPAS >> and confirm by pressing F7 .
7. Enter the **Number of keys** >> and confirm by pressing F7 .
8. Enter the **Transponder password** >> and confirm by pressing F7 .

9. Enter the **Transponder Secret Key** >> and confirm by pressing F7 .
10. Tester requests: **Insert key 1** >> , **Insert key 2** >> etc., until the relevant number of keys is reached.
11. Tester information regarding **Synchronisation of keys** is no longer necessary.
12. Switch on the ignition, read out the fault memory of all control units, and erase if necessary.
13. Start engine with all keys, one after the other. The hand-held transmitters have now been taught.

96 66 19 Removing and installing KESSY/PAS control unit - as of MY 2005

- Information
- Programming KESSY/PAS control unit
- Removing KESSY/PAS control unit
- Installing KESSY/PAS control unit
- Programming KESSY/PAS control unit

Tools

Designation	Type	Number	Explanation	
PIWIS Tester	special tool	9718		

top of page

Information

Control unit information for KESSY/PAS

Note

If the KESSY/PAS control unit is replaced, it must be programmed using the Porsche System Tester. This will ensure that the control module is taught for the relevant vehicle, country version and equipment.
If possible, before the control unit is removed and replaced, a read-out of the vehicle data should be obtained from the Porsche **PIWIS Tester 9718** System Tester.

- *Follow the instructions for the Porsche System Tester*.

The KESSY/PAS control unit can only be taught once for one vehicle. Switching is not possible.

top of page

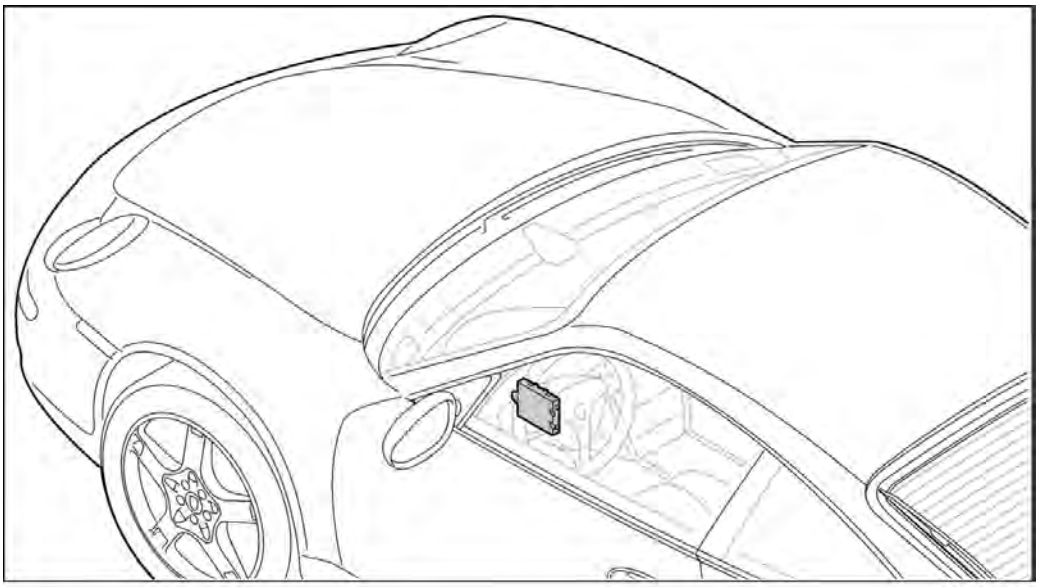
Programming KESSY/PAS control unit

Obtaining read-out and saving vehicle data from control unit

1. Connect the **PIWIS Tester 9718** to the vehicle and start the System Tester. Switch on ignition. Press >> to continue.
2. Select vehicle type using the cursor keys.
3. Switch to Control units.

Note

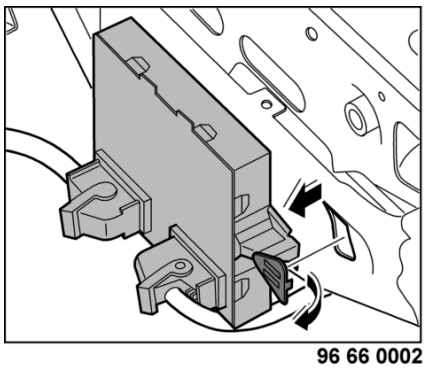
In order to guarantee the function of the control unit after teaching, the coding value in the old control unit must be read out or determined again. This value must be written into the new control unit after teaching. If the control unit cannot be read out again, it must be coded according to the vehicle equipment after the control unit has been replaced manually. **PAS** menu - **Coding**.



4. Select **PAS** with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Read-out values** (vehicle data) with the cursor keys and press the >> key.
7. The note **Coding read-out complete** will appear on the screen of the Porsche System Tester.
8. After the PAS/KESSY/Immobiliser control unit has been replaced, the data that is read out is loaded in via the **Control unit replacement** - **Write in data** menu (see Item 6).
9. The KESSY/PAS control unit and vehicle keys must then be taught. →966619 Removing and installing KESSY control unit - "Programming" section

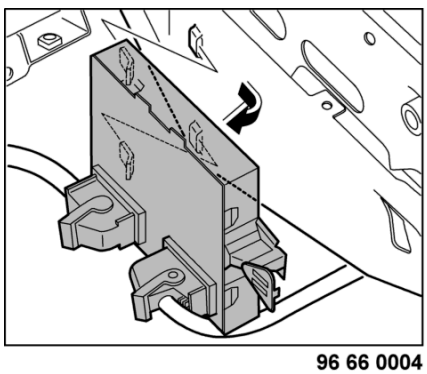
top of page

Removing KESSY/PAS control unit



Removing KESSY/PAS control unit

Installation Location:



Installation position shown on the 911

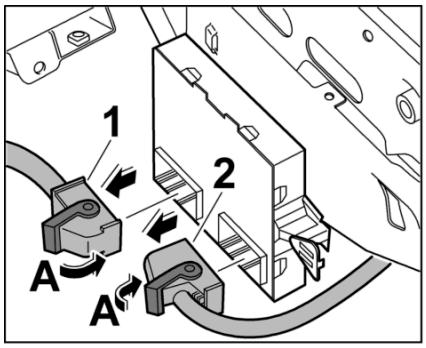
To provide a clearer picture, the illustrations are shown from the bulkhead view.

Pivotting out securing bolt and unclipping control unit

1. Release and open the locking lever located "in the forward direction of travel".
2. Lift control unit at front out of the support for the steering wiring.

Disengaging control unit at both plates

3. Push control unit forward in "direction of travel" and disengage it from the support for the steering wiring.



WARNING

Risk of damage to electronic control modules.

- **If care is not taken, electrical and electronic components may be destroyed.**

→ Before removing the control module, switch off the ignition and remove the ignition key.

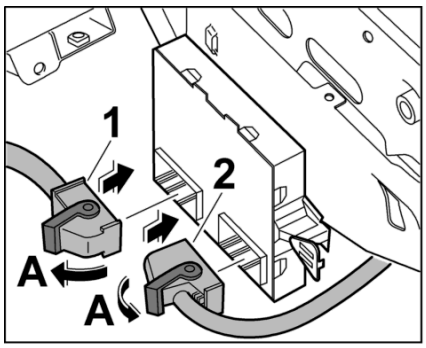
Note
Depending on the vehicle equipment, the control unit has one or two connectors.

Releasing and unplugging connectors

4. Release both electrical connectors **-1, 2-** **-A-** and unplug them from the control unit.
5. Take out the control unit.

top of page

Installing KESSY/PAS control unit

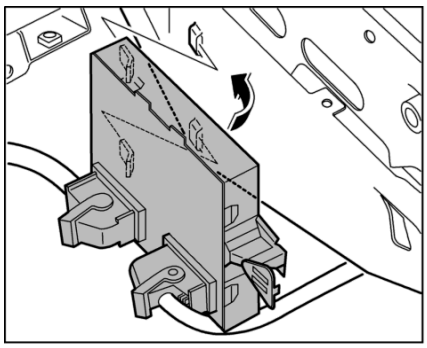


Installing KESSY/PAS control unit

WARNING
Risk of damage to electronic control modules.

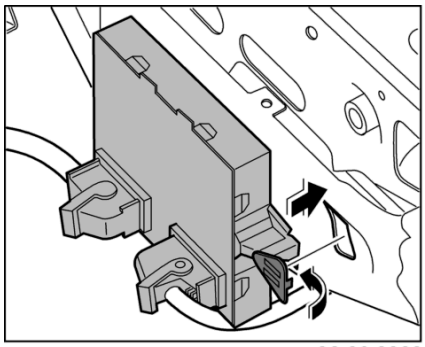
- **If care is not taken, electrical and electronic components may be destroyed.**

→ Before removing the control module, switch off the ignition and remove the ignition key.



Note
Depending on the vehicle equipment, the control unit has one or two connectors.

96 66 0007



Inserting the connectors

1. Press both electrical connectors **-1, 2-** into control unit and lock them until they are felt to engage.

96 66 0005

Engaging control units at both retaining lugs

2. Engage control unit in support for wiring harness with both retaining lugs.

96 66 0003

Clipping in control unit + pivotting out securing bolt

3. Clip in control unit on the support for the steering wiring and engage the locking mechanism for the lock.

top of page

Programming KESSY/PAS control unit

Programming new KESSY/PAS control unit

Note

All original keys are required for teaching.

Note

If a new KESSY/PAS control unit is installed in a vehicle, the immobiliser code, Teach Enable Code (TEC), ELV Secret Key, Transponder password and Transponder Secret Key specified in IPAS must be entered.
You can get the codes from IPAS or from your importer by specifying the vehicle identification number.
During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.
The Porsche System Tester instructions take precedence and in the event of a discrepancy these are the instructions that must be followed. Deviations may occur with later software versions.
The procedure described here has been structured generally, different text or additions may appear in the Porsche System Tester.
In order to guarantee the function of the control unit after teaching, the coding value in the old control unit must be read out or determined again. This value must be written into the new control unit after teaching. → *AZ Removing and installing KESSY control unit - "Reading out" section*

1. Ignition
   off.
2. Replace control unit. → *21 Removing and installing KESSY control unit "Removing" section*; → *23 Removing and installing KESSY control unit "Installing" section*

Note

Once a new KESSY/PAS control unit has been installed, the ignition can no longer be switched on. In order for the Tester to be able to identify the new control unit, the warning indicator light must remain switched on during the teaching procedure. This will activate CAN.

3. Insert ignition key and switch on hazard warning light switch.
4. Select vehicle type.
5. Switch to the control units >> .
6. Select **PAS** with the cursor keys and press the >> key.
7. Switch to the menu **Teaching functions** and **Teach CU**, continue >> .
8. Enter the Teach Enable Code **TEC** from IPAS >> and confirm by pressing F7 .
9. Enter **vehicle identification number** >> and confirm by pressing F7 .
10. Enter the **ELV Secret Key** from IPAS >> and confirm by pressing F7 .
11. Enter **immobiliser code** from IPAS >> and confirm by pressing F7 .
12. Enter the **Transponder password** >> and confirm by pressing F7 .

13. Enter the **Transponder Secret Key** >> and confirm by pressing F7 .
14. Tester advises: **Control unit taught, Teach keys**. Select the **Teach keys** >> menu.
15. Enter the Teach Enable Code **TEC** from IPAS >> and confirm by pressing F7 .
16. Enter the **Number of keys** >> and confirm by pressing F7 .
17. Enter the **Transponder password** >> and confirm by pressing F7 .
18. Enter the **Transponder Secret Key** >> and confirm by pressing F7 .
19. Tester requests: **Insert key 1** >> , **Insert key 2** >> etc., until the relevant number of keys is reached.
20. Tester information regarding **Synchronisation of keys** is no longer necessary.
21. Switch on the ignition, read out the fault memory of all control units, and erase if necessary.
22. << Return to vehicle type, select the **Special functions** on the control unit side, and carry out a **vehicle handover**.
23. Then read out the fault memory again, and erase fault memory for each faulty control unit.
24. Start engine with all keys, one after the other.

Note

In order to guarantee the function of the control unit after teaching, the coding value in the old control unit must be read out or determined again. This value must be written into the new control unit after teaching. If the control unit cannot be read out again, it must be coded according to the vehicle equipment after the control unit has been replaced manually. **PAS** menu - **Coding**.

25. In the menu **PAScodings** select the coding desired by the customer and code with F8 .
26. The Kessy/PAS has been taught. Check the remote controls on the vehicle for proper function.

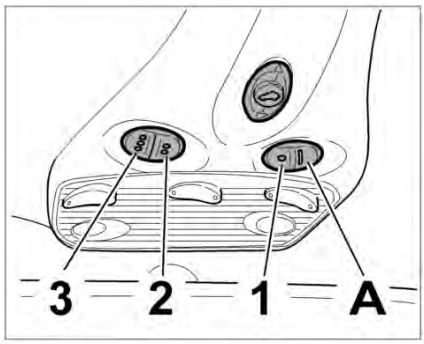
Teaching control unit for garage door opener/HomeLink

HomeLink



WARNING

Danger of accidents if persons, animals or objects lie in the swinging range of the controlled mechanism during operation of the garage door opener.

→ Ensure that there are no persons, animals or objects in the swinging range of the controlled mechanism during operation of the garage door opener.

→ Observe the safety instructions for the original hand-held transmitter.

The programmable HomeLink replaces up to three original remote controls for operating various equipment (e.g. garage door, gate to property, alarm system).

Overview of button assignment for garage door opener

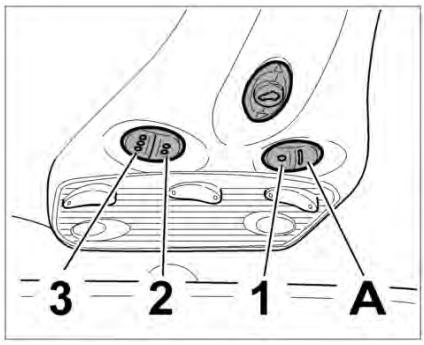
The buttons **-1 to 3-** can be programmed with a frequency of an original remote control.

Prerequisites for operating and programming the HomeLink:

- The ignition is switched on.
- The fog lights are switched off.

To activate the required equipment:

Press the relevant button **-1, 2 or 3-** . The LED **-A-** lights up during signal transmission.

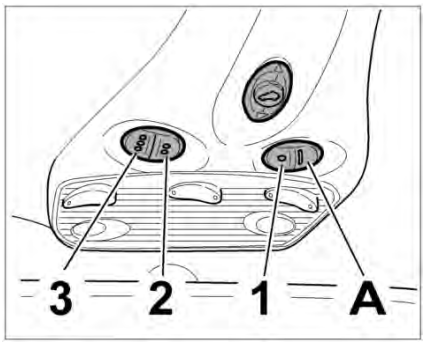


Operating instructions:

Always use the garage door opener in the direction of travel. Otherwise range limitations cannot be ruled out.
Before selling the vehicle, erase the programmed garage door opener signals on the keypad.
To determine whether the original remote control has a fixed or variable code, please read the instructions for the original remote control.
In the case of a standard fixed code, the LED in the roof console is permanently lit during the transmission process. No further steps are necessary for the operation of compatible systems.
If the system set is not activated by the garage door opener control unit, this may be because the original remote control has a variable code.

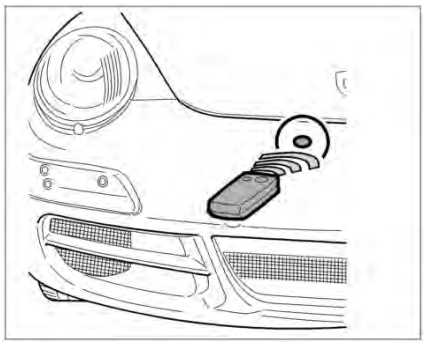
top of page

Assigning garage door opener/HomeLink signals to buttons



Garage door opener/HomeLink with fixed code system

Overview of button assignment for garage door opener



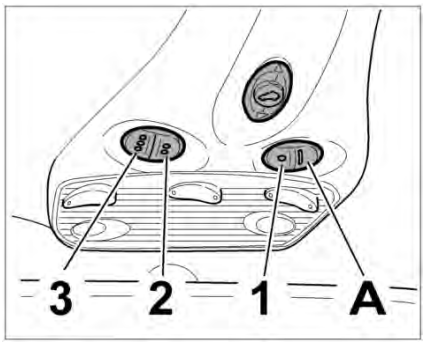
Note

- *This operation erases the standard codes set in the factory. Do not repeat this operation if additional buttons are to be programmed.*
- *Hold the two outer buttons **-1 and 3-** down for around 20 seconds until the LED **-A-** starts to flash quickly. All programmed signals for the buttons **-1 to 3-** are erased.*

Overview of button assignment for garage door opener

1. Press the required button until the LED flashes slowly. You then have around 5 minutes to complete steps 2 and 3.

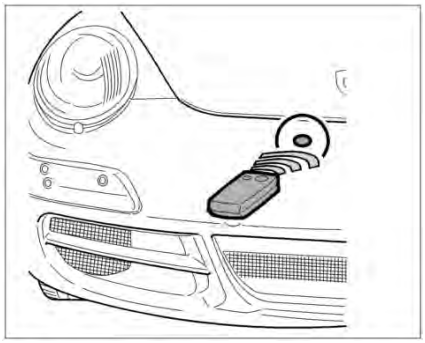
Teaching position for remote control



2. Hold the original remote control approx. 0 - 30 cm in front of the marked position on the vehicle.
3. Press the Send button on the original remote control until the fog lights flash three times (up to approx. 45 seconds).
4. Repeat steps 1 to 3 to assign further buttons.

Note

A number of attempts may be necessary at different distances between the vehicle and original remote control. The fog lights flash once after 5 minutes. The programming operation must then be started from scratch.

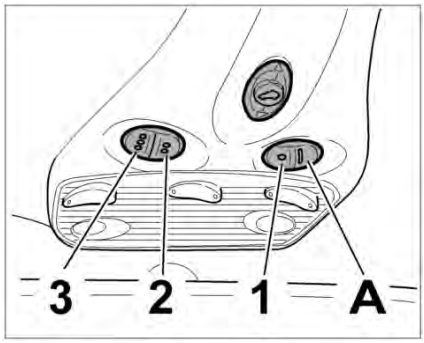


Garage door opener/HomeLink with variable code system

Check operating instructions for the garage door drive (or other system) for specification of a variable code. If the garage door opener control unit has been programmed to a variable code system, it will still have to be synchronised with this system on completion of programming before it will work correctly.

Button assignment for garage door opener

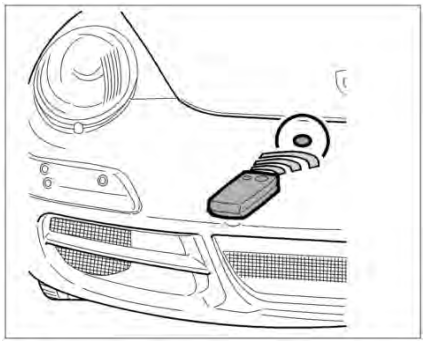
1. Press the required button until the LED flashes slowly. You then have around 5 minutes to complete steps 2 and 3.



Teaching position for remote control

2. Hold the original remote control approx. 0 - 30 cm in front of the marked position on the vehicle.
3. Press the Send button on the original remote control until the fog lights flash three times (up to approx. 45 seconds).
4. To synchronise the system: press the programming button on the garage door drive receiver. You then have 30 seconds to initiate step 5.
5.

Press assigned button on the HomeLink twice. (You may have to press the button to be assigned a third time on some equipment in order to complete the setting.)

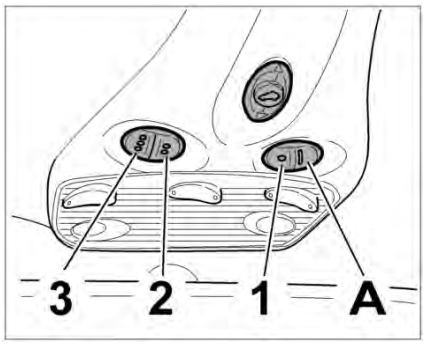


6. Repeat the programming steps to assign further buttons.

Re-programming an individual button

Button assignment for garage door opener

1. Press the required button until the LED flashes slowly (approx. 20 seconds). You then have around 5 minutes to complete steps 2 and 3.



Teaching position for remote control

2. Hold the original remote control approx. 0 - 30 cm in front of the marked position on the vehicle.
3. Press the Send button on the original remote control until the fog lights flash three times (up to approx. 45 seconds).
4. Repeat steps 1 to 3 to assign further buttons.

Note

A number of attempts may be necessary at different distances between the vehicle and original remote control. The fog lights flash once after 5 minutes. The programming operation must then be started from scratch.

Erasing programmed signals on the HomeLink

Button assignment for garage door opener

Note

This operation erases the standard codes set in the factory. Do not repeat this operation if additional buttons are to be programmed.
Hold the two outer buttons **-1 and 3-** down for around 20 seconds until the LED **-A-** starts to flash quickly.
All programmed signals for the buttons **-1 to 3-** are erased.

Do this before selling the vehicle, for example.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se

correspondan con el contenido de la imagen de la pantalla.

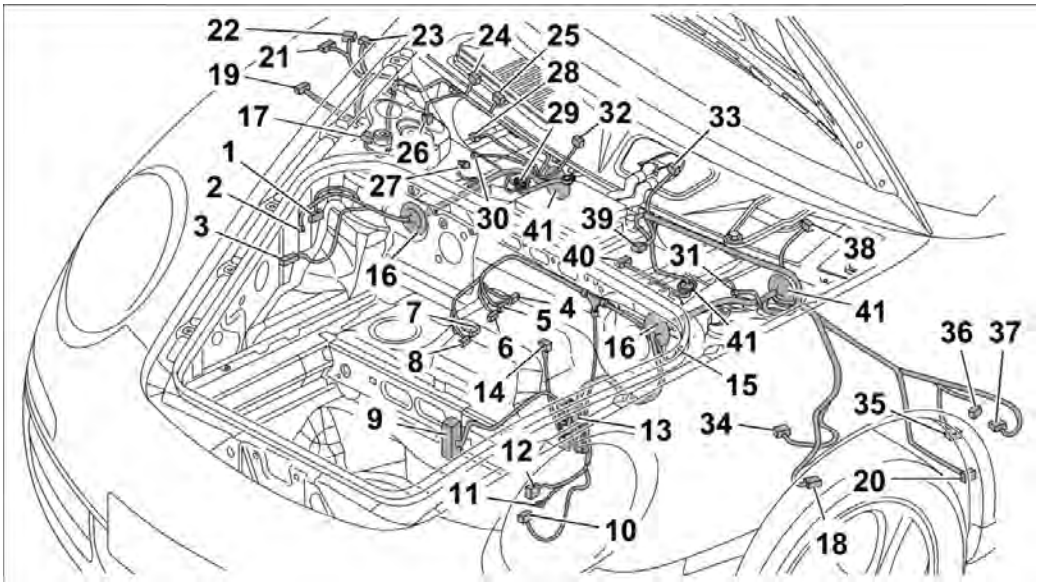
Removing main wire harness

Removing main wire harness

ATTENTION

Damage caused by improper handling of main wire harness.

→ The main wire harness contains all airbag lines, antenna lines and optical waveguides.



→ The main wire harness must therefore not be cut for major repair work and must be replaced complete.

→ If individual wires are damaged, these must be "shut down" (disconnect wires, remove plug-in contacts from plug connections, etc.) and replaced by installing new wires. Lay the new wires along the main wire harness and tie them to it.

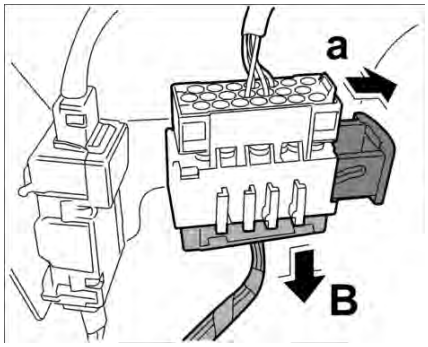
Note

Depending on the equipment I No., the installation positions of the audio components in the front luggage compartment differ.

Installation Location:

Overview of connectors for front main wire harness, shown on the 911

1 - Plug connection between main wire harness and front-end wire harness right



2 - Fuse box for fan

3 - Connector for front-end control unit

4-6 - Connector for navigation unit

Unclipping wire harness to CD changer/navigation unit

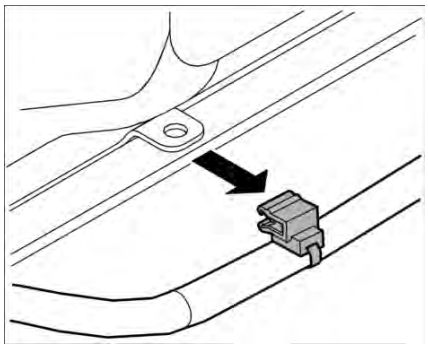
10. Unclip wire harness to CD changer/navigation unit **-arrows-** .
11. Remove grommets **-16-** left and right.
12. Pull through main wire harness in direction of plenum panel.
13. Disconnect and release ABS wire harness front left and right **-17 and 18-** . →976555 Replacing ABS wire harness - chapter on "Removing" [997110 997111 997120 997121 997310 997311 997320 997321]→976555 Replacing ABS wire harness - chapter on "Removing" [997410 997411 997430 997431 997610 997611 997620 997621]

13.1. Release and disconnect plug connection for wheel sensor at left and right.

13.2. Unscrew fastening screw of connector socket.

13.3. Release rear wire harness.

14. Release and pull off connectors on front antenna for tyre pressure monitoring system **-19 and 20-** at left and right. →443819 Removing and installing antenna for tyre pressure monitoring system - chapter on "Removing"



15. Release and pull off connector of switching element for filler flap **-21-** . →553819 Removing and installing switching element for filler flap - chapter on "Removing"

16. Pull off connector from tank filler neck **-22-** . →200719 Removing and installing filler neck - chapter on "Removing"

Note

Only in the cabriolet.

17. Release connector on rod antenna **-23-** and pull it off.

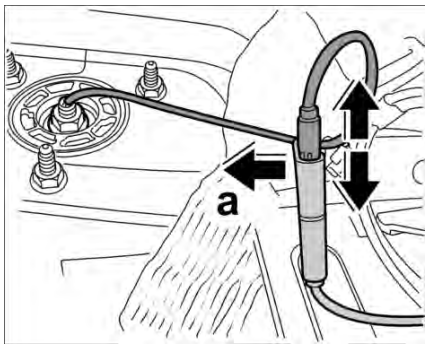
Unclipping wire harness

18. Unclip wire harness on end plate under windscreen at the three retaining clips **-arrow-** .

19. Release connector on GPS antenna **-24-** and pull it off. →911319 Removing and installing GPS antenna - chapter on "Removing"

20. Release connector on radio antenna **-25-** and pull it off. →914719 Removing and installing radio antenna - chapter on "Removing"

21. Release connector for vertical sensor **-26-** and pull it off.



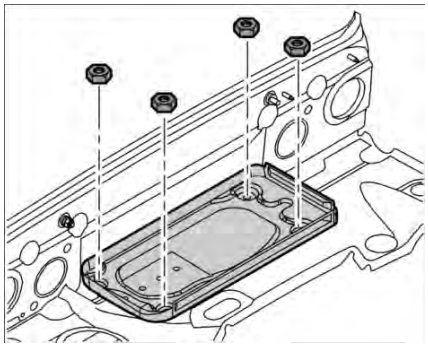
22. Release connector for pressure switch **-27-** and pull it off. →878319 Removing and installing pressure switch - chapter on "Removing"

Note

Only for vehicles with I number 536

23. Release connector for alarm siren **-28-** and pull it off. →966519 Removing and installing alarm siren - chapter on "Removing"

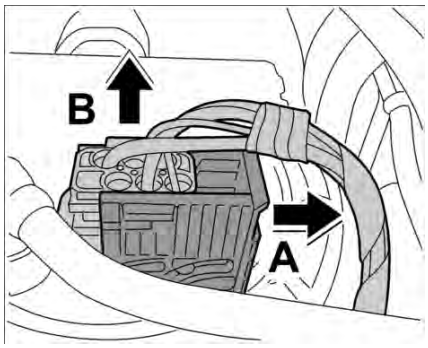
24. Release and pull off B+ line **-29-** from power distributor. →978919 Removing and installing power distributor - chapter on "Removing"



Disconnecting PASM plug connection

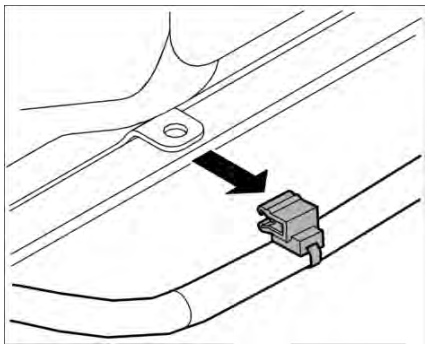
25. Release plug connections for PASM, front left and right **-30 und 31-** **-Arrow a-** and disconnect.
26. Release and pull off connectors for windscreen washer system spray nozzle, left and right **-32 and 33-** . →926619 Removing and installing spray nozzle for windscreen washer system - chapter on "Removing"

Note



Only for vehicles with HBA.

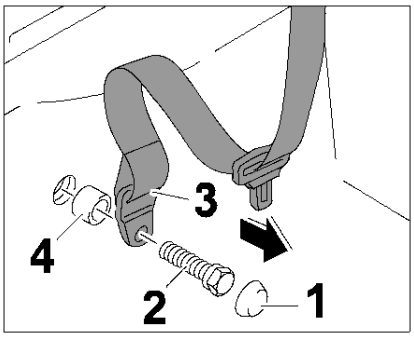
27. Release and pull off connector on front angle sensor for headlight beam adjustment **-34-** . →947819 Removing and installing front angle sensor for headlight beam adjustment - chapter on "Removing"
28. Release and pull off connector on wiper motor **-38-** . →921519 Removing and installing wiper motor - chapter on "Removing"
29. Release and pull off connector on alarm horn **-39-** . →966519 Removing and installing alarm siren - chapter on "Removing"



Removing and installing battery retaining bracket

30. Undo the four fastening nuts on the battery retaining bracket and remove the battery retaining bracket.

Pulling off tank connector

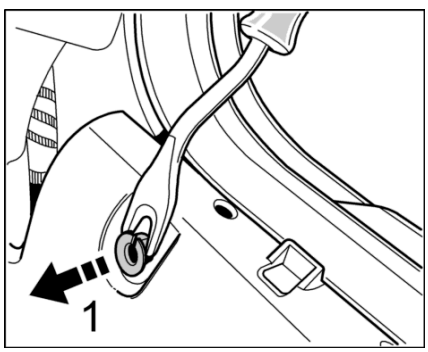


31. Release connector on fuel level sender **-40-** **-Arrow A-** and pull it off **-Arrow B-** .

Unclipping wire harness

32. Unclip wire harness on end plate under windscreen at the two retaining clips **-arrow-** .
33. Remove grommets **-41-** in centre, and on left and right.
34. Pull through main wire harness in direction of interior.

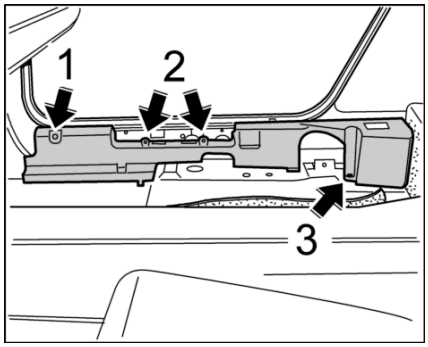
Exposing main wire harness in passenger compartment



Undoing seat belt and fitting

1. Loosen seat belt mount at left and right.

1.1. Press off cap **-1-** with a screwdriver and unscrew the fastening screw **-2-** . Remove seat belt with fitting **-3-** and spacer sleeve **-4-** .

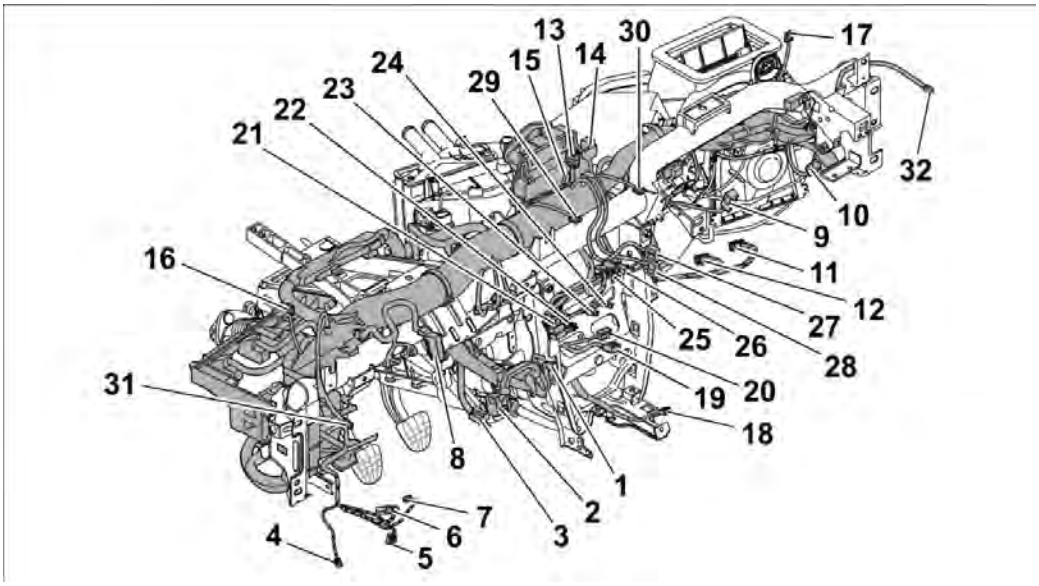


2. Disengage floor covering at the support and lay it in the vehicle interior.

Unlocking locating peg using the removal tool

3. Remove left and right support.

3.1. Unlock locating peg **-1-** of the support using the commercially available removal tool **Disassembly tool, universal NR.21**.



Unscrewing fastening screws

3.2. Unscrew fastening screws **-2-** and nuts **-3-** and carefully pull the support up and out of the retaining points.

Removing main wire harness in passenger compartment

Installation Location:

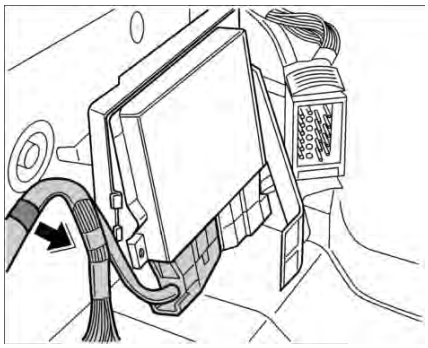
Installation Location:

Overview of connectors for main wire harness in passenger compartment



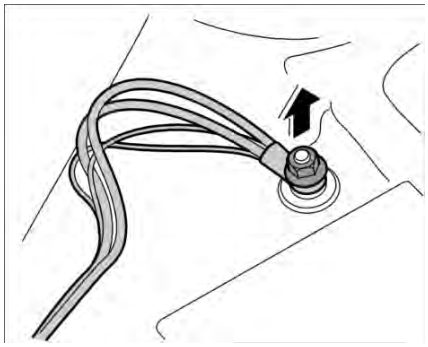
33-34 - Plug connection between main wire harness and rear end wire harness, left and right
35-36 - Connector for loudspeaker, rear left and right
37-38 - Connector for seat-belt tensioner, front left and right
39-40 - Rubber sleeve
41 - Tiptronic control module connector
42-43 - Connector for airbag sensor, centre left and right
44-45 - Connector for ParkAssist control unit
46-48 - Connector for rear end convenience systems control unit
49 - Ground point under driver's seat
50-53 - Connector for telephone control unit
54 - Ground point under passenger's seat
55-56 - Connector for front seat, left and right
57 - Connector for driver's seat with memory
58 - Connector for door sill button module

59-60 - Plug connection between main wire harness and wire harness for door, left and right
61 - Fusebox
62 - Relay carrier
63-64 - Connector for vehicle electrical system control unit
65 - Connector for gateway control unit
66-67 - Connector for KESSY/PAS control unit
68 - Connector for stop light switch
69 - Connector for pedal sensor
70 - Plug connection between main wire harness and wire harness for centre console
71 - Plug connection for telephone handset
72 - Connector for airbag triggering unit
73 - Connector for parking-brake lever contact switch
74-75 - Tiptronic position switch
76 - Ground point under unit carrier
77 - Connector for tilt sensor control unit
78 - Power distributor
79-80 - Plug connection between main wire harness and wire harness for heater/air-conditioning unit
81-82 - Connector for garage door opener control unit
83 - Connector for sunroof switch
84 - Connector for interior light
85 - Connector for sunroof motor
86 - Plug connection for rain sensor
87-88 - Plug connection for make-up mirror, left and right
89-93 - Connector for antenna unit, left and right

Releasing plug connection between main wire harness and rear-end wire harness

1. Release plug connection between main wire harness and rear-end wire harness, left and right **-33 und 34-** **-Arrow A-** and disconnect.
2. Pull off connector for seat-belt tensioner, front left and right **-37 und 38-** and remove rubber sleeves **-39 und 40-** . →691319 Removing and installing front three-point seat belt with tensioner - chapter on "Removing" [997310 997311 997320 997321 997610 997611 997620 997621]→691319 Removing and installing front three-point seat belt with tensioner - chapter on "Removing" [997110 997111 997120 997121 997410 997411 997430 997431]

Unclipping wire harness for Tiptronic control module

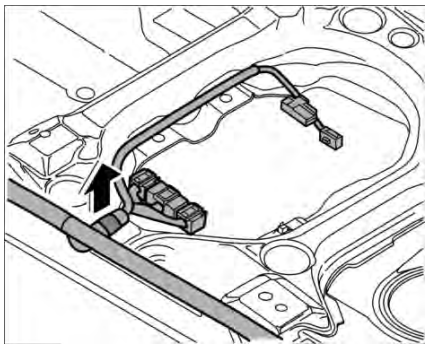


3. Release and pull off connector on Tiptronic control module **-41-** . →373019 Removing and installing transmission control module - chapter on "Removing"

3.1. Unclip wire harness for Tiptronic control module.

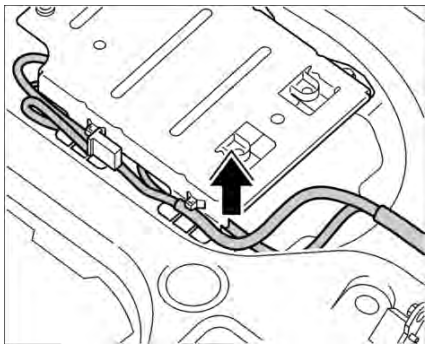
4. Release and pull off connector for airbag sensor, centre left and right **-42 and 43-** . →695119 Removing and installing airbag sensor - chapter on "Removing"

5. Release and pull off connector for ParkAssist control unit **-44 and 45-** . →917419 Removing and installing ParkAssist control unit - chapter on "Removing"



6. Release and pull off connector for rear end convenience systems control unit **-46 to 48-** . →578919 Removing and installing control unit for rear end convenience systems - chapter on "Removing".

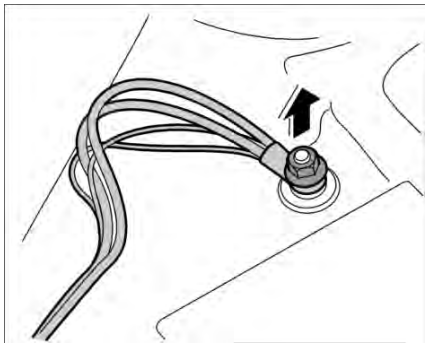
Loosening ground point



7. Loosen ground point under the driver's seat **-49-** .

7.1. Screw off fastening nut and remove ground straps.

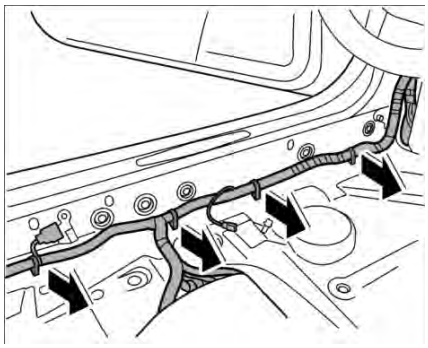
Unclipping ground point under driver's seat



8. Unclip ground point under driver's seat.

Unclipping wire harness for telephone control unit

9. Release and remove connectors for telephone control unit **-50 to 53-** . →919019 Removing and installing telephone control unit - chapter on "Removing"

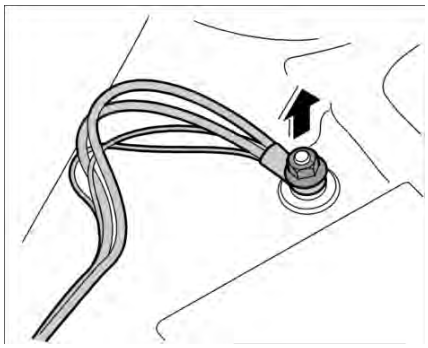


9.1. Unclip wire harness for telephone control unit.

Loosening ground point

10. Loosen ground point under the passenger's seat **-54-** .

10.1. Screw off fastening nut and remove ground straps.

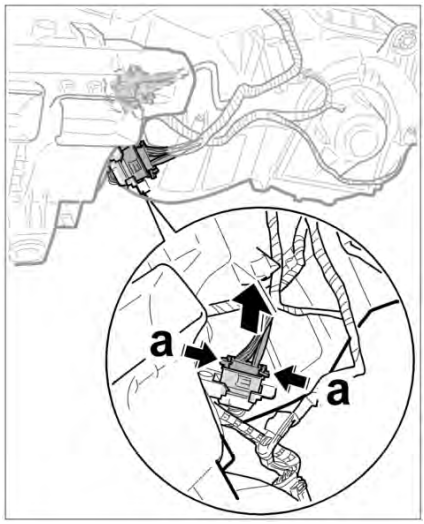


Unclipping wire harness at door sill

11. Unclip wire harness at door sill.
12. Release and disconnect plug connection between main wire harness and wire harness for door, left and right **-59 and 60-** . →973219 Removing and installing wire harness for door - chapter on "Disconnecting"
13. Release and pull off connector for gateway control unit **-65-** . →903519 Removing and installing gateway control unit - chapter on "Removing"
14. Release and pull off connectors for KESSY/PAS control unit **-66 and 67-** . →966619 Removing and installing KESSY control unit - chapter on "Removing"
15.

Release and pull off connector for stop light switch **-68-** . →943619 Removing and installing stop light switch - chapter on "Removing".

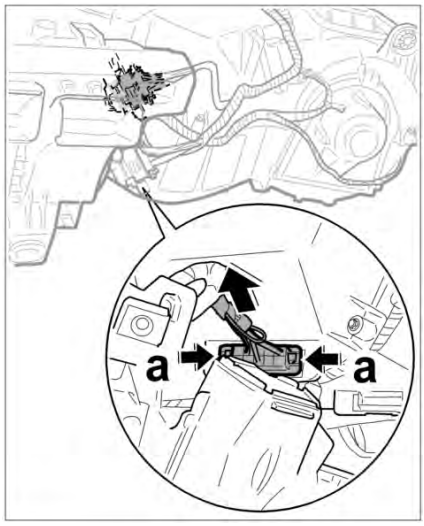
16. Release and pull off connector for pedal sensor **-69-** . *→207819 21 Removing and installing pedal sensor - chapter on "Removing"*



Loosening ground point

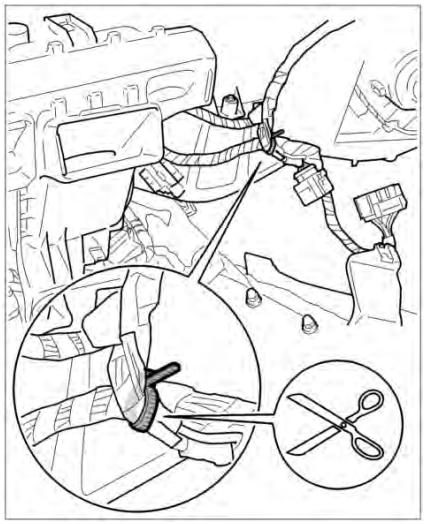
17. Loosen ground point under the unit carrier **-76-** .

17.1. Screw off fastening nut and remove ground straps.



18. Release and pull off connector for tilt sensor control unit **-77-** . →966319 Tilt sensor control unit - chapter on "Removing"

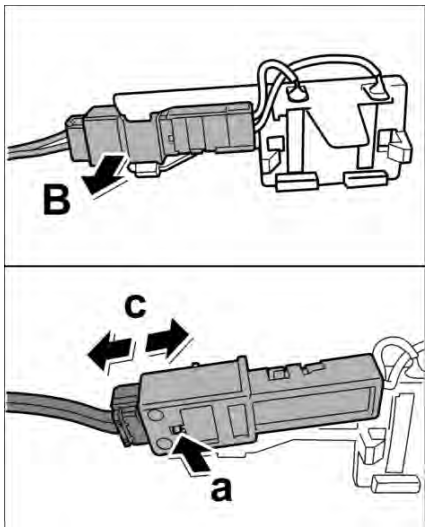
Releasing electric plug connection



19. Disconnect plug connections between main wire harness and wire harness for heater/air-conditioning unit **-79 and 80-** .

19.1. Release lower plug connection on heater/air-conditioning unit **-Arrows a-** and disconnect.

Releasing plug connection

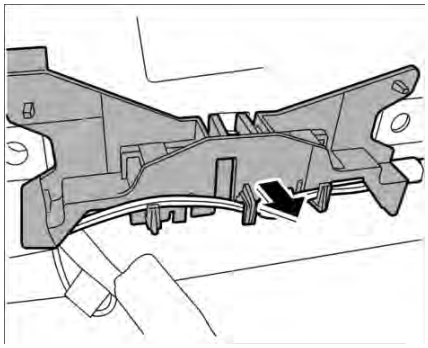


19.2. Release upper plug connection on heater/air-conditioning unit **-Arrows a-** and disconnect.

Cutting tie-wraps

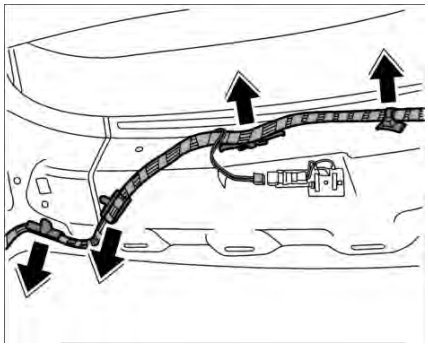
19.3. Cut tie-wraps (main wire harness to heater/air-conditioning unit wire harness) with side cutters. Remove main wire harness.

20. Release and disconnect plug connection for rain sensor **-86-** . →921219 Removing and installing rain sensor - chapter on "Removing"



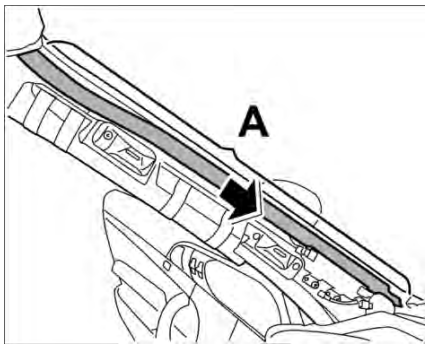
Disconnecting plug connection of make-up mirror

21. Disconnect plug connection of make-up mirror, left and right **-87 and 88-** .



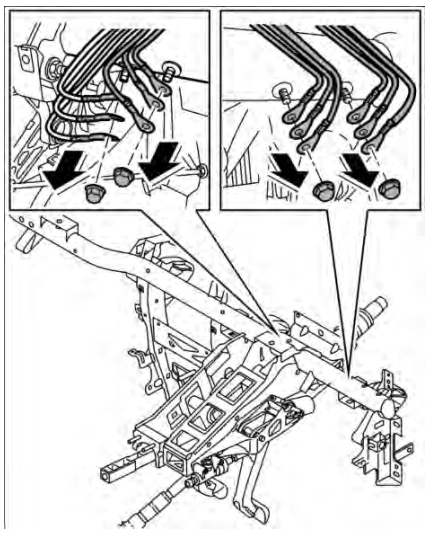
21.1. Unclip plug connection from console **-Arrow B-** .

21.2. Release plug connection **-Arrow a-** and disconnect it **-Arrows C-** .



Unclipping cable duct at front of roof frame

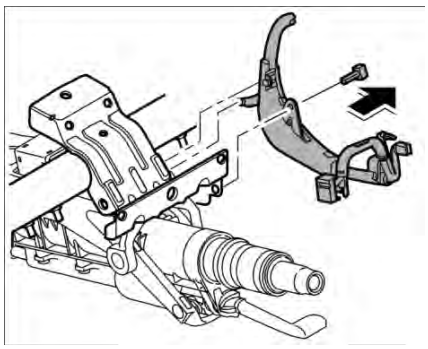
22. Unclip cable duct at front of roof frame.



Unclipping main wire harness at front of roof frame

23. Unclip main wire harness at front of roof frame.

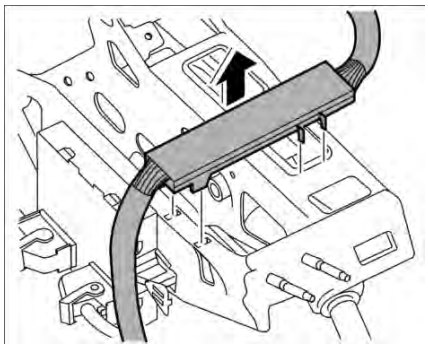
Removing main wire harness from A-pillar



24. Remove main wire harness from A-pillar **-Area A-** .
25. Pull off connector for antenna amplifier, left and right **-89 bis 93-** . →918419 Removing and installing antenna amplifier - chapter on "Removing"

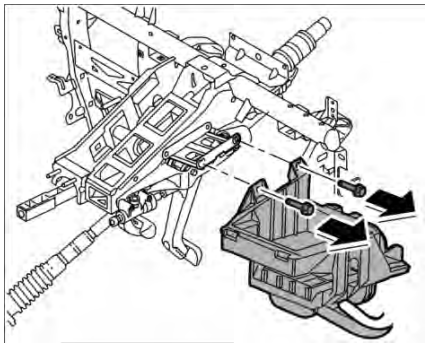
Loosening ground points on dashboard bracket

26. Loosen ground points on dashboard bracket.



26.1. Unscrew fastening nuts and remove ground straps.

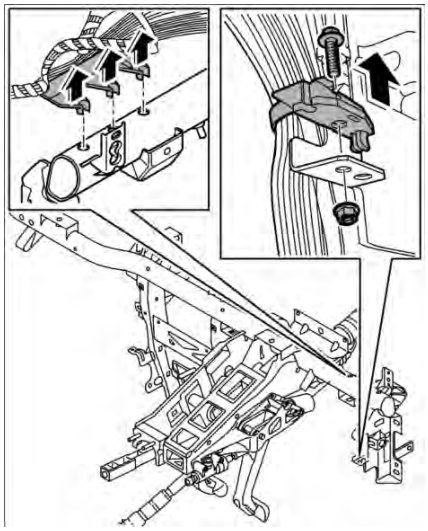
Unclipping length compensation



27. Unclip length compensation at the steering column.

27.1. Remove expansion rivet and length compensation.

Unclipping cable guide

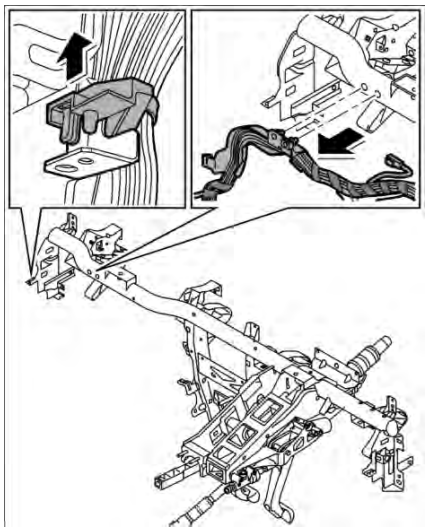


28. Unclip cable guide on dashboard bracket.

Loosening holder for relay carrier

29. Loosen holder for relay carrier.

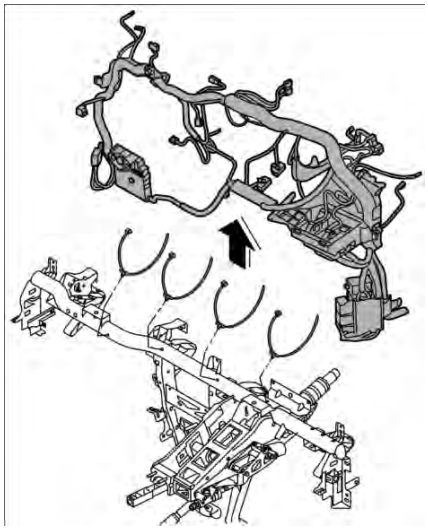
29.1. Unscrew the two fastening screws and remove the relay carrier holder from the dashboard bracket.



Loosening main wire harness at left dashboard bracket

30. Loosen main wire harness at left dashboard bracket.

30.1. Screw off fastening nut and remove fastening screw.



30.2. Unclip main wire harness on cable guide.

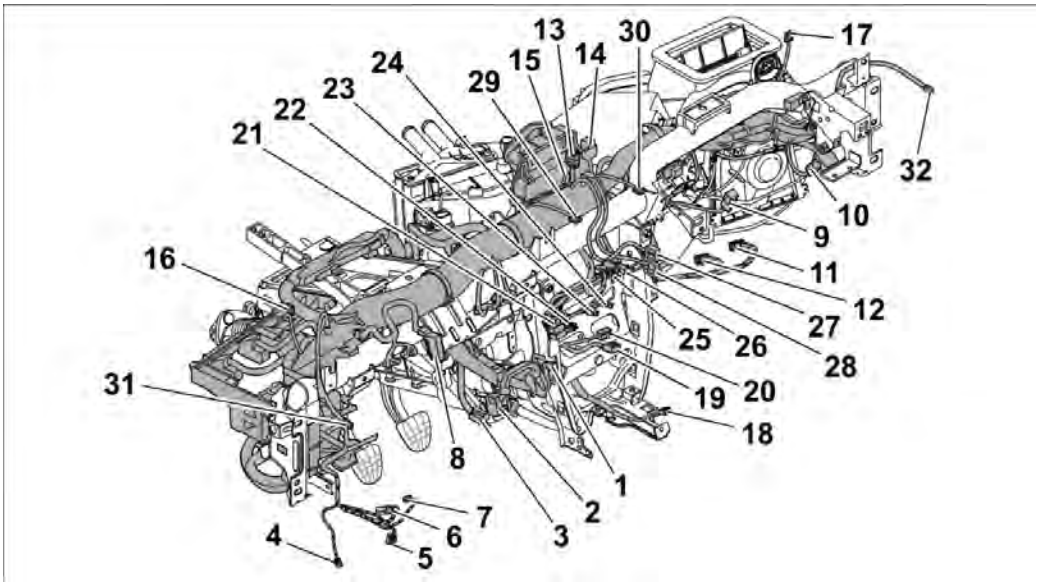
Loosening main wire harness at right dashboard bracket

31. Loosen main wire harness at right dashboard bracket.

31.1. Unclip main wire harness on both cable guides.

Loosening main wire harness at centre dashboard bracket

32. Loosen main wire harness at centre dashboard bracket.

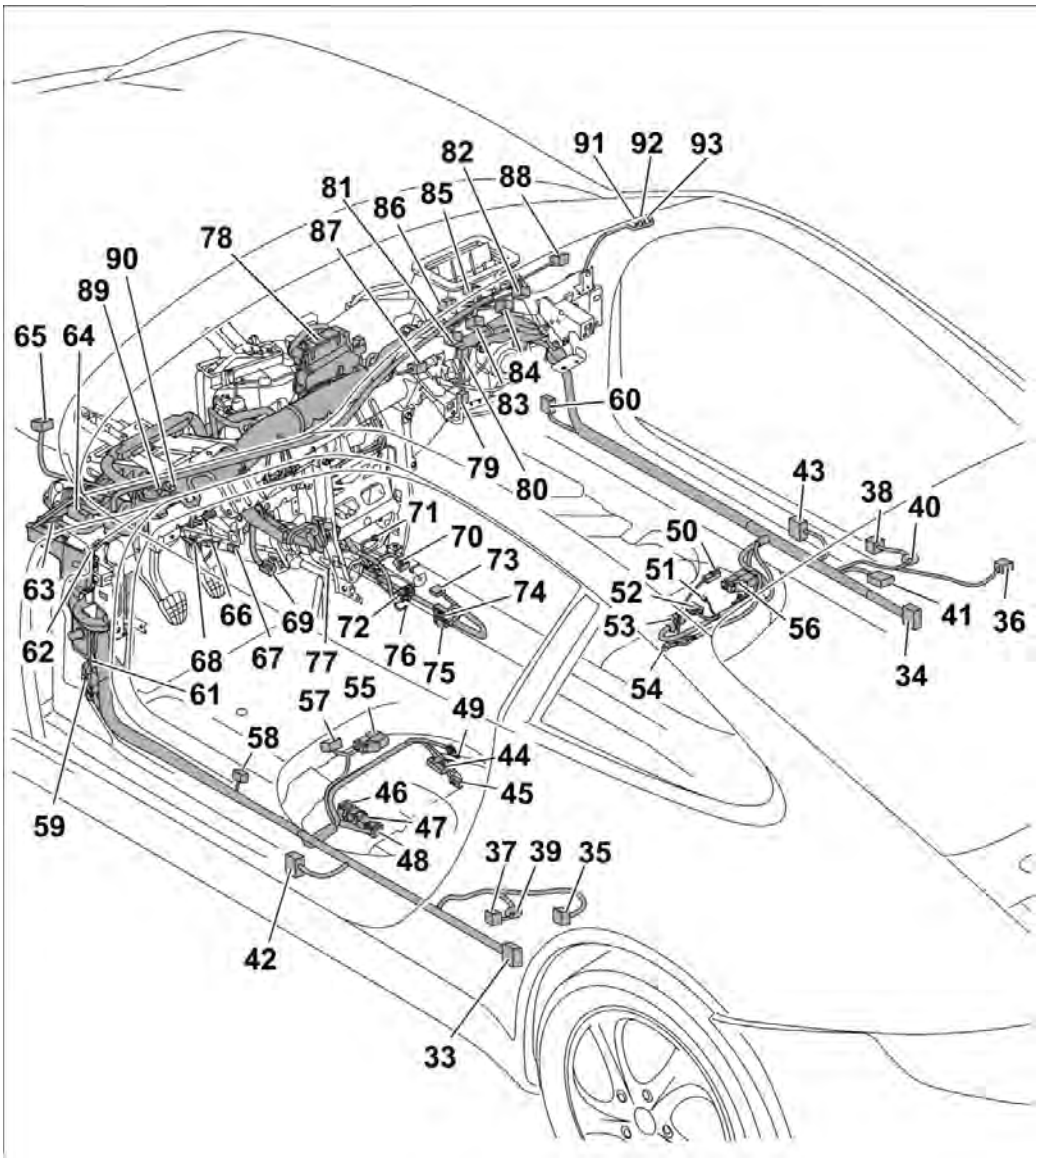


32.1. Undo the four tie-wraps and remove main wire harness.

top of page

Installing main wire harness

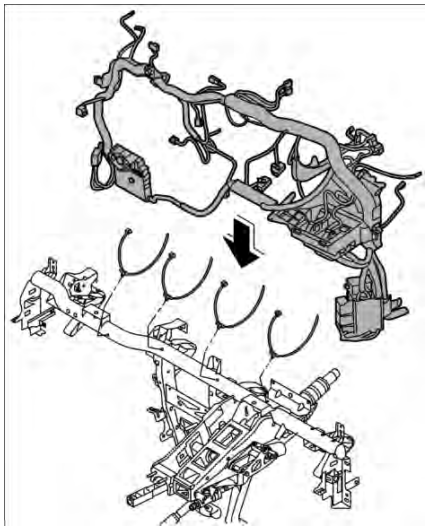
Installing main wire harness in passenger compartment



Installation Location:

Overview of main wire harness for dashboard

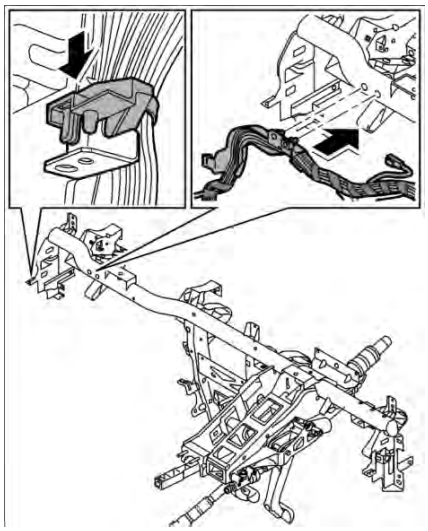
- **1-3** - Connector for steering column switch
- **4** - Connector for main light switch
- **5** - Connector for ignition lock
- **6** - Connector for diagnostic box
- **7** - Connector for floor light left
- **8** - Connector for instrument cluster
- **9-10** - Connector for passenger's airbag, stage 1 and stage 2
- **11** - Connector for floor light right
- **12** - Plug connection for glove compartment
- **13** - Connector for stopwatch
- **14** - Connector for sun sensor
- **15** - Connector for centre speaker
- **16-17** - Connector for loudspeaker, left and right
- **18** - Connector for switch console
- **19-20** - Connector for climate control
- **21-26** - Connector for PCM
- **27** - Connector for central locking
- **28** - Connector for hazard warning light switch
- **29-30** - Plug connection for illumination of centre nozzle
- **31-32** - Plug connection for illumination of left and right nozzle



Installation Location:

Overview of connectors for main wire harness in passenger compartment

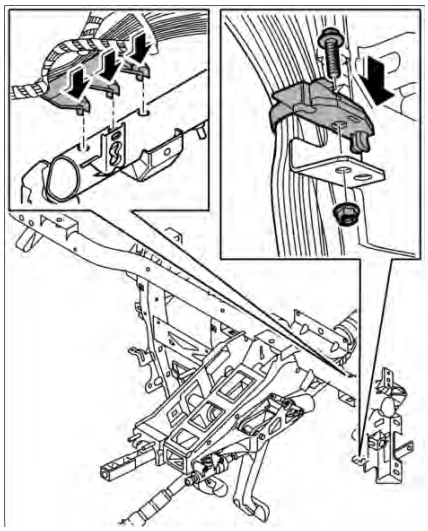
33-34 - Plug connection between main wire harness and rear end wire harness, left and right
35-36 - Connector for loudspeaker, rear left and right
37-38 - Connector for seat-belt tensioner, front left and right
39-40 - Rubber sleeve
41 - Tiptronic control module connector
42-43 - Connector for airbag sensor, centre left and right
44-45 - Connector for ParkAssist control unit
46-48 - Connector for rear end convenience systems control unit
49 - Ground point under driver's seat
50-53 - Connector for telephone control unit
54 - Ground point under passenger's seat
55-56 - Connector for front seat, left and right
57 - Connector for driver's seat with memory
58 - Connector for door sill button module



59-60 - Plug connection between main wire harness and wire harness for door, left and right
61 - Fuse box
62 - Relay carrier
63-64 - Connector for vehicle electrical system control unit
65 - Connector for gateway control unit
66-67 - Connector for KESSY/PAS control unit
68 - Connector for stop light switch
69 - Connector for pedal sensor
70 - Plug connection between main wire harness and wire harness for centre console
71 - Plug connection for telephone handset
72 - Connector for airbag triggering unit
73 - Connector for parking-brake lever contact switch
74-75 - Tiptronic position switch
76 - Ground point under unit carrier
77 - Connector for tilt sensor control unit
78 - Power distributor
79-80 - Plug connection between main wire harness and wire harness for heater/air-conditioning unit
81-82 - Connector for garage door opener control unit
83 - Connector for sunroof switch
84 - Connector for interior light
85 - Connector for sunroof motor
86 - Plug connection for rain sensor
87-88 - Plug connection for make-up mirror, left and right
89-93 - Connector for antenna unit, left and right

Fastening main wire harness at centre dashboard bracket

1. Fasten main wire harness at centre dashboard bracket.

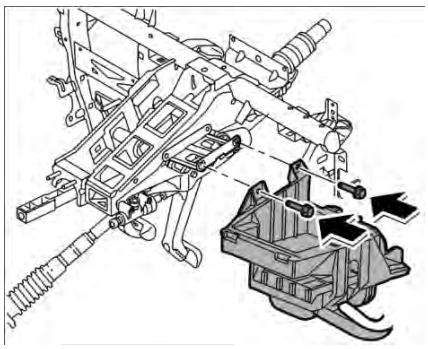


1.1. Lay main wire harness and fasten with four new tie-wraps .

Fastening main wire harness at right dashboard bracket

2. Fasten main wire harness at right dashboard bracket.

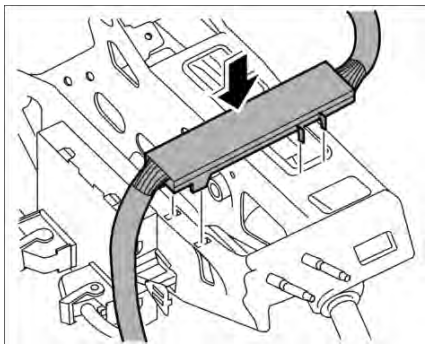
2.1. Clip in main wire harness on both cable guides.



Fastening main wire harness at left dashboard bracket

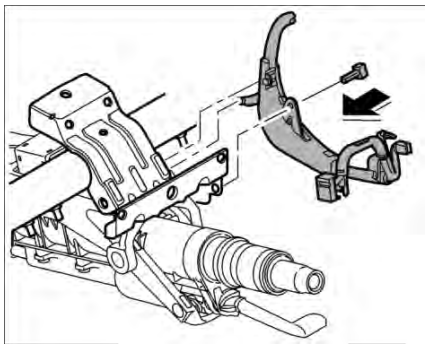
3. Fasten main wire harness at left dashboard bracket.

3.1. Clip in main wire harness on cable guide.



3.2. Insert fastening screw and tighten fastening nut. →**Tightening torque: 3.5 (2.5 ftlb.) Nm**

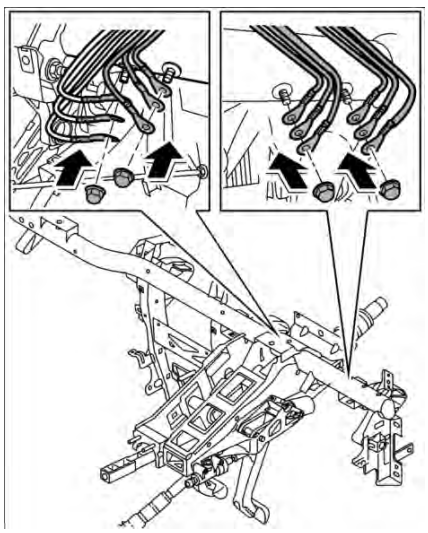
Fastening holder for relay carrier



4. Fasten holder for relay carrier.

4.1. Position holder for relay carrier and tighten with the two fastening screws to the dashboard bracket. →**Tightening torque: 3.5 (2.5 ftlb.) Nm**

Clipping in cable guide

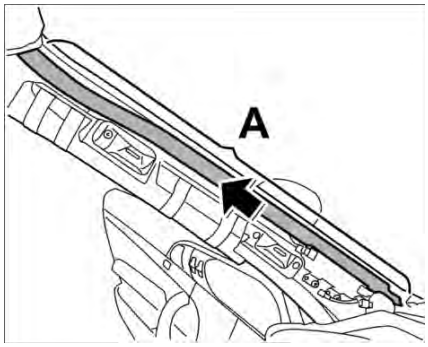


5. Clip in cable guide on dashboard bracket.

Clipping in length compensation

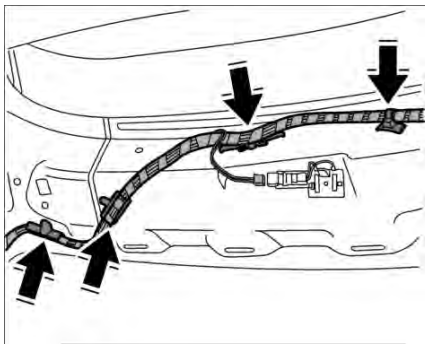
6. Clip in length compensation at the steering column.

6.1. Position length compensation at the steering column and fasten with the expansion rivet.



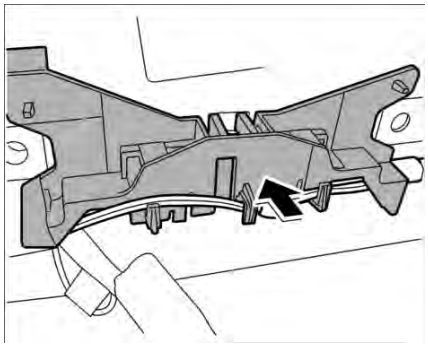
Fastening ground points on dashboard bracket

7. Fasten ground points on dashboard bracket.



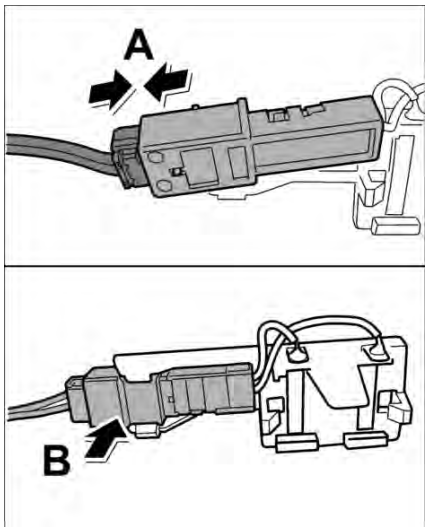
7.1. Fit ground straps and tighten with fastening nuts. →**Tightening torque: 9 (6.5 ftlb.) Nm**

8. Push on connector for antenna amplifier, left and right **-89 to 93-** . →918419 Removing and installing antenna amplifier - chapter on "Installing"



Affixing main wire harness to A-pillar

9. Remove protective film of adhesive strip on main wire harness **-Area A-** and affix main wire harness to A-pillar.

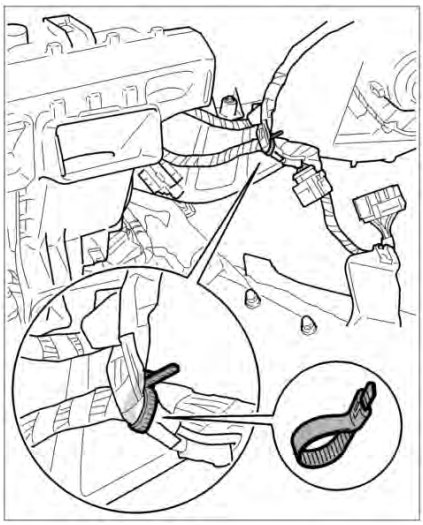


Clipping in main wire harness at front of roof frame

10. Clip in main wire harness at front of roof frame.

Clipping in cable duct at front of roof frame

11. Clip in cable duct at front of roof frame.



Connecting plug connection of make-up mirror

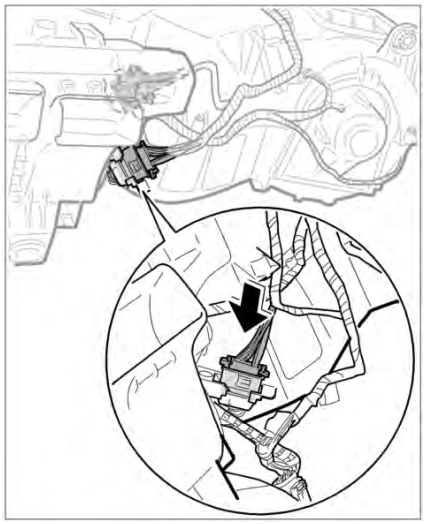
12. Connect plug connection of make-up mirror, left and right **-87 and 88-** .

12.1. Push together plug connection **-Arrows A-** until it is felt to engage.

12.2. Clip plug connection into console **-Arrow B-** .

13. Push together plug connection **-86-** until it is felt to engage. →921219 Removing and installing rain sensor - chapter on "Installing"

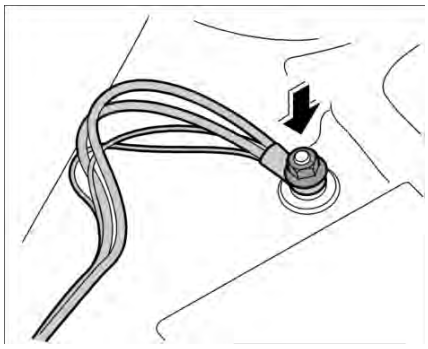
Fastening electric line



14. Connect plug connections between main wire harness and wire harness for heater/air-conditioning unit **-79 and 80-** .

14.1. Lay main wire harness to heater/air-conditioning unit wire harness and fix with a tie-wrap.

Connecting upper electrical plug connection

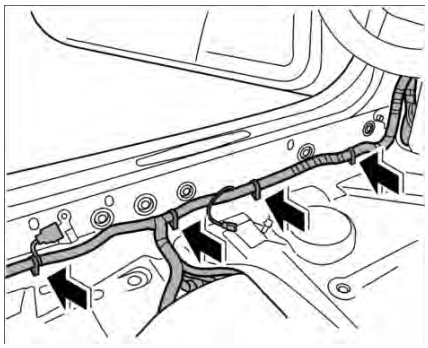


14.2. Push in upper electric plug connection at heater/air-conditioning unit until it is felt to engage.

Connecting lower electrical plug connection

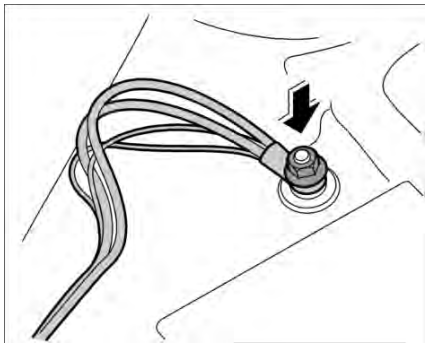
14.3. Push in lower electric plug connection at heater/air-conditioning unit until it is felt to engage.

15. Push on connector for tilt sensor control unit **-77-** until it is felt to engage. →966319 Tilt sensor control unit - chapter on "Removing"



Securing ground point

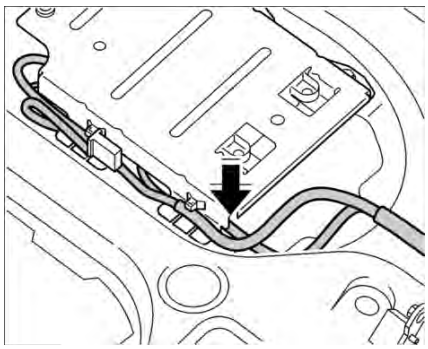
16. Fasten ground point under the unit carrier **-76-** .



16.1. Connect ground straps and tighten with the fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**

17. Push on connector for pedal sensor **-69-** until it is felt to engage. *→207819 23 Removing and installing pedal sensor - chapter on "Installing"*
18. Push on connector for stop light switch **-68-** until it is felt to engage. →943619 Removing and installing stop light switch - chapter on "Installing".
19. Push on connectors of KESSY/PAS control unit **-66 and 67-** until they are felt to engage. →966619 Removing and installing KESSY control unit - chapter on "Installing"
20. Push on connector of Gateway control unit **-65-** until it is felt to engage. →903519 Removing and installing gateway control unit - chapter on "Installing"
21. Push together plug connection between main wire harness and wire harness for door, left and right **-59 und 60-** until they are felt to engage. →973219 Removing and installing wire harness for door - chapter on "locking"

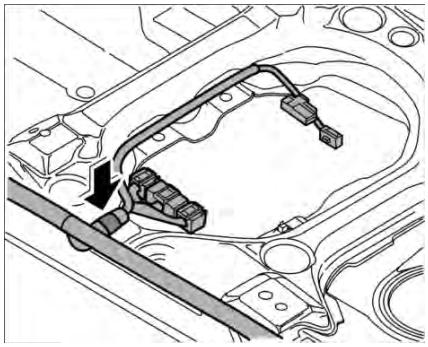
Clipping in wire harness at door sill



22. Clip in wire harness at door sill.

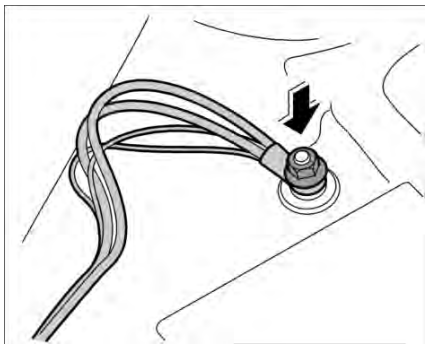
Securing ground point

23. Fasten ground point under the passenger seat **-54-** .



23.1. Connect ground straps and tighten with the fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**

Clipping in wire harness for telephone control unit



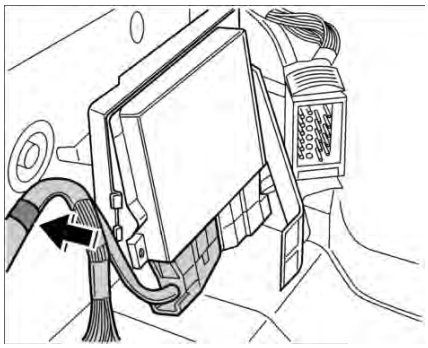
24. Push on connectors for telephone control unit **-50 to 53-** until they are felt to engage. →919019 Removing and installing control unit for telephone - chapter on "Installing"

24.1. Clip in wire harness for telephone control unit.

Clipping in wire harness under driver's seat

25. Clip in wire harness under driver's seat.

Securing ground point



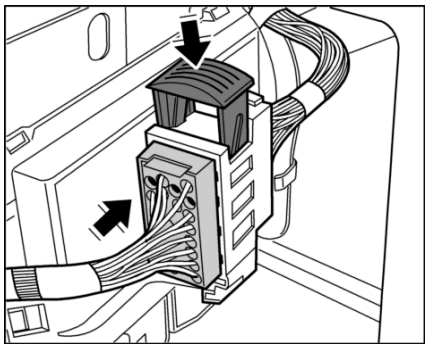
26. Fasten ground point under the driver's seat **-49-** .

26.1. Connect ground straps and tighten with the fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**

27. Push on connectors for rear end convenience systems control unit **-46 to 48-** until they are felt to engage. →578919 Removing and installing control unit for rear end convenience systems - chapter on "Installing".

28. Push on connectors for ParkAssist control unit **-44 and 45-** until they are felt to engage. →917419 Removing and installing ParkAssist control unit - chapter on "Installing"

29. Push on connectors for airbag sensor, centre left and right **-42 und 43-** until they are felt to engage. →695119 Removing and installing airbag sensor - chapter on "Installing"

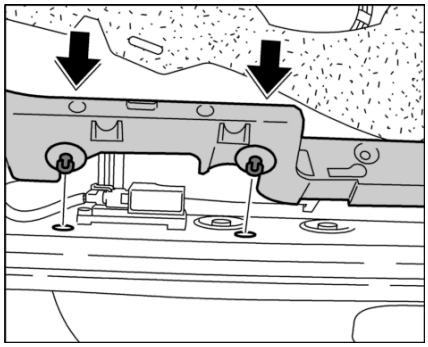


Clipping in wire harness for Tiptronic control module

30.

Push on connector for Tiptronic control module **-41-** until it is felt to engage, and lock it. →373019 Removing and installing transmission control module - chapter on "Installing"

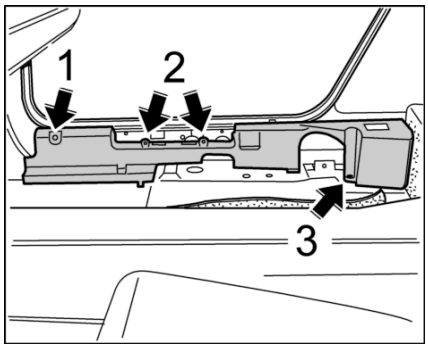
30.1. Clip in wire harness for Tiptronic control module.



31. Fit rubber sleeves **-39 and 40-** and push on connector for seat-belt tensioner, front left and right **-37 and 38-** . →691319 Removing and installing front three-point seat belt with tensioner - chapter on "Installing" [997310 997311 997320 997321 997610 997611 997620 997621]→691319 Removing and installing front three-point seat belt with tensioner - chapter on "Installing" [997110 997111 997120 997121 997410 997411 997430 997431]

Connecting plug connection for main wire harness to rear wire harness

32. Connect plug connection between main wire harness and rear-end wire harness, left and right **-33 and 34-** and lock.



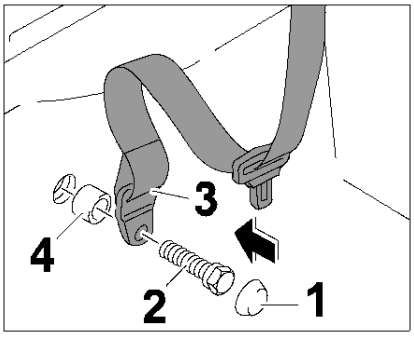
Completing the vehicle

Engaging the support

1. Install left and right support.

1.1. Position the support and engage in lower side member.

Securing the support



1.2. Press in the locating peg **-1-** of the support and check it is seated correctly.

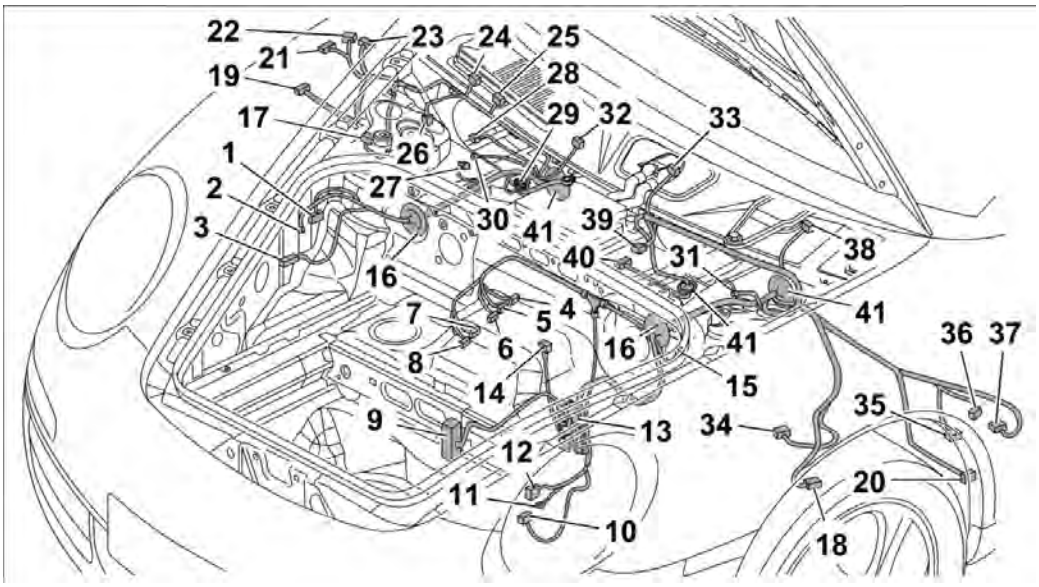
1.3. Tighten the fastening nut **-3-** and fastening screws **-2-** . →**Tightening torque: 7.2 (5.5 ftlb.) Nm**

2. Lay the floor covering over the support and engage.

Note

Ensure that belt strap can run properly!

Installing seat belt and fitting



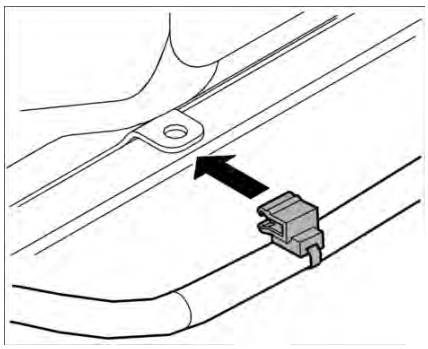
3. Fasten seat belt mount at left and right.

3.1. Tighten fastening screw **-2-** , seat belt with fitting **-3-** and spacer sleeve **-4-** on inner lower side member. →**Tightening torque: 50 (37 ftlb.) Nm**

3.2. Press in **-1-** cap.

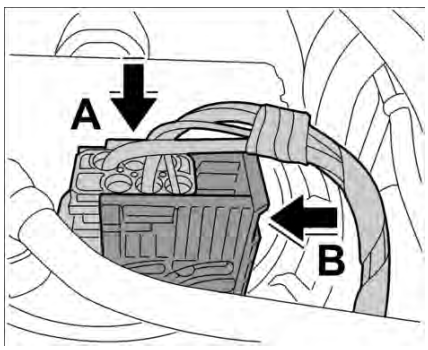
Installing front main wire harness

Installation Location:



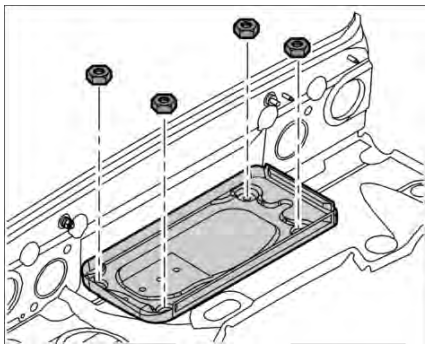
Overview of connectors for front main wire harness, shown on the 911

1 - Plug connection between main wire harness and front-end wire harness right
2 - Fuse box for fan
3 - Connector for front-end control unit
4-6 - Connector for navigation unit
7-8 - Connector for CD changer
9 - Connector for loudspeaker amplifier
10 - Connector for luggage compartment light
11 - Ground point
12 - Plug connection between main wire harness and front-end wire harness left
13 - Connector for hydraulic unit
14 - Connector for brake fluid sender
15 - Connector for tyre pressure monitoring system control unit
16 - Grommet
17-18 - Plug connection for ABS wire harness, front left and right
19-20 - Connector for tyre pressure monitoring system antenna, left and right
21 - Connector for filler flap switching element
22 - Connector for tank filler neck
23 - Connector for rod antenna
24 - Connector for GPS antenna
25 - Connector for radio antenna
26 - Connector for vertical sensor
27 - Connector for pressure switch
28 - Connector for alarm siren
29 - B+ line to power distributor
30-31 - Plug connection for PASM, front left and right
32-33 - Connector for windscreen washer system spray nozzle, left and right
34 - Connector for headlight beam adjustment angle sensor



35 - Connector for fluid level indicator sender
36 - Connector for windscreen washer system pump
37 - Connector for headlight washer pump
38 - Connector for wiper motor
39 - Connector for alarm horn
40 - Connector for fuel level sensor
41 - Grommet

1. Push through main wire harness in direction of plenum panel.
2. Fit grommets **-41-** centre, left and right.

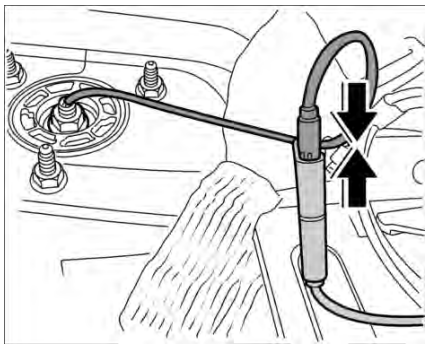


Clipping in wire harness

3. Clip in wire harness on end plate under windscreen at the two retaining clips **-arrow-** .

Pushing on tank connector

4. Push on connector for fuel level sender **-40-** **-Arrow A-** and lock **-Arrow B-** .



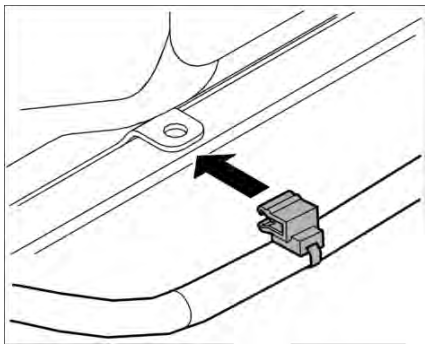
Removing and installing battery retaining bracket

5. Position battery retaining bracket and secure with the four fastening nuts. →**Tightening torque: 10 (7.5 ftlb.) Nm**
6. Push on connector for alarm horn **-39-** until it is felt to engage. →966519 Removing and installing alarm siren - chapter on "Installing"
7. Push on connector for wiper motor **-38-** until it is felt to engage. →921519 Removing and installing wiper motor - chapter on "Installing"

Note

Only for vehicles with HBA.

8. Push connector onto front angle sensor for headlight beam adjustment **-34-** until it is felt to engage. →947819 Removing and installing front angle sensor for headlight beam adjustment - chapter on "Installing"
9. Push on connectors for windscreen washer system spray nozzle, left and right **-32 and 33-** until they are felt to engage. →926619 Removing and installing spray nozzle for windscreen washer system - chapter on "Installing"



Connecting PASM plug connection

10. Connect plug connections for PASM, front left and right **-30 und 31-** until they are felt to engage.
11. Push B+ line **-29-** onto mounting point at the power distributor as far as the stop. Check B+ line sits firmly. →978919 Removing and installing power distributor - chapter on "Installing"

Note

Only for vehicles with I number 536

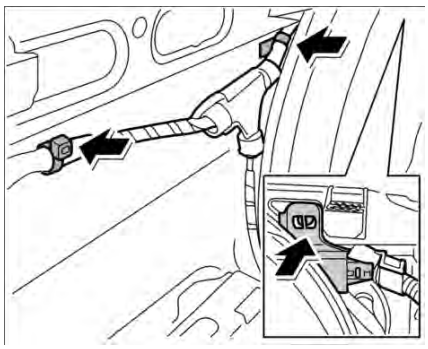
12. Push on connector for alarm siren **-28-** until it is felt to engage. →966519 Removing and installing alarm siren - chapter on "Installing"
13. Push on connector for pressure switch **-27-** until it is felt to engage. →878319 Removing and installing pressure switch - chapter on "Installing"
14. Push on connector of vertical sensor **-26-** until it is felt to engage.
15. Push on connector for radio antenna **-25-** until it felt to engage. →914719 Removing and installing radio antenna - chapter on "Installing"
16. Push on connector for GPS antenna **-24-** until it is felt to engage. →914719 Removing and installing radio antenna - chapter on "Installing"

Clipping in wire harness

17. Clip in wire harness for end plate under windscreen at the three retaining clips **-arrow-** .

Note

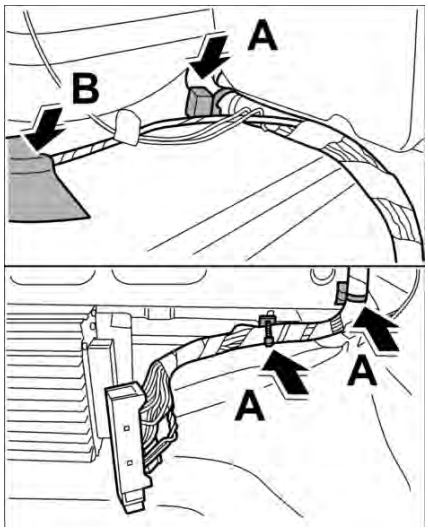
Only in the cabriolet.



18. Push in connector for rod antenna **-23-** until it is felt to engage.
19. Push on connector for tank filler neck **-22-** . →200719 Removing and installing filler neck - chapter on "Installing"
20. Push on connector for filler flap switching element **-21-** until it is felt to engage. →553819 Removing and installing switching element for filler flap - chapter on "Installing"
21. Push on connectors of front antenna for tyre pressure monitoring system **-19 and 20-** at left and right until they are felt to engage. →443819 Removing and installing antenna for tyre pressure monitoring system - chapter on "Installing"
22. Lay and connect ABS wire harness, front left and right **-17 and 18-** . →976555 Replacing ABS wire harness - chapter on "Installing" [997110 997111 997120 997121 997310 997311 997320 997321]→976555 Replacing ABS wire harness - chapter on "Installing" [997410 997411 997430 997431 997610 997611 997620 997621]

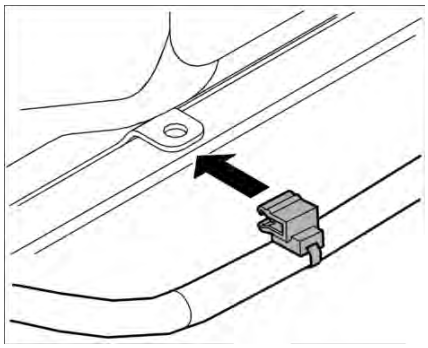
22.1. Laying ABS wire harness

22.2. Tighten fastening screw of connector socket. →**Tightening torque: 10 (7.5 ftlb.) Nm**



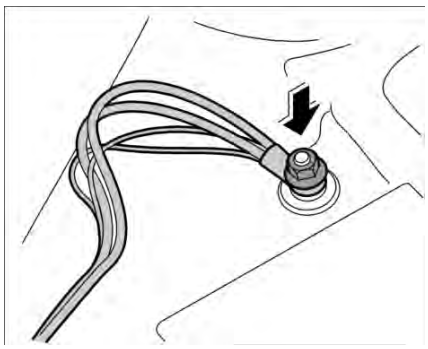
22.3. Lock the plug connection securely.

23. Push through main wire harness in direction of luggage compartment.
24. Fit grommets **-16-** left and right.



Clipping in wire harness to CD changer/navigation unit.

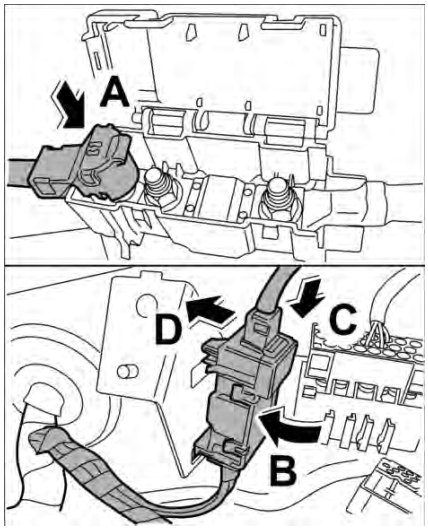
25. Clip in wire harness to CD changer/navigation unit **-arrows-** .



Clipping in wire harness to loudspeaker amplifier

26. Clip in wire harness to loudspeaker amplifier **-Arrows A-** and fix with new adhesive tape **-Arrow B-** .

Clipping in wire harness

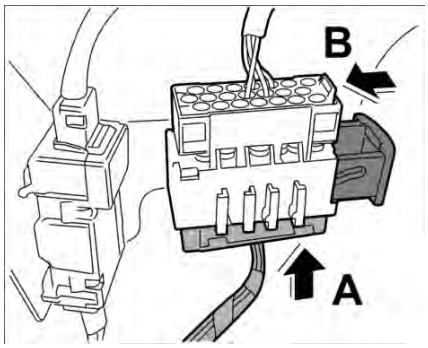


27. Clip in wire harness for front end control unit **-arrow-** .
28. Push on connector for tyre pressure monitoring system control unit **-15-** until it is felt to engage. →443419 Removing and installing control unit for tyre pressure monitoring system - chapter on "Installing"
29. Push on connector for brake fluid sender **-14-** until it is felt to engage.
30. Push on connector for hydraulic unit **-13-** and lock it. *→453019 23 Removing and installing hydraulic unit - chapter on "Installing"*
31. Push together plug connection between main wire harness and front-end wire harness, left **-12-** until it engages securely. Clip in connector socket.

Securing ground point

32. Secure ground point left **-11-** .

32.1. Connect ground straps and tighten fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**



Pushing connector onto fuse box for fan

33. Push connector onto fuse box for fan **-2-** .

33.1. Push connector onto fuse box for fan **-Arrow A-** .

33.2. Close lid **-Arrow B-** until it is felt to engage.

33.3. Position bottom of fuse box for fan on the clip **-Arrow C-** and clip in **-Arrow D-** .

Pushing together plug connection between front end wire harness and main wire harness, right

34. Push together plug connection between main wire harness and front end wire harness, right **-1-** .

34.1. Insert connector socket in the holder and turn anti-clockwise 90°.

34.2. Push together plug connection between front-end wire harness and main wire-harness right **-Arrow A-** and lock **-Arrow B-** .

top of page

Subsequent work

Subsequent work

Note

Only in the cabriolet.

1. Install front headliner. *→708319 23 Removing and installing front headliner - section on "Installing"*
2. Secure front headliner in windscreen area. →708419 Removing and installing headliner - section on "Installing" [997110 997111 997120 997121 997410 997411 997430 997431] *→708419 23 Removing and installing headliner - section on "Installing" [997310 997311 997320 997321 997610 997611 997620 997621]*

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

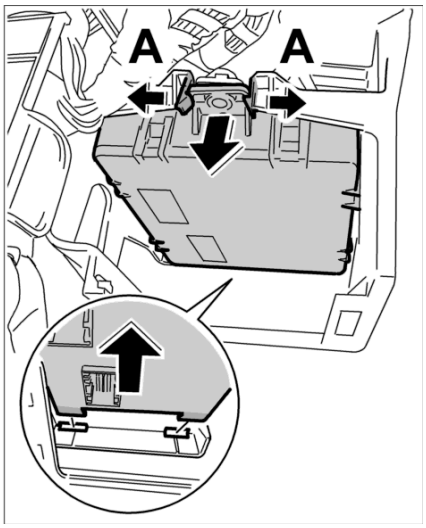
Removing vehicle electrical system control unit

Removing vehicle electrical system control unit

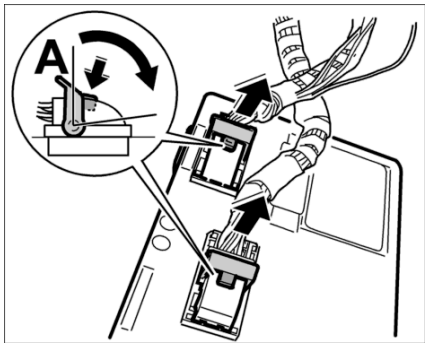
Installation Location:



Install location

WARNING

Risk of damage to electronic control modules.

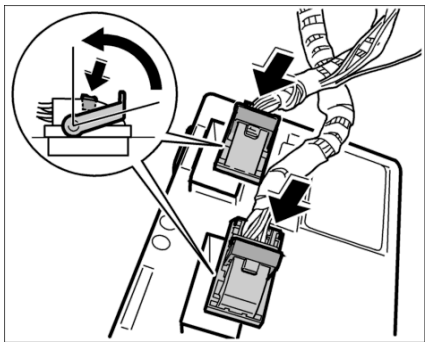


- **If care is not taken, electrical and electronic components may be destroyed.**

→ Before removing the control module, switch off the ignition and remove the ignition key.

Bracket for the vehicle electrical system control unit

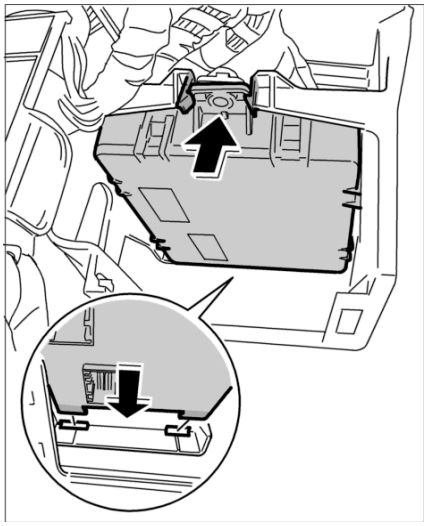
1. Pull apart the locking tabs **-A-** for the vehicle electrical system control unit, pull the control unit forward and down with connectors still attached then pull it out of its holder at the rear.



Release connector A and disconnect.

2. Release both electrical connectors **-A-** and unplug them.
3. Take out the control unit.

top of page



Installing vehicle electrical system control unit

Installing vehicle electrical system control unit

Inserting the connectors

1. Press electrical plugs into control unit and lock them **-arrow-** so they are felt to engage.

Push the electrical system wiring into its retaining bracket so that it engages.

2. Push vehicle electrical system control unit upwards into the holder. It must engage properly. Make sure the electrical leads are not pinched.

Coding vehicle electrical system control unit

Programming the vehicle electrical system control unit:

Reading out and printing out values

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select vehicle type using the cursor keys.
3. Switch from vehicle type to list of control units >> .
4. Select the relevant control unit with the cursor keys and press the >> key.
5. Select Control Unit Replacement with the cursor keys and press the >> key.
6. Select Read Out Values (Code) with the cursor keys and press the >> key.
7. The message "Reading code" will appear on the screen of the Porsche System Tester. Press the >> key.
8. Switch off ignition and replace control unit.
9. Switch on ignition. After replacement of the control unit, the vehicle data that has been read out is transferred to the new unit using the "Write data" menu option (see Section 6). Press the >> key.
10. System Tester displays Coding write-in complete. Press the >> key.
11. Read out fault memory again and erase.

Coding (programming) the control module

Note

The procedure described must be applied when a control unit has to be replaced and the tester function **Control unit replacement** cannot be used.

WARNING

Sudden voltage interruption of the power supply to the control module.

- **Destruction of the control module.**

→ During programming, it is essential to guarantee the power supply for the Porsche System tester. It is essential to connect a battery charger with a current rating of at least 40 A to the vehicle battery.

→ Prior to disconnecting the control module, switch off the ignition and remove the ignition key.

Note

Follow the instructions on the Tester.
Later versions of the software may display slightly different text or require a slightly different procedure. The instructions you receive from the tester itself take precedence over this description.

1. Connect the Porsche System Tester to the vehicle and start the System Tester. Switch on the ignition. >> Continue.
2. Select vehicle type using the cursor keys.
3. Using the >> key, move from the vehicle type to the list of control modules. Perform the automatic control module search.
4. Select the relevant control module with the cursor keys and press the >> key.
5. Select **Control unit replacement** with the cursor keys and press the >> key.
6. Select **Write in data** and write in the relevant data. (Even if no data was read out, the required data is loaded for the control unit.)
7. Select Coding with the cursor keys and press the >> key.
8. Select the version required for the vehicle in question and follow the instructions on the Tester.
9. In the menu **Vehicle type**, select **Control units** and then select the menu **Special functions**.
10. Perform**Vehicle handover** and follow the instructions of the Tester.
11. Read out and erase fault memory.
