as of MY 2005
Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

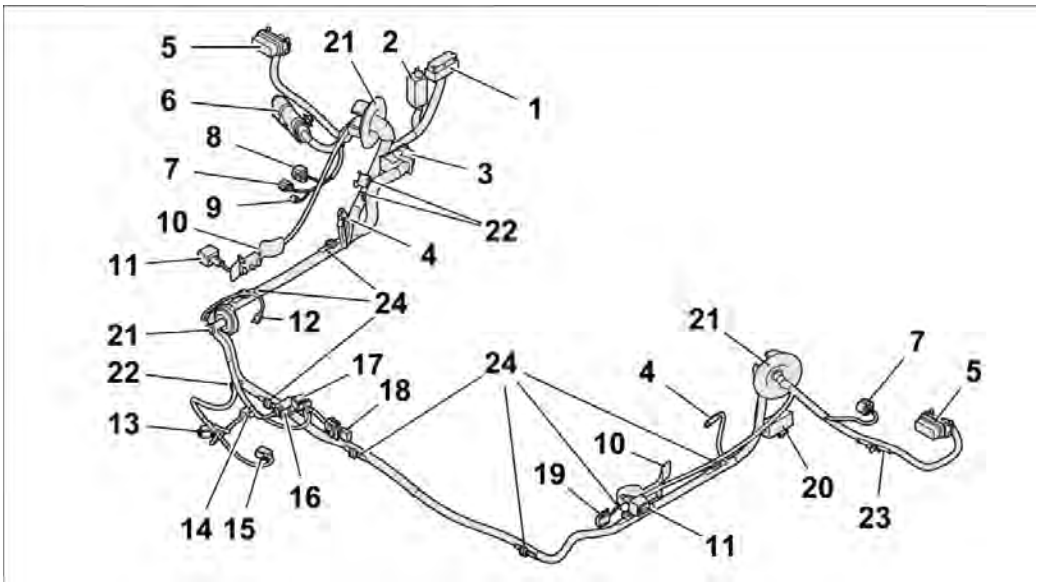
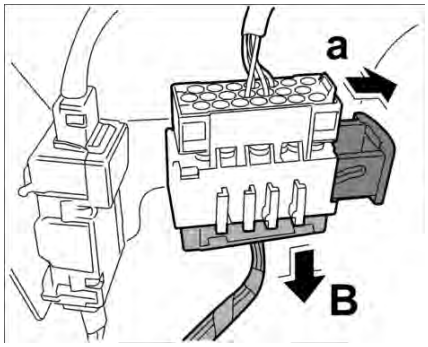
Removing wire harness for front-end



Removing wire harness for front-end

Installation Location:

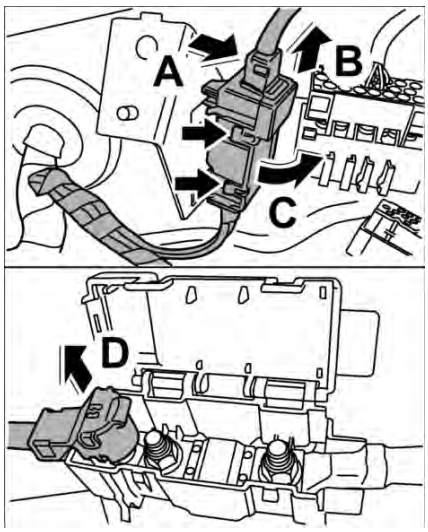
Installation position for wire harness at front end of car, shown on 911



Installation Location:

Overview of connectors for front-end wire harness

1 - Plug connection for front-end wire harness to main wire harness, right
2 - Fuse box for fan
3 - Connector for front-end control unit
4 - Ground point, left and right
5 - Connector for headlight, left and right
6 - Plug connection between front-end wire harness and front apron wire harness
7 - Plug connection for coolant fan
8 - Connector for control unit for coolant control
9 - Connector for control unit for coolant control
10 - Cable guide for sensor line for airbag, front left and right
11 - Connector for sensor line for airbag, front left and right



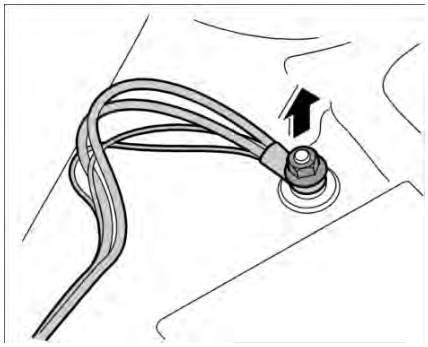
12 - Connector for emergency release, front
13 - Connector for outside temperature sensor
14 - Connector for horn, high-pitch
15 - Connector for horn, low-pitch
16 - Connector for servo motor for front lid release
17 - Connector for control unit for garage door opener/HomeLink
18 - Plug connection for microswitch for roof lock, front
19 - Connector for servo motor for lid, front
20 - Plug connection between front-end wire harness and main wire harness, left
21 - Grommet
22 - Tie-wrap
23 - Line holder
24 - Line holder

Disconnecting plug connection between front-end wire harness and main wire harness, right

1. Disconnect plug connection between front-end wire harness and main wire harness, right **-1-** .

1.1. Release plug connection between front-end wire harness and main wire harness, right **-arrow a-** and disconnect **-arrow B-** .

Pulling off connector on fuse box for fan

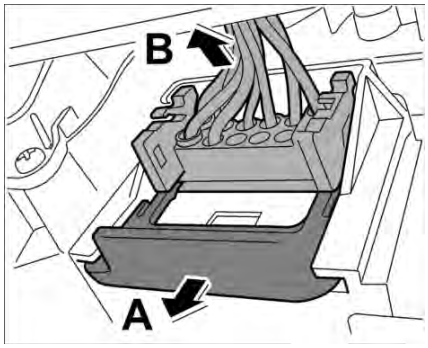


2. Pull off connector on fuse box for fan **-2-** .

2.1.

Unclip fuse box for fan **-arrow A-** and lift up and off **-arrow B-** .

2.2. Release lid **-arrows-** and open **-arrow C-** .

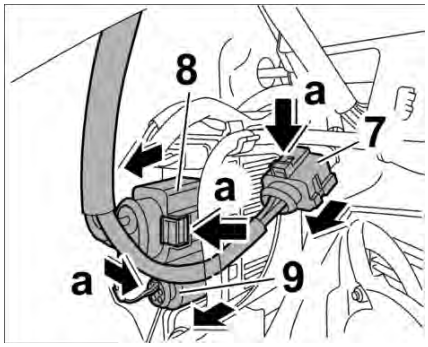


2.3. Pull off connector on fuse box for fan **-arrow D-** .

Loosening ground point

3. Loosen ground point **-4-** at left and right.

3.1. Screw off fastening nut and remove ground straps.



Pulling off connector on headlight

4. Pull off connector on headlight **-5-** at left and right.

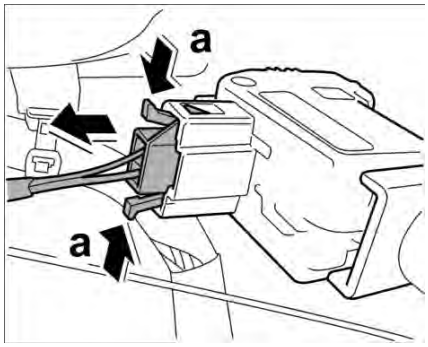
4.1. Pull securing clip down and out **-arrow A-** .

4.2. Pull off connector on headlight at left and right **-arrow B-** .

Removing plug on control unit for coolant control

5. Pull off connector and plug connection on control unit for coolant control **-7 to 9-** .

5.1. Release and remove plug connection to coolant fan **-7-** .



5.2. Release and remove connector on control unit for coolant control **-8 and 9-** .

6. Unclip cable guide for sensor line for front airbag **-10-** .
7. Release connectors on both sensors for front airbag **-11-** and pull them off. →695119 Removing and installing airbag sensor - chapter on "Removing"
8. Unclip front-end wire harness on right side at tie-wraps **-22-** .
9. Unclip front-end wire harness on left side at holders **-23-** .

Note

Only for USA/Canada version vehicles

10. Release connector on front emergency release **-12-** and pull it off. →556219 Removing and installing front emergency release - chapter on "Removing" [997410 997430 997610 997620]→556219 Removing and installing front emergency release - chapter on "Removing" [997110 997120 997310 997320]→*556219 21 Removing and installing front emergency release - chapter on "Removing" [997111 997121 997311 997321 997411 997431 997611 997621]*
11. Release connector for outside temperature sensor **-13-** and pull it off. →916819 Removing and installing outside temperature sensor - chapter on "Removing"

Installing wire harness for front-end

Installing wire harness for front-end

Note

The wire harness for front end spare parts scope means the scope for fully-equipped vehicles. Depending on the vehicle equipment, connectors not required are tied to the wire harness for front end using tie-wraps. When doing this, ensure the lines are routed correctly so that no line becomes trapped or damaged.

Installation Location:

Overview of connectors for front-end wire harness

1 - Plug connection for front-end wire harness to main wire harness right
2 - Fuse box for fan
3 - Connector for front-end control unit
4 - Ground point, left and right
5 - Connector for headlight, left and right
6 - Plug connection between front-end wire harness and front apron wire harness
7 - Plug connection for coolant fan
8 - Connector for control unit for coolant control
9 - Connector for control unit for coolant control
10 - Cable guide for sensor line for airbag, front left and right
11 - Connector for sensor line for airbag, front left and right
12 - Connector for emergency release, front
13 - Connector for outside temperature sensor
14 - Connector for horn, high-pitch

15 - Connector for horn, low-pitch

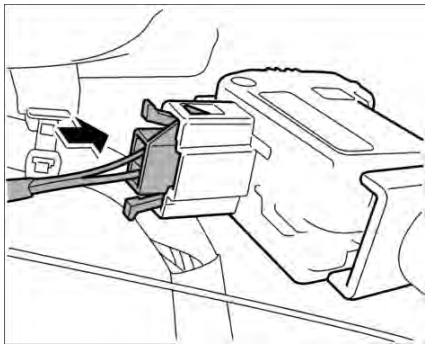
16 - Connector for servo motor for front lid release

17 - Connector for control unit for garage door opener/HomeLink

18 - Plug connection for microswitch for roof lock, front

19 - Connector for servo motor for lid, front

20 - Plug connection for front-end wire harness to main wire harness, left



21 - Grommet

22 - Tie-wrap

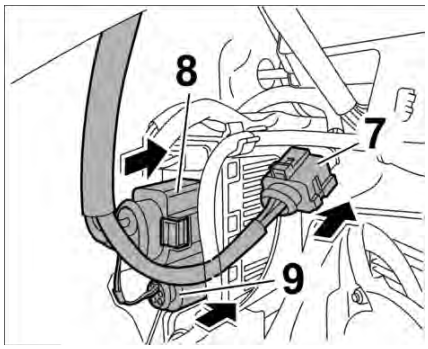
23 - Line holder

24 - Line holder

1. Lay wire harness for front-end.
2. Push the wire harness for the front-end through the openings in the body and fit the three grommets **-21-** .
3. Fasten wire harness for the front-end with the holders **-24-** to the body.
4. Push together plug connection for front-end wire harness to main wire harness, left **-20-** until it engages securely.

Pushing connector onto servo motor for front lid

5. Push connector onto servo motor for front lid **-19-** .



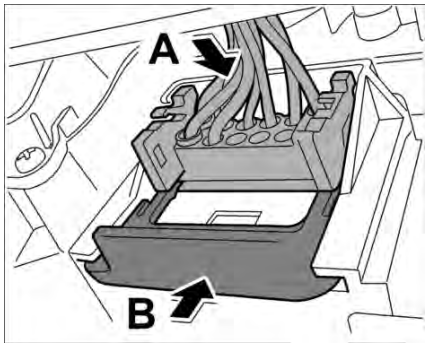
5.1. Push connector onto servo motor for front lid until it is felt to engage.

6. Push together plug connection on microswitch for front lid lock lower part **-18-** until it is felt to engage. →551719 Removing and installing front lock lower part - chapter on "Installing"
7. Clip in front-end wire harness on right side at tie-wraps **-22-** .
8. Push connector onto control unit for garage door opener/HomeLink **-17-** until it is felt to engage. →967919 Removing and installing control unit for garage door opener - chapter on "Installing"
9. Push connector onto servo motor for front lid release **-16-** until it is felt to engage. →551319 Removing and installing release for front lid - chapter on "Installing"
10. Push connectors onto the two horns **-14 and 15-** until they click into place. →905019 Removing and installing horn - chapter on "Installing"
11. Push connector onto outside temperature sensor **-13-** until it is felt to engage. →916819 Removing and installing outside temperature sensor - chapter on "Installing"

Note

Only for USA/Canada version vehicles

12. Push connector onto front emergency release **-12-** until it is felt to engage. →556219 Removing and installing front emergency release - chapter on "Installing" [997410 997430 997610 997620]→556219 Removing and installing front emergency release - chapter on "Installing" [997110 997120 997310 997320]→*556219 23 Removing and installing front emergency release - chapter on "Installing" [997111 997121 997311 997321 997411 997431 997611 997621]*
13. Clip in front-end wire harness on left side at holder **-23-** .
14. Clip in front-end wire harness on right side at tie-wraps **-22-** .
15. Push connectors onto both sensors for front airbag **-11-** until they are felt to engage. →695119 Removing and installing airbag sensor - chapter on "Installing"
16. Clip in cable guide for sensor line for front airbag **-10-** .

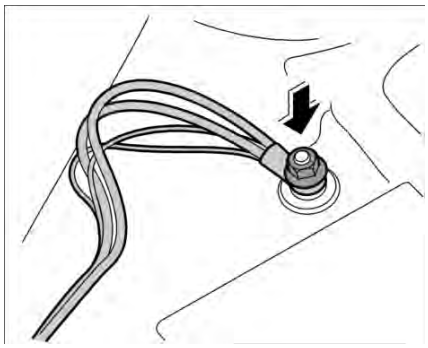


Pushing connectors onto control unit for coolant control.

17. Push connector and plug connection onto control unit for coolant control **-7 to 9-** .

17.1. Push the two connectors onto the control unit for coolant control **-8 and 9-** until they are felt to engage.

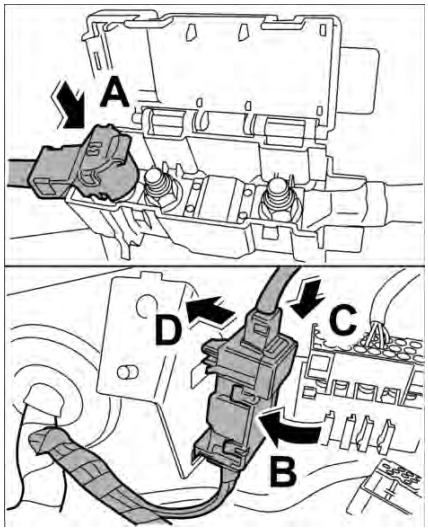
17.2. Push on plug connection to coolant fan **-7-** until it is felt to engage.



Pushing connector onto headlight

18. Push connector onto headlight **-5-** at left and right.

18.1. Push connector onto headlight at left and right **-Arrow A-** .

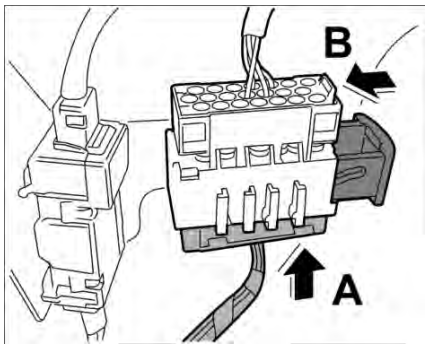


18.2. Push on securing clip from below until it is felt to engage **-Arrow B-**
.

Securing ground point

19. Fasten ground point **-4-** at left and right.

19.1. Connect ground straps and screw down fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**



Pushing connector onto fuse box for fan

20. Push connector onto fuse box for fan **-2-** .

20.1. Push connector onto fuse box for fan **-Arrow A-** .

20.2. Close lid **-Arrow B-** until it is felt to engage.

20.3. Position fuse box below on the clip **-Arrow C-** and clip in **-Arrow D-** .

Pushing together plug connection between front end wire harness and main wire harness, right

21. Push together plug connection between front end wire harness and main wire harness, right **-1-** .

21.1. Push together plug connection between front end wire harness and main wire harness, right **-Arrow A-** and lock **-Arrow B-** until it is felt to engage.

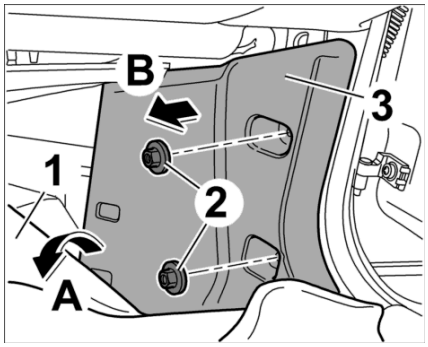
Removing rear wire harness

Exposing rear wire harness

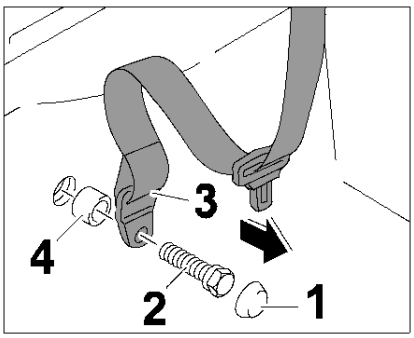


Removing lateral footwell trim on driver's side

1. Remove left footwell trim panel.

1.1. Remove fuse carrier cover **-1-** (**-arrow A-**).

1.2. Unscrew the three fastening screws **-2-** and take off the footwell trim panel **-3-** (**-arrow B-**).

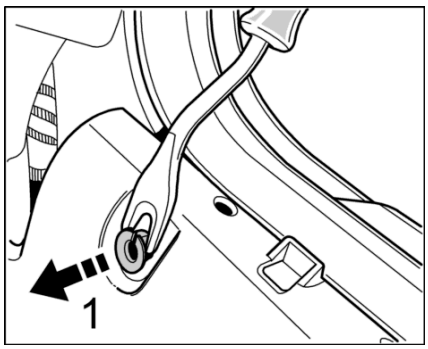


Removing lateral footwell trim on passenger's side

2. Remove right footwell trim panel.

2.1. Partly loosen floor covering **-1-** at the bottom in the area of the A-pillar **-arrow A-** .

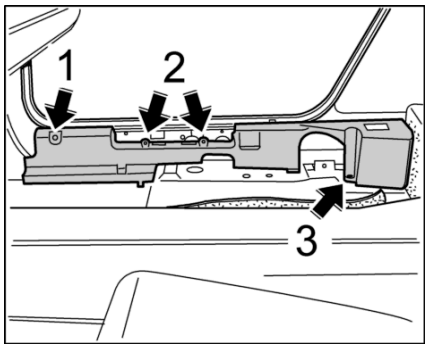
2.2. Unscrew both plastic nuts **-2-** and take off the footwell trim panel **-3-** (**-arrow B-**).



Undoing seat belt and fitting

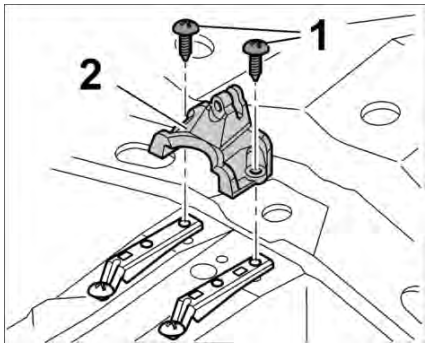
3. Loosen seat belt mount at left and right.

3.1. Press off cap **-1-** with a screwdriver and unscrew the fastening screw **-2-** . Remove seat belt with fitting **-3-** and spacer sleeve **-4-** .



4. Disengage floor covering at the support and lay it in the vehicle interior.

Unlocking locating peg using the removal tool



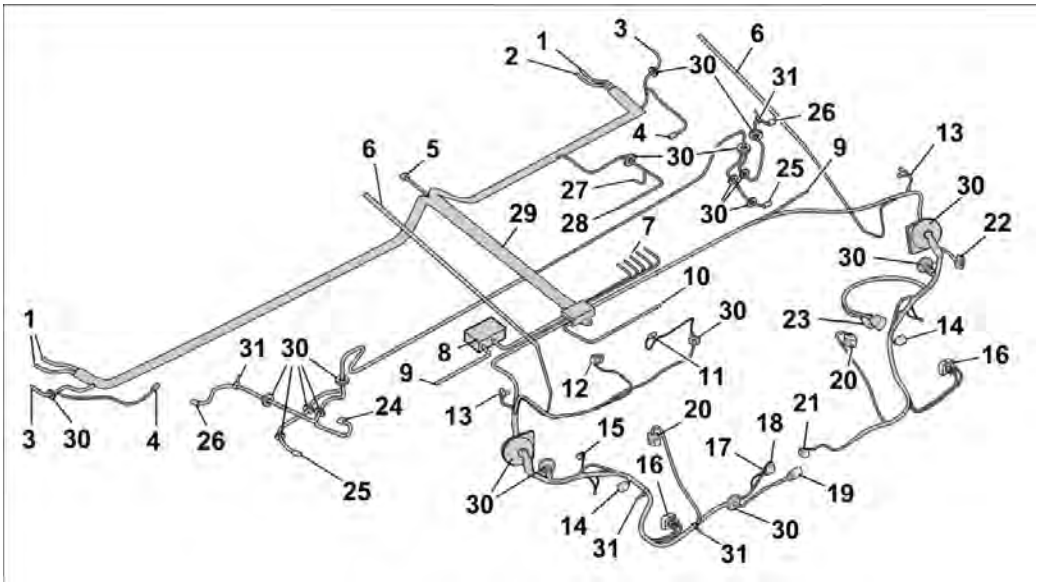
5. Remove left and right support.

5.1. Unlock locating peg **-1-** of the support using the commercially available removal tool **Disassembly tool, universal NR.21**.

Unscrewing fastening screws

5.2. Unscrew fastening screws **-2-** and nuts **-3-** and carefully pull the support up and out of the retaining points.

Removing mounting saddle for rear-seat backrest



6. Remove mounting saddle for rear-seat backrest.

6.1. Unscrew the two fastening screws **-1-** and remove mounting saddle for rear-seat backrest **-2-** .

7. Remove insulating elements in the area of the rear wire harness.

Removing rear wire harness

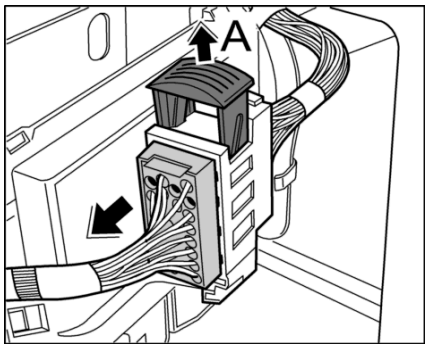
Installation Location:

Overview of plugs for rear wire harness

1 - Plug connection for main wire harness to rear wire harness, left and right
2 - Tiptronic control unit connector
3 - Connector for seat-belt tensioner, left and right
4 - Connector for rear loudspeaker, left and right
6 - Plug connection for rear window heating, left and right
7 - DME control module connector
8 - Rear relay carrier
9 - PASM connector, left and right
10 - Subwoofer connector
11 - Connector for auxiliary brake light
12 - Connector for wiper motor for rear window washer
13 - Ground point, left and right
14 - Connector for rear light, left and right
15 - Connector for engine coolant level switch
16 - Plug connection for oxygen sensor, left and right
17 - Plug connection for rear lock lower part
18 - Connector for motor for rear lid release
19 - Plug connection for wire harness for number plate light
20 - Plug for hot-film mass air flow meter
21 - Connector for air cleaner flap
22 - Plug connection for rear wire harness to wire harness for rear lid
23 - Plug connection for rear wire harness to engine wire harness
24 - Plug for angle sensor for HBA, rear left

25 - Plug connection for rear wheel sensor, left and right

26 - Connector for tyre pressure monitoring system antenna, rear left and right



27 - B+ lead for transmission

28 - Connector for reversing light switch

29 - Cable duct

30 - Rubber sleeves

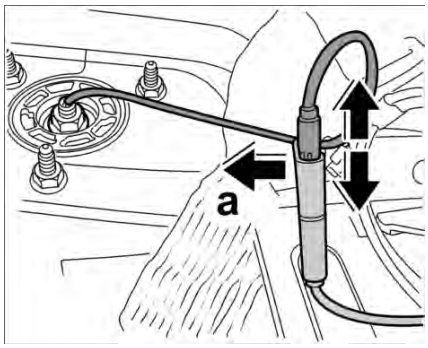
31 - Tie-wrap

Releasing plug connection for main wire harness to rear wire harness

1. Disconnect plug connection for main wire harness to rear wire harness **-1-** at left and right.

1.1. Release and disconnect plug connection for main wire harness to rear wire harness **-1-** (**-arrow A-**).

2. Release and pull off connector on Tiptronic control unit **-2-** . →373019 Removing and installing transmission control module - section on "Removing"



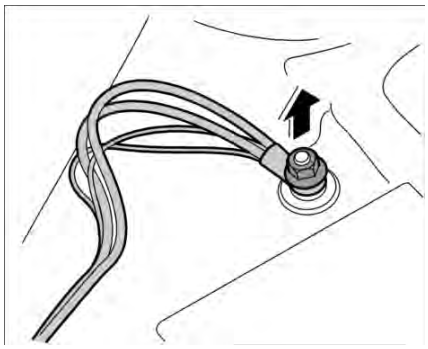
3. Pull off connector on seat-belt tensioner **-3-** at left and right. →691319 Removing and installing front three-point seat belt with tensioner - section on "Removing"

3.1. Release and pull off connector on seat-belt tensioner **-3-** at left and right.

3.2. Remove rubber sleeve **-30-** .

4. Release and disconnect plug connection for rear window heating **-6-** at left and right. →648619 Removing and installing rear window - section on "Removing"

5. Release and pull off connector on DME control module **-7-** . →247019 Removing and installing DME control module - section on "Removing" [997310 997311 997320 997321 997611 997620 997621]→247019 Removing and installing DME control module - section on "Removing" [997610]



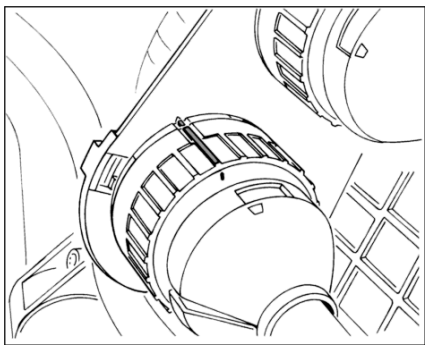
Disconnecting PASM plug connection

6. Disconnect PASM plug connection **-9-** at left and right.

6.1.

Release and disconnect PASM plug connection **-9-** (**-arrow a-**).

7. Release and pull off connector on subwoofer **-10-** . →913619 Removing and installing subwoofer - section on "Removing"
8. Release and pull off connector on wiper motor for rear window washer **-12-** . →923419 Removing and installing wiper motor for rear window washer - section on "Removing"



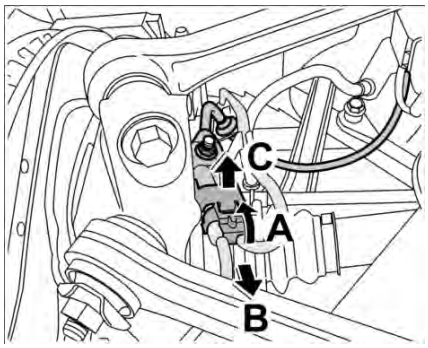
Loosening ground point

9. Loosen ground point **-13-** at left and right.

9.1. Screw off fastening nut and remove ground straps.

10. Unclip cable duct **-29-** .
11. Unclip tie-wrap **-31-** .
12. Release and disconnect plug connection for oxygen sensor **-16-** at left and right. →246919 Removing and installing oxygen sensor ahead of catalytic converter - section on "Removing"
13. Release and disconnect plug connection on rear lock lower part **-17-** . →558619 Removing and installing rear lock lower part - section on "Removing"
14. Release and pull off connector on motor for rear lid release **-18-** . →558419 Removing and installing motor for rear lid release - section on "Removing"
15. Release and disconnect plug connection for rear wire harness to wire harness for rear lid **-22-** . →559019 Removing and installing rear lid - section on "Removing"

Round connectors for engine wire harness



16. Disconnect plug connection for rear wire harness to engine wire harness **-23-** . →100119 Removing and installing engine - section on "Removing"

16.1. Release rear wire harness at the two plug connections and disconnect it by turning the bayonet locks anti-clockwise.

17. Disconnect plug on angle sensor for HBA at rear left **-24-** . →947919 Removing and installing rear angle sensor for headlight levelling system - section on "Removing"

17.1. Release and pull off connector on angle sensor for HBA at rear left **-24-** .

17.2. Remove rubber sleeve **-30-** .

Disconnecting plug connection for rear wheel sensor

18. Disconnect plug connection for rear wheel sensor **-25-** at left and right.

18.1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .

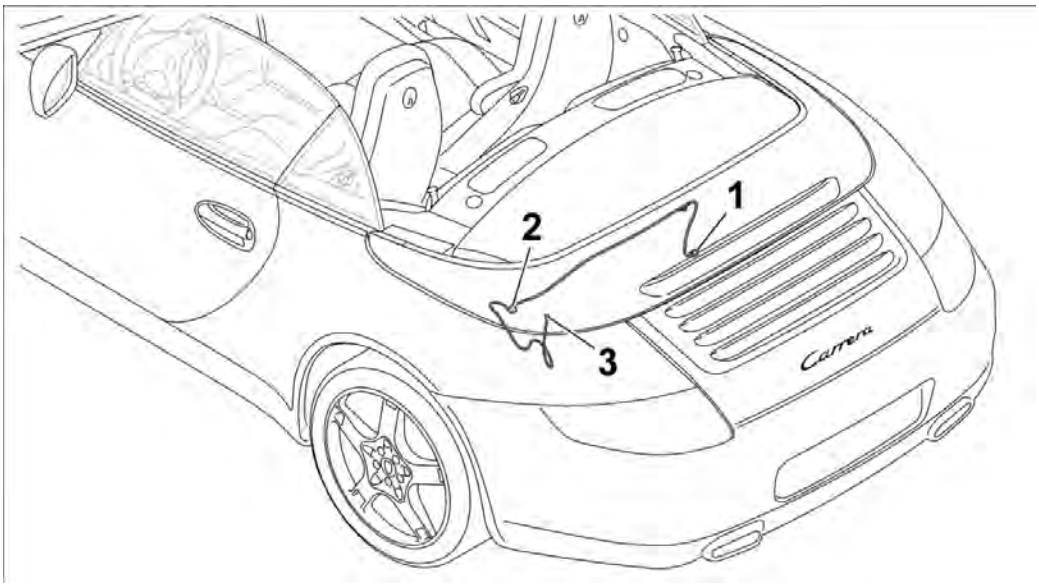
18.2. Unscrew the fastening nut and remove the connector socket **-arrow C-** .

18.3. Remove rubber sleeve **-30-** .

19. Pull off connector on rear antenna for tyre pressure monitoring system **-26-** at left and right. →443819 Removing and installing antenna for tyre pressure monitoring system - section on "Removing"

19.1. Unclip tie-wrap **-31-** .

19.2. Release and pull off connector on rear antenna for tyre pressure monitoring system **-26-** at left and right.



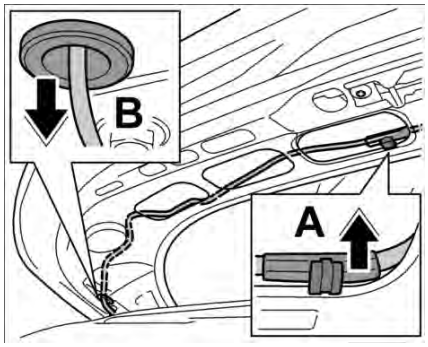
19.3. Remove rubber sleeve **-30-** .

20. Screw off B+ lead **-27-** on transmission. →343519 Removing and installing transmission - section on "Removing" [997610 997611 997620 997621]→343519 Removing and installing transmission - section on "Removing" [997310 997311 997320 997321]

21. Release and pull off connector on reversing light switch **-28-** . →947219 Removing and installing reversing light switch - section on "Removing"

22. Pull rear wire harness out of the engine compartment through the opening in the rear wall into the interior of the vehicle and remove it.

Removing wire harness for auxiliary stop light (Cabriolet)

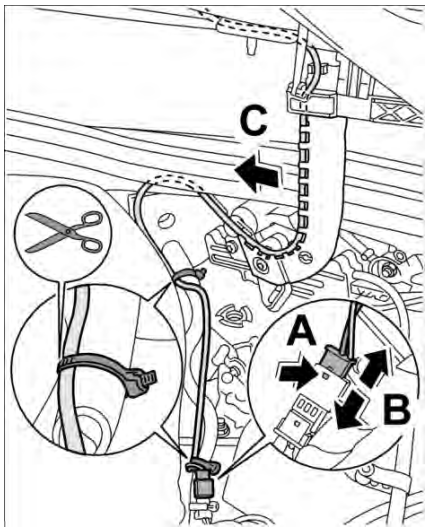


Overview of wire harness for auxiliary stop light

1 - Connector for auxiliary stop light

2 - Rubber sleeve

3 - Plug connection between wire harness for auxiliary stop light and rear wire harness



Removing rubber sleeve on wire harness for auxiliary stop light

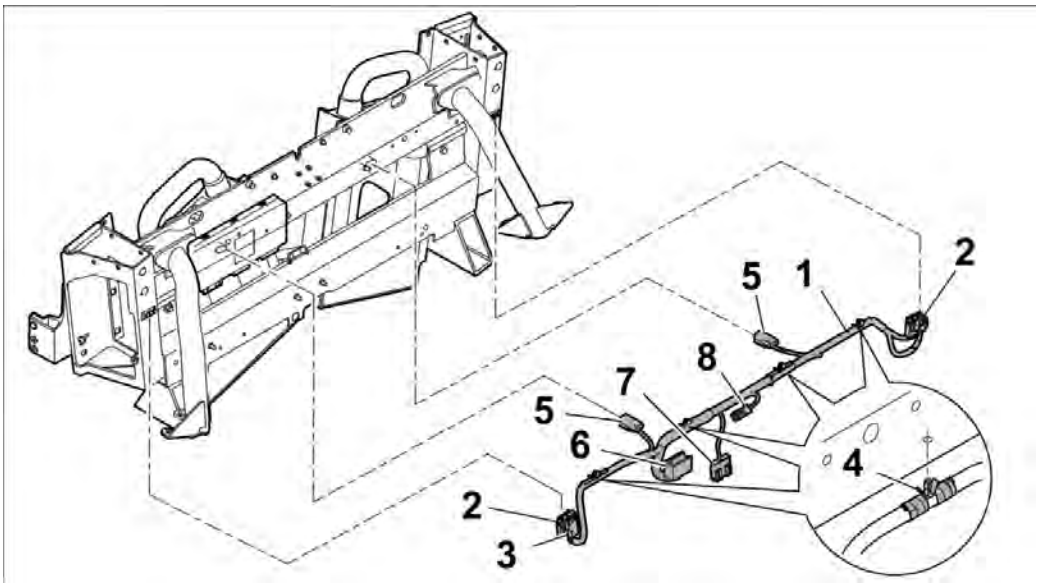
1. Loosen wire harness for auxiliary stop light on convertible top compartment lid and remove rubber sleeve **-2-** .

1.1. Remove wire harness for auxiliary stop light on holder from convertible top compartment lid **-arrow A-** .

1.2. Remove rubber sleeve of wire harness for auxiliary stop light on convertible top compartment lid **-arrow B-** and pull out wire harness for auxiliary stop light downward from the convertible top compartment lid.

Disconnecting plug connection between wire harness for auxiliary stop light and rear wire harness

2. Disconnect wire harness plug connection for auxiliary stop light to rear wire harness **-3-** and expose wire harness for auxiliary stop light.



2.1. Cut both tie-wraps on the wire harness for auxiliary stop light.

2.2. Release wire harness plug connection for auxiliary stop light to rear wire harness **-arrow A-** and disconnect **-arrows B-** .

2.3. Pull wire harness for auxiliary stop light out of the fastening part **-arrow C-** .

Removing wire harness for roll-over protection system (cabriolet)

Installation Location:

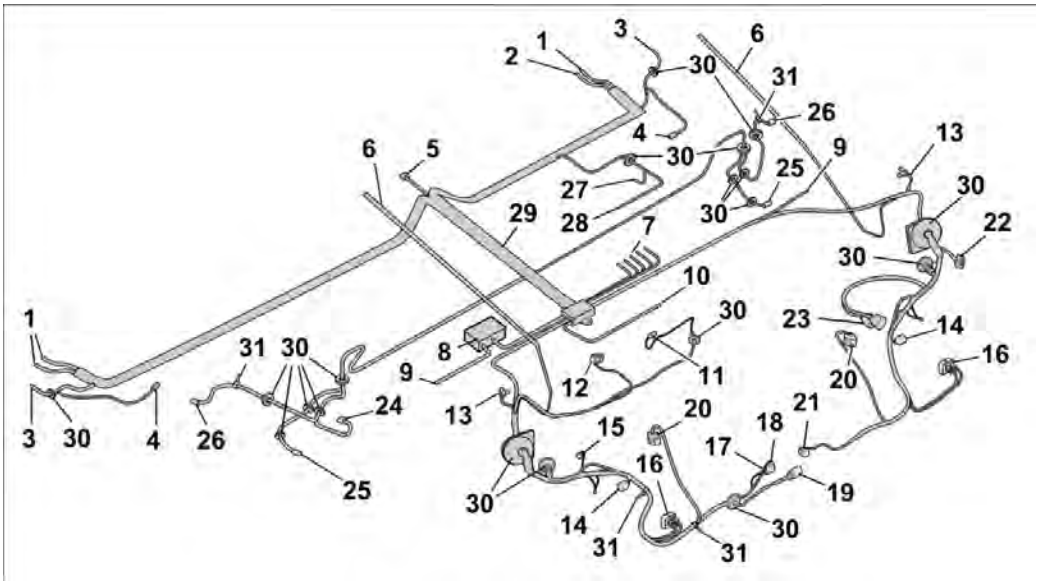
Overview of plugs for wire harness for roll-over protection system

1 - Wire harness for roll-over protection system

2 - Plug connection for rear side panel flap

3 - Hardtop mount plug connection

4 - Retaining clips
5 - Roll-over bar connector
6 - Convertible top control unit connector
7 - Plug connection for wire harness for roll-over protection system to rear wire harness
8 - Plug connection for motor for convertible-top compartment lid drive mechanism



1. Release and disconnect plug connection for hardtop mount **-3-** . →611719 Removing and installing hardtop mount - section on "Removing"
2. Release and disconnect plug connections for rear side panel flap **-2-** at left and right. →614219 Removing and installing rear side panel flap - section on "Removing"
3. Unclip and remove wire harness for roll-over protection system **-1-** at the retaining clips **-4-** .

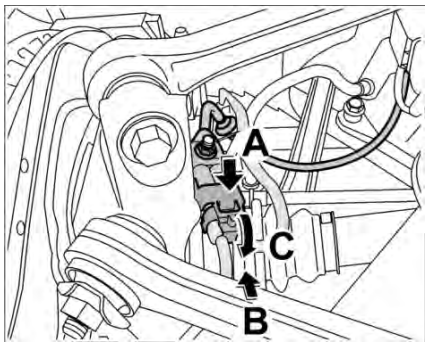
Installing rear wire harness

Installing rear wire harness

Installation Location:



Overview of plugs for rear wire harness

1 - Plug connection for main wire harness to rear wire harness, left and right
2 - Tiptronic control unit connector
3 - Connector for seat-belt tensioner, left and right
4 - Connector for rear loudspeaker, left and right
6 - Plug connection for rear window heating, left and right
7 - DME control module connector

8 - Rear relay carrier
9 - PASM connector, left and right
10 - Subwoofer connector
11 - Connector for auxiliary brake light
12 - Connector for wiper motor for rear window washer
13 - Ground point, left and right
14 - Connector for rear light, left and right
15 - Connector for engine coolant level switch
16 - Plug connection for oxygen sensor, left and right
17 - Plug connection for rear lock lower part
18 - Connector for motor for rear lid release
19 - Plug connection for wire harness for number plate light
20 - Plug for hot-film mass air flow meter
21 - Connector for air cleaner flap
22 - Plug connection for rear wire harness to wire harness for rear lid
23 - Plug connection for rear wire harness to engine wire harness
24 - Plug for angle sensor for HBA, rear left
25 - Plug connection for rear wheel sensor, left and right
26 - Connector for tyre pressure monitoring system antenna, rear left and right
27 - B+ lead for transmission
28 - Connector for reversing light switch
29 - Cable duct
30 - Rubber sleeves
31 - Tie-wrap

1. Lay rear wire harness in interior of vehicle and push it into the engine compartment through the opening in the rear wall. Lay rear wire harness in engine compartment.
2. Plug in connector on reversing light switch **-28-** until it engages correctly. →947219 Removing and installing reversing light switch - section on "Installing"
3. Screw down B+ lead **-27-** on transmission. →**Tightening torque: 10 (7.5 ftlb.) Nm** →343519 Removing and installing transmission - section on "Installing" [997610 997611 997620 997621]→343519 Removing and installing transmission - section on "Installing" [997310 997311 997320 997321]
4. Plug in connector on rear antenna for tyre pressure monitoring system **-26-** at left and right. →443819 Removing and installing antenna for tyre pressure monitoring system - section on "Installing"

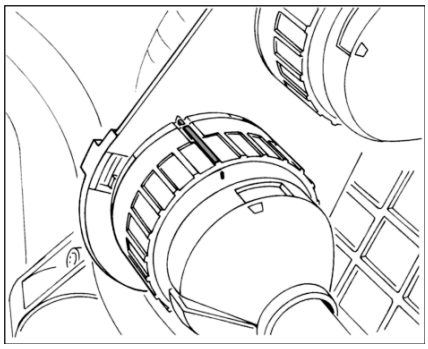
4.1. Fit rubber sleeve **-30-** .
4.2. Plug in connector on rear antenna for tyre pressure monitoring system **-26-** at left and right until it engages securely.
4.3. Clip tie-wrap **-31-** into place.

Connecting plug connection for rear wheel sensor

5. Connect plug connection for rear wheel sensor **-25-** at left and right.

5.1. Fit rubber sleeve **-30-** .

5.2. Place socket in installation position **-arrow A-** and screw on the fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm**



5.3. Plug in the two connectors **-arrow B-** .

5.4. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

6. Connect plug on angle sensor for HBA at rear left **-24-** . →947919 Removing and installing rear angle sensor for headlight levelling system - section on "Installing"

6.1. Fit rubber sleeve **-30-** .

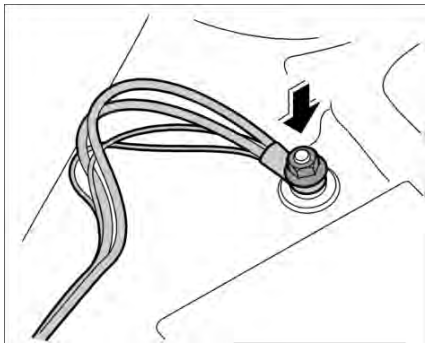
6.2. Plug in connector on rear left angle sensor for HBA **-24-** until it engages firmly.

Round connectors for engine wire harness

7. Push plug connection for rear wire harness to engine wire harness **-23-** together. →100119 Removing and installing engine - section on "Installing"

7.1. Connect rear wire harness at the two plug connections and lock it by turning the bayonet locks clockwise.

8. Push plug connection for rear wire harness to wire harness for rear lid together **-22-** until it engages securely. →559019 Removing and installing rear lid - section on "Installing"



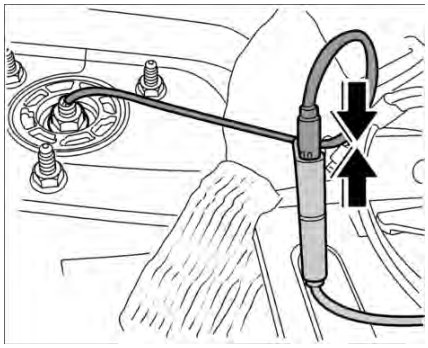
9. Plug in connector on motor for rear lid release **-18-** until it engages firmly. →558419 Removing and installing motor for rear lid release - section on "Installing"

10. Push plug connection on rear lock lower part **-17-** together until it engages securely. →558619 Removing and installing rear lock lower part - section on "Installing"

11. Push in plug connection for oxygen sensor **-16-** at left and right until it engages securely. →246919 Removing and installing oxygen sensor ahead of catalytic converter - section on "Installing"

12. Clip tie-wrap **-31-** into place.

13. Clip in cable duct **-29-** .



Securing ground point

14. Secure ground point **-13-** at left and right.

14.1. Connect ground straps and screw down fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**

15. Plug in connector on wiper motor for rear window washer **-12-** until it engages correctly. →923419 Removing and installing wiper motor for rear window washer - section on "Installing"

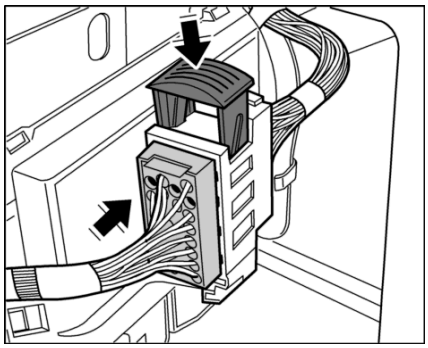
16. Plug in connector on subwoofer **-10-** until it engages firmly. →913619 Removing and installing subwoofer - section on "Installing"

Connecting PASM plug connection

17. Connect PASM plug connection **-9-** at left and right.

17.1. Connect PASM plug connection **-9-** until it engages securely.

18. Plug in connector on DME control module **-7-** until it engages securely. →247019 Removing and installing DME control module - section on "Installing" [997310 997311 997320 997321 997611 997620 997621]→247019 Removing and installing DME control module - section on "Installing" [997610]



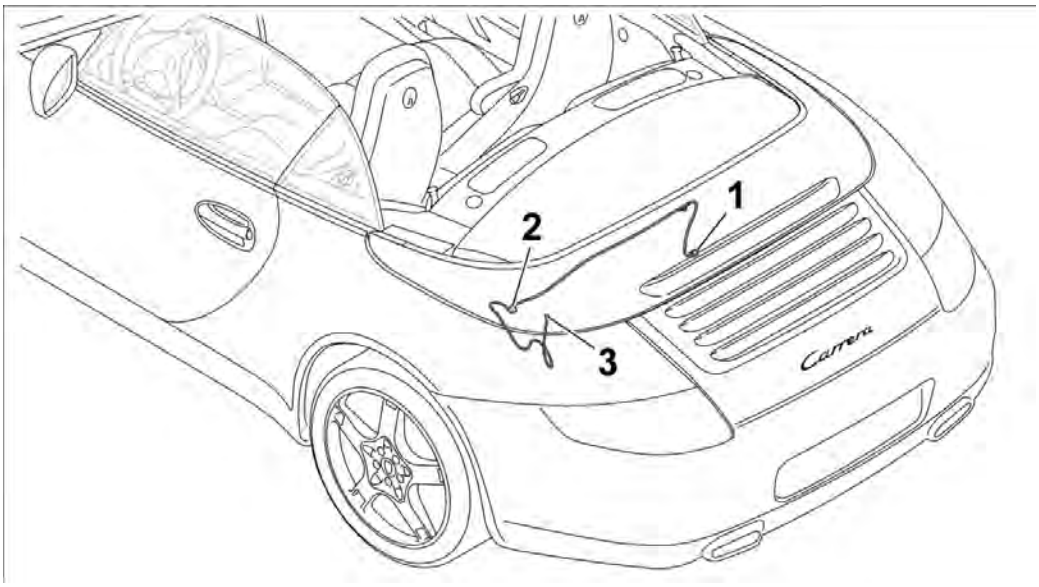
19. Push in plug connection for rear window heating **-6-** at left and right until it engages securely. →648619 Removing and installing rear window - section on "Installing"

20. Plug in connector on seat-belt tensioner **-3-** at left and right. →691319 Removing and installing front three-point seat belt with tensioner - section on "Installing"

20.1. Fit rubber sleeve **-30-** .

20.2. Plug in connector on seat-belt tensioner **-3-** at left and right until it engages securely.

21. Attach connector to Tiptronic control unit **-2-** and lock it until it engages firmly. →373019 Removing and installing transmission control module - section on "Installing"

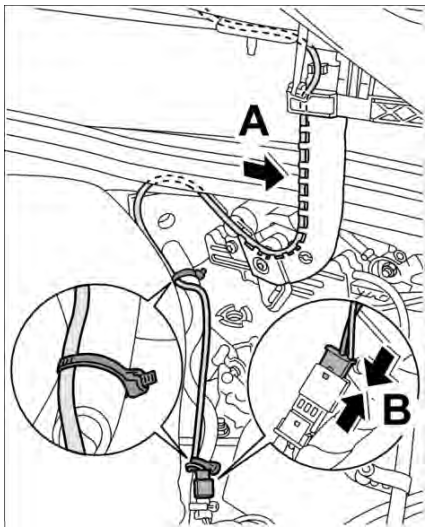


Connecting plug connection for main wire harness to rear wire harness

22. Push plug connection for main wire harness to rear wire harness **-1-** together at left and right.

22.1. Push plug connection for main wire harness to rear wire harness **-1-** together and lock it.

Installing wire harness for auxiliary stop light (Cabriolet)

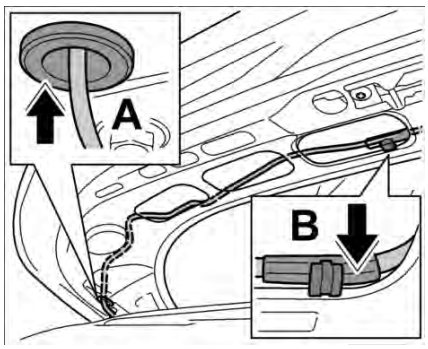


Overview of wire harness for auxiliary stop light

1 - Connector for auxiliary stop light

2 - Rubber sleeve

3 - Plug connection between wire harness for auxiliary stop light and rear wire harness



Pushing together plug connection between wire harness for auxiliary stop light and rear wire harness

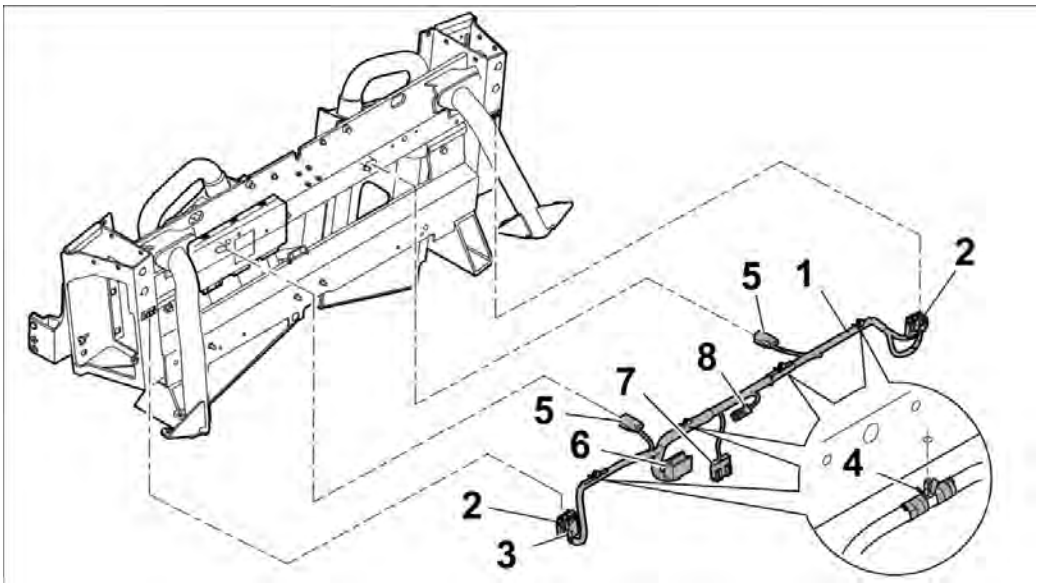
1. Route wire harness for auxiliary stop light and push together wire harness plug connection for auxiliary stop light to rear wire harness **-3-** .

1.1. Press wire harness for auxiliary stop light into fastening part **-arrow A-** .

1.2. Push together plug connection between wire harness for auxiliary stop light and rear wire harness **-arrows B-** .

1.3. Fasten wire harness for auxiliary stop light with two new tie-wraps.

Fitting rubber sleeve on wire harness for auxiliary stop light



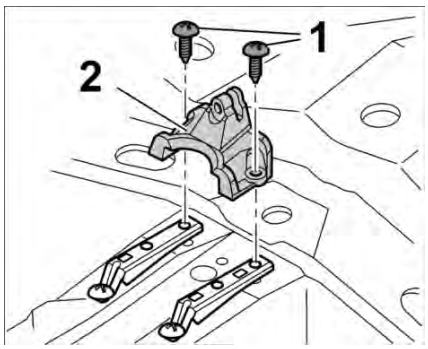
2. Fit rubber sleeve **-2-** of the wire harness for auxiliary stop light and fasten wire harness for auxiliary stop light.

2.1. Slide in wire harness for auxiliary stop light from below into the convertible top compartment lid and fit rubber sleeve **-arrow A-** .

2.2. Push on wire harness for auxiliary stop light with the holder onto the convertible top compartment lid **-arrow B-** .

Installing wire harness for roll-over protection system (cabriolet)

Installation Location:

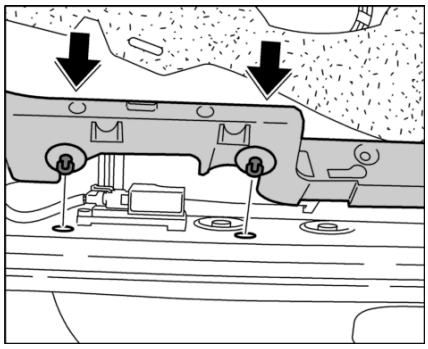


Overview of plugs for wire harness for roll-over protection system

1 - Wire harness for roll-over protection system
2 - Plug connection for rear side panel flap
3 - Hardtop mount plug connection
4 - Retaining clips
5 - Roll-over bar connector
6 - Convertible top control unit connector
7 - Plug connection for wire harness for roll-over protection system to rear wire harness
8 - Plug connection for motor for convertible-top compartment lid drive mechanism

1. Position wire harness for roll-over protection system **-1-** on the frame and clip in at the retaining clips **-4-** .
2. Push in plug connections for rear side panel flap **-2-** at left and right until they engage securely. →614219 Removing and installing rear side panel flap - section on "Installing"
3. Push in hardtop mount plug connection **-3-** until it engages securely. →611719 Removing and installing mount for hardtop - section on "Installing"

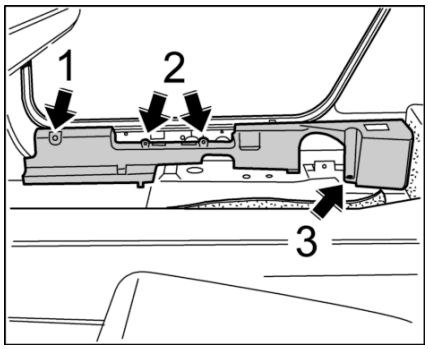
Completing the vehicle



1. Insert insulating elements in the area of the rear wire harness.

Installing mounting saddle for rear-seat backrest

2. Install mounting saddle for rear-seat backrest.



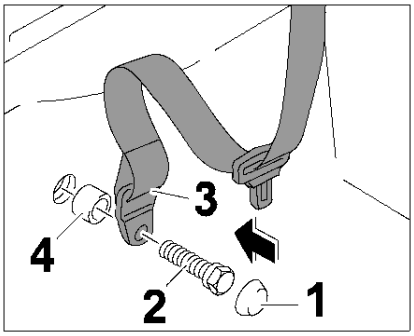
2.1. Position mounting saddle for rear-seat backrest **-2-** and secure with the two fastening screws **-1-** . →**Tightening torque: 10 (7.5 ftlb.) Nm**

Engaging the support

3. Install left and right support.

3.1. Position the support and engage in lower side member.

Securing the support



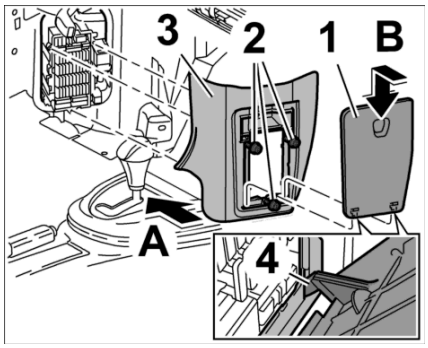
3.2. Push in the locating peg **-1-** of the support and check that it is seated correctly.

3.3. Tighten the fastening nuts **-3-** and fastening screws **-2-** . →**Tightening torque: 7.2 (5.5 ftlb.) Nm**

4. Lay the floor covering over the support and engage.

Note

Ensure that belt strap can run properly!

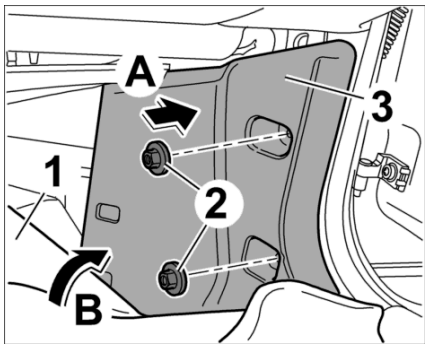


Installing seat belt and fitting

5. Secure seat belt mount at left and right.

5.1. Screw in fastening screw **-2-** , seat belt and fitting **-3-** and spacer sleeve **-4-** on inner lower side member. →**Tightening torque: 50 (37 ftlb.) Nm**

5.2. Press in cap **-1-** .



Installing lateral footwell trim on driver's side

6. Install left footwell trim panel.

6.1. Insert footwell trim panel **-3-** (**-arrow A-**) and screw in the three fastening screws **-2-** . → **Tightening torque: 3 (2 ftlb.) Nm**

6.2. Insert the fuse carrier cover **-1-** with both clips **-4-** into the lateral footwell trim panel **-2-** and clip in **-arrow B-** .

Installing lateral footwell trim on passenger's side

7. Install right footwell trim panel.

7.1. Position footwell trim panel **-3-** (**-arrow A-**) and screw down with both plastic nuts **-2-** .

7.2. Secure floor covering **-1-** at the bottom in the area of the A-pillar **-arrow B-** .**Use double-sided adhesive tape or suitable adhesive**.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

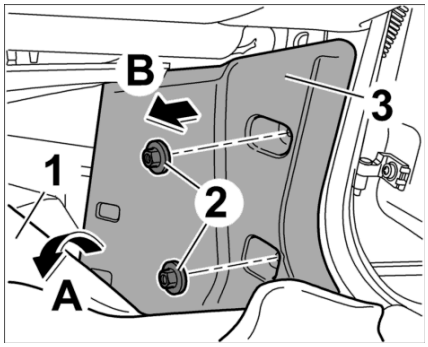
Removing rear wire harness

Exposing rear wire harness

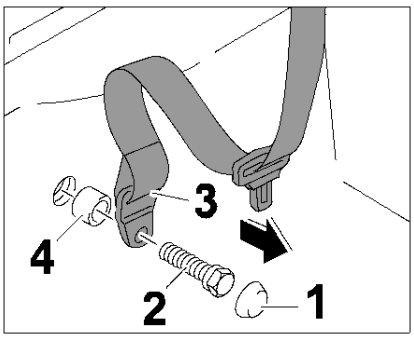


Removing lateral footwell trim on driver's side

1. Remove left footwell trim panel.

1.1. Remove fuse carrier cover **-1-** (**-arrow A-**).

1.2. Unscrew the three fastening screws **-2-** and take off the footwell trim panel **-3-** (**-arrow B-**).

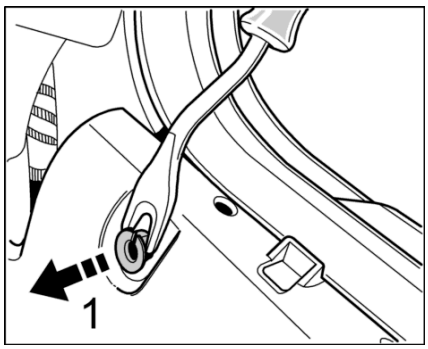


Removing lateral footwell trim on passenger's side

2. Remove right footwell trim panel.

2.1. Partly loosen floor covering **-1-** at the bottom in the area of the A-pillar **-arrow A-** .

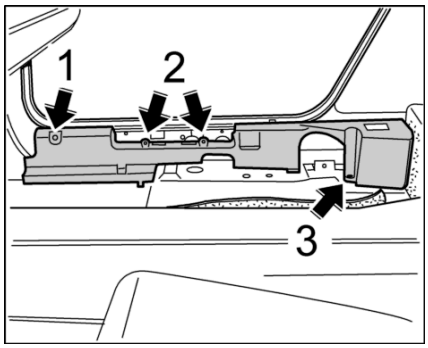
2.2. Unscrew both plastic nuts **-2-** and take off the footwell trim panel **-3-** (**-arrow B-**).



Undoing seat belt and fitting

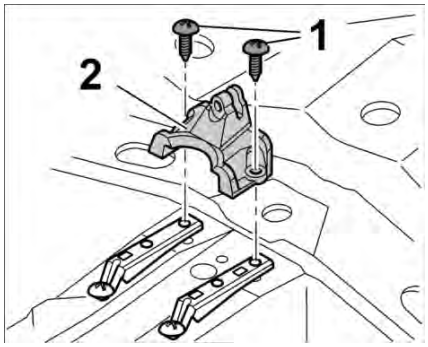
3. Loosen seat belt mount at left and right.

3.1. Press off cap **-1-** with a screwdriver and unscrew the fastening screw **-2-** . Remove seat belt with fitting **-3-** and spacer sleeve **-4-** .



4. Disengage floor covering at the support and lay it in the vehicle interior.

Unlocking locating peg using the removal tool



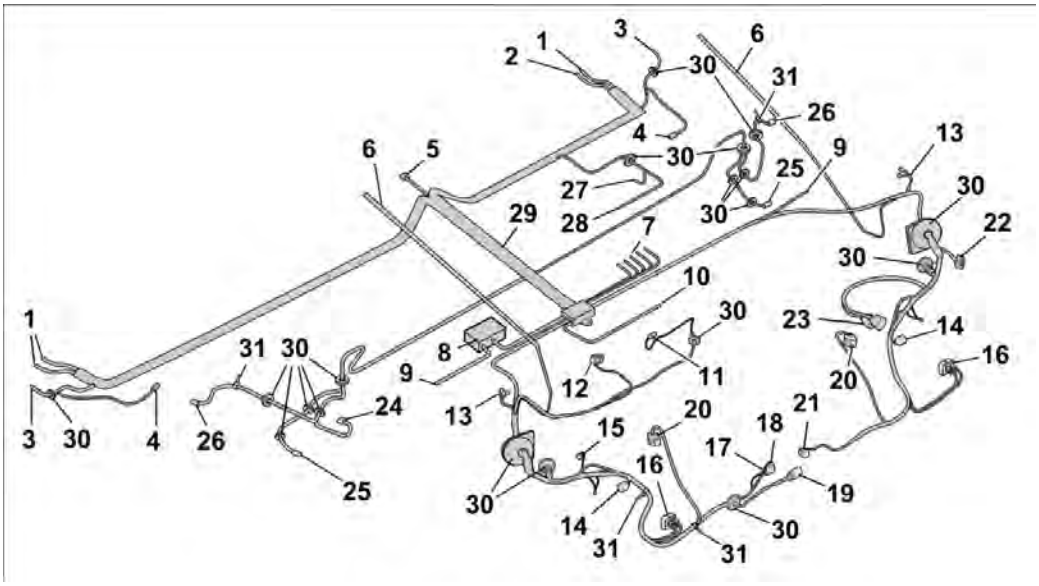
5. Remove left and right support.

5.1. Unlock locating peg **-1-** of the support using the commercially available removal tool **Disassembly tool, universal NR.21**.

Unscrewing fastening screws

5.2. Unscrew fastening screws **-2-** and nuts **-3-** and carefully pull the support up and out of the retaining points.

Removing mounting saddle for rear-seat backrest



6. Remove mounting saddle for rear-seat backrest.

6.1. Unscrew the two fastening screws **-1-** and remove mounting saddle for rear-seat backrest **-2-** .

7. Remove insulating elements in the area of the rear wire harness.

Removing rear wire harness

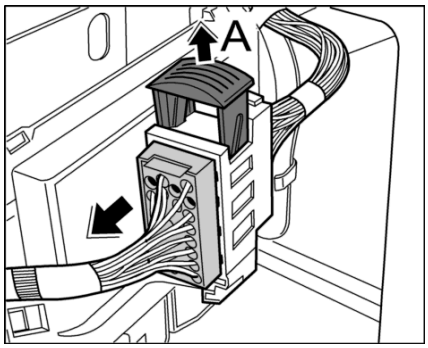
Installation Location:

Overview of plugs for rear wire harness

1 - Plug connection for main wire harness to rear wire harness, left and right
2 - Tiptronic control unit connector
3 - Connector for seat-belt tensioner, left and right
4 - Connector for rear loudspeaker, left and right
6 - Plug connection for rear window heating, left and right
7 - DME control module connector
8 - Rear relay carrier
9 - PASM connector, left and right
10 - Subwoofer connector
11 - Connector for auxiliary brake light
12 - Connector for wiper motor for rear window washer
13 - Ground point, left and right
14 - Connector for rear light, left and right
15 - Connector for engine coolant level switch
16 - Plug connection for oxygen sensor, left and right
17 - Plug connection for rear lock lower part
18 - Connector for motor for rear lid release
19 - Plug connection for wire harness for number plate light
20 - Plug for hot-film mass air flow meter
21 - Connector for air cleaner flap
22 - Plug connection for rear wire harness to wire harness for rear lid
23 - Plug connection for rear wire harness to engine wire harness
24 - Plug for angle sensor for HBA, rear left

25 - Plug connection for rear wheel sensor, left and right

26 - Connector for tyre pressure monitoring system antenna, rear left and right



27 - B+ lead for transmission

28 - Connector for reversing light switch

29 - Cable duct

30 - Rubber sleeves

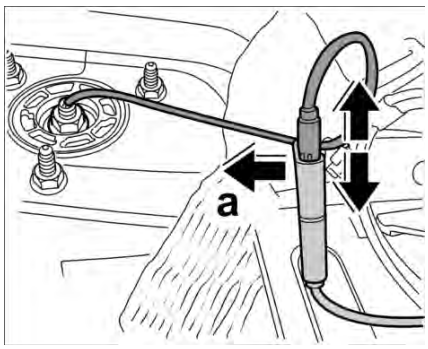
31 - Tie-wrap

Releasing plug connection for main wire harness to rear wire harness

1. Disconnect plug connection for main wire harness to rear wire harness **-1-** at left and right.

1.1. Release and disconnect plug connection for main wire harness to rear wire harness **-1-** (**-arrow A-**).

2. Release and pull off connector on Tiptronic control unit **-2-** . →373019 Removing and installing transmission control module - section on "Removing"



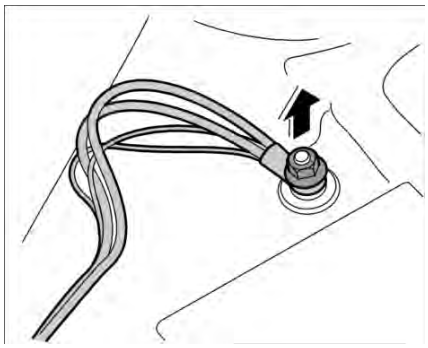
3. Pull off connector on seat-belt tensioner **-3-** at left and right. →691319 Removing and installing front three-point seat belt with tensioner - section on "Removing"

3.1. Release and pull off connector on seat-belt tensioner **-3-** at left and right.

3.2. Remove rubber sleeve **-30-** .

4. Release and disconnect plug connection for rear window heating **-6-** at left and right. →648619 Removing and installing rear window - section on "Removing"

5. Release and pull off connector on DME control module **-7-** . →247019 Removing and installing DME control module - section on "Removing"

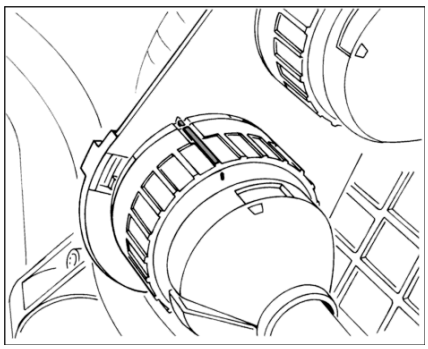


Disconnecting PASM plug connection

6. Disconnect PASM plug connection **-9-** at left and right.

6.1. Release and disconnect PASM plug connection **-9-** (**-arrow a-**).

7. Release and pull off connector on subwoofer **-10-** . →913619 Removing and installing subwoofer - section on "Removing"
8. Release and pull off connector on wiper motor for rear window washer **-12-** . →923419 Removing and installing wiper motor for rear window washer - section on "Removing"



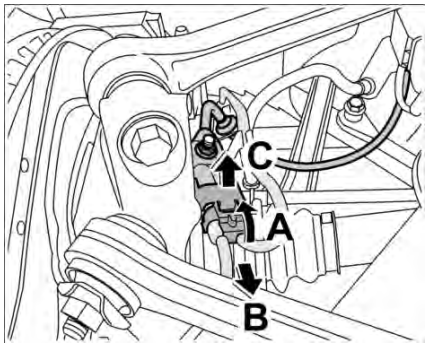
Loosening ground point

9. Loosen ground point **-13-** at left and right.

9.1. Screw off fastening nut and remove ground straps.

10. Unclip cable duct **-29-** .
11. Unclip tie-wrap **-31-** .
12. Release and disconnect plug connection for oxygen sensor **-16-** at left and right. →246919 Removing and installing oxygen sensor ahead of catalytic converter - section on "Removing"
13. Release and disconnect plug connection on rear lock lower part **-17-** . →558619 Removing and installing rear lock lower part - section on "Removing"
14. Release and pull off connector on motor for rear lid release **-18-** . →558419 Removing and installing motor for rear lid release - section on "Removing"
15. Release and disconnect plug connection for rear wire harness to wire harness for rear lid **-22-** . →559019 Removing and installing rear lid - section on "Removing"

Round connectors for engine wire harness



16. Disconnect plug connection for rear wire harness to engine wire harness **-23-** . →100119 Removing and installing engine - section on "Removing"

16.1. Release rear wire harness at the two plug connections and disconnect it by turning the bayonet locks anti-clockwise.

17. Disconnect plug on angle sensor for HBA at rear left **-24-** . →947919 Removing and installing rear angle sensor for headlight levelling system - section on "Removing"

17.1. Release and pull off connector on angle sensor for HBA at rear left **-24-** .

17.2. Remove rubber sleeve **-30-** .

Disconnecting plug connection for rear wheel sensor

18. Disconnect plug connection for rear wheel sensor **-25-** at left and right.

18.1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .

18.2. Unscrew the fastening nut and remove the connector socket **-arrow C-** .

18.3. Remove rubber sleeve **-30-** .

19. Pull off connector on rear antenna for tyre pressure monitoring system **-26-** at left and right. →443819 Removing and installing antenna for tyre pressure monitoring system - section on "Removing"

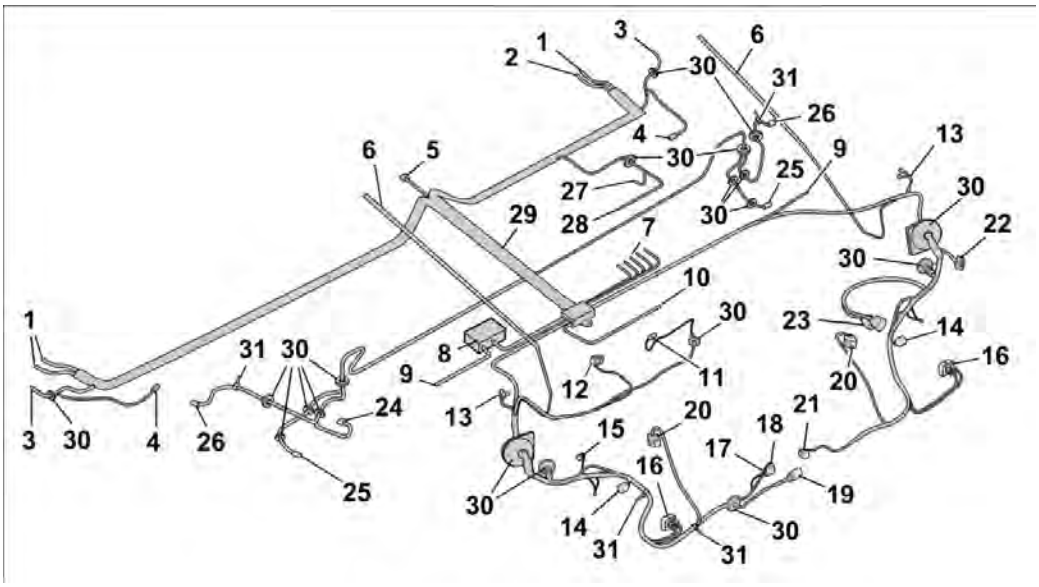
19.1. Unclip tie-wrap **-31-** .

19.2. Release and pull off connector on rear antenna for tyre pressure monitoring system **-26-** at left and right.

19.3. Remove rubber sleeve **-30-** .

20. Screw off B+ lead **-27-** on transmission. →343519 Removing and installing transmission - section on "Removing" [997410 997411 997430 997431]→343519 Removing and installing transmission - section on "Removing" [997110 997111 997120 997121]

21. Release and pull off connector on reversing light switch **-28-** . →947219 Removing and installing reversing light switch - section on "Removing"



22. Pull rear wire harness out of the engine compartment through the opening in the rear wall into the interior of the vehicle and remove it.

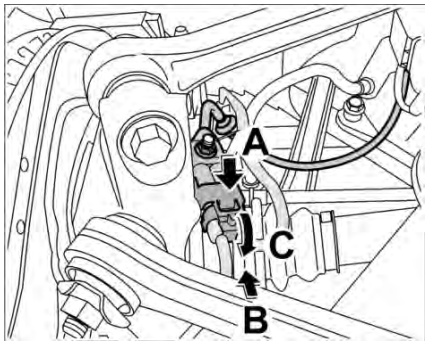
15 - Connector for engine coolant level switch
16 - Plug connection for oxygen sensor, left and right
17 - Plug connection for rear lock lower part
18 - Connector for motor for rear lid release
19 - Plug connection for wire harness for number plate light
20 - Plug for hot-film mass air flow meter
21 - Connector for air cleaner flap
22 - Plug connection for rear wire harness to wire harness for rear lid
23 - Plug connection for rear wire harness to engine wire harness
24 - Plug for angle sensor for HBA, rear left
25 - Plug connection for rear wheel sensor, left and right
26 - Connector for tyre pressure monitoring system antenna, rear left and right
27 - B+ lead for transmission
28 - Connector for reversing light switch

29 - Cable duct

30 - Rubber sleeves



31 - Tie-wrap

1. Lay rear wire harness in interior of vehicle and push it into the engine compartment through the opening in the rear wall. Lay rear wire harness in engine compartment.
2. Plug in connector on reversing light switch **-28-** until it engages correctly. →947219 Removing and installing reversing light switch - section on "Installing"
3. Screw down B+ lead **-27-** on transmission. →**Tightening torque: 10 (7.5 ftlb.) Nm** →343519 Removing and installing transmission - section on "Installing" [997410 997411 997430 997431]→343519 Removing and installing transmission - section on "Installing" [997110 997111 997120 997121]
4. Plug in connector on rear antenna for tyre pressure monitoring system **-26-** at left and right. →443819 Removing and installing antenna for tyre pressure monitoring system - section on "Installing"

4.1. Fit rubber sleeve **-30-** .

4.2. Plug in connector on rear antenna for tyre pressure monitoring system **-26-** at left and right until it engages securely.

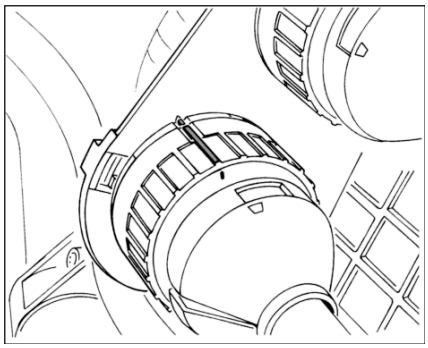
4.3. Clip tie-wrap **-31-** into place.

Connecting plug connection for rear wheel sensor

5. Connect plug connection for rear wheel sensor **-25-** at left and right.

5.1. Fit rubber sleeve **-30-** .

5.2. Place socket in installation position **-arrow A-** and screw on the fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm**



5.3. Plug in the two connectors **-arrow B-** .

5.4. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

6. Connect plug on angle sensor for HBA at rear left **-24-** . →947919 Removing and installing rear angle sensor for headlight levelling system - section on "Installing"

6.1. Fit rubber sleeve **-30-** .

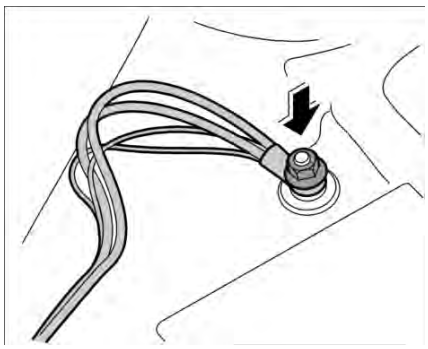
6.2. Plug in connector on rear left angle sensor for HBA **-24-** until it engages firmly.

Round connectors for engine wire harness

7. Push plug connection for rear wire harness to engine wire harness **-23-** together. →100119 Removing and installing engine - section on "Installing"

7.1. Connect rear wire harness at the two plug connections and lock it by turning the bayonet locks clockwise.

8. Push plug connection for rear wire harness to wire harness for rear lid together **-22-** until it engages securely. →559019 Removing and installing rear lid - section on "Installing"



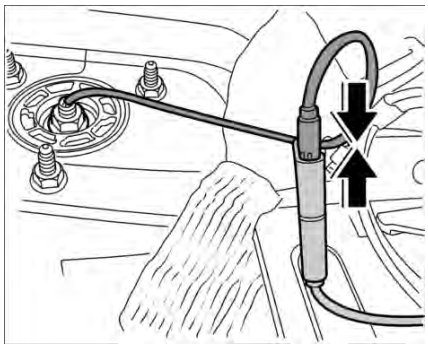
9. Plug in connector on motor for rear lid release **-18-** until it engages firmly. →558419 Removing and installing motor for rear lid release - section on "Installing"

10. Push plug connection on rear lock lower part **-17-** together until it engages securely. →558619 Removing and installing rear lock lower part - section on "Installing"

11. Push in plug connection for oxygen sensor **-16-** at left and right until it engages securely. →246919 Removing and installing oxygen sensor ahead of catalytic converter - section on "Installing"

12. Clip tie-wrap **-31-** into place.

13. Clip in cable duct **-29-** .



Securing ground point

14. Secure ground point **-13-** at left and right.

14.1. Connect ground straps and screw down fastening nut. →**Tightening torque: 9 (6.5 ftlb.) Nm**

15. Plug in connector on wiper motor for rear window washer **-12-** until it engages correctly. →923419 Removing and installing wiper motor for rear window washer - section on "Installing"

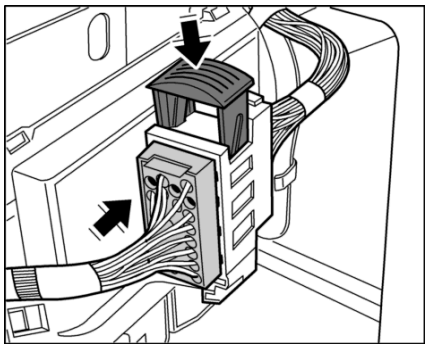
16. Plug in connector on subwoofer **-10-** until it engages firmly. →913619 Removing and installing subwoofer - section on "Installing"

Connecting PASM plug connection

17. Connect PASM plug connection **-9-** at left and right.

17.1. Connect PASM plug connection **-9-** until it engages securely.

18. Plug in connector on DME control module **-7-** until it engages securely. →247019 Removing and installing DME control module - section on "Installing"



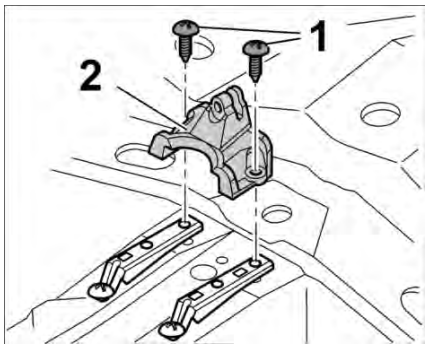
19. Push in plug connection for rear window heating **-6-** at left and right until it engages securely. →648619 Removing and installing rear window - section on "Installing"

20. Plug in connector on seat-belt tensioner **-3-** at left and right. →691319 Removing and installing front three-point seat belt with tensioner - section on "Installing"

20.1. Fit rubber sleeve **-30-** .

20.2. Plug in connector on seat-belt tensioner **-3-** at left and right until it engages securely.

21. Attach connector to Tiptronic control unit **-2-** and lock it until it engages firmly. →373019 Removing and installing transmission control module - section on "Installing"

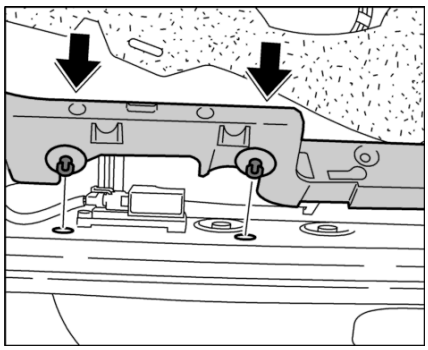


Connecting plug connection for main wire harness to rear wire harness

22. Push plug connection for main wire harness to rear wire harness **-1-** together at left and right.

22.1. Push plug connection for main wire harness to rear wire harness **-1-** together and lock it.

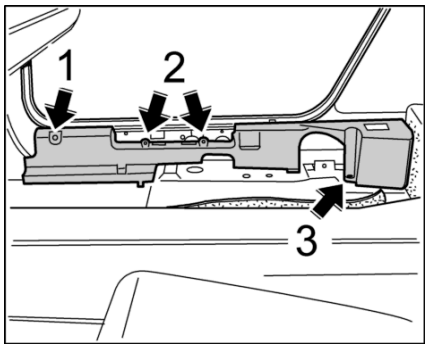
Completing the vehicle



1. Insert insulating elements in the area of the rear wire harness.

Installing mounting saddle for rear-seat backrest

2. Install mounting saddle for rear-seat backrest.



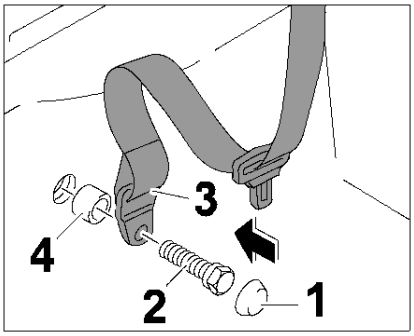
2.1. Position mounting saddle for rear-seat backrest **-2-** and secure with the two fastening screws **-1-** . →**Tightening torque: 10 (7.5 ftlb.) Nm**

Engaging the support

3. Install left and right support.

3.1. Position the support and engage in lower side member.

Securing the support



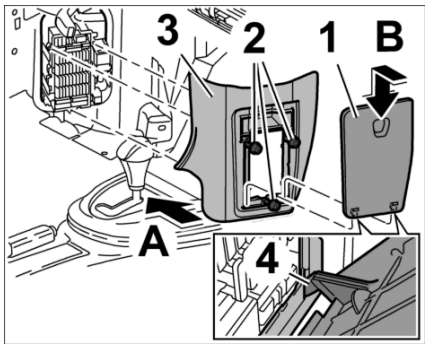
3.2. Push in the locating peg **-1-** of the support and check that it is seated correctly.

3.3. Tighten the fastening nuts **-3-** and fastening screws **-2-** . →**Tightening torque: 7.2 (5.5 ftlb.) Nm**

4. Lay the floor covering over the support and engage.

Note

Ensure that belt strap can run properly!

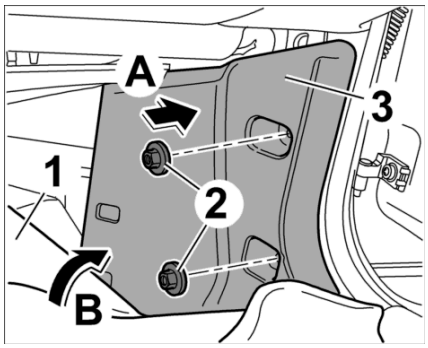


Installing seat belt and fitting

5. Secure seat belt mount at left and right.

5.1. Screw in fastening screw **-2-** , seat belt and fitting **-3-** and spacer sleeve **-4-** on inner lower side member. →**Tightening torque: 50 (37 ftlb.) Nm**

5.2. Press in cap **-1-** .



Installing lateral footwell trim on driver's side

6. Install left footwell trim panel.

6.1. Insert footwell trim panel **-3-** (**-arrow A-**) and screw in the three fastening screws **-2-** . → **Tightening torque: 3 (2 ftlb.) Nm**

6.2. Insert the fuse carrier cover **-1-** with both clips **-4-** into the lateral footwell trim panel **-2-** and clip in **-arrow B-** .

Installing lateral footwell trim on passenger's side

7. Install right footwell trim panel.

7.1. Position footwell trim panel **-3-** (**-arrow A-**) and screw down with both plastic nuts **-2-** .

7.2. Secure floor covering **-1-** at the bottom in the area of the A-pillar **-arrow B-** .**Use double-sided adhesive tape or suitable adhesive**.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

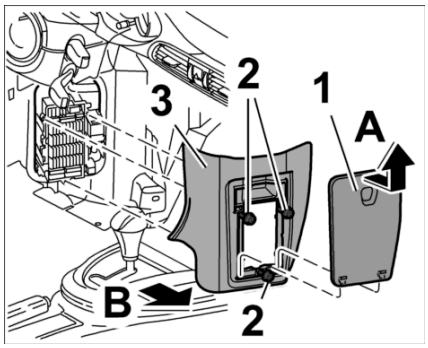
Removing wiring harness for door

Removing lateral footwell trim on driver's side

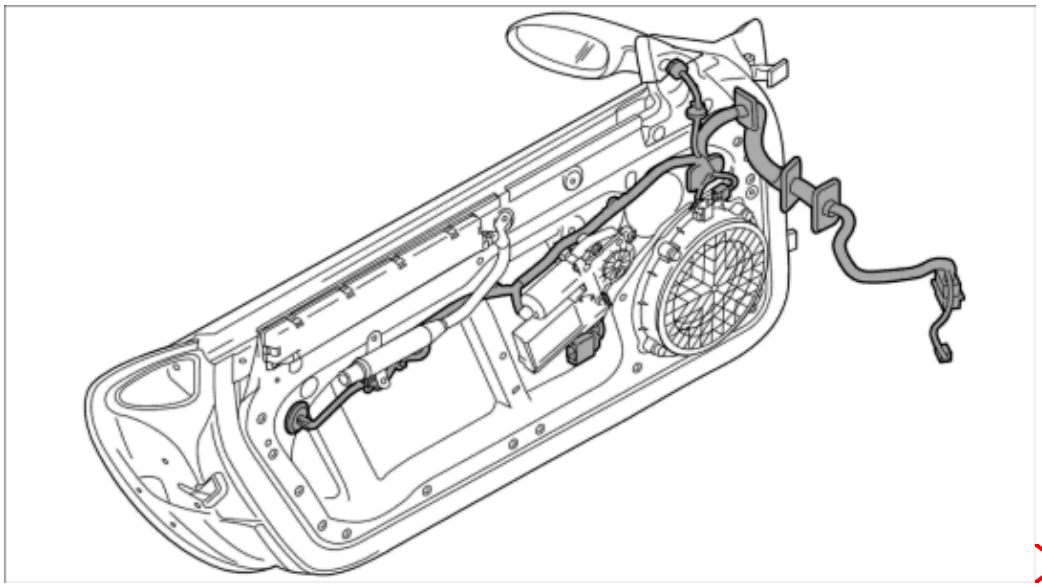


Installation Location:

Overview of wire harness for door

Note

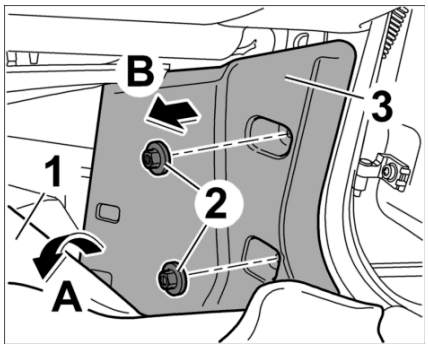
Work is only necessary for removing or installing the wire harness for the driver's door.



Removing lateral footwell trim on driver's side

1. Remove fuse carrier cover **-1-** **-arrow A-** .
2. Unscrew the three fastening screws **-2-** and take off the footwell trim panel **-3-** **-arrow B-** .

Removing lateral footwell trim on passenger's side

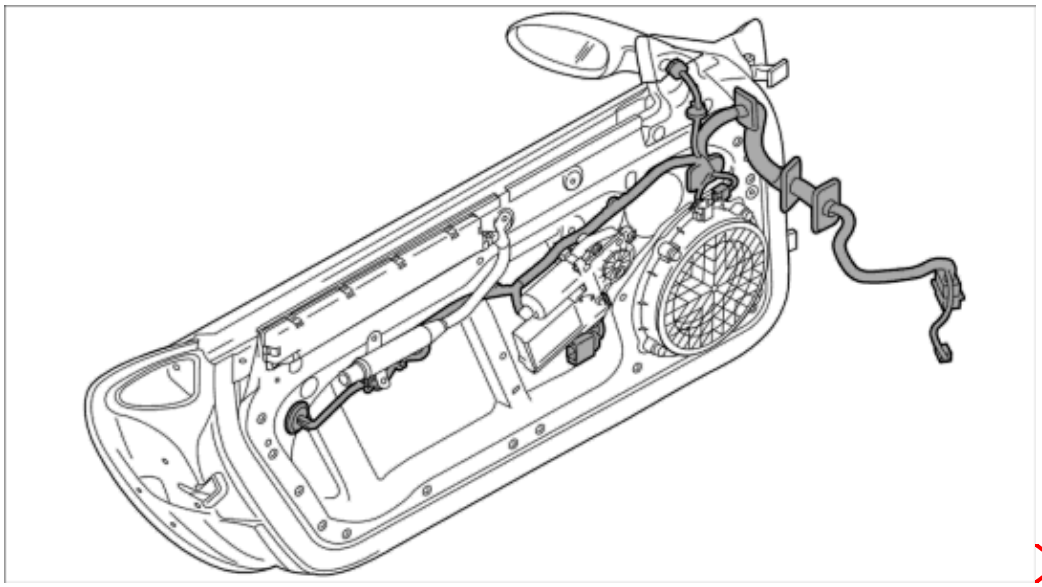


Installation Location:

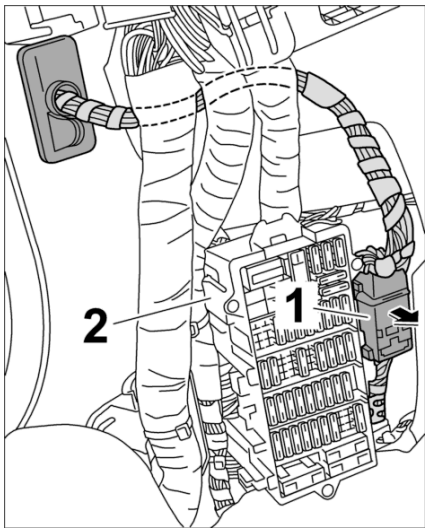
Overview of wire harness for door

Note

Work is only necessary for removing or installing the wire harness for the passenger's door.



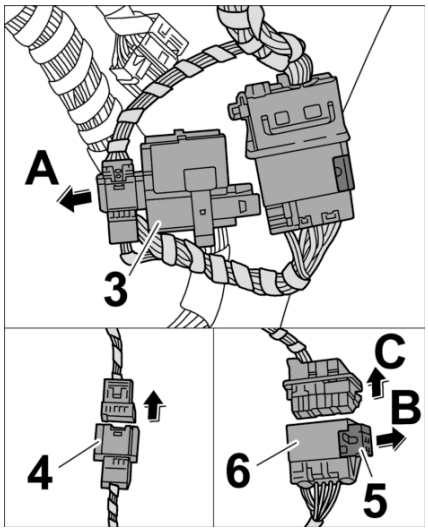
Removing lateral footwell trim on passenger's side



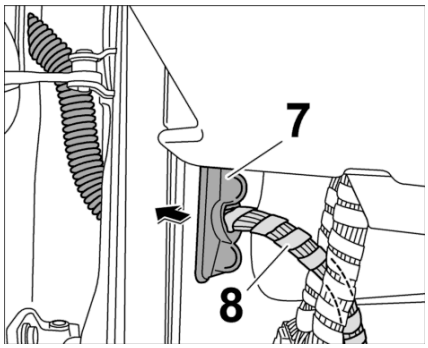
1. Partly loosen carpet **-1-** at the bottom in the area of the A-pillar **-arrow A-** .
2. Unscrew both plastic nuts **-2-** and take off the footwell trim panel **-3-** **-arrow B-** .

Disconnect wire harness for door (driver's side) at the A-pillar

Installation Location:



Overview of wiring harness for door

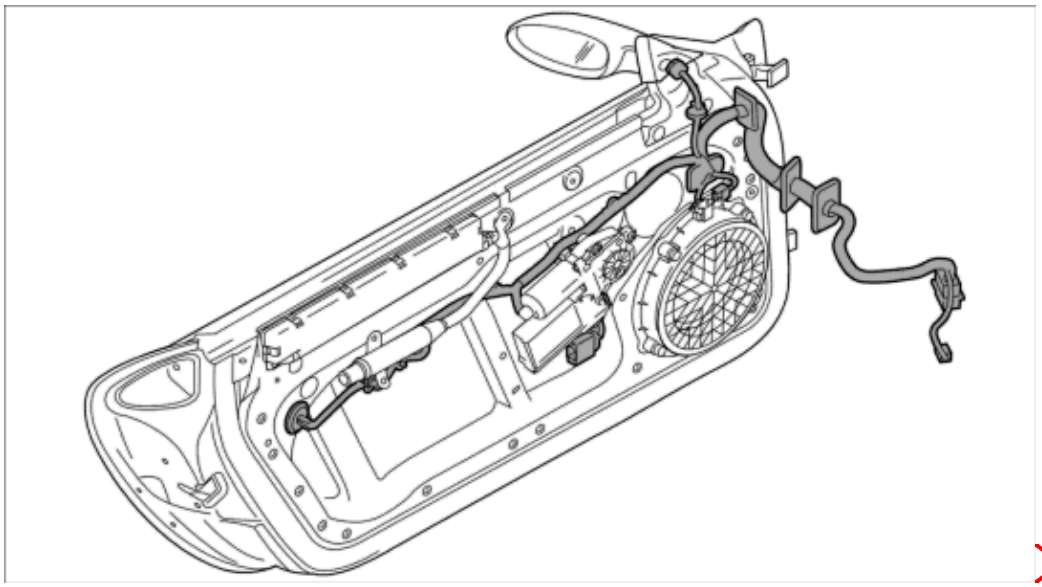


Unclipping plug connection

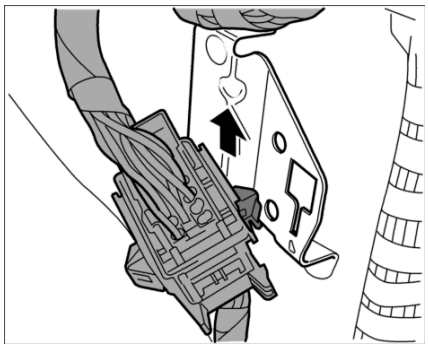
1. Unclip wire harness plug connection for door **-1-** at the fuse carrier **-2-** .

Disconnecting plug connection

2. Release locking mechanism **-5-** on the wire harness plug connection for door **-6-** **-arrow B-** and disconnect **-arrow C-** .



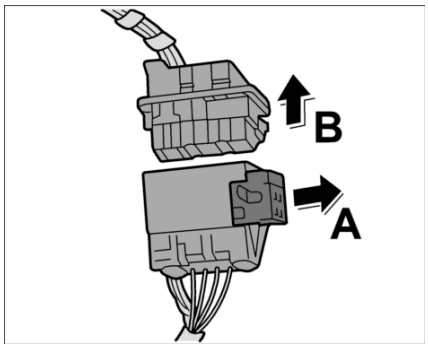
Removing rubber sleeve



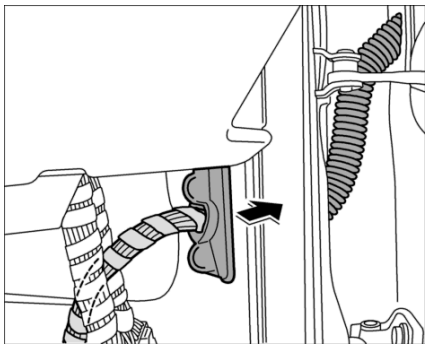
3. Remove rubber sleeve **-7-** and pull out together with the wire harness for door **-8-** from the A-pillar.

Disconnect wire harness for door (passenger's side) at the A-pillar

Installation Location:



Overview of wiring harness for door

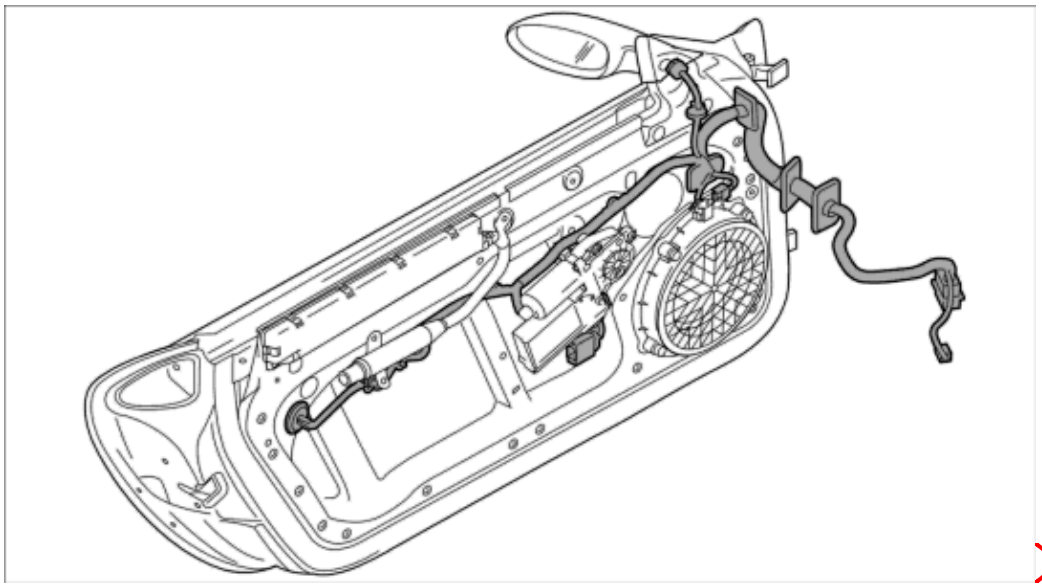


Disengaging wire harness plug connection for door to the body

1. Disengage wire harness plug connection for door to the body.

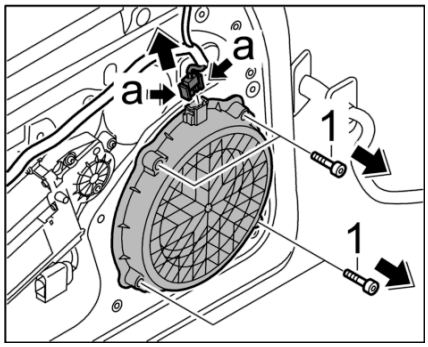
Disconnecting wire harness plug connection for door

2. Release locking mechanism on the wire harness plug connection for door **-arrow A-** and disconnect wire harness plug connection for door **-arrow B-** .



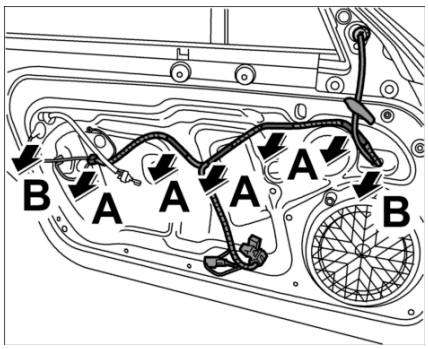
Removing rubber sleeve

3. Remove rubber sleeve and pull out together with the wire harness for door from the A-pillar.



Removing wiring harness for door

Installation Location:

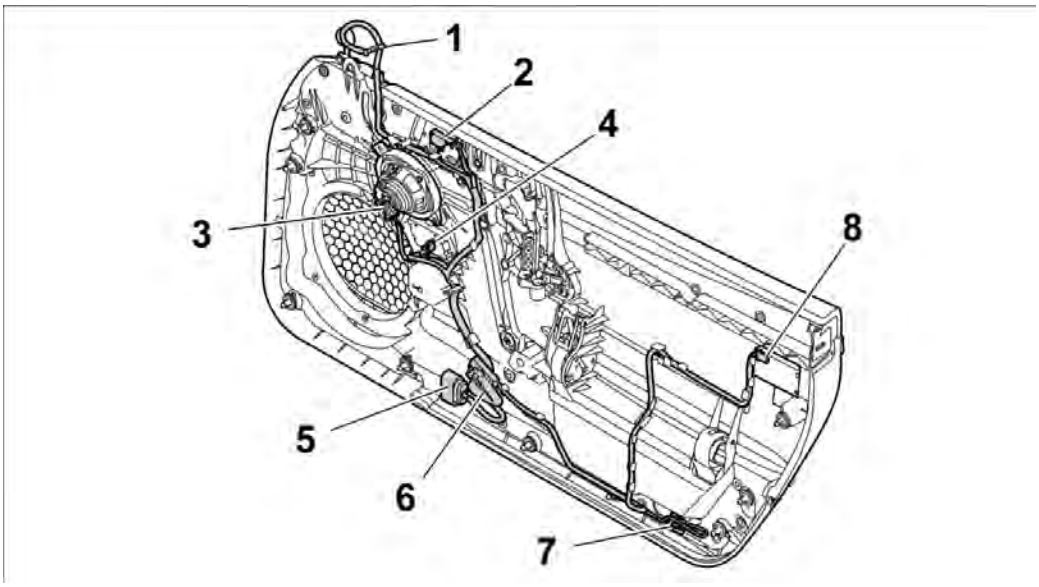


Overview of wiring harness for door

1. Remove door sub-frame. →573019 Removing and installing door sub-frame - chapter on "removing"

Bass speaker

2. Release connector on woofer **-arrows a-** and pull off.

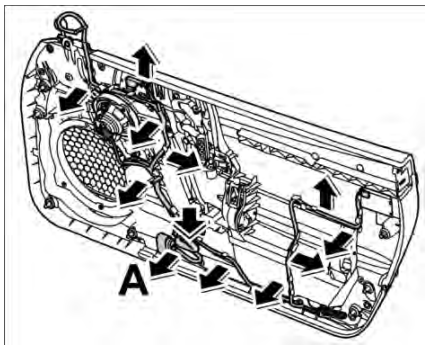


Removing wiring harness for door

3. Unclip wire harness for door to the five retaining clips **-arrows A-** . Remove both rubber sleeves **-arrow B-** and take off wire harness for door.

Removing wiring harness for door trim panel

Installation Location:



Overview of wiring harness for door trim panel

1 - Mirror adjustment switch connector
2 - Overview of switch connector for power windows
3 - Midrange loudspeaker connector
4 - Switch connector for memory seat adjustment
5 - Wire harness plug connection for door trim panel to door wire harness

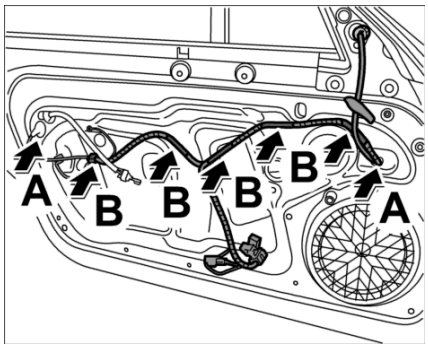
Installing wiring harness for door

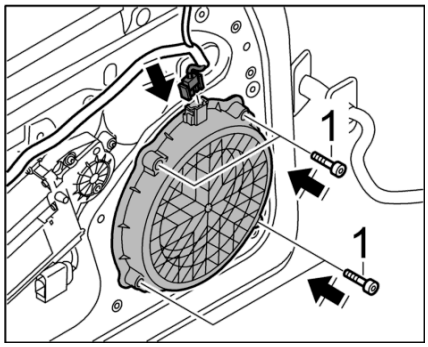
Installing wiring harness for door



Note

The wire harness for door spare parts scope means the scope for fully-equipped vehicles. Depending on the vehicle equipment, connectors not required are tied to the wire harness for door using tie-wraps.
When doing this, ensure the lines are routed correctly so that no line becomes trapped or damaged.

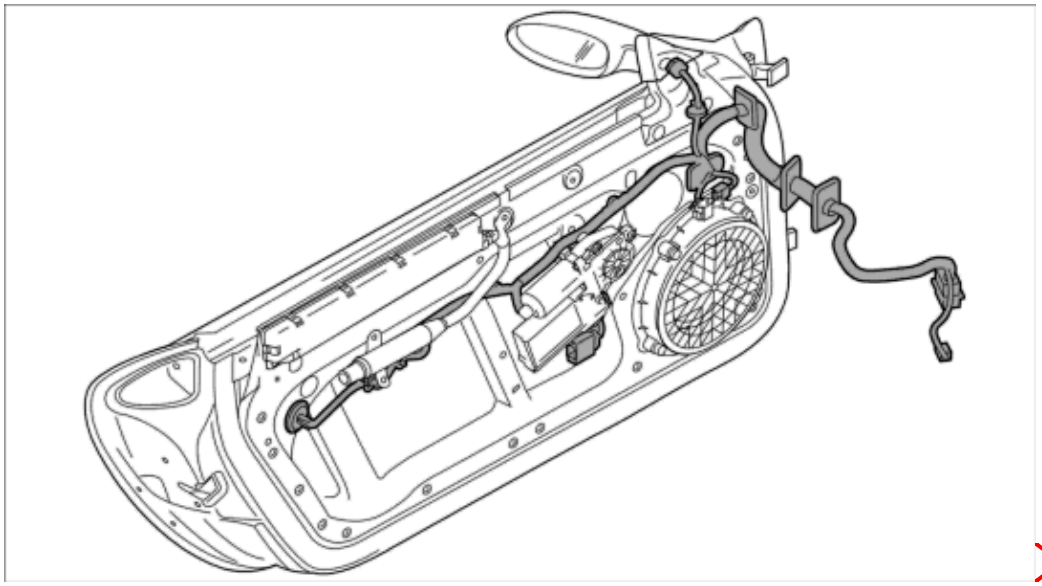
Installation Location:



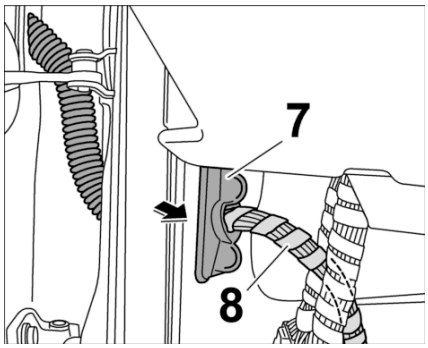
Overview of wiring harness for door

Installing wiring harness for door

1. Route wire harness for door. Fit both rubber sleeves **-Arrows A-** and clip in the wire harness for door with five retaining clips **-Arrows B-** .



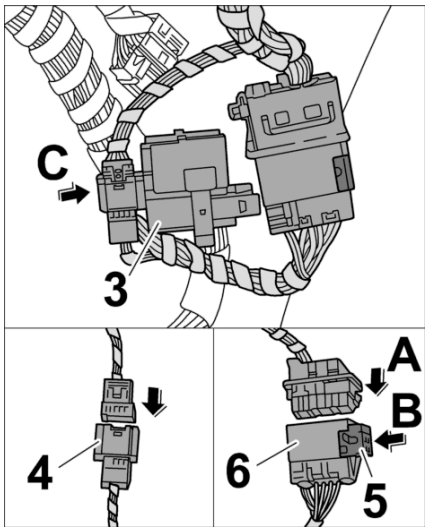
Bass speaker



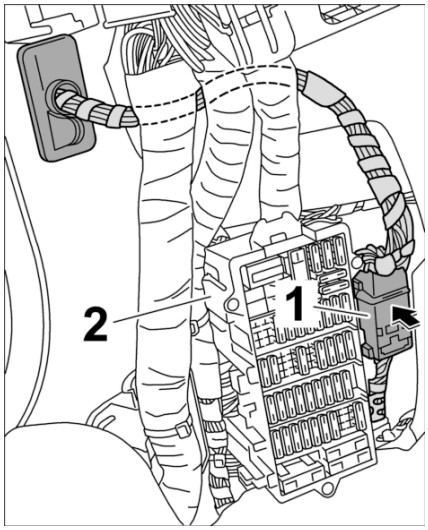
2. Connect connector on woofer until connector is felt to engage.
3. Install door sub-frame. →573019 Removing and installing door sub-frame - chapter on "installing"

Locking wire harness for door (driver's side) at the A-pillar

Installation Location:



Overview of wiring harness for door

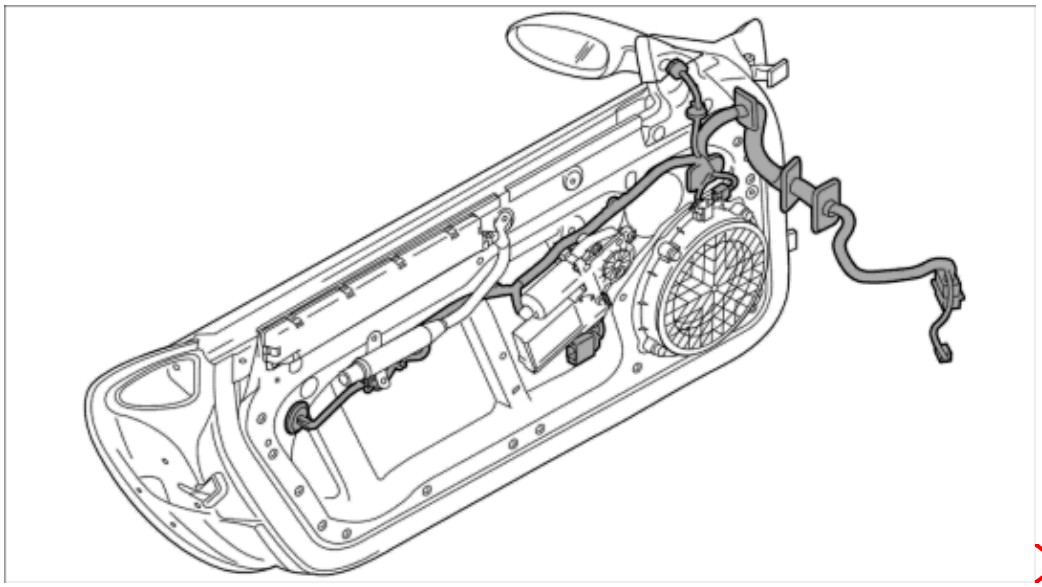


Installing rubber sleeve

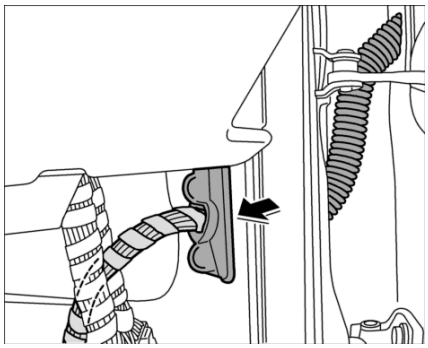
1. Push wire harness for door **-8-** through the A-pillar and mount rubber sleeve **-8-** .

Connecting plug connection

2. Push together wire harness plug connection for door **-6-** **-arrow A-** and lock **-arrow B-**



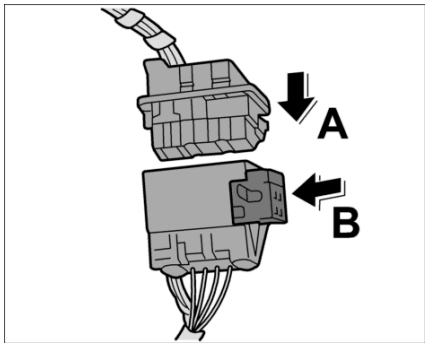
Clipping in the plug connection



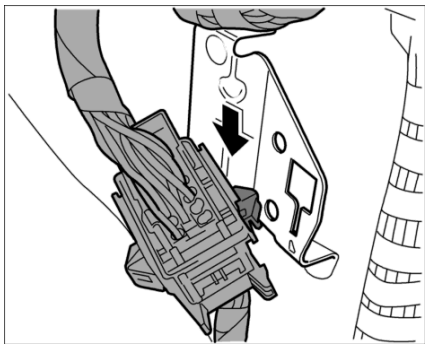
3. Unclip wire harness plug connection for door **-1-** at the fuse carrier **-2-** .

Locking wire harness for door (passenger's side) at the A-pillar

Installation Location:



Overview of wiring harness for door

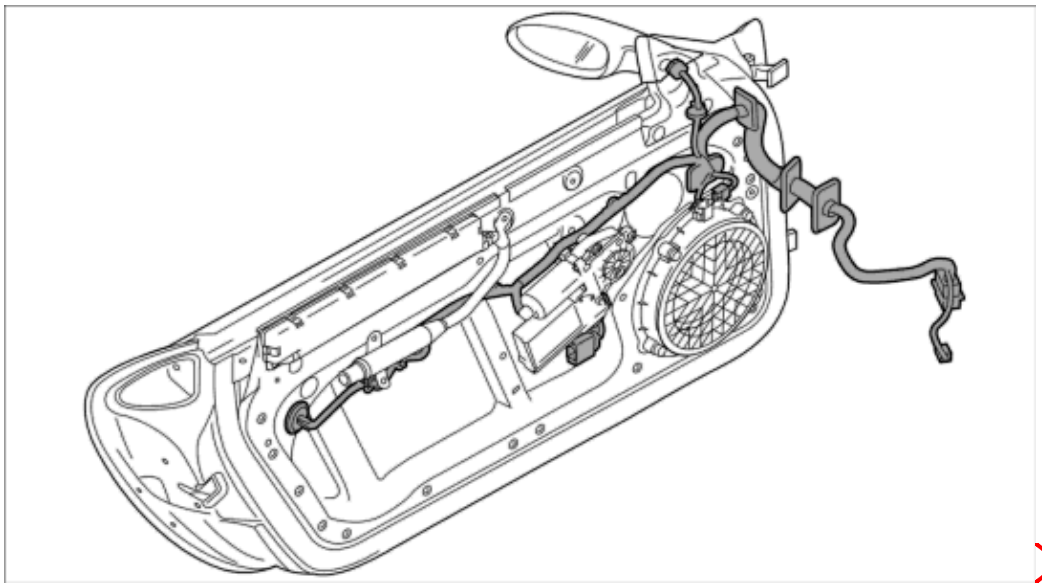


Fitting rubber sleeve

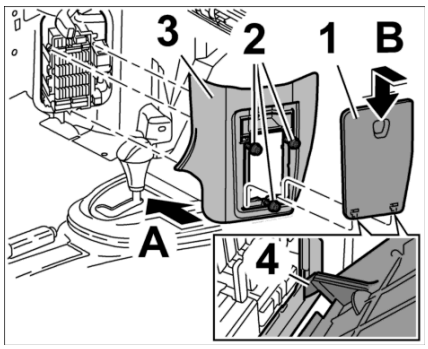
1. Push wire harness for door through the A-pillar and mount rubber sleeve.

Connecting wire harness plug connection for door

2. Push together wire harness plug connection for door **-arrow A-** and lock **-arrow B-** .



Engaging wire harness plug connection for door to the body

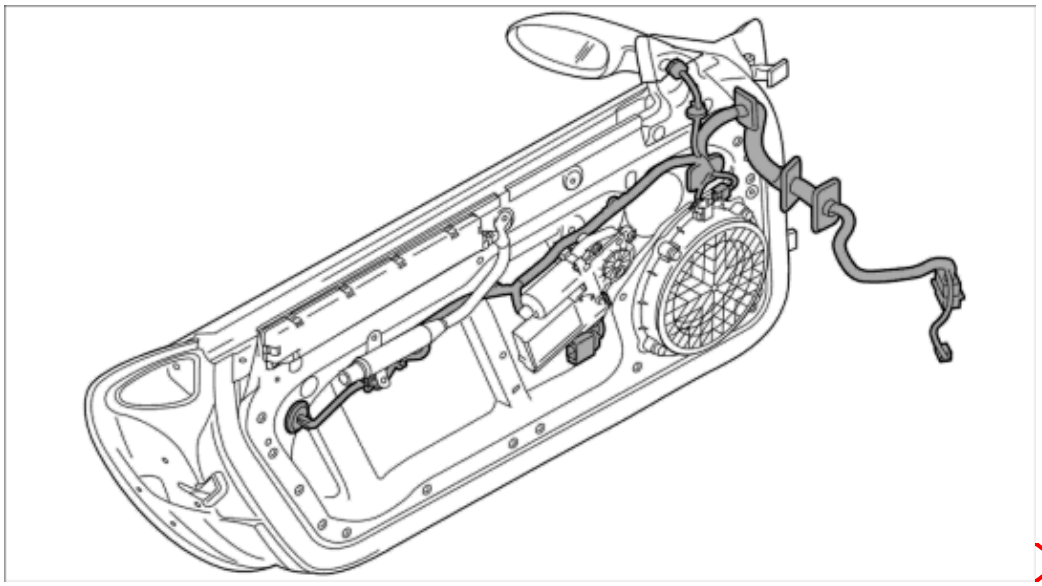


3. Engage wire harness plug connection for door to the body.

Installing lateral footwell trim on driver's side

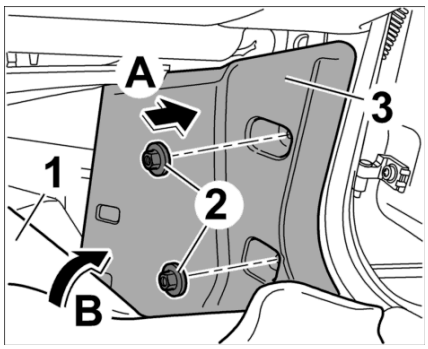
Installation Location:

Overview of wiring harness for door



Installing lateral footwell trim on driver's side

1. Insert footwell trim panel **-3-** **-arrow A-** and screw down with the three fastening screws **-2-** . → **Tightening torque: 2 ftlb.**



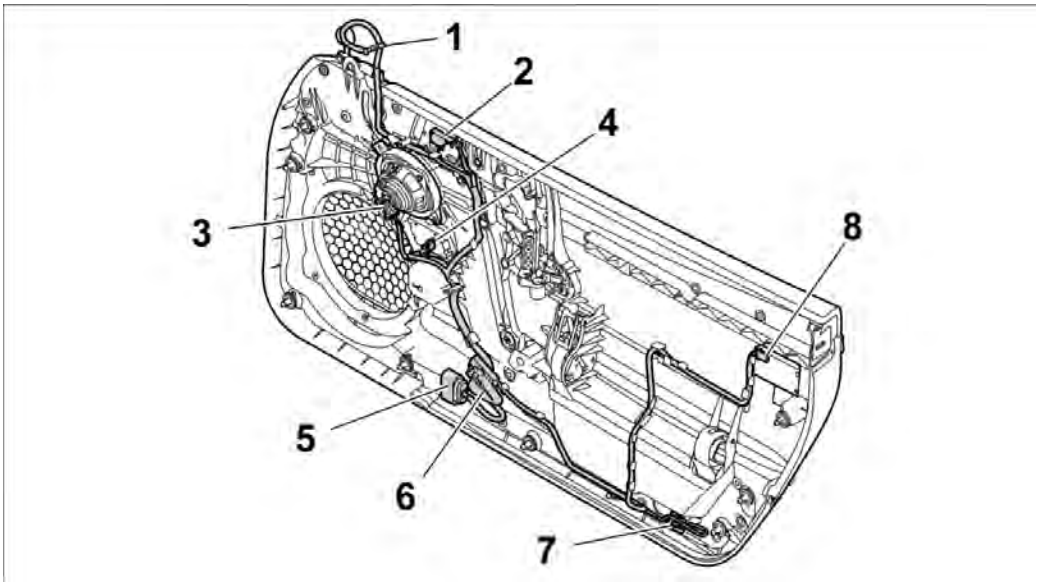
2. Insert the fuse carrier cover **-1-** with both clips **-4-** into the lateral footwell trim panel **-2-** and clip in **-arrow B-** .

Installing lateral footwell trim on passenger's side

Installation Location:

Overview of wiring harness for door

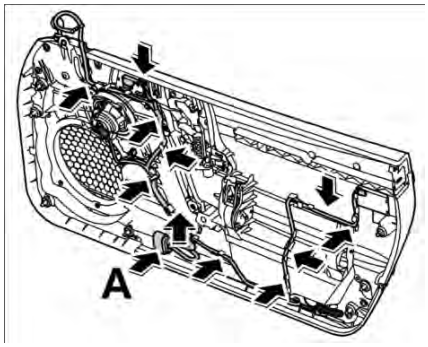
Installing lateral footwell trim on passenger's side



1. Position footwell trim panel **-3-** **-arrow A-** and screw down with both plastic nuts **-2-** .
2. Fasten carpet **-1-** at the bottom in the area of the A-pillar **-arrow B-** **Double-sided adhesive tape or suitable adhesive**.

Installing wiring harness for door trim panel

Note



The wire harness for door trim panel spare parts scope means the scope for fully-equipped vehicles.
Depending on the vehicle equipment, connectors not required are tied to the wire harness for door trim panel using tie-wraps.
When doing this, ensure the lines are routed correctly so that no line becomes trapped or damaged.

Installation Location:

Overview of wiring harness for door trim panel

1 - Mirror adjustment switch connector
2 - Overview of switch connector for power windows
3 - Midrange loudspeaker connector
4 - Switch connector for memory seat adjustment
5 - Wire harness plug connection for door trim panel to door wire harness
6 - Door control module connector
7 - Door warning light connector

Installing wiring harness for door trim panel

1. Insert wire harness in **-direction of arrow-** in the clips of the door trim panel.
2. Clip connector of wire harness plug connection for door trim panel to door wire harness in the door trim panel **-arrow A-** .

3. Push connector on to door warning light **-7-** . →961619 Removing and installing door warning light - chapter on "Installing"
4. Attach connector to switch for memory seat adjustment **-4-** until it engages firmly. →729419 Removing and installing switch for memory seat adjustment - chapter on "Installing"
5. Push connector on midrange loudspeaker **-3-** until it is felt to engage. →914119 Removing and installing loudspeakers for front doors - chapter on "Installing"
6. Push on connector to switch for power windows **-2-** until it is felt to engage. →645819 Removing and installing switch for power windows - chapter on "Installing"

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der**

Zusammenhang von Text und zugehörigem Bild verloren geht.
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

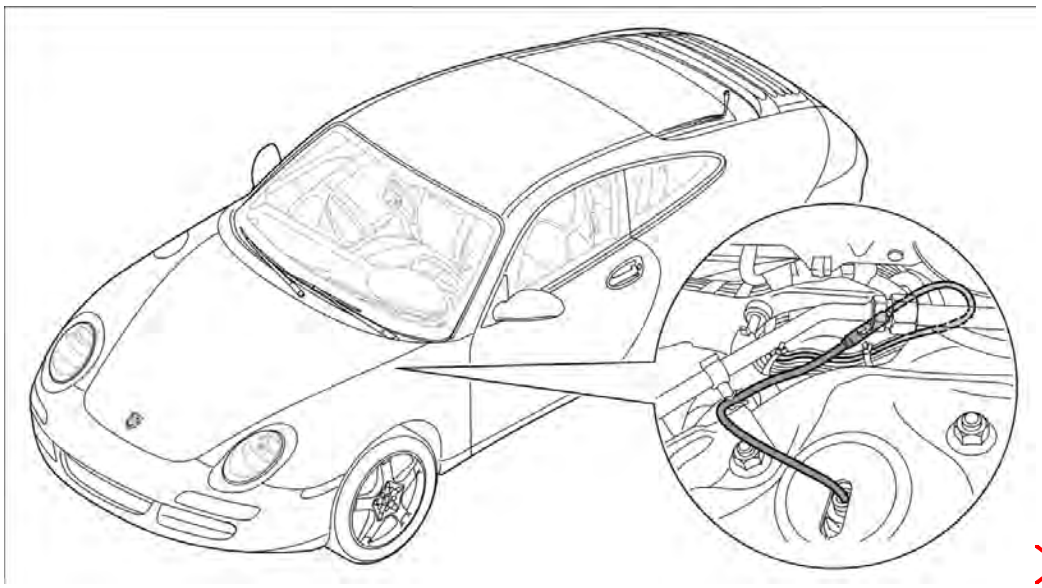
Preliminary work

Preliminary work for wire harness for front PASM

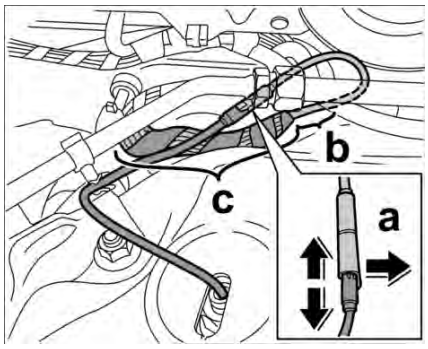
1. Disconnect battery. →2706IN Work instructions after disconnecting the battery
2. Remove plenum panel cover. →852219 Removing and installing cover - section on "Removing"

Preliminary work for wire harness for rear PASM



1. Disconnect battery. →2706IN Work instructions after disconnecting the battery
2. Remove subwoofer for BOSE sound system (I No. 680). →913619 Removing and installing subwoofer - section on "Removing".
3. Lift up and remove carpet lining behind the backrest.

top of page



Removing wire harness for PASM

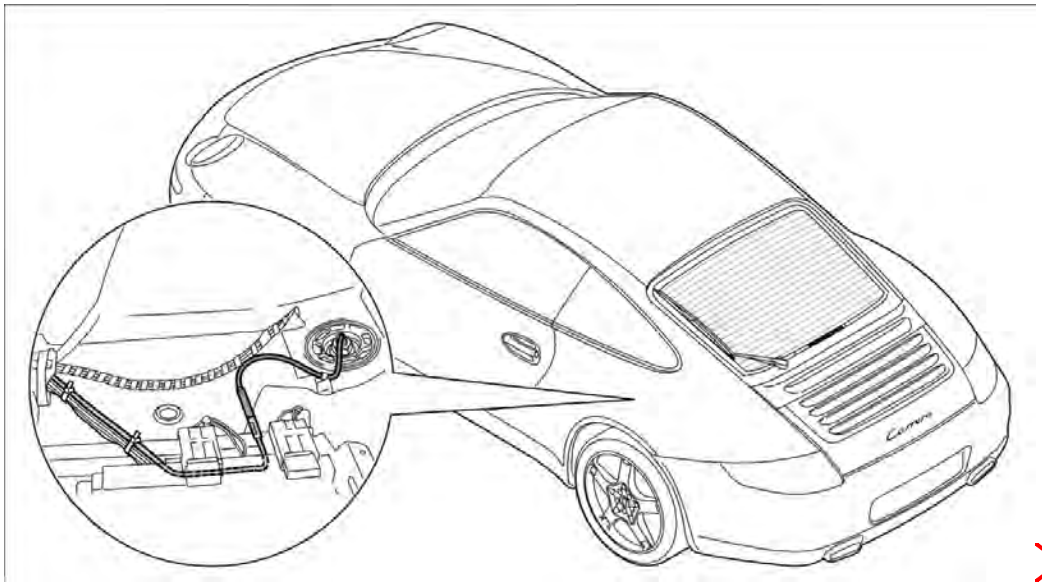
Removing wire harness for front PASM

Installation Location:

Installation position of wire harness for front PASM, shown on the 911

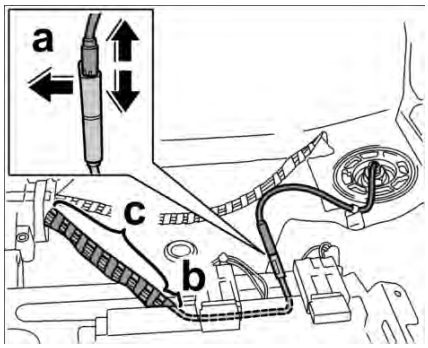
Exposing wire harness for front PASM

1. Unlock PASM plug connection **-Arrow a-** and disconnect it.



Note

When cutting the PASM wire harness, make sure there is enough length of cable left to join to the new lines.



2. Cut wire harness for PASM at **-b-** and remove it.
3. Cut through the fabric tape at **-c-** and expose the remaining PASM wires.

Removing wire harness for rear PASM

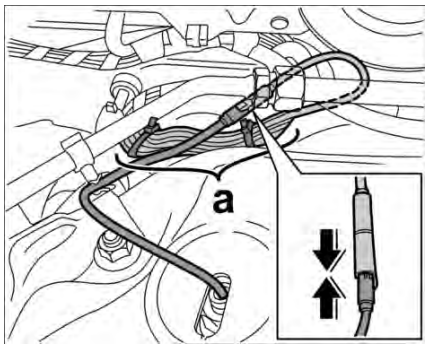
Installation Location:

Installation position of wire harness for rear PASM

Exposing wire harness for rear PASM

1. Unlock PASM plug connection **-Arrow a-** and disconnect it.

Note



When cutting the PASM wire harness, make sure there is enough length of cable left to join to the new lines.

2. Cut wire harness for PASM at **-b-** and remove it.
3. Cut through the fabric tape at **-c-** and expose the remaining PASM wires.

top of page

Installing wire harness for PASM

Installing wire harness for front PASM

Routing and connecting wire harness for rear PASM

1. Press the PASM plug connection together until it clicks into place.

Note

Select a place for the joint where there is enough space to join all the lines present.
Do not cut the lines too short in case they have to be laid in a different position if there is insufficient space in the area of the joint.

Note

The electric lines are located in the plenum panel and are thus exposed to the highest demands.
The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

2. Crimp the lines at
   -a- .

2.1. Cut off lines in different lengths (due to the shrink-fit connections).

2.2. Slide shrink-fit hoses onto the lines.

2.3. Strip 10 mm of insulation off the lines.

2.4. Crimp the lines using crimping sleeves and the **manual crimping pliers** from the **repair kit for wire harnesses NR.155-1**.

2.5. Slide the shrink-fit hoses over the crimp connections and carefully shrink them using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for wire harnesses) so that they are watertight.

2.6. Wrap commercially available PVC tape all around the area of the connection points.

3. Secure the repaired area **-a-** to the main wire harness with tie-wraps.

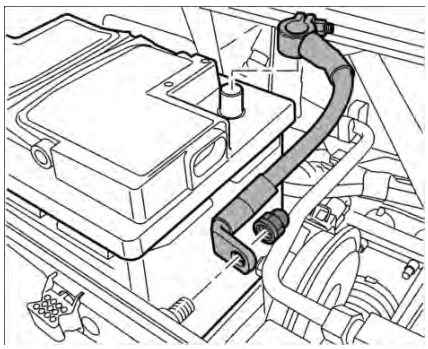
Removing wire harness for battery wiring

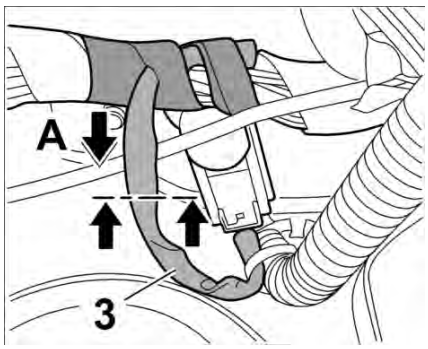
Removing ground strap and B+ line of battery



Installation Location:

Installation position of wire harness for battery wiring

1 - Ground strap for battery



2 - B+ line for battery

Ground strap from battery to body

1. Remove ground strap for battery **-1-** .

1.1. Unscrew fastening nut of battery ground strap to body and remove ground strap for battery.

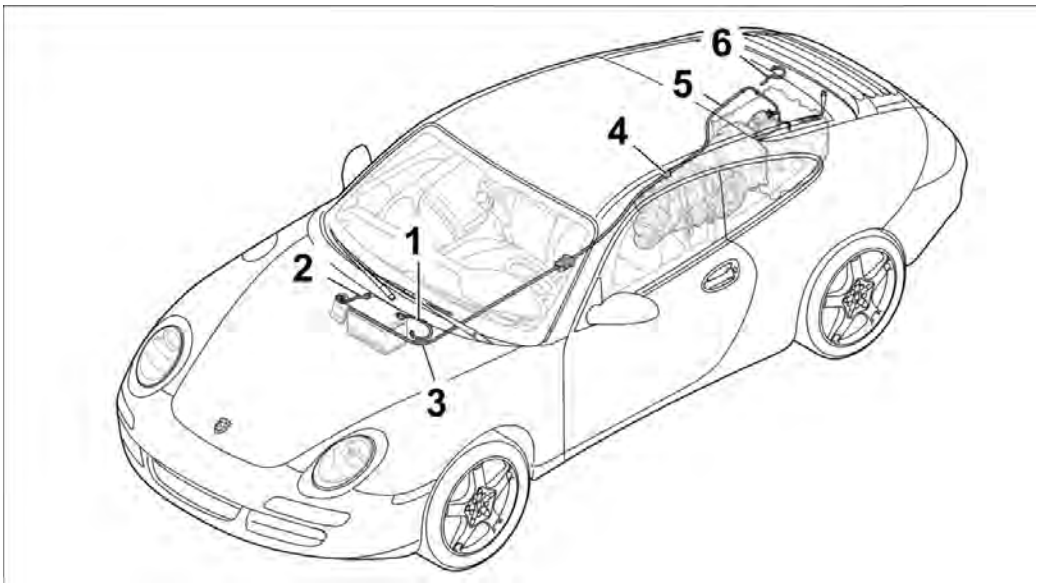
Cut through the positive cable.

2. Remove B+ line for battery **-2-** .

2.1. Cut through the positive cable of main wire harness **-3-** at the place indicated **-arrows-** .

2.2.

Remove binding band from main wire harness until the sheathing of the positive cable **-3-** can be removed **-Arrow A-** .

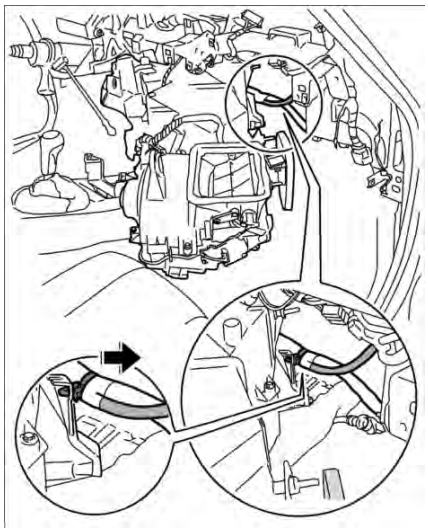


2.3. Unscrew B+ line from battery. →270619 Removing and installing battery - chapter on "Removing"

2.4. Release and pull off B+ line from power distributor →978919 Removing and installing power distributor - chapter on "Removing"

2.5. Remove B+ line for battery.

Remove B+ line from power distributor to transmission connection point

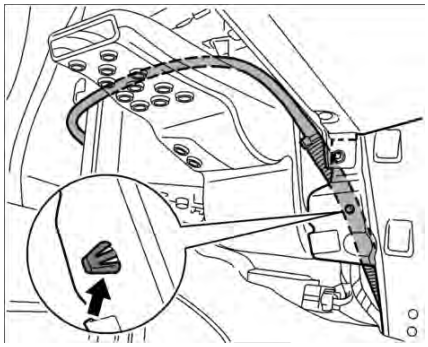


Installation Location:

Installation position of wire harness for battery wiring

3 - B+ line from power distributor to transmission connection point

4 - Connection point of B+ box on transmission

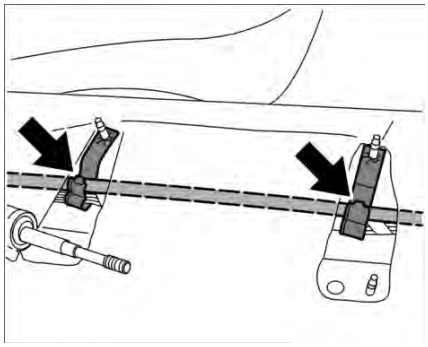


Unclipping B+ line from heater/air-conditioning unit

1. Unclip B+ line **-3-** from heater/air-conditioning unit.

1.1. Unclip B+ line at tie-wrap from heater/air-conditioning unit.

1.2. Disconnect B+ line from main wire harness. To do this, remove the tie-wrap and the binding band.

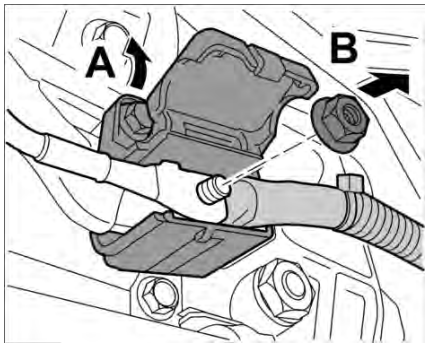


Fastening of B+ line at unit carrier.

2. Unclip B+ line **-3-** at unit carrier.

2.1. Unclip B+ line at retaining clip **-arrow-** from unit carrier.

2.2. Pull B+ line through unit carrier.

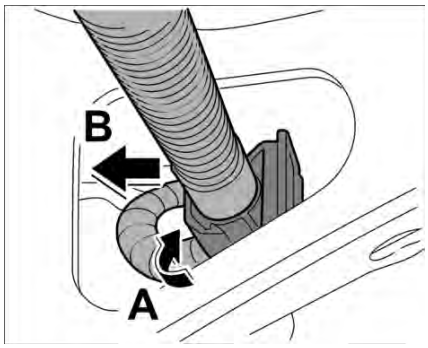


Fastening of B+ line at centre tunnel

3. Loosen B+ lead **-3-** at centre tunnel.

3.1. Pull B+ line out of the two holders **-arrows-** .

3.2. Push B+ line under the carpet away from the direction of travel.



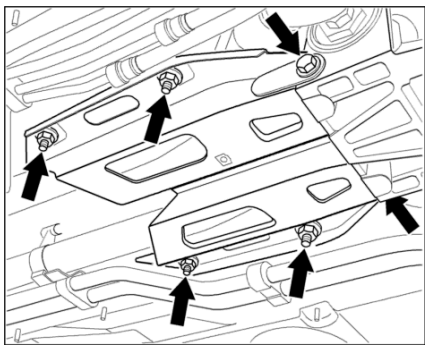
Unscrewing B+ line at box for B+ line

4. Unscrew B+ line **-3-** at box for B+ line.

4.1. Open box for B+ line at transmission **-Arrow A-** , unscrew fastening nut **-Arrow B-** and remove the B+ line.

Note

For vehicles with manual transmission.



Unclipping B+ line from transmission bracket

5. Unclip B+ line **-3-** from transmission bracket.

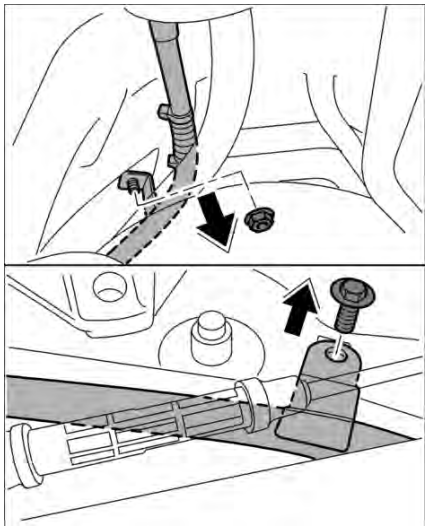
5.1. Open holder **-Arrow A-** and remove B+ line **-Arrow B-** .

Note

For vehicles with automatic transmission.

Transmission bracket

6. Remove transmission bracket.

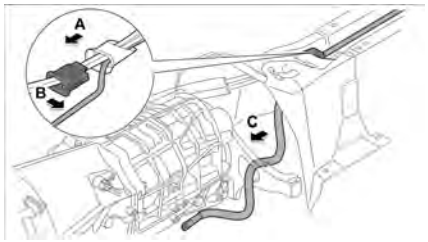


6.1. Support automatic transmission with **transmission jack WE1082**.

6.2. Unscrew the four fastening screws and the two fastening nuts.

6.3. Remove transmission bracket.

Note



For vehicles with automatic transmission.

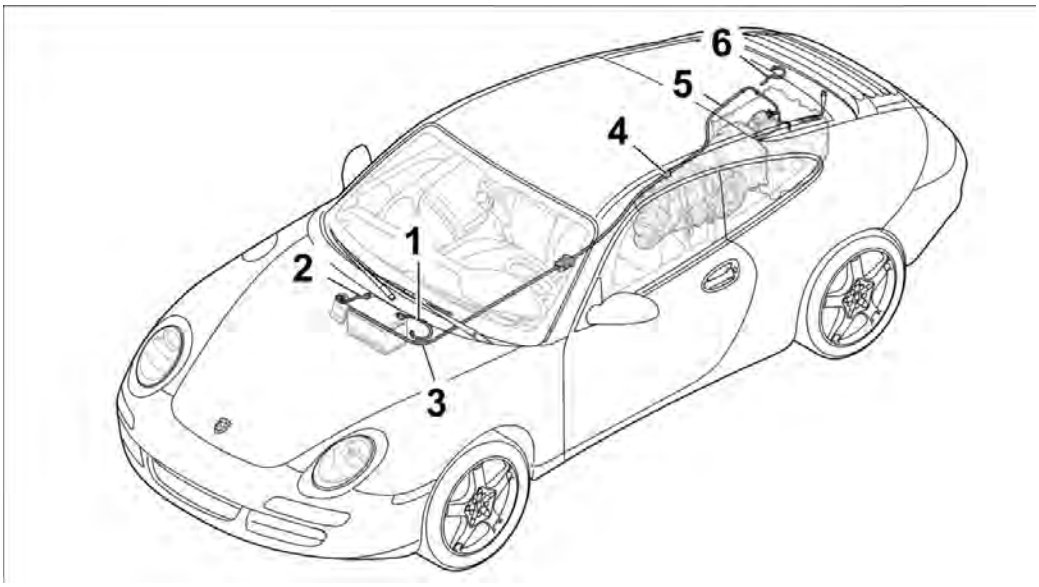
Unscrewing guide tube of B+ line

7. Unscrew guide tube of B+ line **-3-** from body.

7.1. Unscrew fastening screw and fastening nut on guide tube of B+ line.

Removing B+ line

8. Remove B+ line **-3-** .



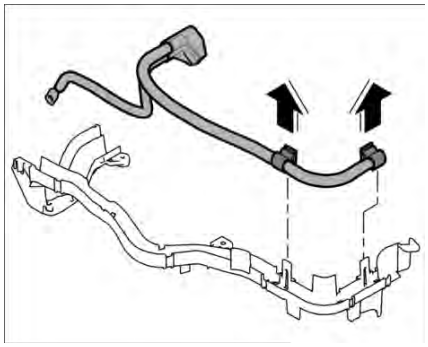
8.1. Remove grommet **-Arrow A-** .

8.2. Remove B+ line from grommet **-Arrow B-** .

8.3. Pull B+ line out of the vehicle interior and remove **-Arrow C-** .

Removing B+ line from starter to transmission connection point

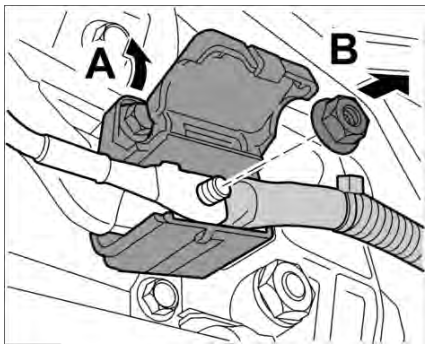
Installation Location:



Installation position of wire harness for battery wiring

4 - Connection point of B+ box on transmission

5 - B+ line from starter to transmission connection point



1. Screw off fastening nut on starter lead at terminal 30 and remove it. →276019 Removing and installing starter - chapter on "Removing"

Unclipping B+ line to starter at cable duct

2. Unclip B+ line **-5-** at cable duct for engine wire harness.

2.1. Unclip B+ line at cable duct **-arrows-** .

Unscrewing B+ line at box for B+ line

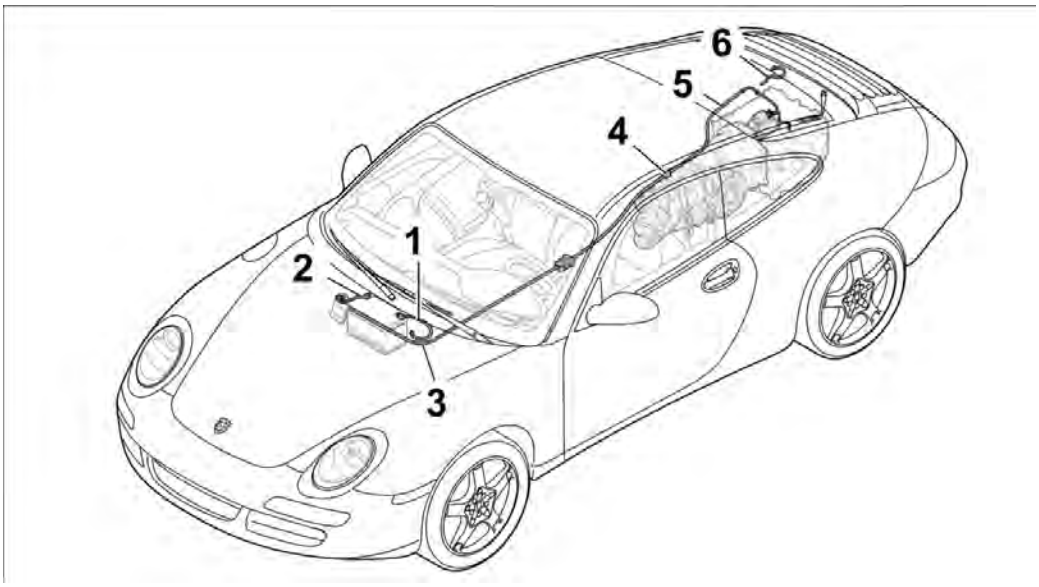
3. Unscrew B+ line **-5-** at box for B+ line **-4-** .

3.1. Open box for B+ line at transmission **-Arrow A-** , unscrew fastening nut **-Arrow B-** and remove the B+ line.

Note

For vehicles with manual transmission.

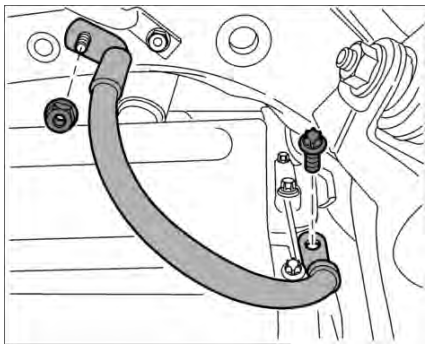
4. Remove cable duct of B+ line **-5-** at manual transmission. →343519 Removing and installing transmission - chapter on "Removing" [997410 997411 997430 997431 997610 997611 997620 997621]→343519 Removing and installing transmission - chapter on "Removing" [997110 997111 997120 997121 997310 997311 997320 997321]



Note

For vehicles with automatic transmission.

5. Remove cable duct of B+ line **-5-** at automatic transmission. →373527 Removing and mounting automatic transmission - chapter on "Mounting" [997110 997111 997120 997121 997310 997311 997320 997321] →*373527 27 Removing and mounting automatic transmission - chapter on "Mounting" [997410 997411 997430 997431 997610 997611 997620 997621]*
6. Remove B+ line **-5-** .



Removing engine ground strap

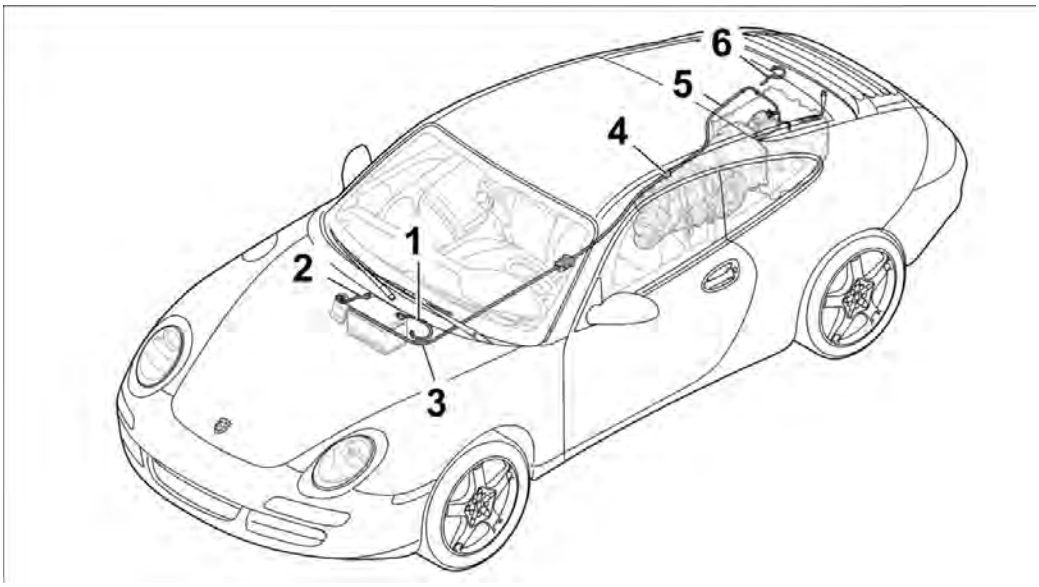
Installation Location:

Installation position of wire harness for battery wiring

6 - Engine ground strap

Fastening engine ground strap

1. Remove engine ground strap **-6-** .

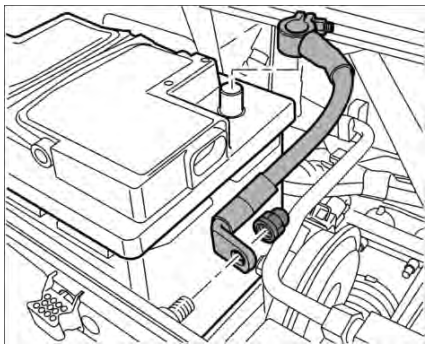


1.1. Unscrew fastening screws on engine, fastening nut on body, and remove ground strap.

top of page

Installing wire harness for battery wiring

Installing ground strap and B+ line of battery



Installation Location:

Installation position of wire harness for battery wiring

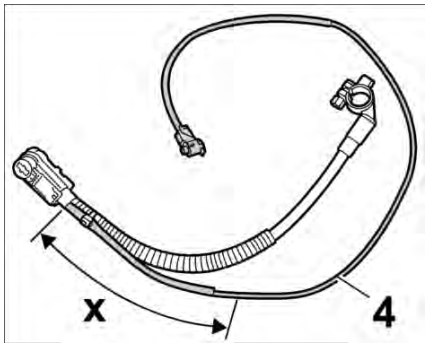
1 - Ground strap for battery

2 - B+ lead for battery

Ground strap from battery to body

1. Install ground strap for battery **-1-** .

1.1. Screw down battery ground strap on the body with the fastening nut. →**Tightening torque: 5 (3.5 ftlb.) Nm**

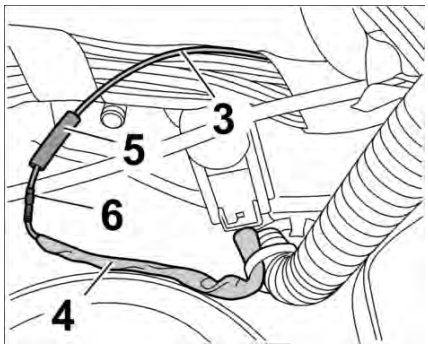


2. Install B+ line for battery **-2-** .

2.1. Push the B+ line of the battery onto the mounting point at the power distributor as far as the stop. Check that the B+ line sits firmly. →978919 Removing and installing power distributor - chapter on "Installing"

2.2. Screw B+ line tightly to battery. →**Tightening torque: 5 (3.5 ftlb.) Nm** →270619 Removing and installing battery - chapter on "Removing"

Note



The electric lines are located in the plenum panel and are thus exposed to the highest demands.
The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

Trimming the positive cable.

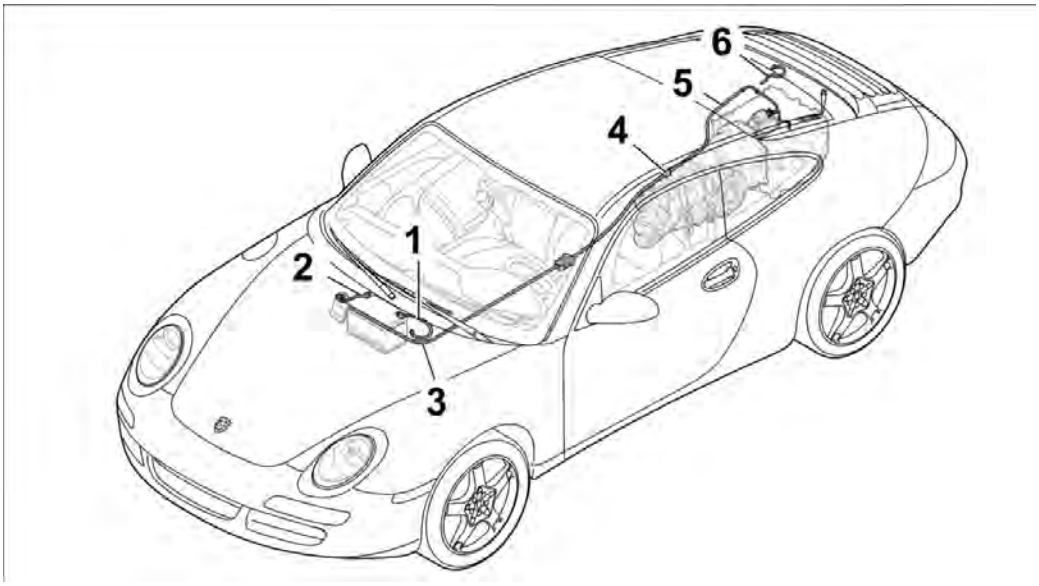
3. Crimp the positive cable.

3.1. Trim the new positive cable **-4-** to the **-dimension X = approx. 20 cm-** and strip the insulation.

Crimping the positive cable

3.2. Strip insulation off original positive cable of main wire harness **-3-** and push on the shrink-fit hose **-5-** .

3.3. Crimp crimping sleeve **-6-** using the **hand crimping pliers** from the **repair kit for harnesses NR.155-1** to the positive cable **-3-** .

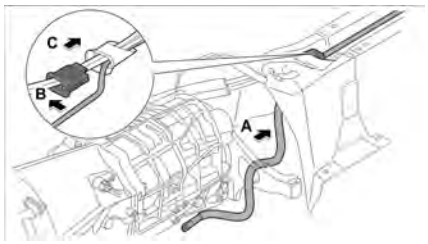


3.4. Crimp crimping sleeve **-6-** using the **hand crimping pliers** from the **repair kit for harnesses NR.155-1** to the new positive cable **-4-** . Check the crimp connection carefully.

3.5. Slide the shrink-fit hose over the crimp connection and carefully shrink it using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for harnesses) so that it is watertight.

3.6. Tie positive cable to the main wire harness with adhesive tape.

Install B+ line from power distributor to transmission connection point



Installation Location:

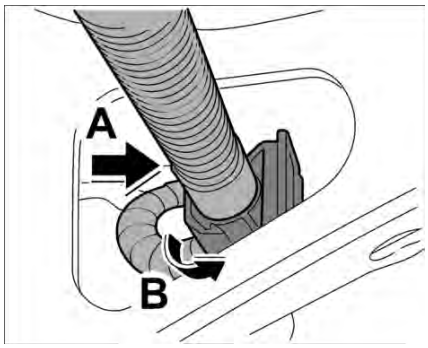
Installation position of wire harness for battery wiring

3 - B+ line from power distributor to transmission connection point

4 - Connection point of B+ box on transmission

Installing B+ line

1. Install B+ line **-3-** .



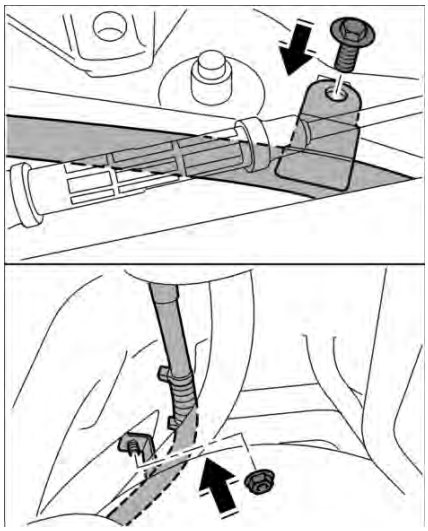
1.1. Lay B+ line to transmission and push into the vehicle interior **-Arrow A-** .

1.2. Press B+ line into the grommet **-Arrow B-** .

1.3. Fit grommet **-Arrow C-** .

Note

For vehicles with manual transmission.



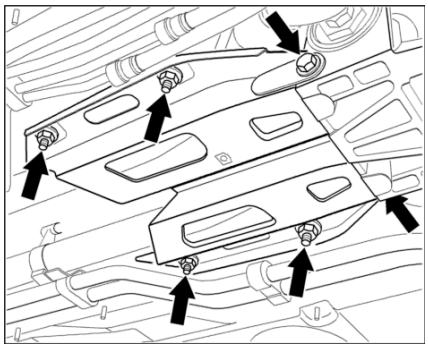
Clip B+ line onto transmission bracket.

2. Clip B+ line **-3-** onto transmission bracket.

2.1. Insert B+ line into holder **-Arrow A-** and close holder **-Arrow B-**

Note

For vehicles with automatic transmission.



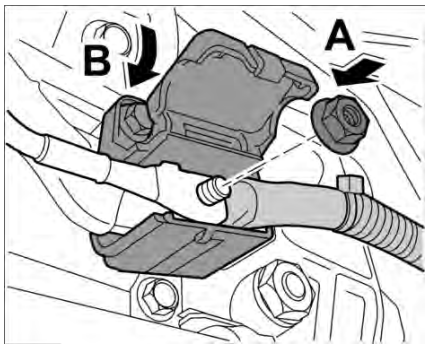
Fastening guide tube of B+ line

3. Screw down guide tube of B+ line **-3-** on the body.

3.1. Position guide tube of B+ line on the body and screw down with fastening screw and fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm** →**Tightening torque: 10 (7.5 ftlb.) Nm**

Note

For vehicles with automatic transmission.

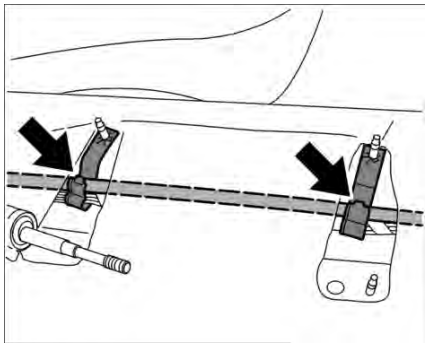


Transmission support

4. Install transmission support.

4.1. Position the transmission support and secure with the four fastening screws and the two fastening nuts. →**Tightening torque: 65 (48 ftlb.) Nm**

4.2. Lower **transmission jack WE1082** and remove from under the vehicle.

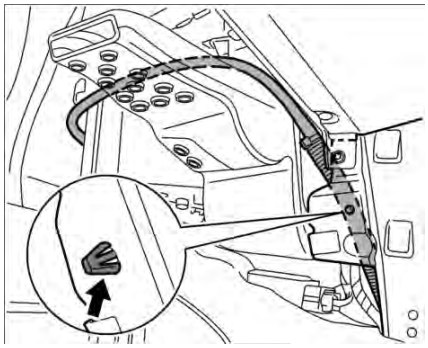


Screw down B+ line at box for B+ line.

5. Screw down B+ line **-3-** at box for B+ line **-4-** .

5.1. Insert B+ line into the box and tighten with the fastening nut **-Arrow A-** . →**Tightening torque: 23 (17 ftlb.) Nm**

5.2. Close box for B+ line on transmission **-Arrow B-** .

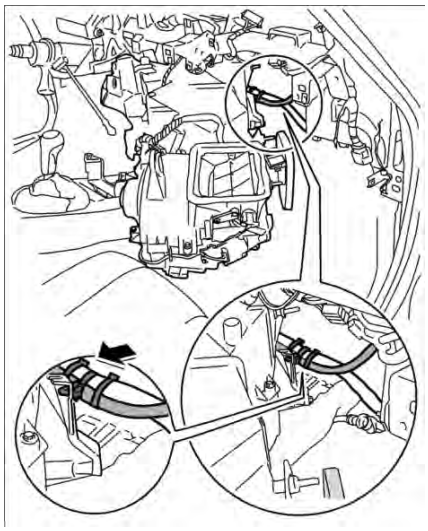


Fastening of B+ line at centre tunnel

6. Fasten B+ lead **-3-** at centre tunnel.

6.1. Push B+ line under the carpet in the direction of travel.

6.2. Insert B+ line into the two holders **-arrows-** .



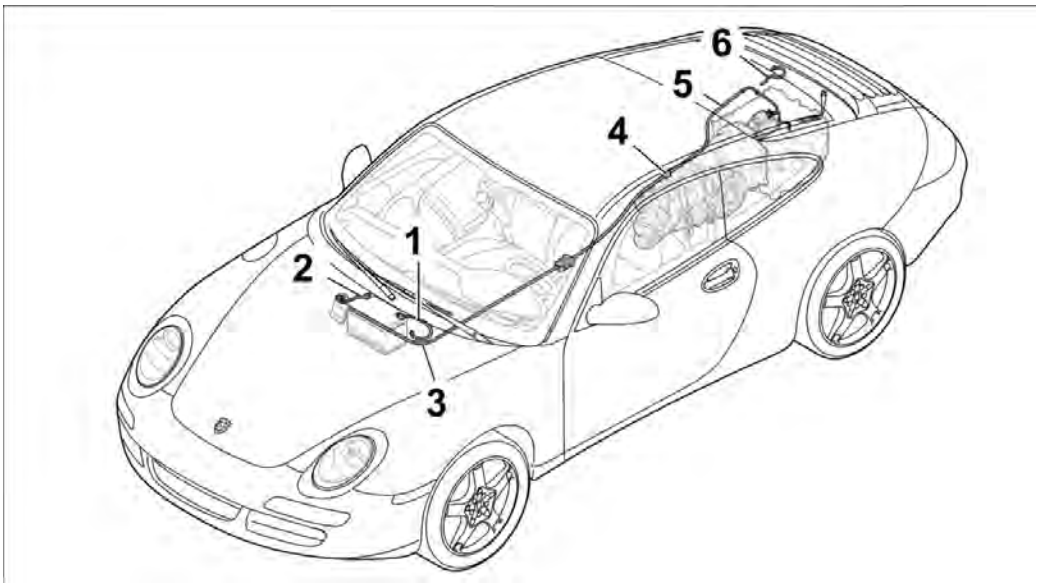
Fastening of B+ line at unit carrier.

7. Clip in B+ line **-3-** at unit carrier.

7.1. Push B+ line through the unit carrier and across the footwell air vent.

7.2. Clip in B+ line **-arrow-** at unit carrier with the retaining clip.

Fastening B+ line at heater/air-conditioning unit



8. Clip in B+ line **-3-** at heater/air-conditioning unit.

8.1. Secure the B+ line to the main wire harness with the two new tie-wraps.

8.2. Clip in B+ line at heater/air-conditioning unit with the tie-wraps.

Installing B+ line from starter to transmission connection point

Installation Location:

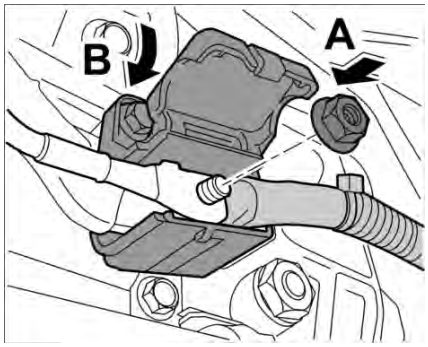
Installation position of wire harness for battery wiring

4 - Connection point of B+ box on transmission

5 - B+ line from starter to transmission connection point

1. Lay B+ line **-5-** .

Note



For vehicles with manual transmission.

2. Install cable duct of B+ line **-5-** at manual transmission. →343519 Removing and installing transmission - chapter on "Installing" [997410 997411 997430 997431 997610 997611 997620 997621]→343519 Removing and installing transmission - chapter on "Installing" [997110 997111 997120 997121 997310 997311 997320 997321]

Note

For vehicles with automatic transmission.

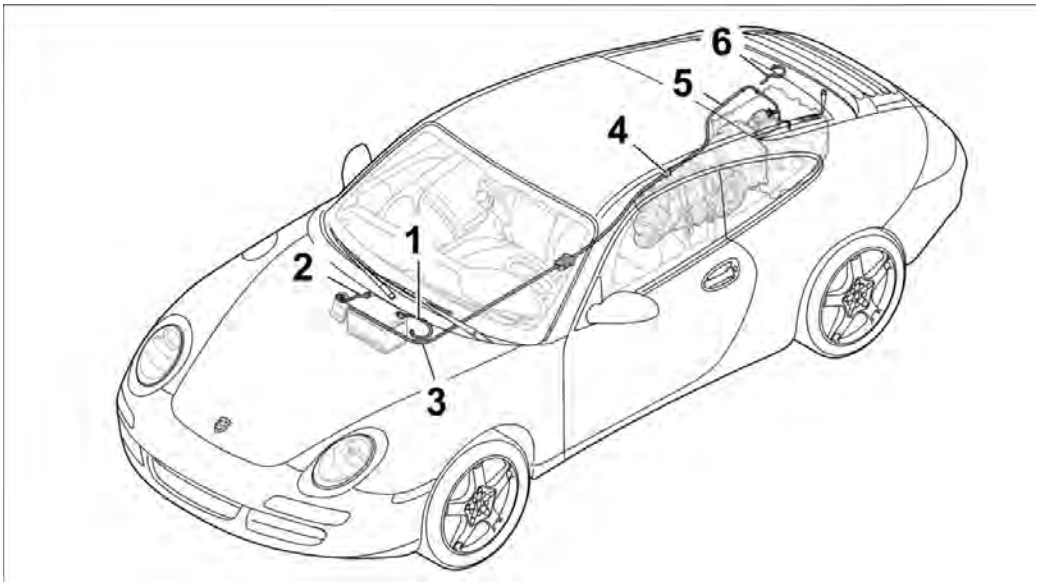
3. Screwing down B+ line at box for B+ line

4. Screw down B+ line **-5-** at box for B+ line **-4-** .

4.1. Insert B+ line into the box and tighten with the fastening nut **-Arrow A-** . →**Tightening torque: 23 (17 ftlb.) Nm**

4.2. Close box for B+ line on transmission **-Arrow B-** .

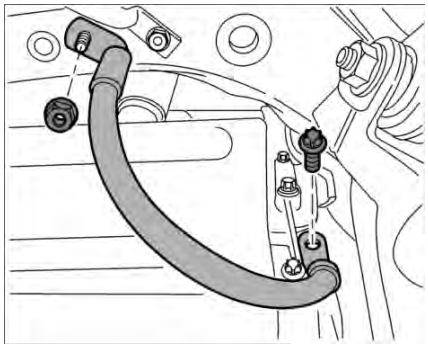
Clipping in starter lead at cable duct



5. Clip in B+ line **-5-** at cable duct for engine wire harness.

5.1. Clip in B+ line at cable duct **-arrows-** .

6. Position starter lead for terminal 30 and secure with fastening nut. →**Tightening torque: 18 (13.0 ftlb.) Nm** →276019 Removing and installing starter - chapter on "Installing"



Fitting ground strap to engine

Installation Location:

Installation position of wire harness for battery wiring

6 - Engine ground strap

Fastening engine ground strap

1. Fit engine ground strap **-6-** .

1.1. Position ground strap and screw down with the fastening screw and fastening nut. →**Tightening torque: 23 (17 ftlb.) Nm** →**Tightening torque: 23 (17 ftlb.) Nm**

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

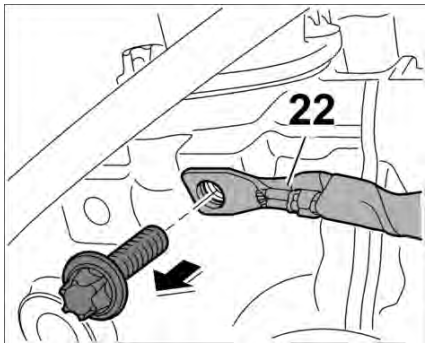
10-12 - Fuel injector plug, cylinder 4 - 6

13 - Camshaft sensor plug, cylinder row 1 - 3

14 - Camshaft sensor plug, cylinder row 4 - 6

15 - Knock sensor connector, cylinder row 1 - 3

16 - Knock sensor connector, cylinder row 4 - 6

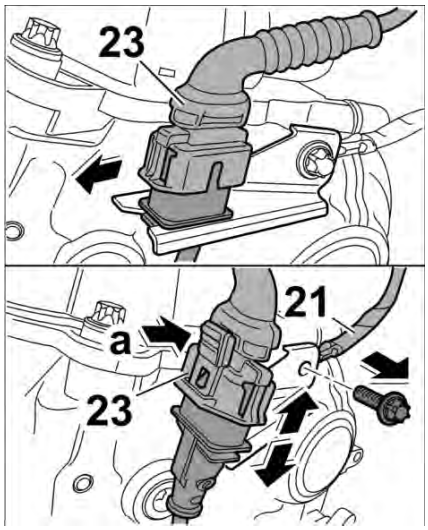


17 - Solenoid hydraulic-valve plug (camshaft timing), cylinder row 1 - 3

18 - Solenoid hydraulic-valve plug (camshaft timing), cylinder row 4 - 6

19 - Solenoid hydraulic-valve plug (valve lift control), cylinder row 1 - 3

20 - Solenoid hydraulic-valve plug (valve lift control), cylinder row 4 - 6
21 - Ground strap
22 - Ground strap
23 - Speed sender
24 - Connector for intake-pipe change-over switch
25 - Secondary air blower plug
26 - Generator plug
27 - Tank vent connector
28 - Throttle valve connector
29A - Oil level sensor connector, M9605
29B - Oil level sensor connector, M9701
30 - Starter lead for terminal 30
31 - Starter lead for terminal 50
32-33 - Pressure sensor plug
34A - Engine-temperature sensor connector, M9605
34B - Engine-temperature sensor connector, M9701
35 - A/C compressor connector
36 - Water-temperature sensor connector
37-38 - Plug connections for engine wire harness to rear wire harness



1. Release plugs on the six ignition coils **-1 to 6-** and pull them off. →287020 Removing and installing spark plug - section on "Removing"
2. Release plugs on the six fuel injectors **-7 to 12-** and pull them off. →244019 Removing and installing fuel injector - section on "Removing"
3. Release connectors on both knock sensors **-15 and 16-** and pull them off. →287219 Removing and installing knock sensor - section on "Removing"
4. Release plugs on both solenoid hydraulic valves (camshaft timing) **-17 and 18-** and pull them off. →153719 Removing and installing solenoid hydraulic valve (camshaft timing) - section on "Removing"
5. Release plugs on both solenoid hydraulic valves (valve lift control) **-19 and 20-** and pull them off. →155519 Removing and installing solenoid hydraulic valve (valve lift control) - section on "Removing"

Unscrewing ground straps on engine

6. Unscrew ground straps **-22-** .

6.1. Unscrew fastening screw and remove ground straps **-22-** .

Disconnecting plug connection on speed sender

7. Disconnect plug connection on speed sender **-23-** and unscrew ground straps **-21-** .

7.1. Pull plug connection **-23-** out of holder.

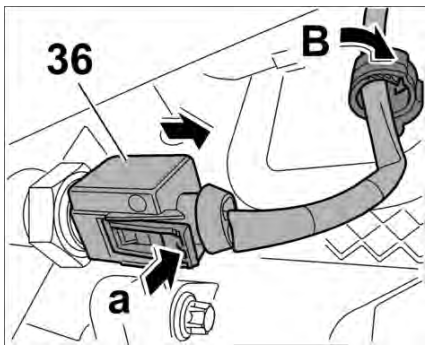
7.2. Release plug connection **-23-** (**-Arrows a-**) and disconnect it.

7.3. Unscrew fastening screw and remove ground straps **-21-** .

8. Release securing clip and pull off connector on intake-pipe change-over switch **-24-** .

9. Release plug on secondary air blower **-25-** and pull it off. →266519 Removing and installing secondary air pump - section on "Removing"

10. Release securing clip and pull off connector on tank vent **-27-** .



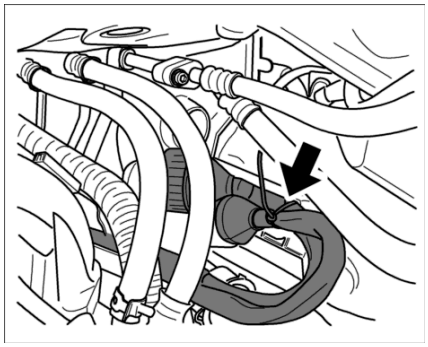
11. Release connector on oil level sensor **-29-** and pull it off.

12. Screw off fastening nut on starter lead for terminal 50 **-31-** and remove it. →276019 Removing and installing starter - section on "Removing"

13. Pull off plugs on pressure sensor **-32 and 33-** .

14. Release connector on engine temperature sensor **-34-** and pull it off.

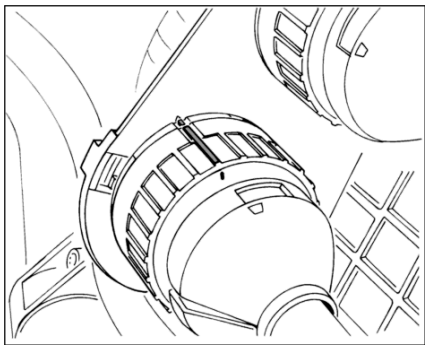
15. Release and disconnect plug connection to compressor **-35-** . →873419 Removing and installing compressor - section on "Removing"



Pulling off connector on water temperature sensor

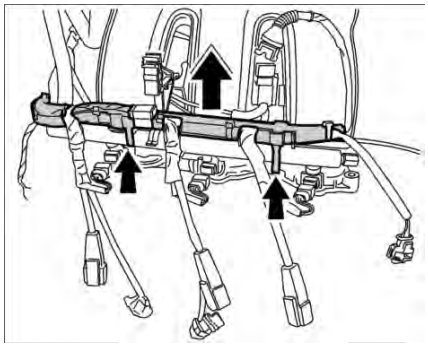
16. Pull off connector on water temperature sensor **-36-** .

16.1. Open holder **-Arrow B-** and remove lead.



16.2. Release connector on water temperature sensor **-36-** (**-Arrow a-**) and pull it off.

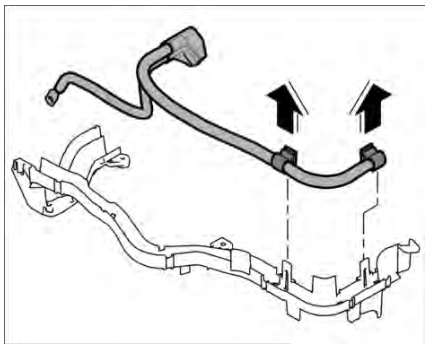
Engine wire harness attachment



17. Disconnect plug connection for engine wire harness to rear wire harness **-37 and 38-** . →100119 Removing and installing engine - section on "Removing"

17.1. Remove tie-wrap **-Arrow-** .

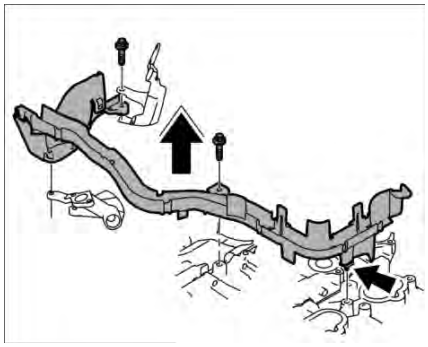
Round connectors for engine wire harness



17.2. Release engine wire harness at the two plug connections and disconnect it by turning the bayonet locks anti-clockwise.

Unclipping cable duct on left and right

18. Unclip cable duct on the left and right.



18.1. Unclip cable duct on the left and right at the fuel distributor pipes **-Arrows-** .

Unclipping starter lead at cable duct

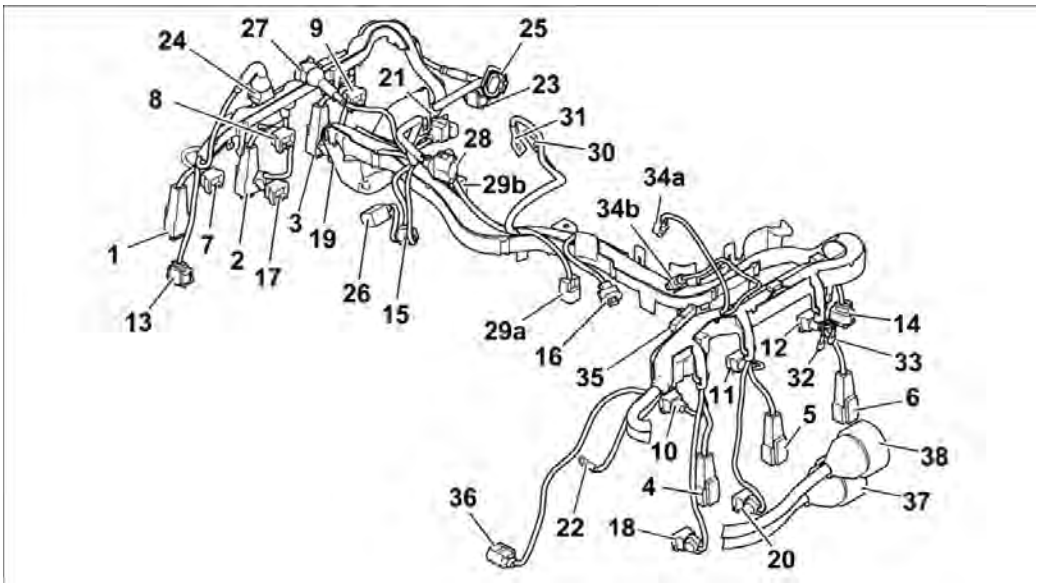
19. Unclip starter lead.

19.1. Unclip starter lead at cable duct **-Arrows-** .

Removing cable duct

20. Remove cable duct.

20.1. Unscrew fastening screws, unclip cable duct **-Arrow-** and remove it.



21. Remove wire harness for engine.

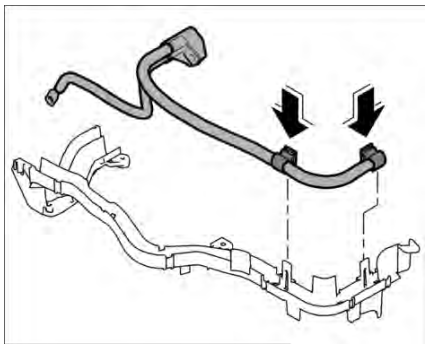
36 - Water-temperature sensor connector

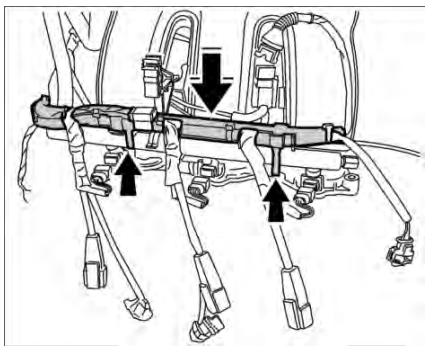
37-38 - Plug connections for engine wire harness to rear wire harness



1. Lay out wire harness for engine.

Installing cable duct

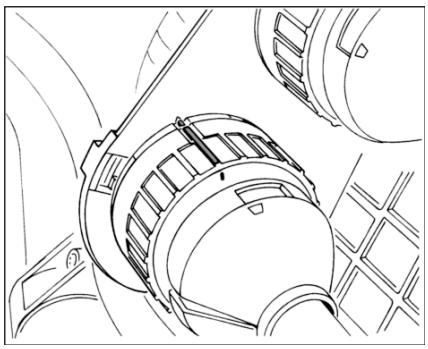
2. Install cable duct.



2.1. Clip in cable duct **-Arrows-** and secure with the fastening screws. →**Tightening torque: 10 (7.5 ftlb.) Nm**

Clipping in starter lead at cable duct

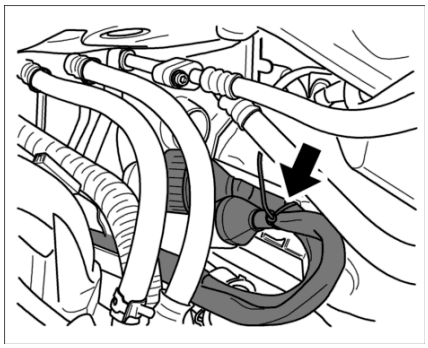
3. Clip in starter lead.



3.1. Clip in starter lead at cable duct **-Arrows-** .

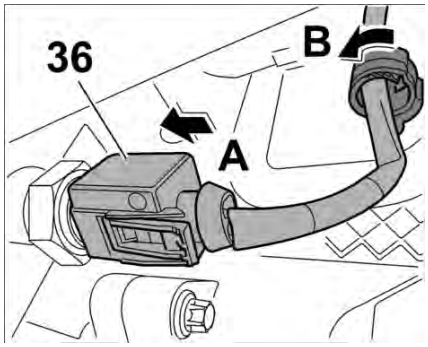
Clipping in cable duct at left and right

4. Clip in cable duct at the left and right.



4.1. Position and clip in cable duct on the left and right at the fuel distributor pipes **-Arrows-** .

Round connectors for engine wire harness



5. Push plug connection for engine wire harness to rear wire harness **-37 and 38-** together. →100119 Removing and installing engine - section on "Installing"

5.1. Connect engine wire harness at the two plug connections and lock it by turning the bayonet locks clockwise.

Engine wire harness attachment

5.2. Fit new tie-wrap **-Arrow-** .

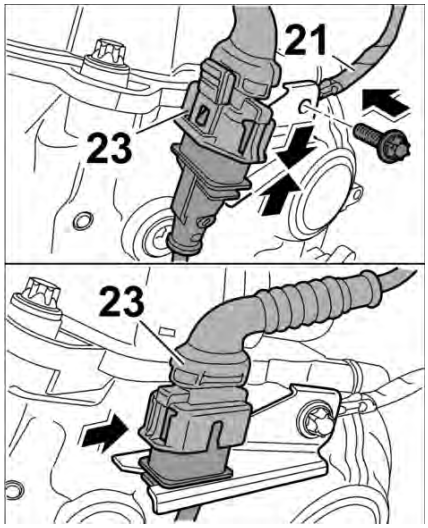
Attaching connector on water temperature sensor

6. Attach connector on water temperature sensor **-36-** .

6.1. Plug in connector on water temperature sensor **-36-** (**-Arrow A-**) until it engages firmly.

6.2. Insert wire into the holder and close holder **-Arrow B-** .

7. Press plug connection for compressor **-35-** together until it is felt to engage. →873419 Removing and installing compressor - section on "Installing"



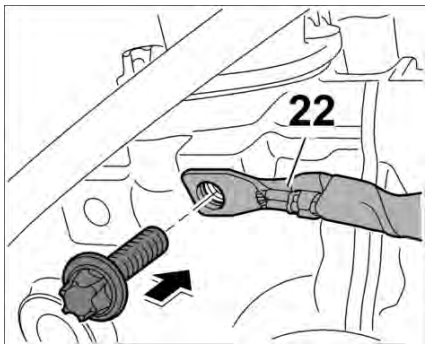
8. Plug in connector on engine temperature sensor **-34-** until it engages firmly.

9. Connect plugs on pressure sensor **-32 and 33-** .

10.

Position starter lead for terminal 50 **-31-** and secure with fastening nut. →**Tightening torque: 6.5 (5.0 ftlb.) Nm** →276019 Removing and installing starter - section on "Installing"

11. Plug in connector on oil level sensor **-29-** until it engages securely.
12. Plug in connector on tank vent **-27-** until the securing clip engages securely.
13. Connect plug on secondary air blower **-25-** until it engages firmly. →266519 Removing and installing secondary air pump - section on "Installing"
14. Plug in connector on intake-pipe change-over switch **-24-** until the securing clip engages securely.



Connecting plug connection on speed sender

15. Screw down ground straps **-21-** and connect plug connection on speed sender **-23-** .

15.1. Position ground straps **-21-** and screw down the fastening screw. →**Tightening torque: 10 (7.5 ftlb.) Nm**

15.2. Push the plug connection **-23-** together until it is felt to engage.

15.3. Push plug connection **-23-** into holder.

Screwing down ground straps on engine

16. Screw down ground straps **-22-** .

16.1. Position ground straps **-22-** and screw down the fastening screw. →**Tightening torque: 10 (7.5 ftlb.) Nm**

17. Connect plugs on the two solenoid hydraulic valves (valve lift control) **-19 and 20-** until they click into place. →155519 Removing and installing solenoid hydraulic valve (valve lift control) - section on "Installing"
18. Connect plugs on the two solenoid hydraulic valves (camshaft timing) **-17 and 18-** until they click into place. →153719 Removing and installing solenoid hydraulic valve (camshaft timing) - section on

"Installing"

19. Plug in connectors on the two knock sensors **-15 and 16-** until they click into place. →287219 Removing and installing knock sensor - section on "Installing"
20. Connect plugs on the six fuel injectors **-7 to 12-** until they engage securely. →244019 Removing and installing fuel injector - section on "Installing"
21. Connect plugs on the six ignition coils **-1 to 6-** until they engage securely. →287020 Removing and installing spark plug - section on "Installing"

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

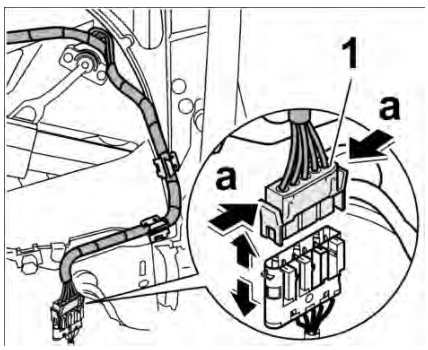
Removing wire harness for convertible top

Removing plastic panel

Installation Location:

Installation position of convertible top wire harness

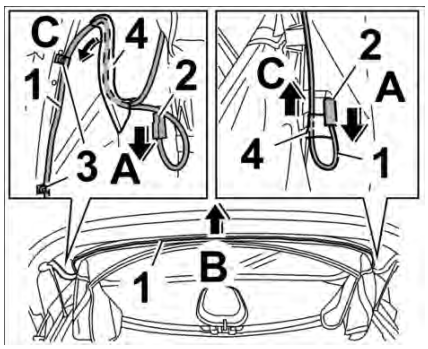


Removing plastic panel

1. Remove plastic panel.

1.1. Unscrew fastening screws **-4-** and remove plastic bracket **-2-** from roof frame 1 **-3-** .

1.2. Turn fixing clip **-1-** 90° counterclockwise and remove to the rear from the plate of the plastic panel **-2-** .

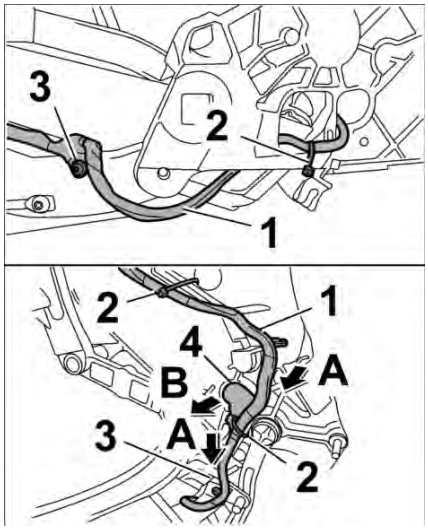


Disconnecting wire harness plug connection for convertible top

Disconnecting wire harness plug connection for convertible top

1. Release electric plug connection **-1-** of wire harness **-Arrow a-** and disconnect.

Removing wire harness for convertible top



Removing wire harness at rear window

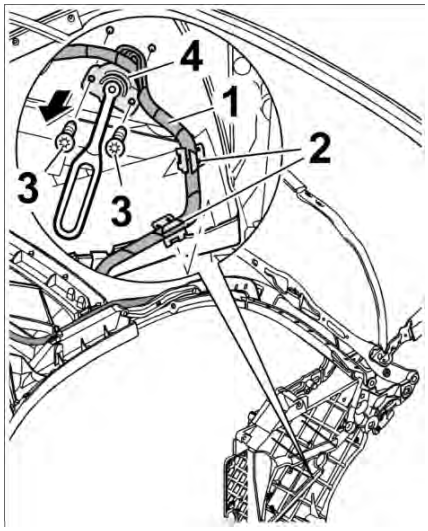
1. Remove wire harness at rear window.

1.1. Pull off both connectors **-2-** at the rear window **-Arrows A-** .

1.2. Pull out wire harness **-1-** from the rear window frame **-Arrow B-** .

1.3. Unscrew the two fastening screws **-3-** and remove the wire harness **-1-** from the fabric plate **-4-** .

Removing wire harness convertible top support



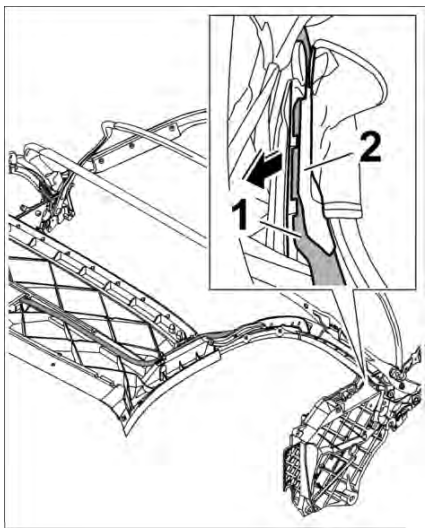
2. Remove wire harness convertible top support.

2.1. Remove the three tie-wraps **-2-** .

2.2. Unscrew the two fastening screws **-3-** .

2.3. Unclip wire harness **-1-** from the two retaining clips **-Arrows A-** .

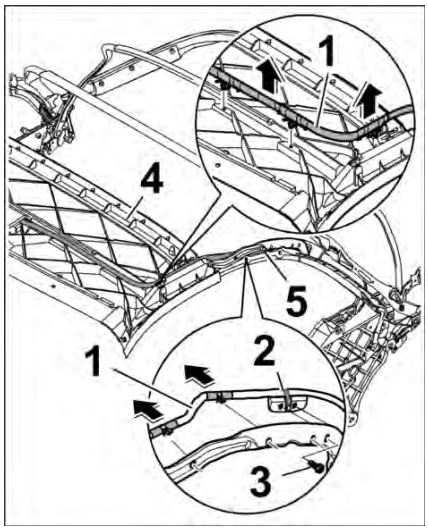
2.4. Remove foam part **-4-** **-Arrow B-** .



Removing potentiometer

3. Remove potentiometer.

3.1. Remove wire harness **-1-** from the two clamps **-2-** .



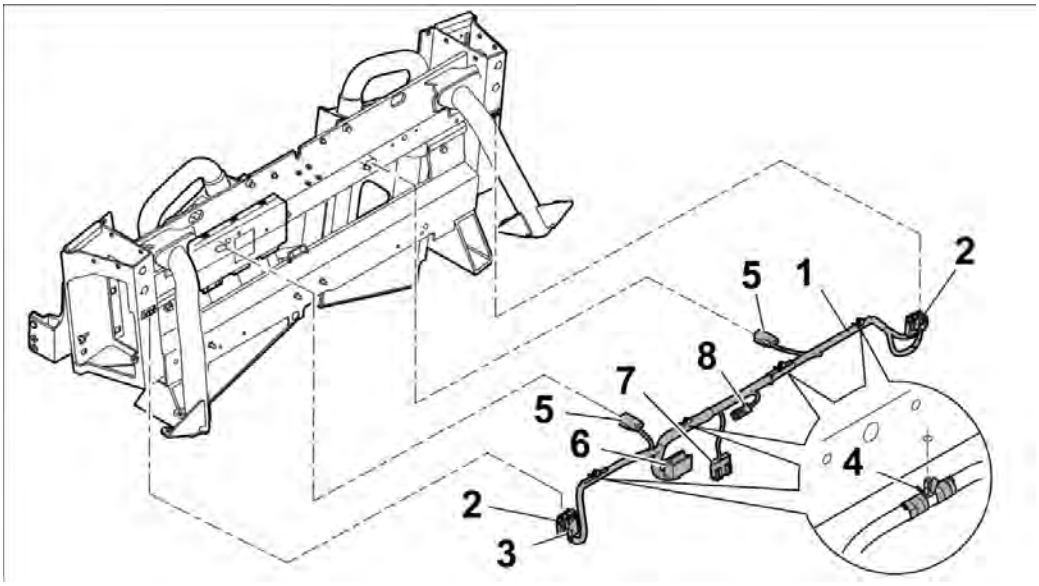
3.2. Unscrew the two fastening screws **-3-** and remove the potentiometer **-4-** .

Removing wire harness from cable duct

4. Remove wire harness from cable duct.

4.1. Remove wire harness **-1-** from cable duct **-2-** .

Removing wire harness at roof frame 1 and roof frame 3



5. Removing wire harness at roof frame 1 and roof frame 3

5.1. Unscrew the two fastening screws **-3-** and remove plastic bracket **-2-** on roof frame 3 **-5-**
.

5.2. Unclip wire harness **-1-** at roof frame 3 **-5-** and at roof frame 1 **-4-**
.

Removing wire harness for roll-over protection system

Installation Location:

Overview of plugs for wire harness for roll-over protection system

1 - Wire harness for roll-over protection system

2 - Plug connection for rear side panel flap

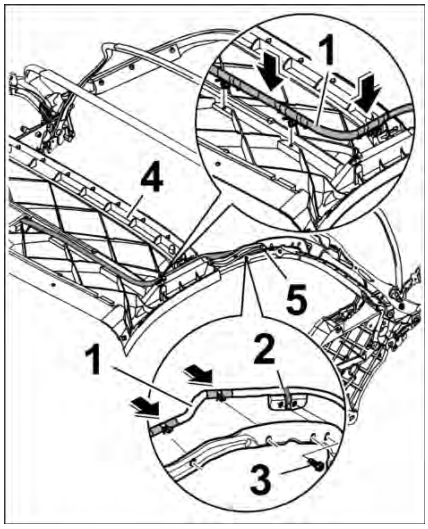
3 - Hardtop mount plug connection

4 - Retaining clips

5 - Roll-over bar connector

6 - Convertible top control unit connector

7 - Plug connection for wire harness for roll-over protection system to rear wire harness



8 - Plug connection for motor for convertible-top compartment lid drive mechanism

1. Release and disconnect plug connections for rear side panel flap **-2-** at left and right. →614219 Removing and installing rear side section flap - chapter on "Removing"
2. Release and disconnect plug connection for hardtop mount **-3-** . →611719 Removing and installing hardtop mount - chapter on "Removing"
3. Release connector on convertible top control unit **-6-** and pull off. →619619 Removing and installing control unit for convertible top - chapter on "Removing"
4. Release and disconnect plug connection for roll-over protection system wire harness to rear wire harness **-7-** . →697719 Removing and installing frame for roll-over protection system - chapter on "Removing"
5. Release plug connection on motor for convertible-top compartment lid drive **-8-** and disconnect. →617019 Removing and installing drive motor - chapter on "Removing"
6. Unclip and remove wire harness for roll-over protection system **-1-** at the retaining clips **-4-** .

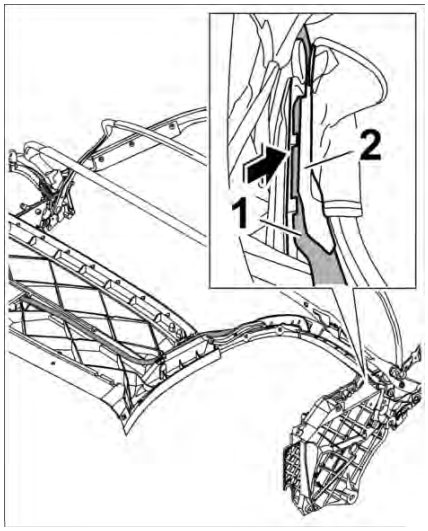
Installing wire harness for convertible top

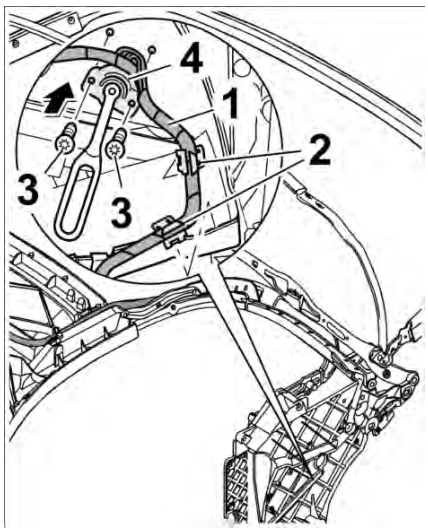
Installing wire harness for convertible top



Installing wire harness at roof frame 1 and roof frame 3

1. Install wire harness at roof frame 1 and roof frame 3.

1.1. Lay wire harness **-1-** and clip in at roof frame 1 **-4-** and at roof frame 3 **-5-** .

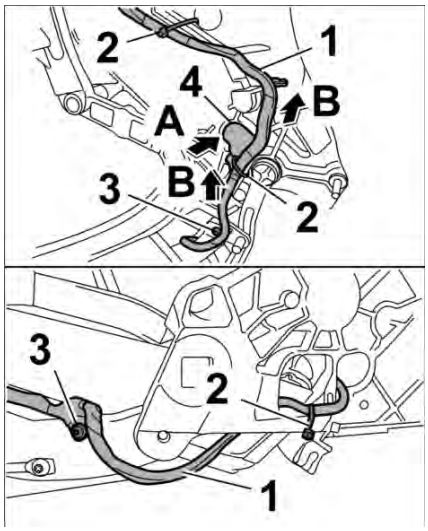


1.2. Position plastic bracket **-2-** on roof frame 3 **-8-** and screw down with the two fastening screws **-3-** .
→**Tightening torque: 3 (2 ftlb.) Nm**

Pressing wire harness into cable duct

2. Press wire harness into cable duct.

2.1. Press wire harness into cable duct.



Installing potentiometer.

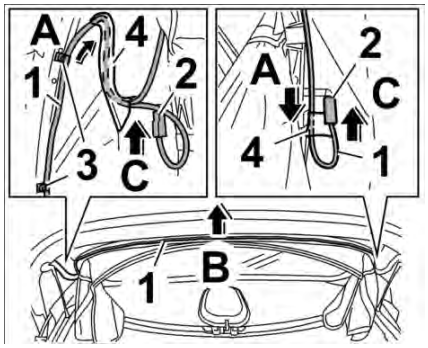
3. Install potentiometer.

3.1. Insert potentiometer fork into the pins of the hydraulic housing.

3.2. Position potentiometer **-4-** on convertible top support and screw down with the two fastening screws **-3-** . →**Tightening torque: 3 (2 ftlb.) Nm**

3.3. Lay wire harness **-1-** and press into the two clamps **-2-** .

Installing wire harness on convertible-top support



4. Install wire harness on convertible-top support.

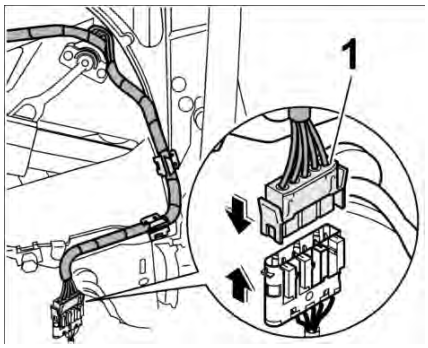
4.1. Lay wire harness **-1-** and insert foam part **-4-** **-Arrow A-** .

4.2. Clip in wire harness **-1-** at the two retaining clips **-Arrows B-** .

4.3. Secure wire harness **-1-** with the two fastening screws **-3-** .

4.4. Fit three new tie-wraps **-2-** .

Installing wire harness at rear window

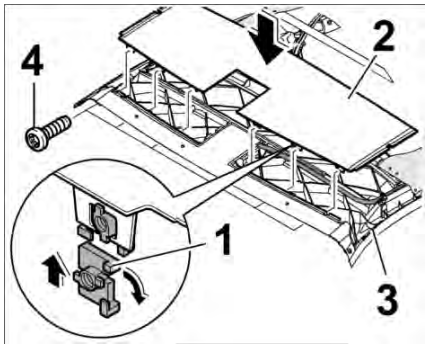


5. Install wire harness at rear window.

5.1. Push wire harness **-1-** through the fabric plate **-4-** **-Arrow A-** and secure with the two fastening screws **-3-** .

5.2. Lay wire harness **-1-** and press into the rear window frame **-Arrow B-** .

5.3. Push on both connectors **-2-** at the rear window **-Arrows C-** .



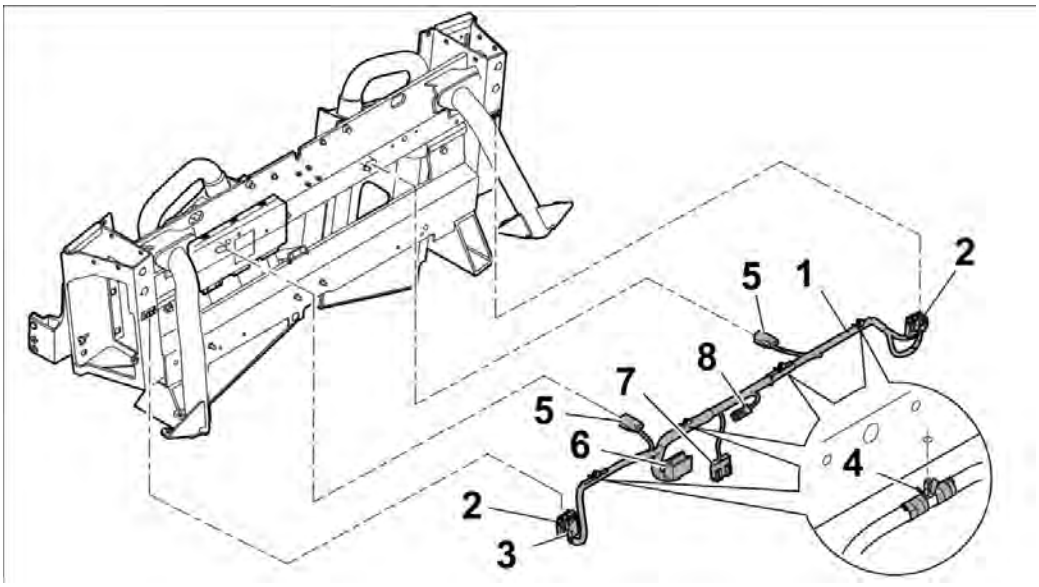
Connecting wire harness plug connection for convertible top

Connecting wire harness plug connection for convertible top

1. Push together the electric plug connection **-1-** of the wire harness until it is felt to engage.

Installing plastic panel

Installing plastic panel



1. Install plastic panel.

1.1. Insert fixing clip **-1-** onto plate of plastic panel from behind **-2-** and turn 90° clockwise.

1.2. Position plastic panel **-2-** on roof frame 1 **-3-** and screw down with the fastening screws **-4-** . Tightening torque →**Tightening torque : 5 (3.5 ftlb.) Nm**

Installing wire harness for roll-over protection system

Installation Location:

Overview of plugs for wire harness for roll-over protection system

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

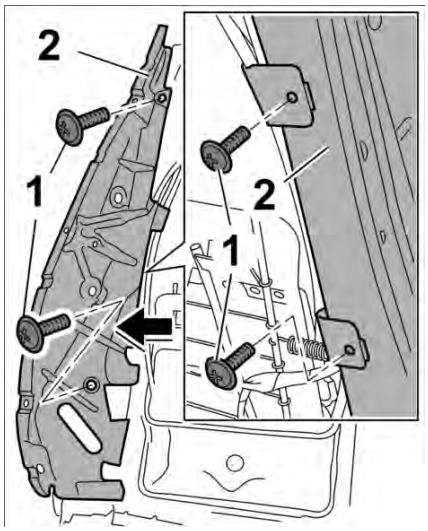
10. Push connectors **-2 and 3-** onto sensors for lumbar support until they click into place. →723419 Removing and installing lumbar support - section on "Installing"
11. Push connector **-1-** onto control valve for lumbar support adjustment until it engages firmly. →723319 Removing and installing control valve for lumbar adjustment - section on "Installing"

Fitting foam part



Fitting foam part

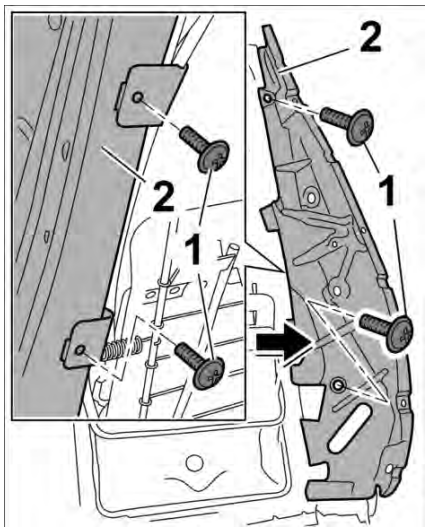
Note

Observe the installation position of the hoses!
Make sure that the hoses are not pinched. Insert hoses exactly into the cut-outs on the foam part.

1. Fit foam part **-1-** at the headrest.

Installing backrest side support

Installing backrest side support



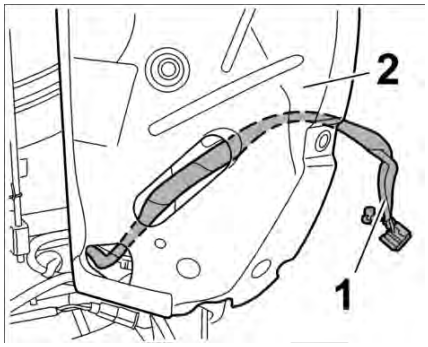
Note

Observe hose routing!

In vehicles with lumbar support, make sure the hoses are routed correctly in the area of the backrest side support.

1. Fit backrest side support **-2-** and screw down with the four fastening screws **-1-** .

Installing support for left backrest side part



Installing support for left backrest side part

Note

Observe hose routing!

In vehicles with lumbar support, make sure the hoses are routed correctly in the area of the backrest side support.

1. Insert support for backrest side part **-2-** and secure with the four fastening screws **-1-** .

Routing wire harness for airbag

2. Route wire harness for airbag **-1-** as shown behind the backrest side part support **-2-** .

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der**

Zusammenhang von Text und zugehörigem Bild verloren geht.
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

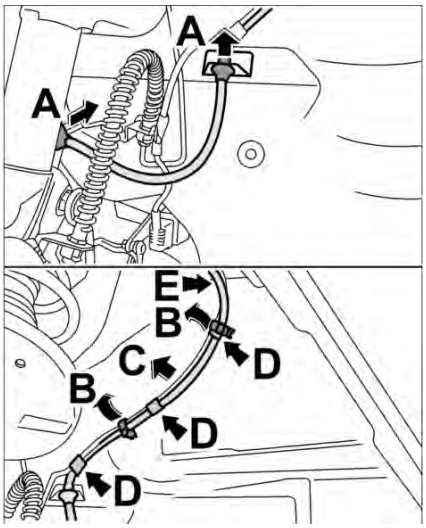
Removing wire harness for anti-lock brake system (ABS)

Removing front ABS wire harness

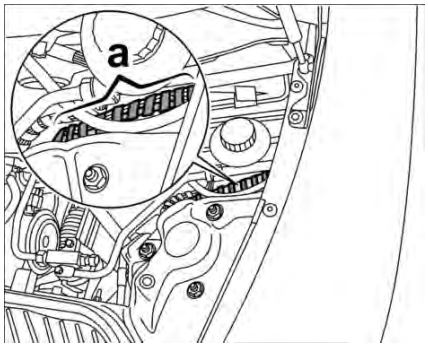
Installation Location:



Installation position for front ABS wire harness

Disconnecting plug connection for front wheel sensor

1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .
2. Unscrew the fastening screw and remove the connector socket **-arrow C-** .



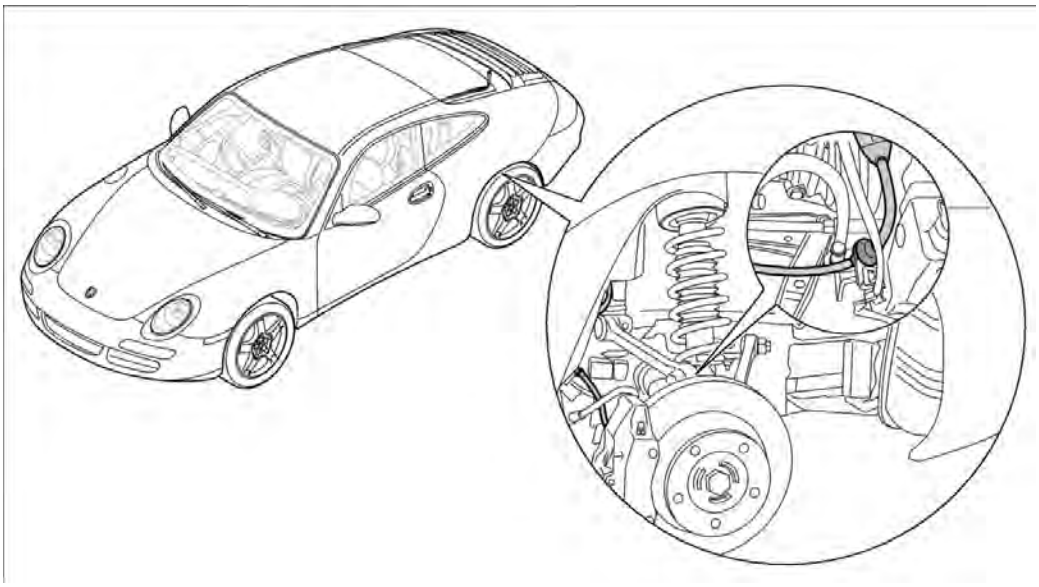
Removing the ABS wire harness from the brackets

3. Remove the ABS wire harness from the brackets **-arrows A-** .
4. Open the clips **-arrows B-** and remove the ABS wire harness **-arrow C-** .
5. Remove the fabric tape **-D-** .

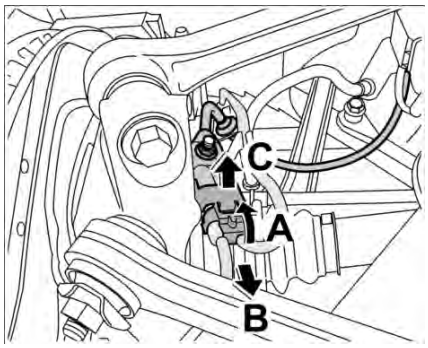
Note

When cutting the ABS wire harness, make sure that there is enough line length left to join to the new lines.

6. Cut off the ABS wire harness around **-E-** and remove it.



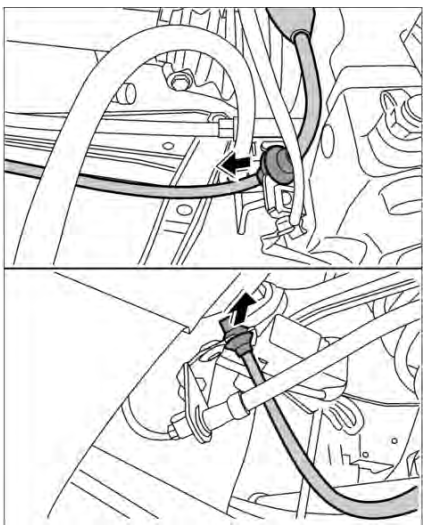
Exposing ABS wire harness



7. Cut through the fabric tape in the plenum panel, in the area around **-a-** , and expose the remaining ABS lines.

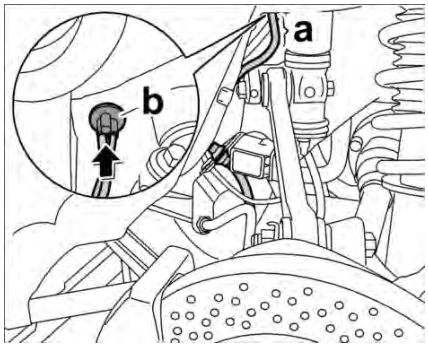
Removing rear ABS wire harness

Installation Location:



Installation position for rear ABS wire harness

Disconnecting plug connection for rear wheel sensor

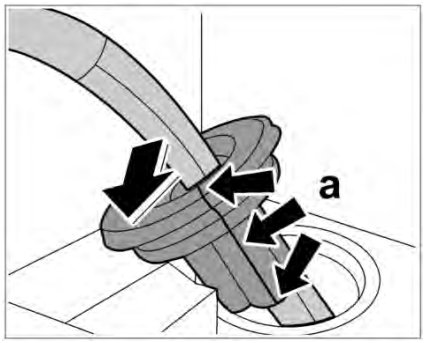


1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .
2. Unscrew the fastening nut and remove the connector socket **-arrow C-** .

Removing the ABS wire harness from the brackets

3. Remove the ABS wire harness from the brackets

-arrows- .



Cutting off ABS wire harness

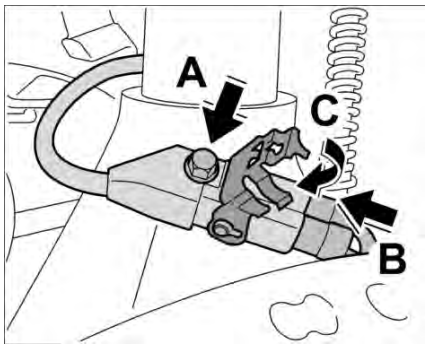
Note

When cutting the ABS wire harness, make sure that there is enough line length left to join to the new lines.

4. Cut off the ABS wire harness around **-a-** and press inward with the rubber sleeve **-b-** **-arrow-** .

Cutting off rubber sleeve

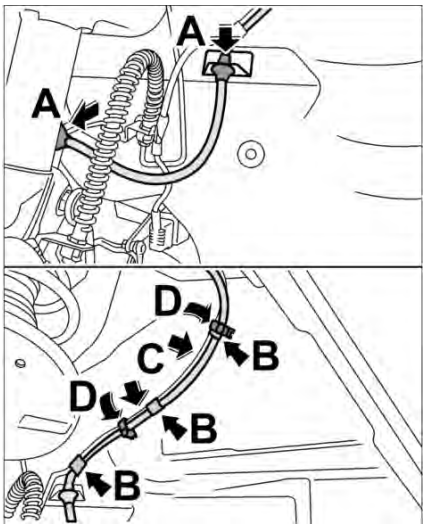
Note



Only for vehicles with HBA.

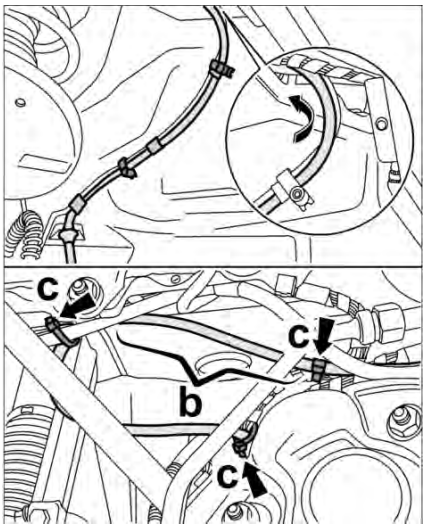
5. Cut through the rubber sleeve at the side of the HBA line **-a-** and remove the HBA line **-arrow-** .

top of page



Installing wire harness for anti-lock brake system (ABS)

Installing front ABS wire harness



Connecting plug connection for front wheel sensor

1. Place socket in installation position **-arrow A-** and screw on the fastening screw. →**Tightening torque: 10 (7.5 ftlb.) Nm**
2. Plug in the two connectors **-arrow B-** .
3. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

Pressing ABS wire harness into supports

4. Press the ABS wire harness into the supports by pressing on the rubber sleeves **-arrows A-** .
5. Secure line for headlight levelling system to the ABS wire harness using fabric tape **-B-** .
6. Place ABS wire harness in installation position **-arrows C-** and close clip **-arrows D-** .

Routing and connecting ABS wire harness

7. Push through ABS wire harness to plenum panel **-arrow-** .

Note

Select a place for the joint where there is enough space to join all the lines present.
Do not cut the lines too short in case they have to be laid in a different position if there is insufficient space in the area of the joint.

Note

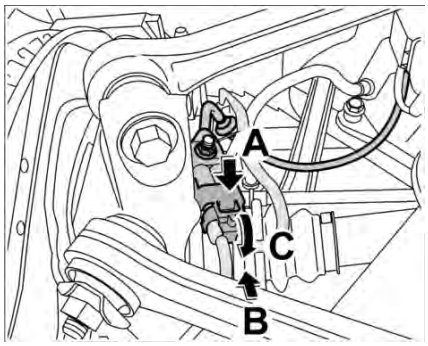
The electric lines are located in the plenum panel and are thus exposed to the highest demands.
The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

8. Crimp lines in area around **-b-** .

8.1. Cut off lines in different lengths (due to the shrink-fit connections).

8.2. Slide shrink-fit hoses onto the lines.

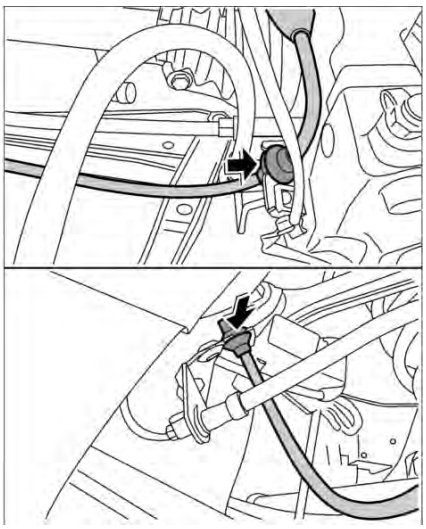
8.3. Strip 10 mm of insulation off the wires.



8.4. Crimp lines using crimping sleeves and the **hand crimping pliers** from the **repair kit for harnesses NR.155-1**.

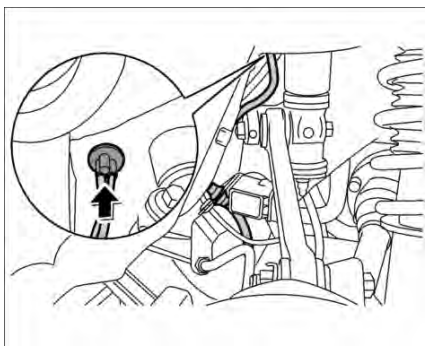
8.5. Slide the shrink-fit hoses over the crimp connections and carefully shrink them using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for harnesses) so that they are watertight.

8.6. Wrap commercially available PVC tape all around the area of the connection points.



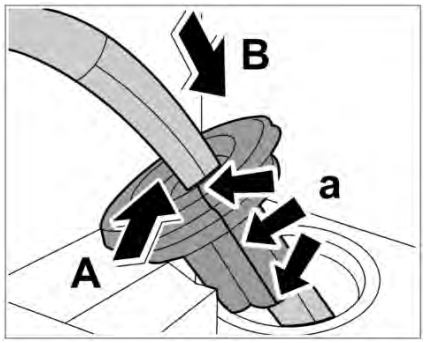
9. Secure the repaired area to the neighbouring wire harnesses using tie-wraps **-c-** .

Installing rear ABS wire harness



Connecting plug connection for rear wheel sensor

1. Place socket in installation position **-arrow A-** and screw on the fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm**
2. Plug in the two connectors **-arrow B-** .
3. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

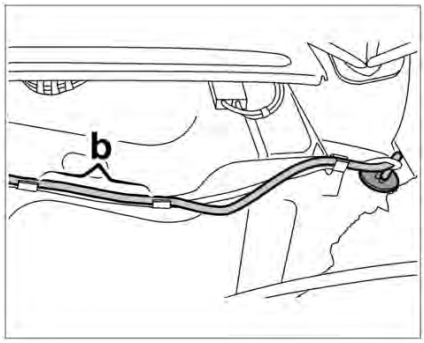


Pressing ABS wire harness into supports

4. Press the ABS wire harness into the supports by pressing on the rubber sleeves **-arrows-** .

Pushing the ABS wire harness inward

5. Push the ABS wire harness inward **-arrow-** .



Stick rubber sleeve together.

Note

Only for vehicles with HBA.

6. Cut through the rubber sleeve **-a-** and insert the HBA line **-arrow A-** . Stick the rubber sleeve together at the cut edge **-a-** using a commercially available PUR adhesive and seal. Press the rubber seal into the opening **-arrow B-** .

Crimping lines

Note

Select a place for the joint where there is enough space to join all the lines present.
Do not cut the lines too short in case they have to be laid in a different position if there is insufficient space in the area of the joint.

Note

The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

7. Crimp lines in area around **-b-** .

7.1. Cut off lines in different lengths (due to the shrink-fit connections).

7.2. Slide shrink-fit hoses onto the lines.

7.3. Strip 10 mm of insulation off the wires.

7.4. Crimp lines using crimping sleeves and the **hand crimping pliers** from the **repair kit for harnesses NR.155-1**.

7.5. Slide the shrink-fit hoses over the crimp connections and carefully shrink them using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for harnesses) so that they are watertight.

7.6. Wrap commercially available PVC tape all around the area of the connection points.

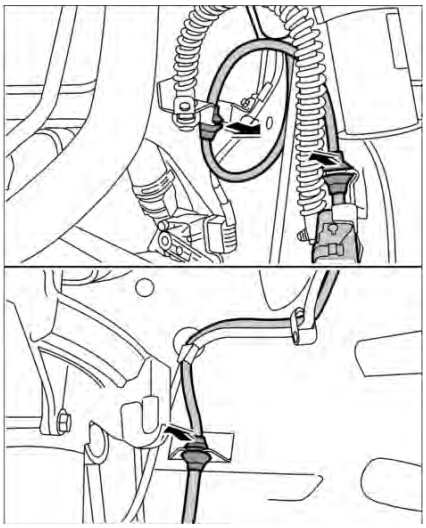
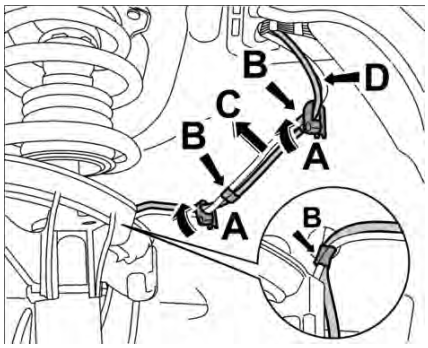
Removing wire harness for anti-lock brake system (ABS)

Removing front ABS wire harness

Installation Location:



Installation position for front ABS wire harness

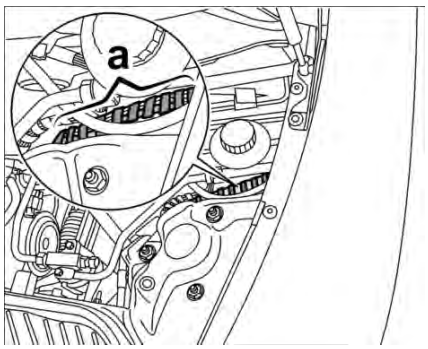


Disconnecting plug connection for front wheel sensor

1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .
2. Unscrew the fastening nut and remove the connector socket **-arrow C-** .

Removing the ABS wire harness from the brackets

3. Remove the ABS wire harness from the brackets **-arrows-** .



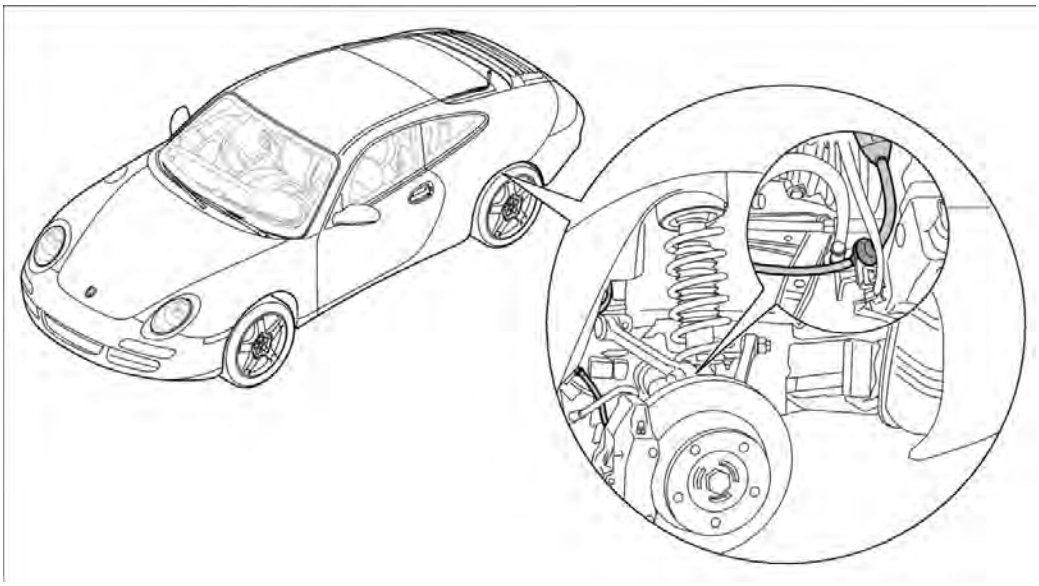
Unclipping ABS wire harness

4. Open clip **-arrows A-** .
5. Remove fabric tape **-B-** and take out ABS wire harness **-arrow C-** .

Note

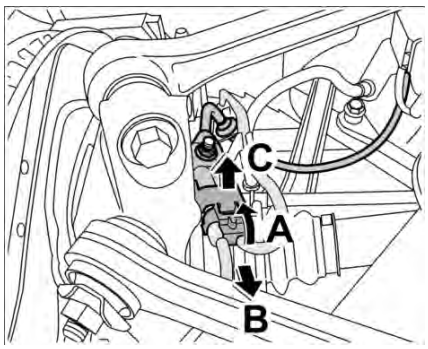
When cutting the ABS wire harness, make sure that there is enough line length left to join to the new lines.

6. Cut off the ABS wire harness around **-D-** and remove it.



Exposing ABS wire harness

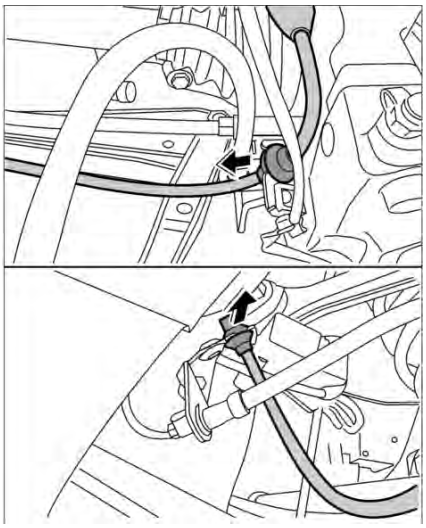
7.



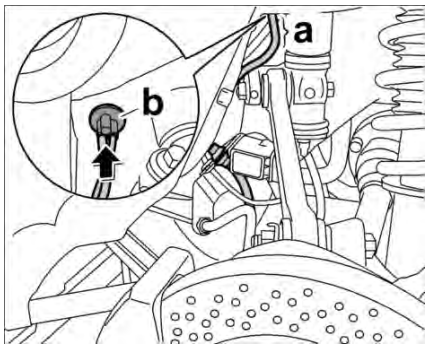
Cut through the fabric tape in the plenum panel, in the area around **-a-** , and expose the remaining ABS lines.

Removing rear ABS wire harness

Installation Location:



Installation position for rear ABS wire harness

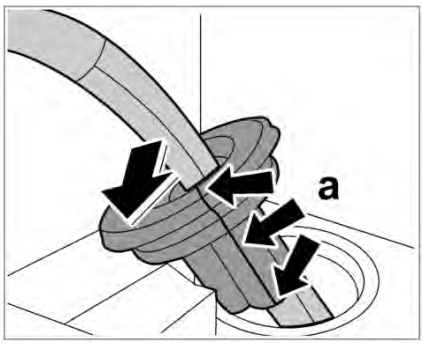


Disconnecting plug connection for rear wheel sensor

1. Release the cable retainer **-arrow A-** and pull off the two connectors **-arrow B-** .
2. Unscrew the fastening nut and remove the connector socket **-arrow C-** .

Removing the ABS wire harness from the brackets

3. Remove the ABS wire harness from the brackets **-arrows-** .



Cutting off ABS wire harness

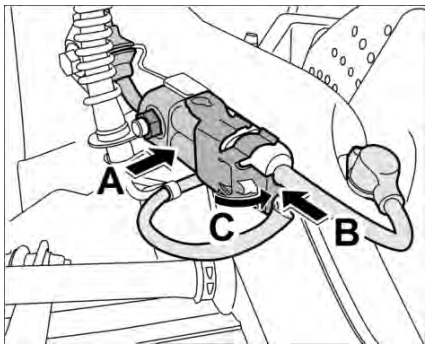
Note

When cutting the ABS wire harness, make sure that there is enough line length left to join to the new lines.

4. Cut off the ABS wire harness around **-a-** and press inward with the rubber sleeve **-b-** **-arrow-** .

Cutting off rubber sleeve

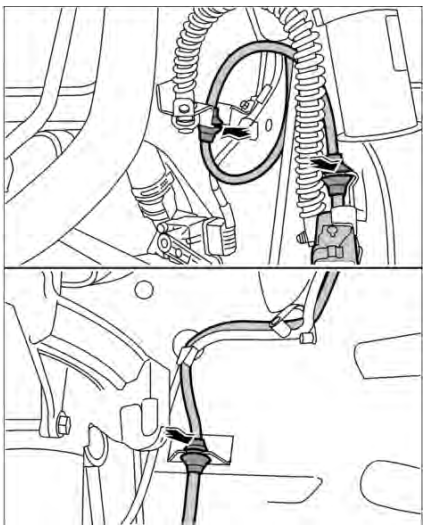
Note



Only for vehicles with HBA.

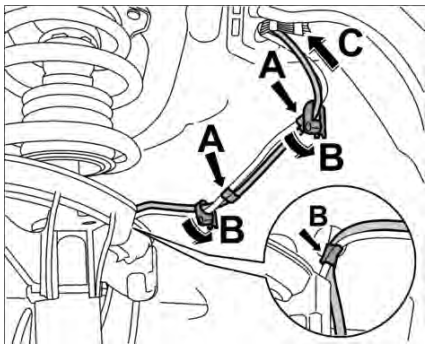
5. Cut through the rubber sleeve at the side of the HBA line **-a-** and remove the HBA line **-arrow-** .

top of page



Installing wire harness for anti-lock brake system (ABS)

Installing wire harness for front airbag



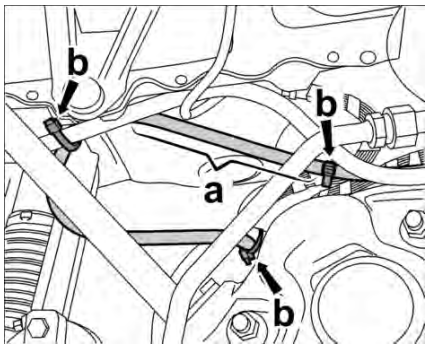
Connecting plug connection for front wheel sensor

1. Place socket in installation position **-arrow A-** and screw on the fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm**
2. Plug in the two connectors **-arrow B-** .
3. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

Pressing ABS wire harness into supports

4. Press the ABS wire harness into the supports by pressing on the rubber sleeves **-arrows-** .

Clipping in ABS wire harness



5. Secure line for headlight levelling system to the ABS wire harness using fabric tape **-A-** .
6. Place ABS wire harness in installation position and close clip **-arrows B-** .
7. Push through ABS wire harness to plenum panel **-arrow C-** .

Note

Select a place for the joint where there is enough space to join all the lines present.
Do not cut the lines too short in case they have to be laid in a different position if there is insufficient space in the area of the joint.

Note

The electric lines are located in the plenum panel and are thus exposed to the highest demands.
The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

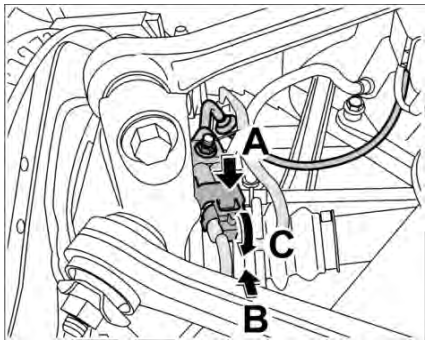
Routing and connecting ABS wire harness

8. Crimp lines in area around **-a-** .

8.1. Cut off lines in different lengths (due to the shrink-fit connections).

8.2. Slide shrink-fit hoses onto the lines.

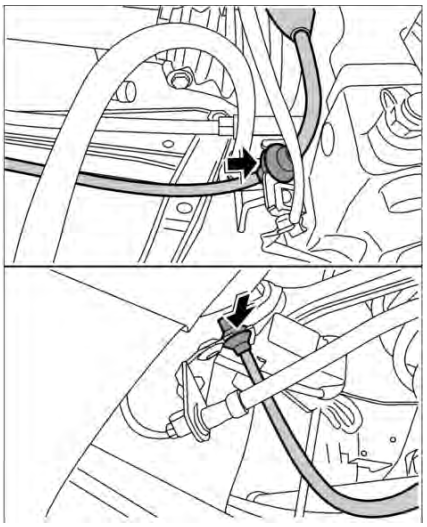
8.3. Strip 10 mm of insulation off the wires.



8.4. Crimp lines using crimping sleeves and the **hand crimping pliers** from the **repair kit for harnesses NR.155-1**.

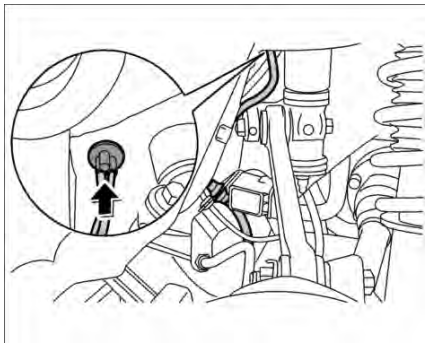
8.5. Slide the shrink-fit hoses over the crimp connections and carefully shrink them using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for harnesses) so that they are watertight.

8.6. Wrap commercially available PVC tape all around the area of the connection points.



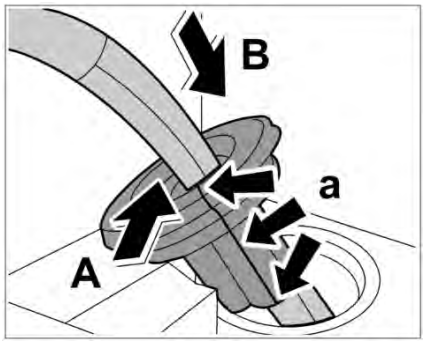
9. Secure the repaired area to the neighbouring wire harnesses using tie-wraps **-b-** .

Installing rear ABS wire harness



Connecting plug connection for rear wheel sensor

1. Place socket in installation position **-arrow A-** and screw on the fastening nut. →**Tightening torque: 10 (7.5 ftlb.) Nm**
2. Plug in the two connectors **-arrow B-** .
3. Fold back the cable retainer **-arrow C-** until it engages correctly at the connectors.

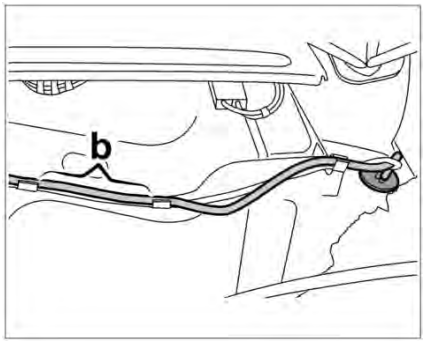


Pressing ABS wire harness into supports

4. Press the ABS wire harness into the supports by pressing on the rubber sleeves **-arrows-** .

Pushing the ABS wire harness inward

5. Push the ABS wire harness inward **-arrow-** .



Stick rubber sleeve together.

Note

Only for vehicles with HBA.

6. Cut through the rubber sleeve **-a-** and insert the HBA line **-arrow A-** . Stick the rubber sleeve together at the cut edge **-a-** using a commercially available PUR adhesive and seal. Press the rubber seal into the opening **-arrow B-** .

Crimping lines

Note

Select a place for the joint where there is enough space to join all the lines present.
Do not cut the lines too short in case they have to be laid in a different position if there is insufficient space in the area of the joint.

Note

The greatest care must be used in the individual work steps for stripping insulation from, crimping, and shrinking/insulating the electric lines.
The procedure for stripping insulation from, crimping, and shrinking/insulating the electric lines must be complied with and observed. The procedures are described in detail in the **repair kit for harnesses NR.155-1**.
Crimping samples are to be prepared before beginning work.

7. Crimp lines in area around **-b-** .

7.1. Cut off lines in different lengths (due to the shrink-fit connections).

7.2. Slide shrink-fit hoses onto the lines.

7.3. Strip 10 mm of insulation off the wires.

7.4. Crimp lines using crimping sleeves and the **hand crimping pliers** from the **repair kit for harnesses NR.155-1**.

7.5. Slide the shrink-fit hoses over the crimp connections and carefully shrink them using the **hot-air blower with special nozzle** (recommended accessories for the repair kit for harnesses) so that they are watertight.

7.6. Wrap commercially available PVC tape all around the area of the connection points.

as of MY 2005
Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**

- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

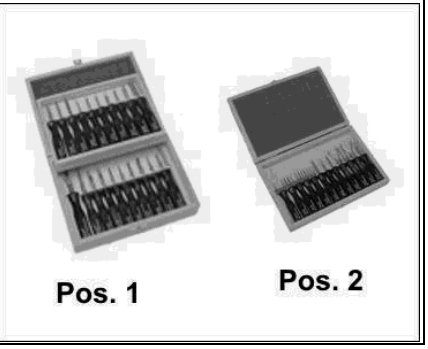
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

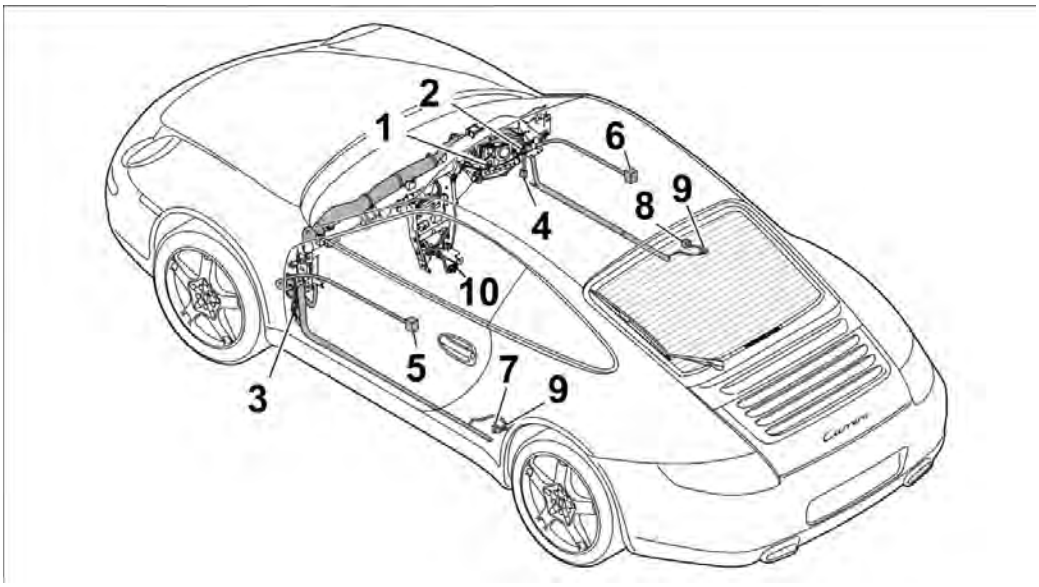
Installing wire harness for airbag



Installing components for airbag from triggering unit to passenger's airbag unit or seat-belt tensioner

WARNING

Danger of injury and material damage if airbag units are not handled correctly.

- → Always observe the safety regulations for handling airbag units *→691000 Safety regulations for handling airbag and belt tensioner units*
- → Remove ignition key. Disconnect battery. Route or isolate the ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided. →2706IN Working instructions after disconnecting the battery
- → After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

Installation Location:

Connector overview for airbag wire harness, shown on the 911

1-2 - Connectors for stage 1 and stage 2 of passenger's airbag unit

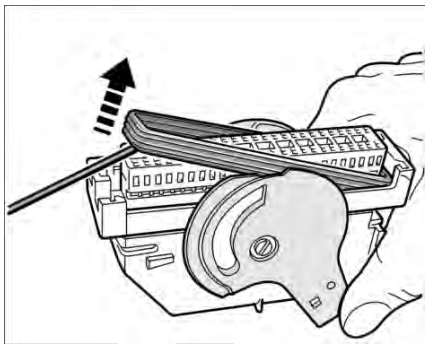
7-8 - Connector for seat-belt tensioner, left and right

9 - Rubber sleeve

10 - Connector for airbag triggering unit

1. Release connector on triggering unit for airbag **-10-** and fold open the locking lever. →695319 Removing and installing triggering unit for airbag - chapter on "Removing"
2. Remove connector from the relevant component.

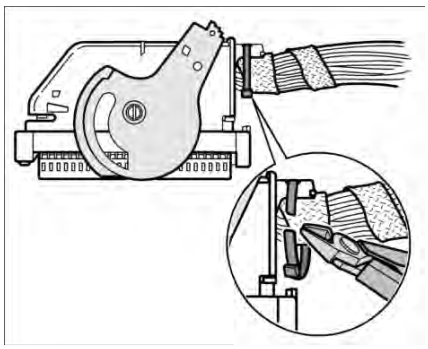
2.1. **Connectors for stage 1 and stage 2 of passenger's airbag unit -1 and 2-**



Release and remove connectors for stage 1 and stage 2 of passenger's airbag unit →695919 Removing and installing passenger's airbag unit - chapter on "Removing"

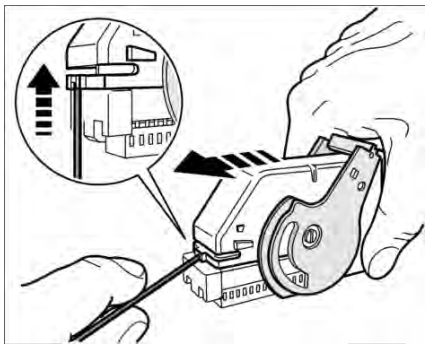
2.2. **Connector for seat-belt tensioner, left -7- and right -8-**

Release and remove connector on seat-belt tensioner. →691319 Removing and installing front three-point belt with seat-belt tensioner - chapter on "Removing" [997310 997311 997320 997321 997610 997611 997620 997621]→691319 Removing and installing front three-point belt with seat-belt tensioner - chapter on "Removing" [997110 997111 997120 997121 997410 997411 997430 997431]



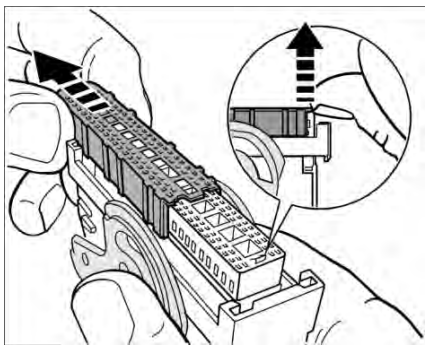
Remove rubber sleeves
-9- .

2.3. Cut off the connector of the damaged wire harness, isolate it and secure it to the main wire harness with tie-wraps.



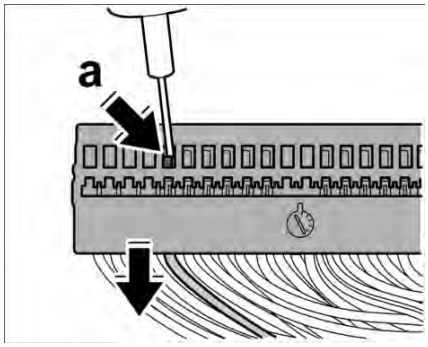
Levering out seal from connector housing

3. Using a small screwdriver, lever the seal out of the connector housing.



Removing tie-wrap at connector housing

4. Cut and remove tie-wrap for fixing the wire harness to the connector housing.



Removing connector housing from connector

5. Release connector housing with a small screwdriver, lift upwards and remove from connector.

Removing connector guide from connector

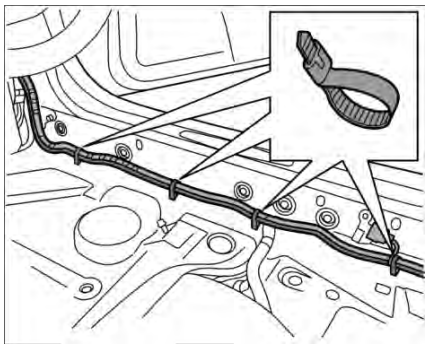
6. Lift connector guide and remove from connector.

Pressing out the contacts

Note

Allocation of lines - see wiring diagram.

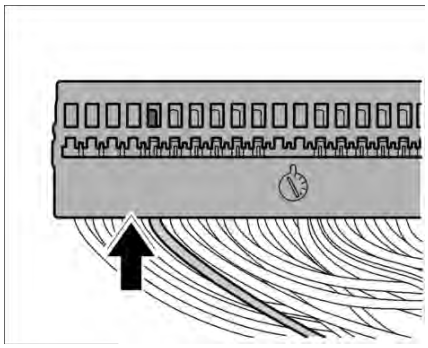
7. Release contact of the damaged line using the **press-out tool 1575-1P** of the **press-out and unlocking tools for flat and round plug connections of all sizes NR.155** **-Arrow a-** and pull out of the contact strip.
8. Push connector of the new wire harness on the relevant component until it is felt to engage.



8.1. **Connectors for stage 1 and stage 2 of passenger's airbag unit -1 and 2-**

Push on connectors for stage 1 and stage 2 of passenger's airbag unit until they are felt to engage. →695919 Removing and installing passenger's airbag unit - chapter on "Installing"

8.2. **Connector for seat-belt tensioner, left -7- and right -8-**

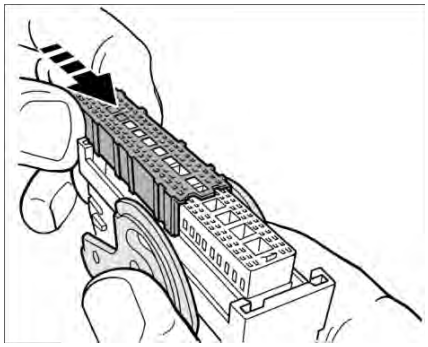


Push on connector for the seat-belt tensioner until it is felt to engage. →691319 Removing and installing front three-point belt with seat-belt tensioner - chapter on "Installing" [997310 997311 997320 997321 997610 997611 997620 997621]→691319 Removing and installing front three-point belt with seat-belt tensioner - chapter on "Installing" [997110 997111 997120 997121 997410 997411 997430 997431]

Fit rubber sleeve **-9-** .

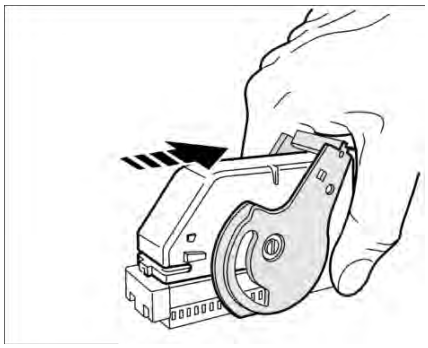
Securing wire harness to the main wire harness

9. Route the new wire harness along the main wire harness, guide it through existing cable ducts and tie it to the main wire harness using tie-wraps.



Pressing in the contacts

Note

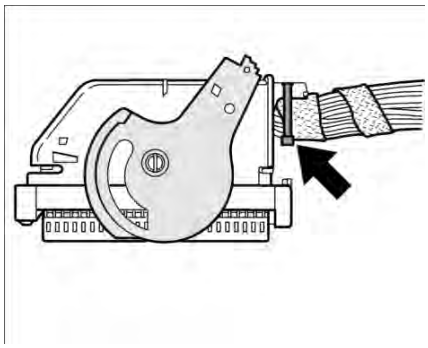


Allocation of lines - see wiring diagram.

10. Plug new line into the contact strip until the contact is felt to engage.

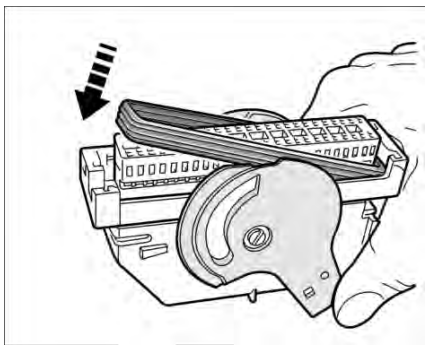
Pushing connector guide onto the connector

11. Push connector guide onto the connector until it is felt to engage.



Pushing connector housing onto the connector

12. Push connector housing onto the connector



12.1. Before fitting the connector housing, check for signs of damage, and replace if necessary. →*976600 Airbag warning light activated: seal in plug connection of triggering unit defective*

12.2. Push connector housing onto the connector until it is felt to engage.

Fitting tie-wrap at connector housing

13. Fasten wire harness with a new tie-wrap **-arrow-** to the connector housing.

Inserting seal of connector housing

14. Insert seal into the connector.

14.1. Before inserting the seal, check for signs of damage, and replace if necessary. →*976600 Airbag warning light activated: seal in plug connection of triggering unit defective*

14.2. Insert seal into the connector and press down as far as it will go. Check seal is seated properly.

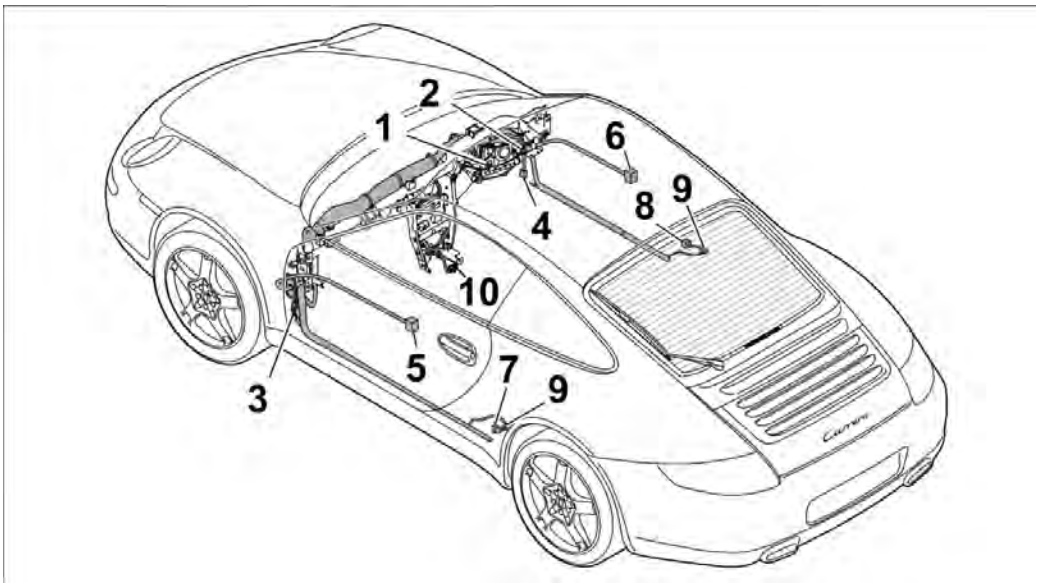
15. Push on connector of triggering unit for airbag **-10-** until it is felt to engage, and lock it. →695319 Removing and installing triggering unit for airbag - chapter on "Installing"

Installing wire harness for airbag from the triggering unit to the A-pillar connection point

WARNING

Danger of injury and material damage if airbag units are not handled correctly.

→ Always observe the safety regulations for handling airbag units →*691000 Safety regulations for handling airbag and belt tensioner units*



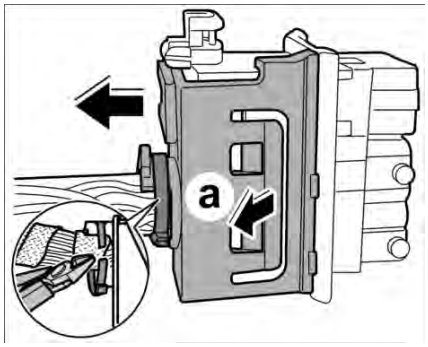
→ Remove ignition key. Disconnect battery. Route or isolate the ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided. →2706IN Working instructions after disconnecting the battery

→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

Note

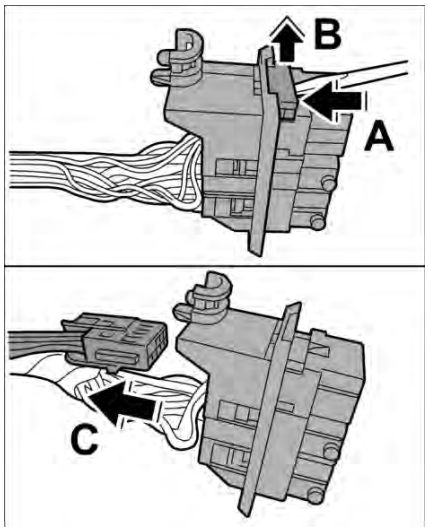
Allocation of lines - see wiring diagram.

Installation Location:



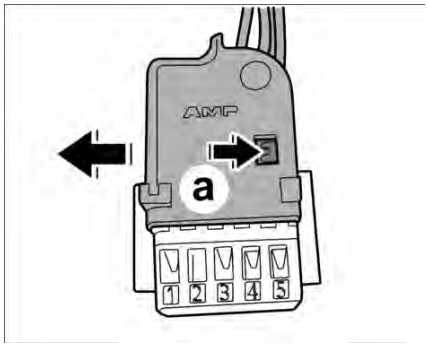
Connector overview for airbag wire harness, shown on the 911

3-4 - Plug connections between main wire harness and wire harness for door, left and right



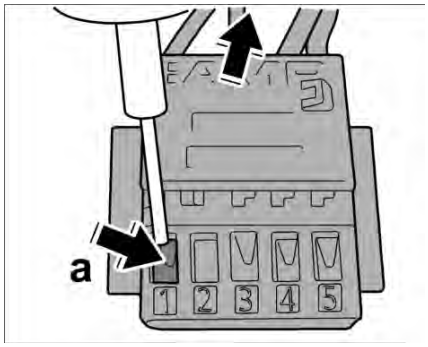
10 - Connector for airbag triggering unit

1. Release and disconnect plug connection for main wire harness to wire harness for door **-3 and 4-** . →973219 Removing and installing wire harness for door - chapter on "Removing"



Removing cap from connector housing.

2. Cut and remove tie-wrap for fixing the wire harness to the connector housing.
3. Release cap on both sides **-arrow a-** and remove from the connector housing.



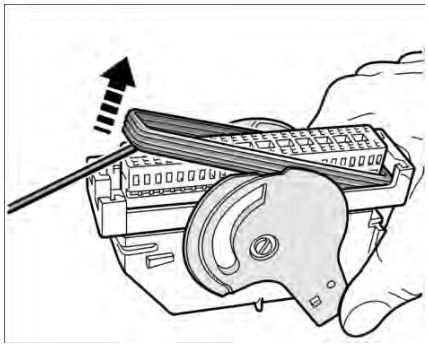
Removing connector from connector housing

4. Release locking mechanism on connector housing with a small screwdriver **-arrow A-** and remove **-arrow B-** .
5. Remove connector from connector housing **-arrow C-** .

Pushing down connector guide from the contact strip

6. Release connector guide on both sides **-arrow a-** and remove from the contact strip.

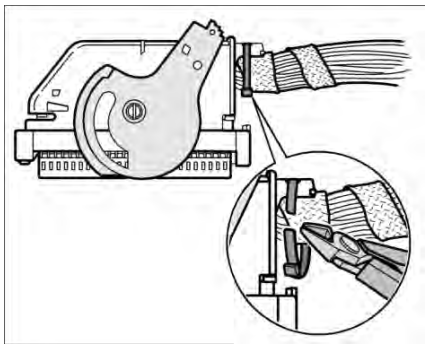
Pressing out contacts from the contact strip



Note

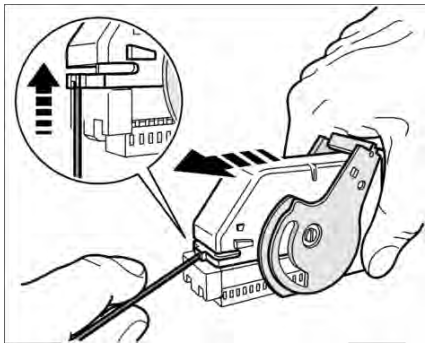
Allocation of lines - see wiring diagram.

7. Release contacts of the damaged lines using the **press-out tool 1575-1P** of the **press-out and unlocking tools for flat and round plug connections of all sizes NR.155** **-arrow a-** and pull out



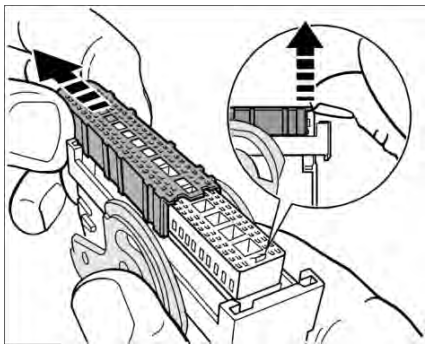
of the contact strip.

8. Cut off the contacts of the damaged lines, isolate them and secure them to the main wire harness with tie-wraps.
9. Release connector on triggering unit for airbag **-10-** and fold open the locking lever. →695319 Removing and installing triggering unit for airbag - chapter on "Removing"



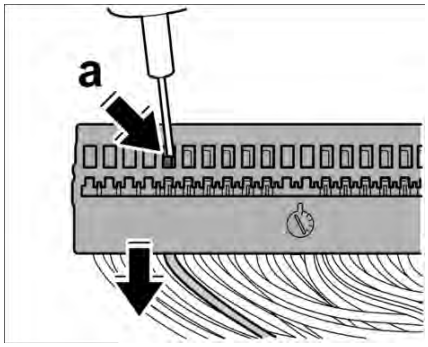
Levering out seal from connector housing

10. Using a small screwdriver, lever the seal out of the connector housing.



Removing tie-wrap at connector housing

11. Cut and remove tie-wrap for fixing the wire harness to the connector housing.

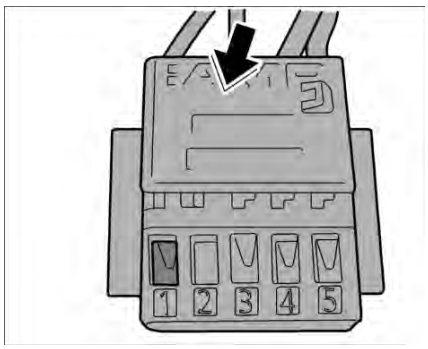


Removing connector housing from connector

12. Release connector housing with a small screwdriver, lift upwards and remove from connector.

Removing connector guide from connector

13. Lift connector guide and remove from connector.

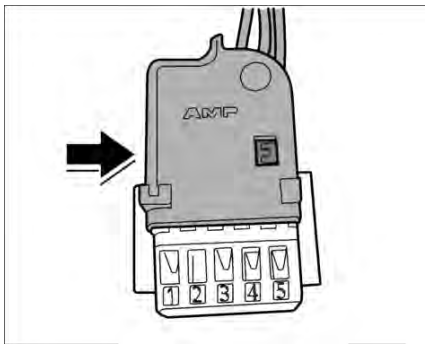


Pressing out the contacts

Note

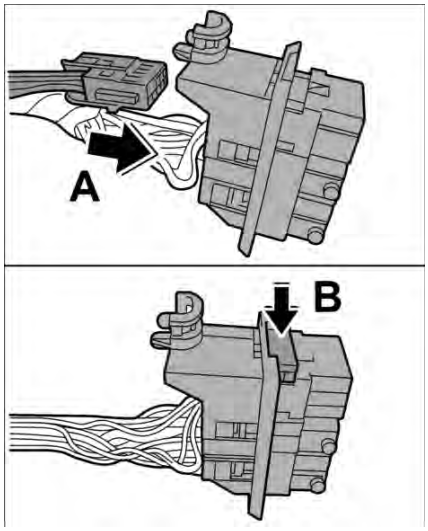
Allocation of lines - see wiring diagram.

14. Release contact of the damaged line using the **press-out tool 1575-1P** of the **press-out and unlocking tools for flat and round plug connections of all sizes NR.155** **-arrow a-** and pull out of the contact strip.
15. Cut off the contacts of the damaged lines, isolate them and secure them to the main wire harness with tie-wraps.



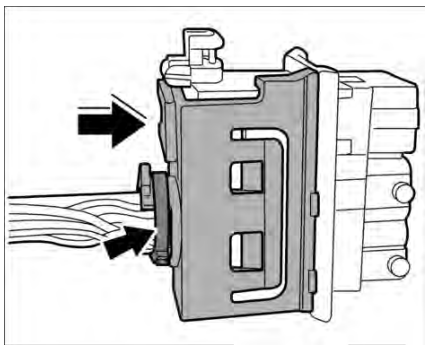
Pressing in contacts on the contact strip

Note



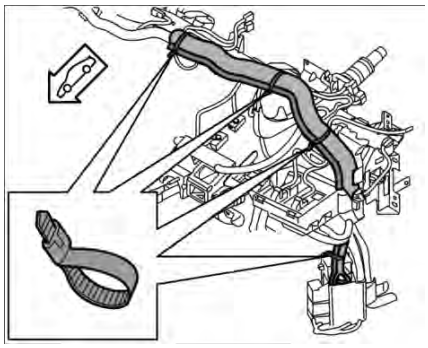
Allocation of lines - see wiring diagram.

16. Push new lines into the contact strip until the contacts are felt to engage.



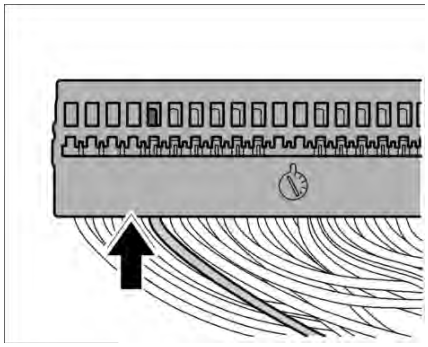
Pushing connector guide onto the contact strip

17. Push connector guide onto the contact strip until it is felt to engage.



Inserting connector into the connector housing

18. Insert connector into the connector housing **-arrow A-** .
19. Insert locking mechanism into the connector housing and press in **-arrow B-** until it is felt to engage.

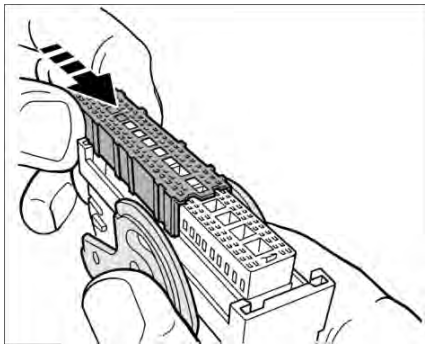


Pressing cap onto the connector housing

20. Press cap onto the connector housing until it is felt to engage.
21. Secure wire harness with a new tie-wrap **-arrow-** to the connector housing.

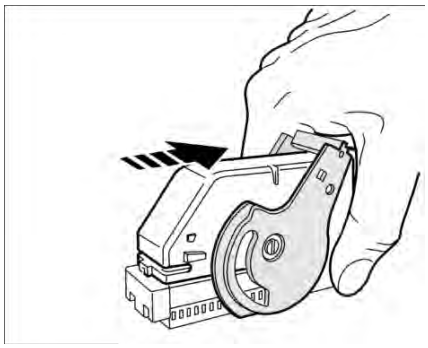
Securing wire harness to the main wire harness

22. Route the new wire harness along the main wire harness, guide it through existing cable ducts and tie it to the main wire harness using tie-wraps.



Pressing in the contacts

Note

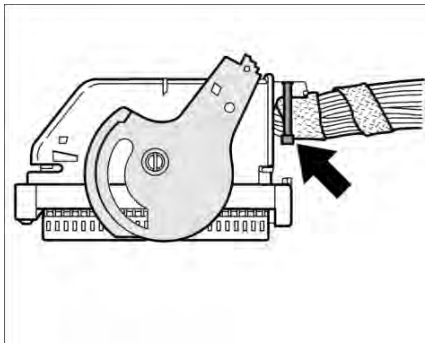


Allocation of lines - see wiring diagram.

23. Plug new line into the contact strip until the contact is felt to engage.

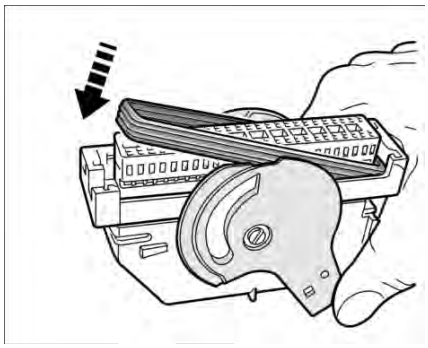
Pushing connector guide onto the connector

24. Push connector guide onto the connector until it is felt to engage.



Pushing connector housing onto the connector

25. Push connector housing onto the connector



25.1. Before fitting the connector housing, check for signs of damage, and replace if necessary. →*976600 Airbag warning light activated: seal in plug connection of triggering unit defective*

25.2. Push connector housing onto the connector until it is felt to engage.

Fitting tie-wrap at connector housing

26. Fasten wire harness with a new tie-wrap **-arrow-** to the connector housing.

Inserting seal of connector housing

27. Insert seal into the connector.

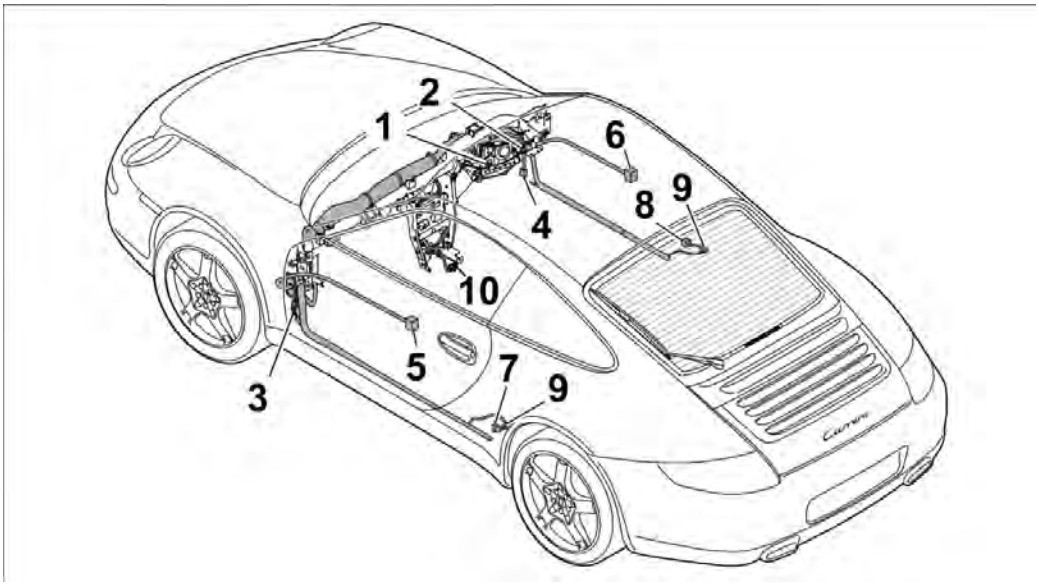
27.1. Before inserting the seal, check for signs of damage, and replace if necessary. →*976600 Airbag warning light activated: seal in plug connection of triggering unit defective*

27.2. Insert seal into the connector and press down as far as it will go. Check seal is seated properly.

28. Push on connector of triggering unit for airbag **-10-** until it is felt to engage, and lock it. →695319 Removing and installing triggering unit for airbag - chapter on "Installing"

Installing wire harness for airbag from the A-pillar connection point to the head airbag

WARNING



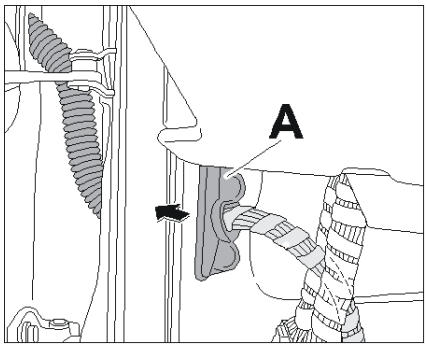
Danger of injury and material damage if airbag units are not handled correctly.

→ Always observe the safety regulations for handling airbag units *→691000 Safety regulations for handling airbag and belt tensioner units*

→ Remove ignition key. Disconnect battery. Route or isolate the ground strap so that all contact with a ground carrier (e.g. body, seat frame) is avoided. →2706IN Working instructions after disconnecting the battery

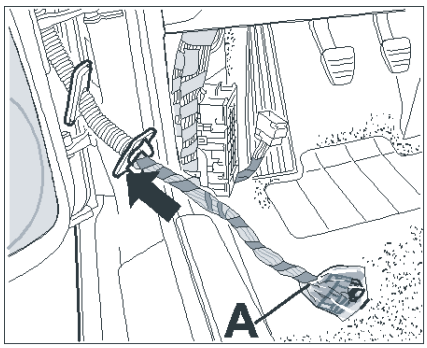
→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

Installation Location:



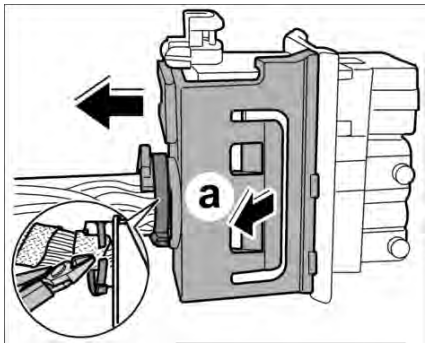
Connector overview for airbag wire harness, shown on the 911

3-4 - Plug connections between main wire harness and wire harness for left and right doors



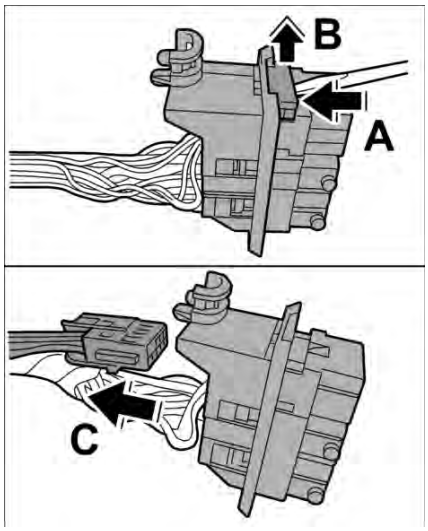
5-6 - Connector for head airbag, left and right

1. Release and disconnect plug connection for main wire harness **-3 and 4-** . →973219 Removing and installing wire harness for door - section on "Removing"
2. Release and pull off connector on head airbag on the left **-5-** and right **-6-** . →696619 Removing and installing head airbag - section on "Removing"
3. Cut off the head airbag connector on the damaged wire harness, insulate it and secure it to the door wire harness with tie-wraps.



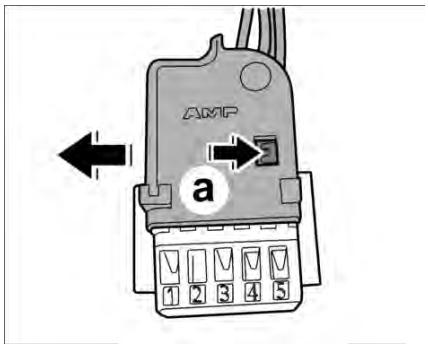
Removing rubber sleeve

4. Remove rubber sleeve **-A-** and carefully pull it and the door wire harness out of the A-pillar.



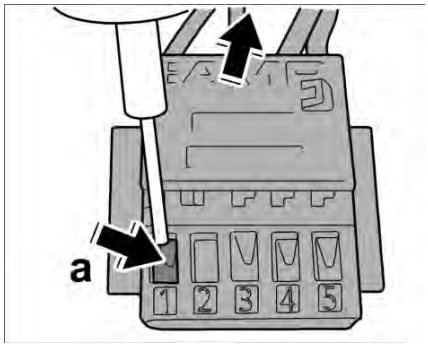
Removing foil hose

5. Push rubber sleeve back slightly **-Arrow-** , remove adhesive tape and pull off foil hose **-A-** .



Removing cap from connector housing.

6. Cut and remove tie-wraps for fixing the wire harness to the connector housing.
7. Release cap on both sides **-Arrow a-** and remove from the connector housing.



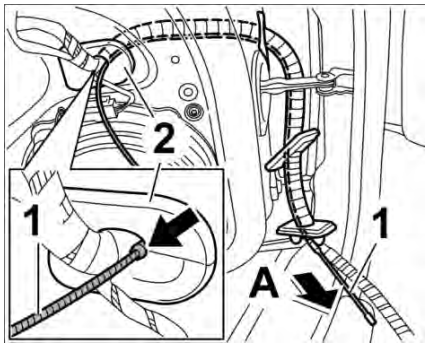
Removing connector from connector housing

8. Release locking mechanism on connector housing with a small screwdriver **-Arrow A-** and remove it **-Arrow B-** .
9. Pull connector out of the connector housing **-Arrow C-** .

Pushing down connector guide from the contact strip

10. Release connector guide on both sides **-Arrow a-** and slide down from the contact strip.

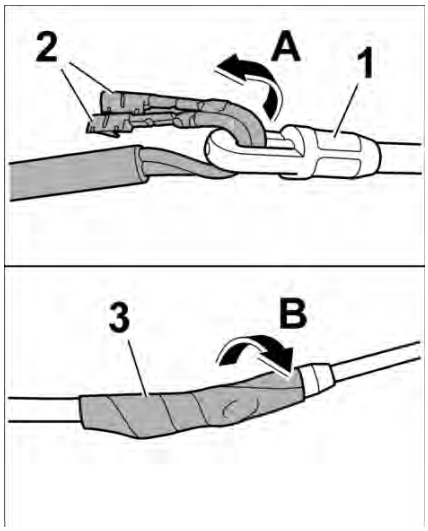
Pressing out contacts from the contact strip



Note

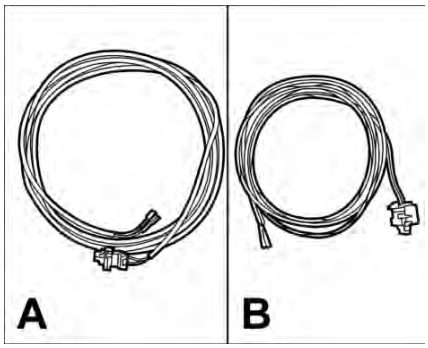
Allocation of lines - see wiring diagram.

11. Release contacts of the damaged lines using the **press-out tool 1575-1P** of the **press-out and unlocking tools for flat and round plug connections of every size NR.155** (**-Arrow a-**) and pull out of the



contact strip.

12. Cut off the contacts of the damaged lines, insulate them and secure them to the main wire harness with tie-wraps.



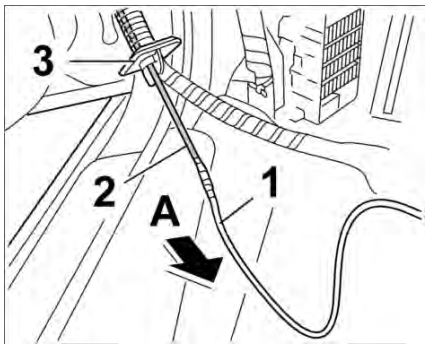
Sliding wire puller through the sleeve

13. Insert wire puller **-1-** with the flexible end on the right side **-Arrow-** into the rubber sleeve **-2-** . Coat the wire puller **-1-** with soapy water and slide it through the rubber sleeve **-2-** (**-Arrow A-**). →976623 Installing wire harness for airbag - section on "Tools and materials"

Securing new lines on the wire puller

Wire harness spare part

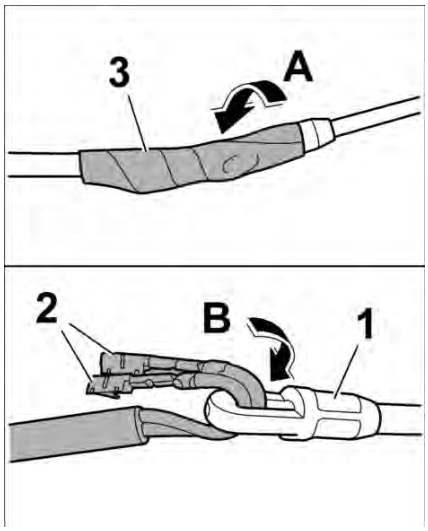
Note



Two different wire harnesses are available as spare parts, depending on the model year. Up to model year 05, the wire harness **-A-** comes with insulation as standard. From model year 2006 onwards, the wire harness **-B-**

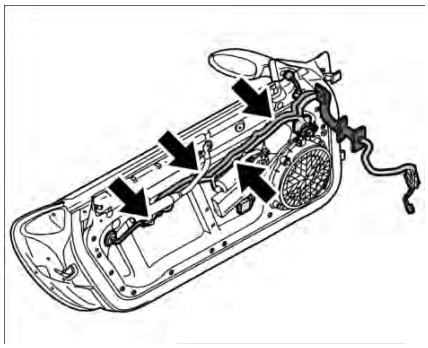
no longer has this insulation.

Note



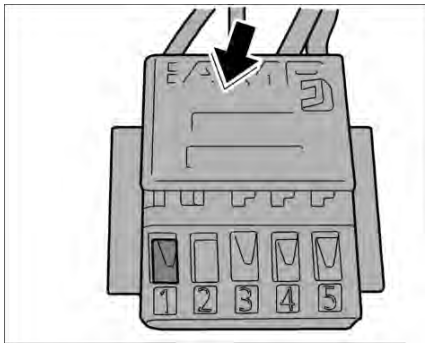
Observe wrapping direction of adhesive tape! To keep the resistance as low as possible when pulling the new wire harness through, always start wrapping the tape around at the new wire harness and end at the wire puller.

14. Push new lines **-2-** through the eye in the back of the wire puller **-1-** (**-Arrow A-**), fold them over and secure with adhesive tape **-3-** (**-Arrow B-**).



Pulling new wire harness through the rubber sleeve

15. Coat the new wire harness **-2-** with soapy water and use the wire puller **-1-** to pull it through the rubber sleeve **-3-** (**-Arrow A-**). Push carefully on the new wire harness at the same time to make it easier to pull the lines through.

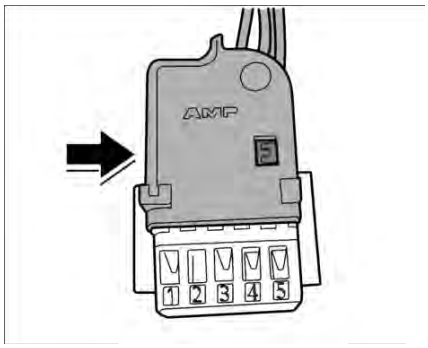


Releasing new line on wire puller

16. Remove adhesive tape **-3-** (**-Arrow A-**) and carefully pull the lines **-2-** out of the eye on the wire puller **-1-** (**-Arrow B-**). Make sure that the insulation on the new lines is not damaged.

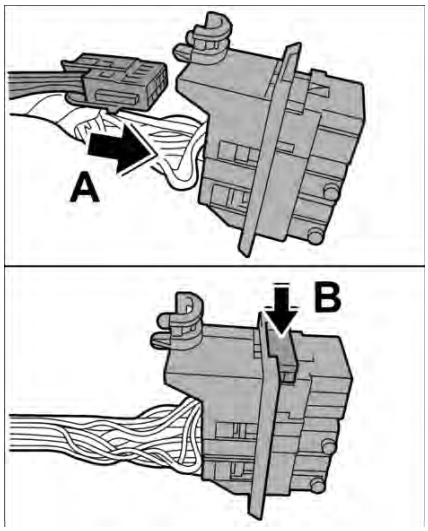
Securing line for head airbag at door sub-frame

17. Route new wire harness along the door wire harness and secure at the standard attachment points on the door sub-frame.
18. Push on connector of new wire harness for head airbag at the left **-5-** and right **-6-** until it is felt to engage. →696619 Removing and installing head airbag - section on "Installing"



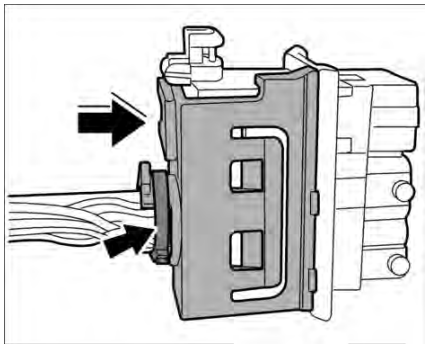
Pressing in contacts on the contact strip

Note



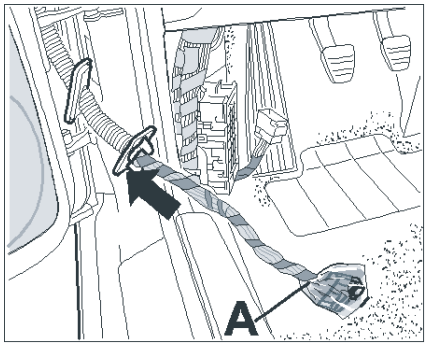
Allocation of lines - see wiring diagram.

19. Push new lines into the contact strip until the contacts are felt to engage.



Pushing connector guide onto the contact strip

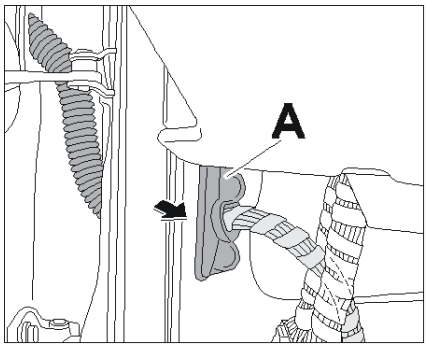
20. Push connector guide onto the contact strip until it is felt to engage.



Inserting connector into the connector housing

21. Slide connector into the connector housing **-Arrow A-** .
22. Insert locking mechanism into the connector housing and press in **-Arrow B-** until it is felt to engage.

Pressing cap onto the connector housing



23. Press cap onto the connector housing until it is felt to engage.
24. Secure wire harness to the connector housing with a new tie-wrap **-Arrow-** .

Attaching foil hose

25. Push the rubber sleeve back slightly **-Arrow-** , then pull the foil hose (500 mm in length) over the door wire harness up to the rubber sleeve and secure in this position with insulating tape.

    Pull foil hose tight and wrap it tightly over its entire length from the rubber sleeve up to the connector **-A-** of the door wire harness with insulating tape.

Fitting rubber sleeve

Note

Route the door wire harness carefully through the A-pillar in the vehicle interior, so that the foil hose and the door wire harness are not damaged!

26. Push wire harness for door through the A-pillar and fit rubber sleeve **-A-** . Check rubber sleeve for correct installation position.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**

- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

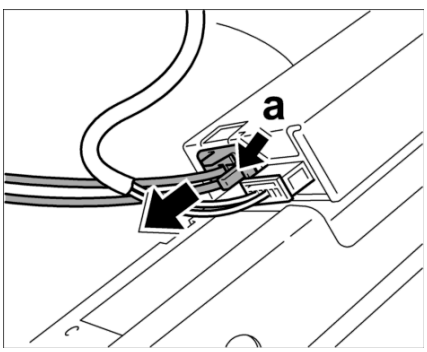
Installing optical waveguide

Disconnecting optical waveguide

Note

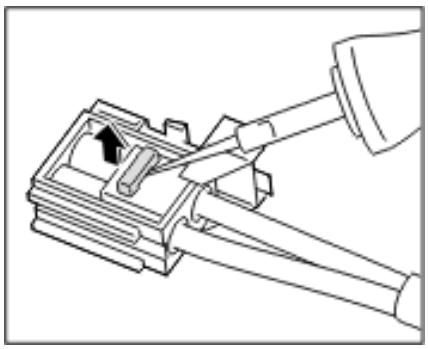


Observe the general information on optical waveguides. →*General information on optical waveguides - MOST bus*

ATTENTION

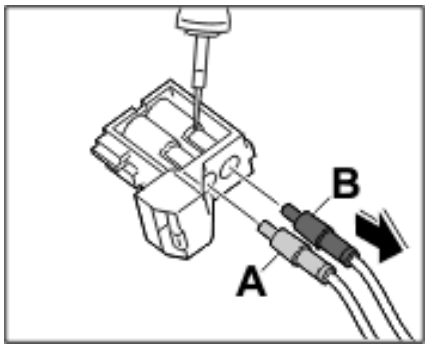
Risk of destruction when removing electric components with the ignition on.

→ Switch off ignition and remove ignition key.



1.

Disconnecting connector for optical waveguide



2. Release the connectors of the damaged optical waveguides on the affected components **-Arrow a-** and disconnect them. The illustration shows the connector on the CD changer as an example.
3. Cut off the connector of the damaged optical waveguide, isolate it and tie it to the main wire harness.

Removing and installing optical contacts on connector side

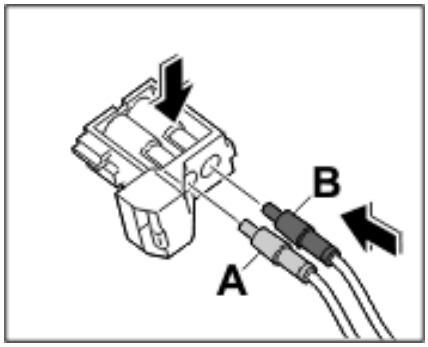
Unlocking secondary locking of the optical contacts (connector side)

1. Open the secondary locking mechanism using the **press-out and unlocking tools for tab and round plug connectors of all sizes NR.155**. Insert the tool in the opening provided and lift the locking mechanism. The locking mechanism engages in the upper position.

Unlocking primary locking of the optical contacts (connector side)

2. Position the **press-out and unlocking tools for tab and round plug connectors of all sizes NR.155** on the primary locking mechanism and lift the locking mechanism.

A - Optical contact, grey



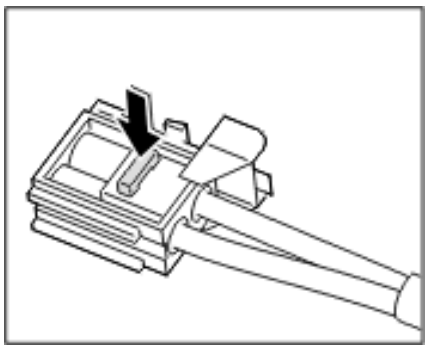
B - Optical contact, black

3. Carefully pull on the optical waveguide **-A and B-** in **-direction of arrow-** . If it is not possible to pull out the optical waveguide, check again if the secondary locking mechanism is completely released and if the primary locking mechanism is raised sufficiently.

Perform visual inspection of locking mechanisms, connector housings and contacts for possible damage, and exchange the damaged parts, if necessary.

Installing optical contacts on connector side

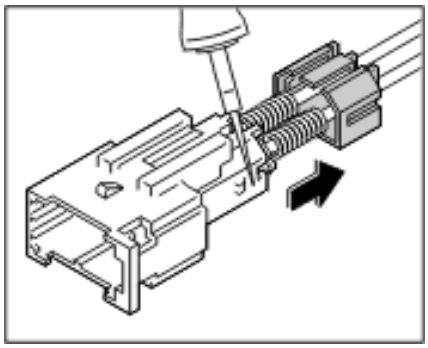
Remove the dust boot right before plugging.
Check the proper condition of the contacts.



Locking primary locking of the optical contacts (connector side)

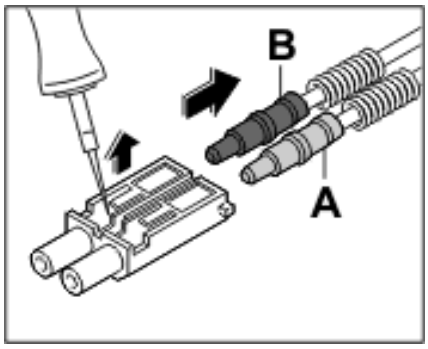
1. Insert the optical contact **-A and B-** in the connector until it engages audibly.

A - Optical contact, grey



B - Optical contact, black

Locking secondary locking of the optical contacts (connector side)



2. Lock the secondary locking and check the optical contacts for tightness.

Removing and installing optical contacts on socket side

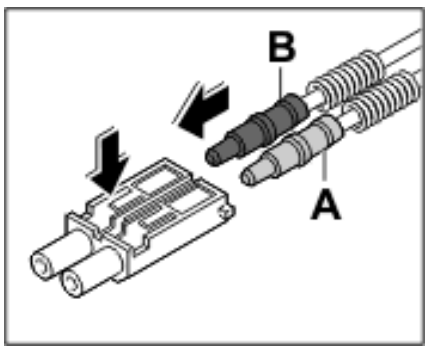
Unlocking spring cap of the optical contacts (on the socket side)

1. Release the spring cap on both sides using the **press-out and unlocking tools for tab and round plug connectors of all sizes NR.155** and remove it.
2. Remove optical waveguide module from connector.

Unlocking contact locking of the optical contacts (on the socket side)

3. Position the **press-out and unlocking tools for flat-type and round plug connectors of all sizes NR.155** for releasing the contact locking mechanism of the optical waveguide module and lift up the locking mechanism.

A - Optical contact, grey



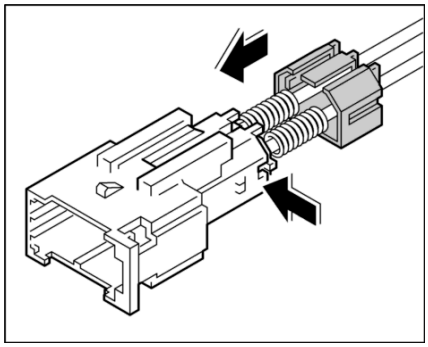
B - Optical contact, black

4. Carefully pull on the optical waveguide **-A and B-** in **-direction of arrow-** . If it is not possible to pull out the optical waveguide, check again if the locking mechanism is completely released.

Perform visual inspection of locking mechanisms, connector housings and contacts for possible damage, and exchange the damaged parts, if necessary.

Installing optical contacts on socket side

Remove the dust boot right before plugging.
Check the proper condition of the contact.
At a force of 10 N (7.5 lb.) the springs installed in the connection point will be compressed. This leads to an increase in attenuation, which could lead to system impairment and system failure. Therefore a maximum force of 10 N (7.5 lb.) may be used to pull on optical waveguides at connection points.



Locking contact locking of the optical contacts (on the socket side)

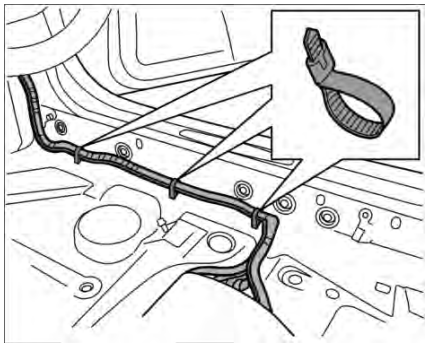
1. Insert optical contact **-B-** into the optical waveguide module until it is felt to engage, and check the optical contact is seated securely.

A - Optical contact, grey

B - Optical contact, black

2. Insert optical waveguide module into the connection point on the socket side.

Locking spring cap of the optical contacts (on the socket side)



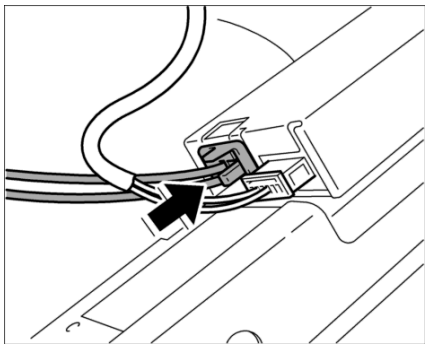
3. Slide the spring cap on the connection point until it can be felt to engage **-arrow-** .

Installing optical waveguide

Note

Observe the general information on optical waveguides. →*General information on optical waveguides - MOST bus*

1. Cut off the opticsl contacts of the damaged optical waveguide, isolate it and tie it to the main wire harness.



Tying optical waveguide to main wire harness

Note

The range of spare parts available for optical waveguides depends on the vehicle equipment. Depending on the vehicle equipment, there is a specific set containing the individual optical waveguides.
Select the required optical waveguide and remove it from the set.

2. Route the new optical waveguide along the main wire harness, guide it through the existing cable ducts and tie it to the main wire harness using tie-wraps.

Connecting connector for optical waveguide

3. Connect the connectors for the new optical waveguide to the affected parts until the connectors are felt to engage. The illustration shows the connector on the CD changer as an example.
4. Read out fault memory and erase if required.
5. Check operation of audio components.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**

- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Installation Location:

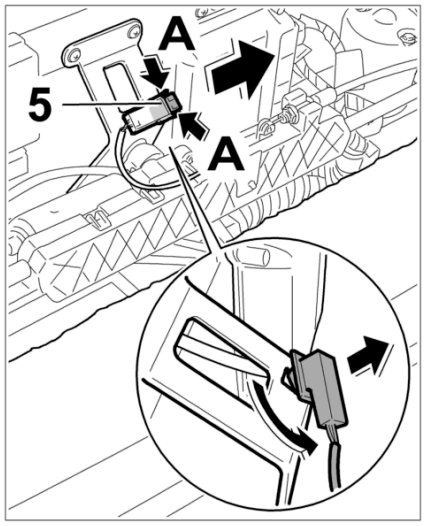
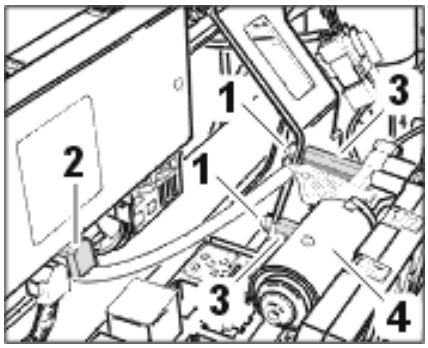
Unscrewing retaining bracket



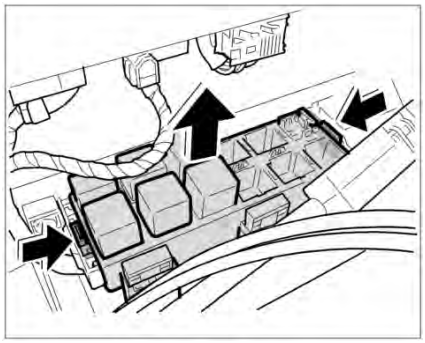
1. Unscrew the four fastening screws **-4-** and the fastening nut **-5-** and lift the retaining brackets for the DME control module and the relay carrier.

Unscrewing fastening nuts



2. Unscrew the two fastening nuts for the relay carrier and disengage the relay carrier from the retaining bracket.

Removing relay carrier for cabriolet

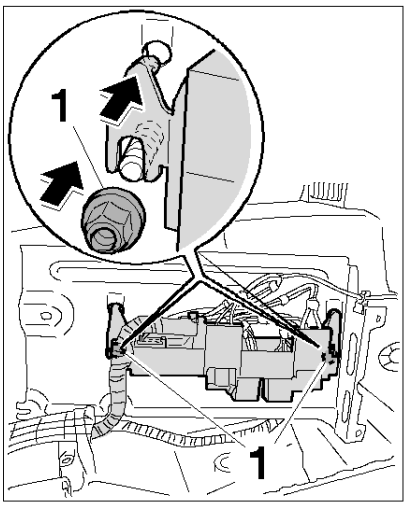


Disconnecting plug connection

1. Disengage electric plug connection for microswitch **-5-** on holder, release **-A-** and disconnect

Unscrewing fastening nuts

2. Loosen the two fastening nuts **-1-** , release electric plug connection **-2-** and unplug from control unit.
3. Remove motor together with drive to the rear out the bracket.



Releasing relay carrier

4. Release both locking hooks and pull the relay carrier up and out of the retaining frame.

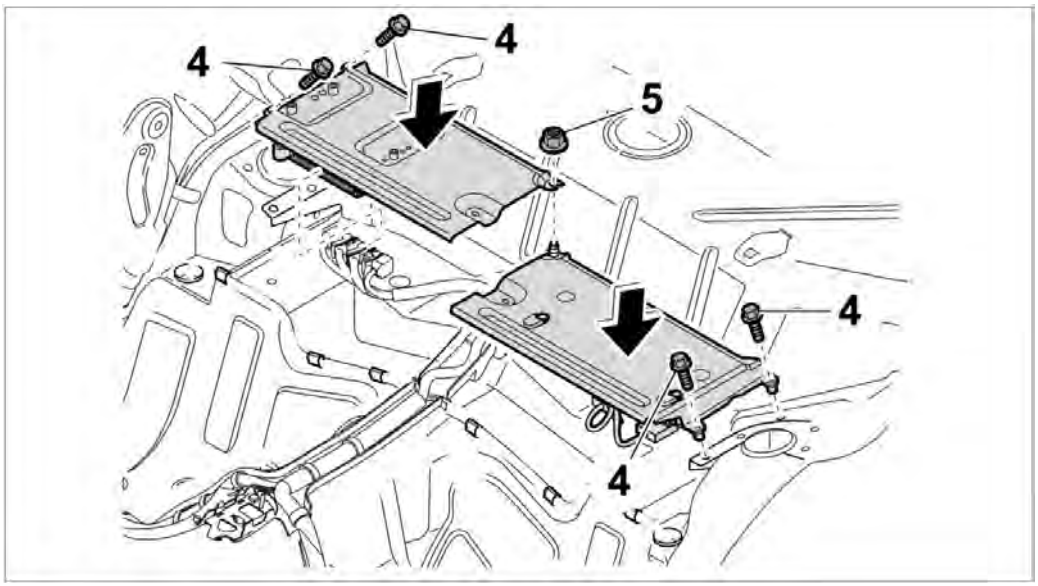
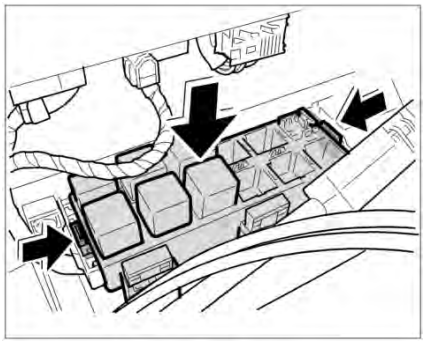
Installing relay carrier



Installing relay carrier

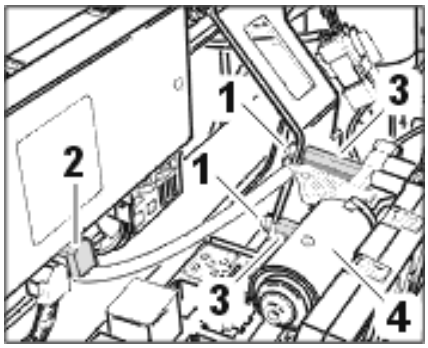
Engaging and screwing down relay carrier

1. Engage relay carrier on retaining bracket and screw down with the two fastening screws **-1-** . → **Tightening torque: 4.5 (3.5 ftlb.) Nm**



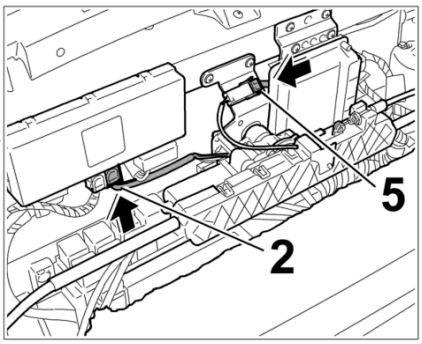
Installation Location:

Screwing down retaining brackets



2. Place retaining brackets on the body and screw down with the four fastening screws **-4-** and the fastening nut **-5-** . →**Tightening torque: 2.2 (1.5 ftlb.) Nm** →**Tightening torque: 4.5 (3.5 ftlb.) Nm**

Installing relay carrier for cabriolet



Engaging relay carrier

1. Push and engage the relay carrier into its retaining frame.

Tightening fastening nuts

2. Push motor for convertible top compartment lid together with potentiometer onto the bracket and screw tight with the fastening nuts **-1-** . →**Tightening torque: 10 (7.5 ftlb.) Nm**

Plugging in electrical plug connections

3. Plug in the electric plug connection for potentiometer **-2-** at control unit until the connector is felt to engage.
4. Plug in the electric plug connection for microswitch **-5-** and engage on the bracket.

64 IN General information on installing and removing car windows - as of MY 2005

- Removing glass with cutting wire separator

Tools

Designation	Type	Number	Explanation	
Glass separating tool	commercially available tool	VAG 1474 B		

top of page

Removing glass with cutting wire separator

Danger of injury when working on car windows

DANGER

Danger of cut injuries when removing and installing car windows!

- **Cutting out glued car windows may lead to cut injuries to the skin and eyes due to flying glass splinters and may result in cut injuries from the knife of the cutter.**

→ Always wear protective gloves when working on car windows.

→ Wear protective goggles when cutting out car windows.

→ Only replace the cutting knife with the power supply disconnected so that the cutter is not switched on accidentally.

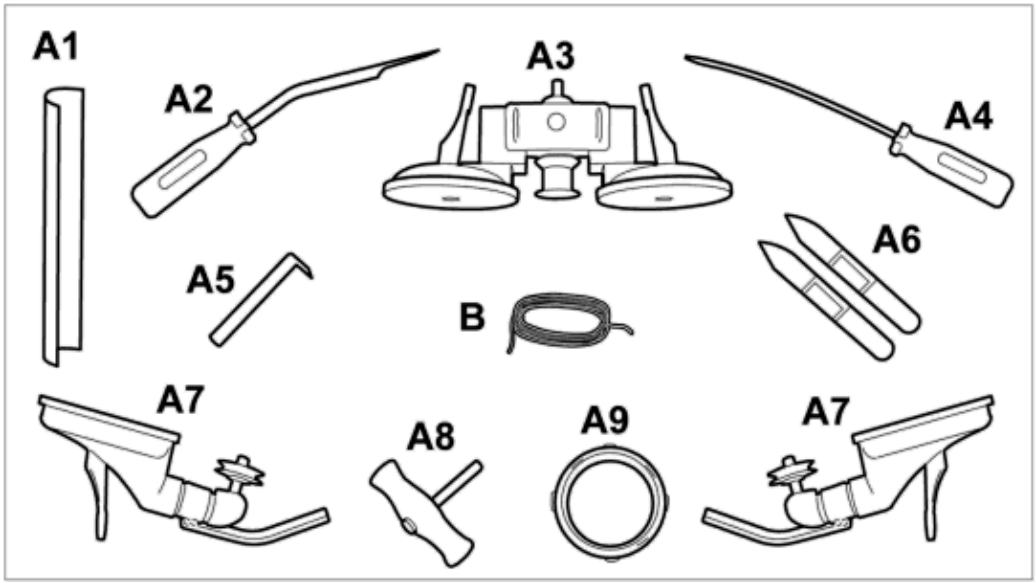
Material damage when removing the glass from car windows

ATTENTION

Danger of damage to the label with the vehicle identification number!

- **Danger of paint damage and damage to the label with the vehicle identification number if windscreen is removed incorrectly!**

→ When cutting out the windscreen, ensure that the label with the vehicle identification number is not damaged!



Removing glass with cutting device - wire separator

Note

- *The following instructions describe the general procedure for removing car windows with the glass separating tool VAG 1474 B.*
- *Information on procedures relating to specific vehicles can be obtained from the instructions in the corresponding chapters in the Technical Manual.*

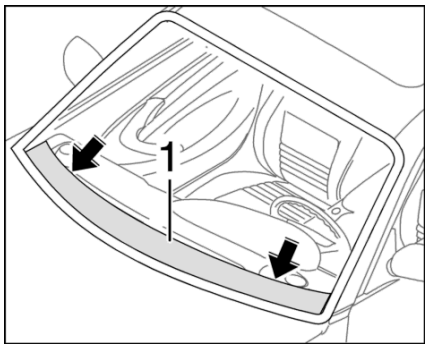
Note

- *It is generally possible to remove the windscreen with the cutting wire and the optional cutting thread contained in the tool set.*
- *In contrast to cutting threads, however, the cutting wire has the following disadvantages:*
- *Danger of injury when tearing off the cutting wire.*
- *Danger of damage to materials on paint surfaces and interior equipment parts.*
- *For the reasons outlined above we recommend using the cutting thread.*

Glass separating tool

A **Glass separating tool VAG 1474 B** 1)
B Cutting thread
A1 Guide rail
A2 Cutting tool (wire holder)
A3 Spooling device
A4 Awl
A5 Guide rail
A6 Filler
A7 Steering roller with arm bracket
A8 Handle
A9 Square cutting wire
1) Contains component set A1-A9 and protective film for dashboard

Applying protective film to the dashboard



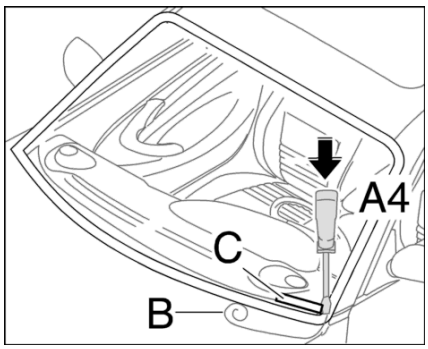
Note

- *In order to guarantee an optimum fastening intake grip, it is advisable to clean the inside of the glass before removal.*

Note

- *The film protects the damping mat against damage when removing the glass.*

1. Cleaning glass on the inside



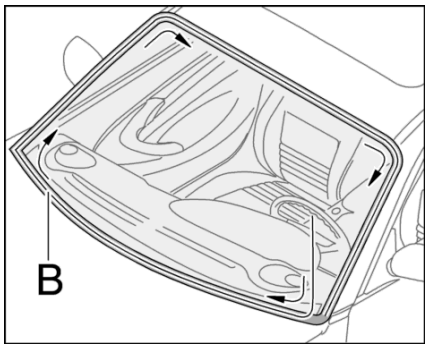
Applying protective film to the dashboard

2. Apply protective film to the dashboard. Select the appropriate film **-1-** and insert between windscreen and damping mat.

Guiding cutting thread into the passenger compartment

Note

- *In order to prevent damage, make sure that the vehicle identification number is completely covered by the protective film when pushing through the adhesive bead.*
- *Warm awl beforehand with the hot-air gun for pushing this through.*

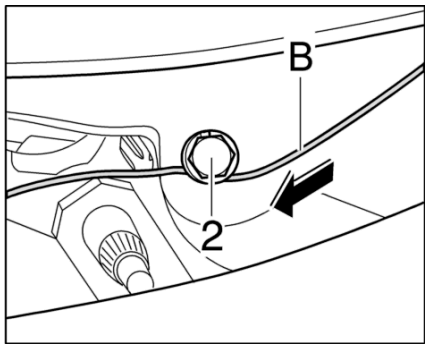


Guiding cutting thread into the passenger compartment

1. Push through adhesive bead on the glass on the edge of the vehicle identification number **-C-** with the awl **-A4-** from the inside to the outside.
2. Pass cutting thread **-B-** through the eyelet on the awl **-A4-** .
3. Pull cutting thread **-B-** into the passenger compartment.
4. Pull cutting thread **-B-** out of the awl **-A4-** .
5. Draw cutting thread **-B-** approx. 1m into the passenger compartment.

Guiding cutting thread into the gap in the glass

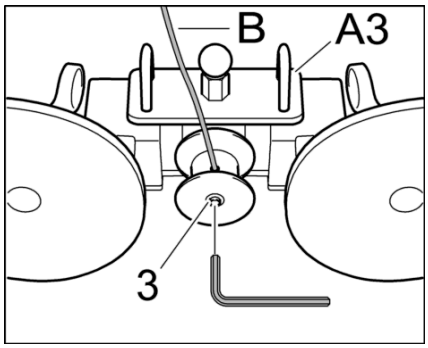
Note



- *The cutting thread should be positioned under the rim as far as possible. The sealing lip must be raised slightly in the upper part of the glass in order to pull the cutting thread through.*

Guiding cutting thread into the gap in the glass

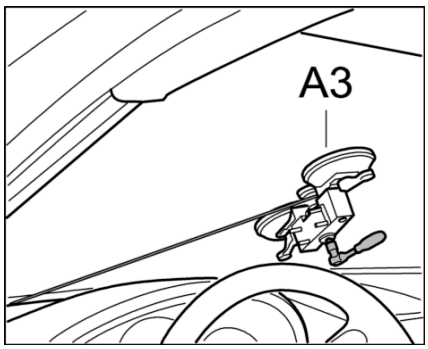
1. Pull cutting thread **-B-** in the direction of the arrow through the gap between the glass and the body. Use filler if necessary.



Attaching cutting thread to the body

Attaching cutting thread to the body

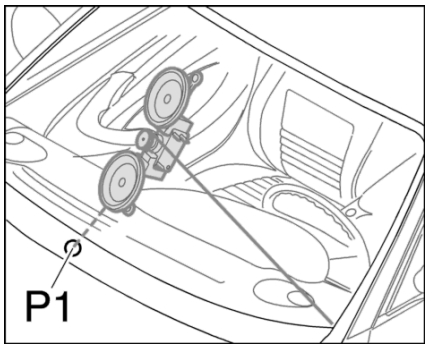
1. Attach the loose end of the cutting thread **-B-** firmly at a suitable point on the body with the fastening screw **-2-** of a component (e.g. wiper motor fastening). To do this, unscrew the fastening screw, wind the cutting thread **-B-** around the screw and tighten the fastening screw again.



Attaching cutting thread to the spooling device

Attaching cutting thread to the spooling device

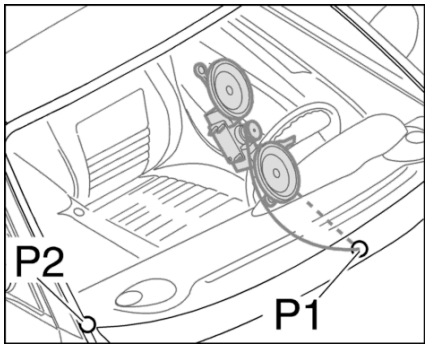
1. Undo clamping screw **-3-** .
2. Insert cutting thread **-B-** into the bore on the spooling device **-A3-** .
3. Attach cutting thread **-B-** firmly with the clamping screw **-3-** .



Installing spooling device and deflection rollers on the glass

Installing spooling device and deflection rollers on the glass

1. Position spooling device **-A3-** diagonally in the centre of the glass.
2. Press spooling device **-A3-** with the fastening intakes firmly against the glass.
3. Fix fastening intake onto the glass by moving the actuating lever.

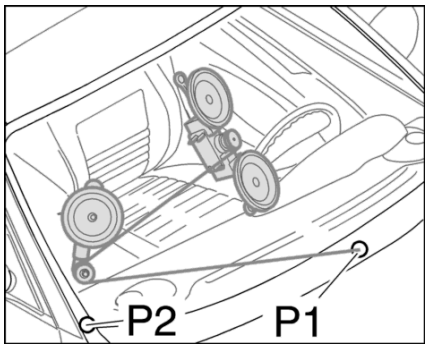


Separating glass as far as P1

Separating glass as far as P1

1. Separate glass by spooling the cutting thread on the spooling device as far as point **-P1-** .

Repositioning spooling device



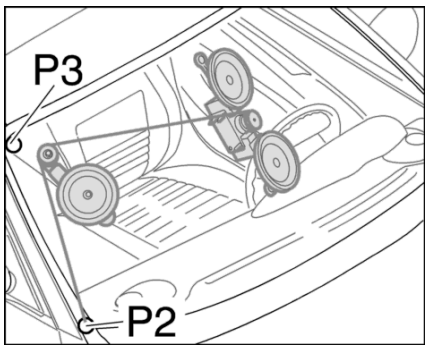
Repositioning spooling device

1. Release spooling device.
2. Release the lower fastening intake on the spooling device.
3. Pull cutting thread through onto the other side of the fastening intake.
4. Fix fastening intake onto the glass by moving the actuating lever.

Separating glass as far as P2

Note

- *The fastening force can be increased by moistening the fastening intake.*

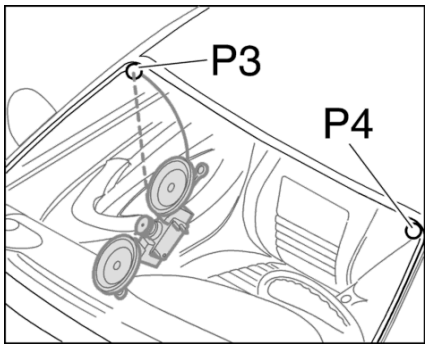


Separating glass as far as P2

1. Position deflection roller in the lower right corner.
2. Press deflection roller with fastening intake firmly against the glass.
3. Fix fastening intake onto the glass by moving the actuating lever.
4. Pass cutting thread over the deflection roller onto the spooling device.
5. Separate glass by spooling the cutting thread on the spooling device as far as point **-P2-** .

Separating glass as far as P3

Note

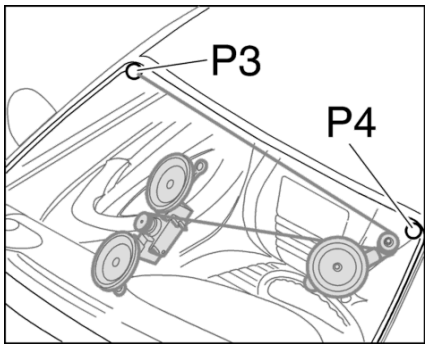


- *The fastening force can be increased by moistening the fastening intake.*

Separating glass as far as P3

1. Release spooling device.
2. Position deflection roller in the upper right corner.
3. Press deflection roller with fastening intake firmly against the glass.
4. Fix fastening intake onto the glass by moving the actuating lever.
5. Pass cutting thread over the deflection roller onto the spooling device.
6. Separate glass by spooling the cutting thread on the spooling device as far as point **-P3-** .

Repositioning spooling device



Repositioning spooling device

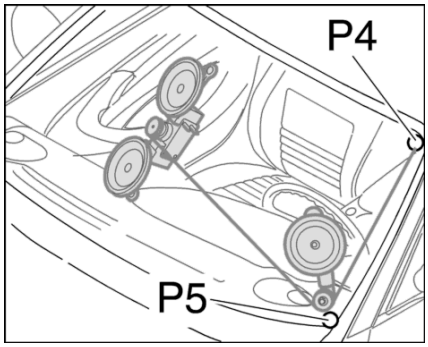
1. Release spooling device.
2. Release the upper fastening intake on the spooling device.
3. Pull cutting thread through onto the other side of the fastening intake.
4. Fix fastening intake onto the glass by moving the actuating lever.

Separating glass as far as P4

Note

- *The fastening force can be increased by moistening the fastening intake.*

Separating glass as far as P4

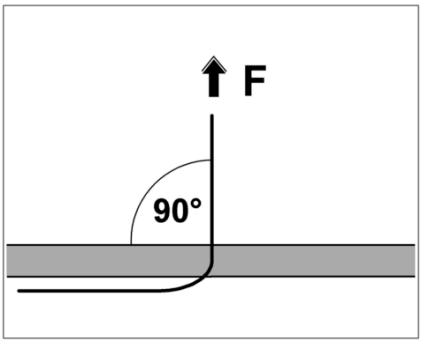


1. Position deflection roller in the upper left corner.
2. Press deflection roller with fastening intake firmly against the glass.
3. Fix fastening intake onto the glass by moving the actuating lever.
4. Pass cutting thread over the deflection roller onto the spooling device.

5. Separate glass by spooling the cutting thread on the spooling device as far as point **-P4-** using the guide rails.

Separating glass as far as P5

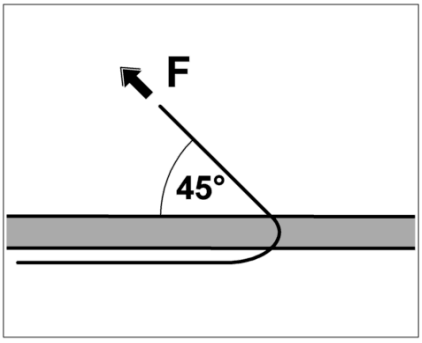
Note



- *The fastening force can be increased by moistening the fastening intake.*

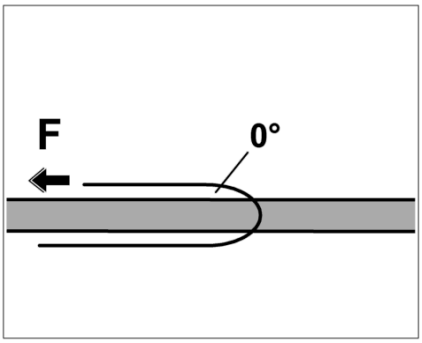
Separating glass as far as P5

1. Release spooling device.
2. Position deflection roller in the lower left corner.
3. Press deflection roller with fastening intake firmly against the glass.
4. Fix fastening intake onto the glass by moving the actuating lever.
5. Pass cutting thread over the deflection roller onto the spooling device.
6. Separate glass by spooling the cutting thread on the spooling device as far as point **-P5-** .
7. Remove the windscreen.



Cutting power when removing glass with cutting thread

High cutting power



Note

- *The power for separating the glass is weaker when the cutting thread is deflected to its maximum point. An angle greater than 90° should be avoided.*

Average cutting power

Unfavourable angle (strong traction required)

Low cutting power

Favourable angle (average traction required)
Optimum angle (minimum traction required)

- Safety instructions for installation work

top of page

Safety instructions for work on car windows

Danger of injury when working on car windows

 DANGER

Danger of cut injuries when removing and installing car windows!

- **Cutting out glued car windows may lead to cut injuries to the skin and eyes due to flying glass splinters and may result in cut injuries from the knife of the cutter.**

→ Always wear protective gloves when working on car windows.

→ Wear protective goggles when cutting out car windows.

→ Only replace the cutting knife with the power supply disconnected so that the cutter is not switched on accidentally.

Material damage when removing the glass from car windows

 ATTENTION

Danger of damage to the label with the vehicle identification number!

- **Danger of paint damage and damage to the label with the vehicle identification number if windscreen is removed incorrectly!**

→ When cutting out the windscreen, ensure that the label with the vehicle identification number is not damaged!

Material damage when inserting the glass into car windows

 ATTENTION

Danger of material damage if specified curing time of adhesive is not observed!

- **There will not be a proper adhesive bond if the prescribed curing time of the adhesive is not observed!**

→ The vehicle must not be used until the curing time has elapsed.
→ Curing time: 3 hours
→ Temperature: at least 10°C
→ Fixing time: approx. 1 hour

top of page

Safety instructions for installation work

Safety instructions for airbag system

 ATTENTION
Danger of injury due to unintentional activation of airbag units!

- **Serious injury due to unintentional activation of airbag units!**

→ The ground strap of the battery must be disconnected during work on the airbag system and alignment bench jobs when the body is being repaired!
→ After the battery is disconnected, assembly work or work on the vehicle with a hammer or similar tools must not be started until after a waiting period of 1 minute!

Safety instructions for sliding roof

 ATTENTION
Danger of material damage to seats!

- **Danger of damage to the seats during the removal and fitting of the sliding roof frame!**

→ Fold the rear seat assembly forward and tip the front seat backrest backwards during the removal and fitting of the sliding roof frame.

ATTENTION

Damage to rear water drainage channel or sliding roof mechanism!

- **Damage to rear water drainage channel or to the sliding roof mechanism when the sliding roof panel is removed and when moving the sliding/tilting roof trim.**

→ The sliding roof frame must not be moved to the "Open" position when the sliding roof panel has been removed.

→ The sliding/tilting roof trim must be shifted without the use of force.

Safety instructions for the heat shield

ATTENTION

The installation of deformed heat shields will cause damage!

- **The installation of deformed heat shields will cause damage due to parts heating up!**

→ Damaged or distorted heat shields must be straightened or replaced.

→ Check heat shields for deformation, fixing of the aluminium braided cord, tears and missing or damaged fixing tabs.

→ After fitting the bumper, check heat shields and aluminium braided cord for leaks.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

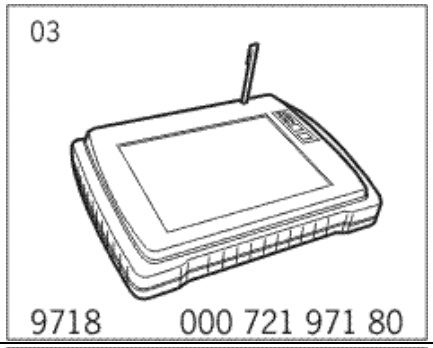
- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

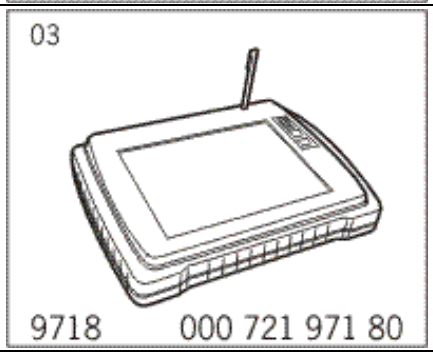
→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y**





materiales.

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

General warning notes

General warnings for handling airbag and belt tensioner units

 ATTENTION

Danger of injury and material damage if airbag unit is not handled correctly!

- **Triggering of airbag unit!**

→ The airbag units are pyrotechnical items in hazard class T 1!

→ Handling, transport and storage of these units must conform to hazardous goods regulation and explosives legislation!

→ The listed statutory requirements refer to the Federal Republic of Germany. The relevant valid regulations must be observed in all other countries. Enquire of the importer for the country concerned!

→ The commencement of work with pyrotechnical items must be reported 14 days in advance to the Trade Supervisory Office (responsible authority)!

→ Airbag units must only be dispatched in transport packaging officially approved for that purpose!

→ Internally and otherwise, they must always be transported in the luggage compartment or cargo hold of a vehicle using the above-mentioned transport packaging!

→ They must not be transported in the passenger compartment!

→ Airbag units must be stored in accordance with the second ordinance of the explosives legislation!

→ This ordinance stipulates that small quantities of materials and items may be stored at certain locations without special storage approval!

→ Airbag units must be kept in a locked place!

→ When storing airbag units, ensure that the airbag opening faces upwards (risk of injury caused by inflation of the airbag units in the event of accidental ignition)!

→ Airbag units must be stored in a dry place and must not be stored together with other hazardous goods (varnishes, etc.)!

→ Loose airbag units or airbag units located in a removed steering wheel must never become the actual (physical) property of the customer!

→ The possession of loose airbag units not installed in the vehicle is not permissible in the private sector!

→ Airbag units may become the property of the customer only when installed in the vehicle!

Warnings about assembly and straightening work

 ATTENTION

Danger of personal injury and material damage as a result of malfunction of the airbag system!

- **Malfunction of the airbag system**

→ Never drive with an airbag triggering unit that has not been taught.
→ The airbag triggering unit must be taught using the **PIWIS Tester 97180**! Until the airbag triggering unit has been taught, the warning light lights up continuously.
→ Inspection and assembly work must only be carried out by specialist staff!
→ Before working on the airbag system and also when working on neighbouring parts where there is a risk because live parts are close to the airbag system, always implement the following safety measures:
→ Remove ignition key.
→ Disconnect and cover the negative terminal of the battery.
→ After the battery is disconnected, assembly work or work on the vehicle with a hammer or similar tools must not be started until after a waiting period of 1 minute! This is necessary in order to interrupt the power supply to the airbag system and to ensure it is not triggered accidentally!
→ Airbag units must be fitted immediately after being removed from their storage location!
→ Airbag units must never be left lying around unattended!
→ If work is interrupted, airbag units must immediately be locked away again!
→ Airbag units must not come into contact with grease, oil, detergents, liquids, or similar substances!
→ Airbag units must not be exposed to temperatures above 90 °C!
→ Airbag units and control units which have fallen from a low height must no longer be installed!
→ Additional linings, stickers or similar must not be attached in the vicinity of the airbag units!
→ Changes must not be made to the wiring or the components of the airbag system!
→ The battery must always be disconnected before starting straightening and welding work with an electrical welding unit!
→ Electrostatic charge: In general, suitable work clothing and footwear are to be worn. → *WM Safety regulations for handling tools and materials for airbag and belt tensioner units*
→ Do not remove the short-circuit spring of the plug contacts.
→ Never connect airbag units to electrical power sources not in accordance with regulations (danger of immediate ignition). Only use testers prescribed by the manufacturer. Airbag diagnosis 6901.
→ If you have to perform welding in the immediate vicinity of the airbag triggering unit, ensure it is removed before starting work!
→ Airbag components must not be repaired!
→ Airbag components must always be replaced!
→ Cleanse your hands after touching ignited airbag units.

top of page

Information for airbag and belt tensioner units

Dangers for persons and the environment

Note
Dangers for persons and the environment

Injury caused by incorrect triggering of the installed unit.
Injury caused by spinning away, e.g. of the entire unit.
Burns caused by touching the hot surfaces of a triggered unit.
Damage to hearing due to the explosion when gas is released.
Irritation caused by breathing in fuel particles.
Irritation caused by skin and eye contact with fuel particles.
Airbag/belt tensioner components must not be opened nor repaired; always use only new parts.
Injury caused by incorrect triggering due to tampering with the short circuit bridges.

Protective measures and rules of behaviour

Note
Protective measures and rules of behaviour

Assembly work only by trained staff.
Carry out tests only with the **PIWIS Tester 97180** diagnostic module; do not use test lamps, voltmeters or ohmmeters.
Do not bring into contact with grease, solvents, cleaning agents, or liquids.
Do not expose to temperatures above 100 °C.
Keep the unfolding area of the airbag clear; e.g. do not hang test devices over the steering wheel. When carrying, hold the airbag with the blow-out direction facing away from the body. Lay the airbag unit aside with the airbag pointing upwards.
Electrostatic charge: In general, wear appropriate work clothing and footwear. → *WM Safety regulations for handling tools and materials for airbag and belt tensioner units*
Do not remove the short-circuit spring of the plug contacts.
Never connect an airbag unit to electrical power sources not in accordance with regulations (danger of ignition). Only use testers prescribed by the manufacturer. Airbag diagnosis 6901.
During installation/removal or work on the vehicle involving vibrations: switch off ignition, disconnect and cover the negative terminal of the battery, wait 1 minute and only then disconnect the plug connection.
Transport: In transport packaging. Forbidden in passenger compartment!
Storage in the workshop: max. 10 kg (=100 driver's or 50 passenger's airbags); protect against theft!
The installation of the airbag/belt tensioner unit must be carried out immediately after removal from the transport container.
If work is interrupted, the airbag/belt tensioner unit must be stored in the transport container again.
Leaving the airbag/belt tensioner unit unsupervised is not permitted.

Behaviour in cases of malfunction or danger

Note

Behaviour in cases of malfunction or danger

Protect from flames and heat.
In case of fire, inform the fire brigade on arrival about the units present.
Do not install mechanically damaged units or units that have fallen, even from a low height.
Always replace units that are mechanically damaged (bulges, cracks).
Because of the irritating combustion residues, only handle triggered airbags with protective gloves and goggles.
In the case of contact with combustion residues, wash the affected skin with soap and water.
In the case of eye contact, wash the eyes out with water.

General information

Note

Airbags - general
A period of 10 seconds is required to enable the triggering unit to identify all faults in the system!
In order to guarantee that every possible fault source is checked during the vehicle test, the ignition must be switched on for at least 10 seconds!
The fault memory must be cleared following a fault in the airbag system and after it has been remedied!
The replacement of a component must be noted in the Guarantee and Maintenance booklet!
To do this, attach the documentation number in a free panel intended for that purpose!
The documentation number is attached to the replacement part as a tear-off sticker!
Exchanged airbag units or airbag modules must be taken into possession by the Porsche Centre or by a dealer authorised by Porsche and must not be handed over to the customer (customer has no right to possess them).
They must be destroyed, disposed of or returned to the manufacturer in accordance with the explosives ordinance and the hazardous materials ordinance!
When the steering wheel is exchanged, e.g. to install a steering wheel from the Tequipment product range, the airbag unit of the replaced steering wheel must be removed and destroyed, disposed of or returned to the manufacturer before the steering wheel is handed over to the customer!

The airbag system is constantly monitored by a diagnosis unit in the triggering unit. Any fault is signalled by a warning light. The warning light for the airbag system lights up in the event of a fault. The airbag warning light lights for approx. 3 seconds after the ignition is switched on and goes out if no fault has been entered in the fault memory. If it lights up again, this indicates a fault in the system. The fault can be read out with the **PIWIS Tester 9718**.

Component exchange after airbag/belt tensioner triggering

The following components must be removed and replaced after the airbag system is triggered:
Airbag unit, driver's side:

1. Contact unit.
2. Airbag unit, driver's side.
3. Triggering unit after the third time the airbag is triggered.

Airbag unit, passenger's side:

1. Airbag unit, passenger's side.
2. Triggering unit after the third time the airbag is triggered.
3. Instrument panel.
4. Check instrument panel bracket for deformation and replace if necessary.

Side-airbag unit, seat:

1. Side-airbag unit, seat.
6. Seat covering, deformed seat components.
7. Sensor for the side-airbag unit after the third time the side-airbag is triggered

Head airbag unit, door:

1. Head airbag unit.
9. Check door unit carrier for deformation and replace if necessary.
10. Sensor for the side-airbag unit after the third time the side-airbag is triggered

Belt tensioner:

1. All belt tensioner units.

Because it is difficult to visually determine if one or more belt tensioners has been triggered, check the following points:

– Using the **PIWIS Tester 9718**, read out the fault memory.
– Check plug connection on the belt tensioner for damage.
– Pull out the belt strap as far as possible and check for wear.
– Perform a function test on the automatic belt device.

50 IN General information and notes on quality - as of MY 2005

- Measures for maintaining long-term body protection
- Electronic control modules

top of page

Measures for maintaining long-term body protection

Note

- *After repair work, the standard corrosion-inhibiting coating should only be restored with the corrosion-inhibiting agents approved by the manufacturer. The following points must be observed for body repairs.*

- Always apply welding primer to both sides of the welding flange when resistance spot welding.
- Prime repair areas from outside. Prime on both sides in the accessible areas.
- Seal all sheetmetal overlaps, sheetmetal edges, butt joints, weld seams etc. with body sealant.
- When replacing structurally bonded body parts, proceed according to the information in the respective repair instructions.
- Only apply body sealant to primed sheetmetal parts.
- Apply top coat paint to the inside of the outer sheetmetal shell before welding. See "Paint build-up": →"Paint Manual"
- Build up paint on bare sheetmetal panels according to the painting methods described in the →"Paint Manual".
- Repair or create standard undersealing by applying long-life undersealing material.
- Preserve cavities in the repair area with cavity preservative after applying a top coat paint.
- Check that the standard water drains (plugs) function correctly or clean them after the cavity preservation material has dried.

Prerequisite for maintaining the long-life guarantee

All body repair work must be carried out correctly and according to the specific Porsche instructions for sheetmetal, paint and corrosion protection/preservation work. To avoid jeopardising the long-life guarantee, a Paint Condition Report is prepared two years after delivery of the vehicle. This condition report must be updated annually by every Official Porsche Centre.

top of page

Electronic control modules

Note

- *If electronic components, e.g. ABS control module, have been removed for repair work and are then reused, they must undergo a functional check after fitting in accordance with existing specifications.*

Battery trickle charge

Note

- *To prevent the vehicle battery from discharging while at the workshop, a battery charging unit with a rated current of at least 40 A must be connected as soon as the vehicle is unlocked.*

Refer to → *Battery trickle charge* for instructions about connecting the battery charging unit.

Protection against overvoltage when performing welding work

To protect electronic control units from overvoltage during electric arc welding, the following work regulations must be observed:

- When welding work is extensive, the electronic control units must be removed. Ensure that there are no electrically insulated parts between the ground connection and the welding point.
- Remove clamp from negative terminal of battery and cover negative terminal of battery.
- Connect the ground connection of the electric arc welding equipment as near as possible to the welding point on the part to be welded.
- Do not touch electronic control units or electric cables with the ground connection or the welding electrode.

Replacing control modules

The replacement of electronic control modules after an accident is necessary if at least one of the following conditions is met:
The housing is noticeably deformed or damaged.
The supporting surface or bracket is deformed (the unit shows no external damage).
The plug connection is damaged or corroded by moisture.
Functional checks or self-diagnosis of the unit reveals the fault "Control module faulty".

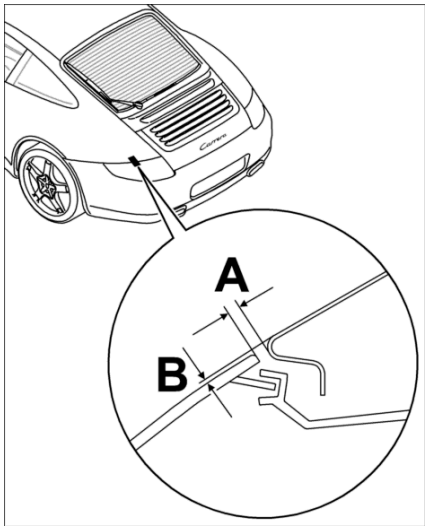
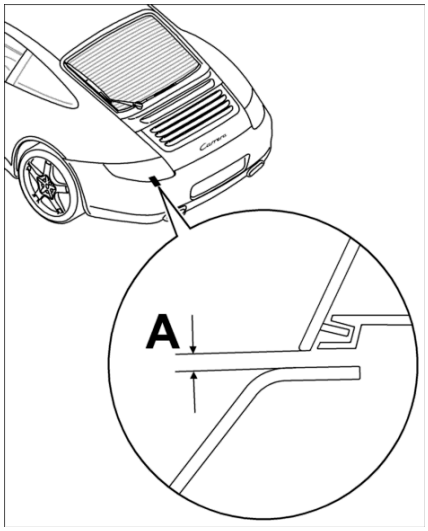
Diagram - body rear gap dimensions

Gap dimensions, body rear



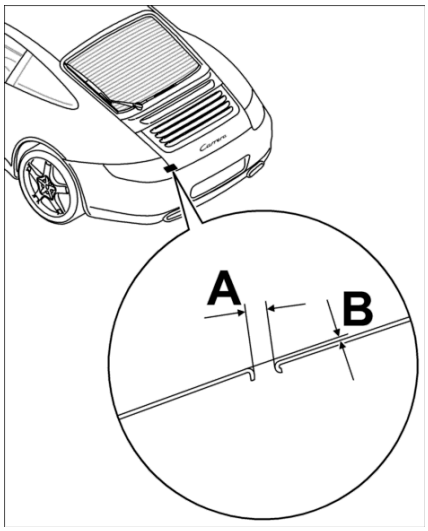
Note

- *Set gap dimensions on the lids, doors and covers, or accessories in accordance with the gap specifications.*
- *Given a clearance in the opening that is too great or too small, the movable body or the accessories must be centred accordingly.*
- *Ensure that the gaps do not taper or do not narrow at local points.*
- *The given values are guidelines which should be observed as far as possible.*
- *The guidelines apply to repair and assembly work.*
- *Use star gauges to measure the gap dimensions,* ***Star gauges for body gap dimensions NR.127-1***



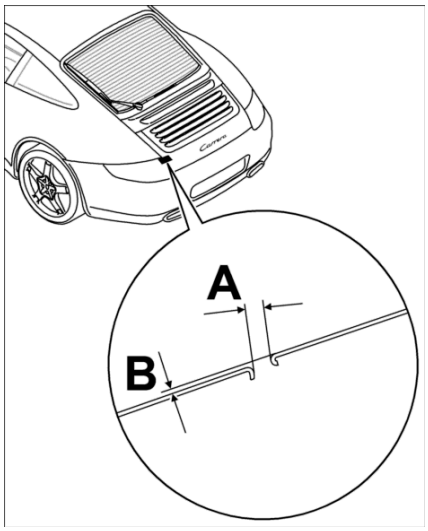
Tail light to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Tail light to outer side panel	Tail light only lowered	Gap dimension A	4 mm	+/-1.5 mm	



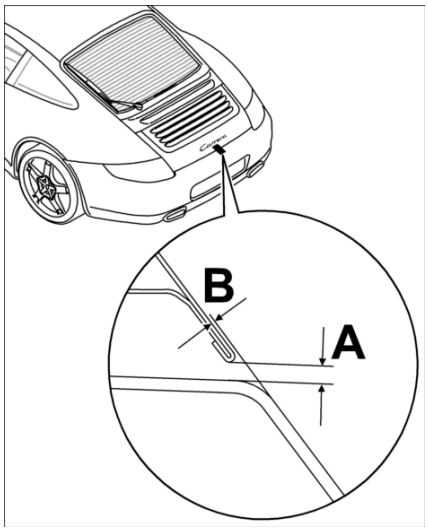
Tail light to centre side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Tail light to centre side panel		Gap dimension A	3 mm	+/-0.8 mm	
Tail light to centre side panel	Tail light only lowered	Gap dimension B	1 mm		



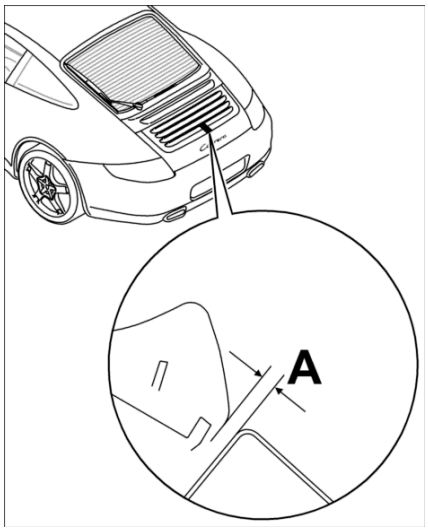
Rear apron to tail light

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Rear apron to tail light		Gap dimension A	4 mm	+/-1.5 mm	



Tail light to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Tail light to rear lid	Determine gap	Gap dimension A	4.9 mm	+/-1 mm	
Tail light to rear lid	Only lowered	Gap dimension B	0.4 mm		



Tail light to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
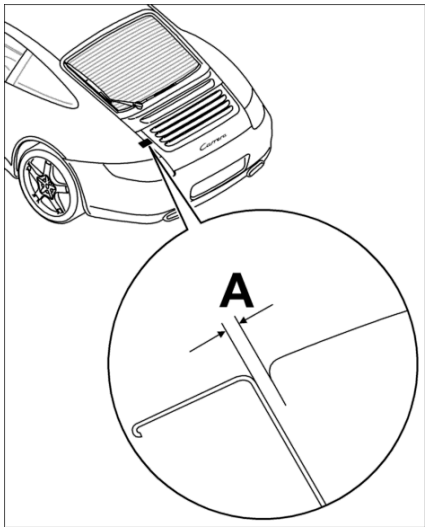
Tail light to rear lid	Determine gap	Gap dimension A	4.5 mm	+/-1 mm	
Tail light to rear lid	Only lowered	Gap dimension B	1.8 mm		



Rear lid to rear spoiler

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
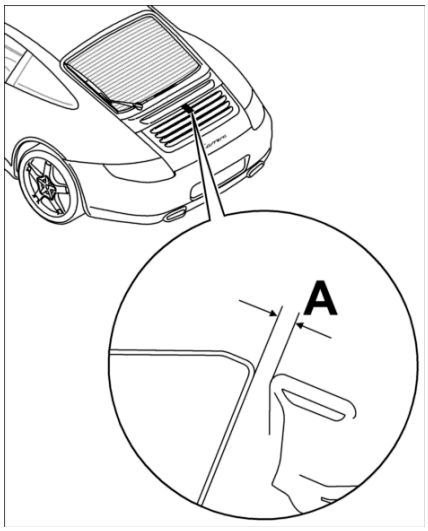
Rear lid to rear spoiler		Gap dimension A	4 mm	+/-1.5 mm	
Rear lid to rear spoiler	Only lowered	Gap dimension B	1 mm		



Rear lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
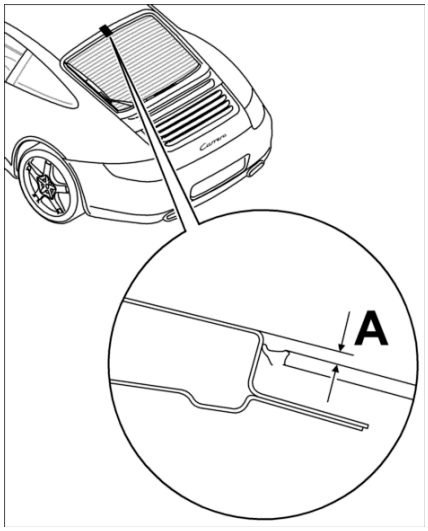
Rear lid to spoiler top section	Rear lid only lowered (max. 1 mm)	Gap dimension A	3.5 mm		



Rear lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
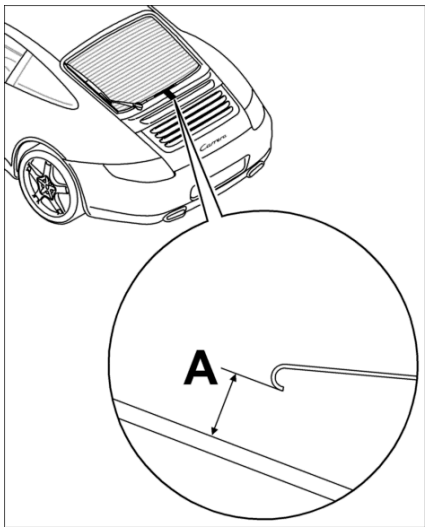
Rear lid to spoiler top section	Rear lid only lowered (max. 1 mm)	Gap dimension A	3.5 mm	+/-0.5 mm	



Rear centre panel to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
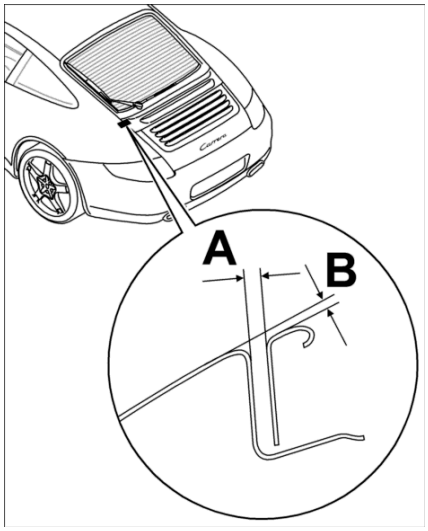
Rear centre panel to spoiler top section	Rear lid only lowered (max. 1 mm)	Gap dimension A	3.5 mm		



Rear window to outer roof panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
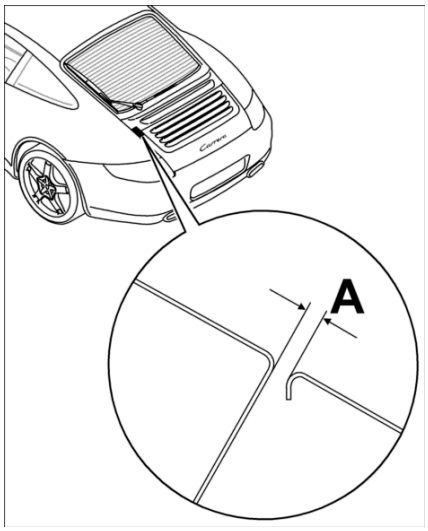
Rear window to outer roof panel	Only lowered	Gap dimension A	2 mm		



Rear centre panel to rear window

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
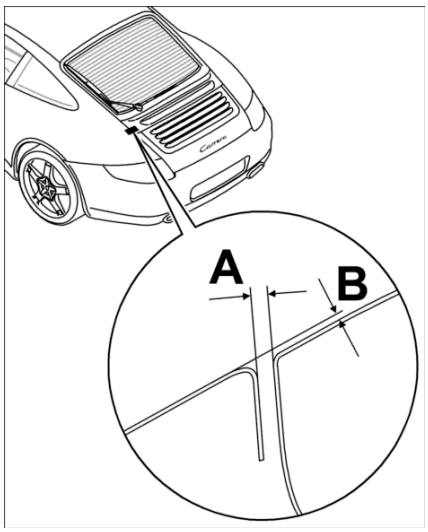
Rear centre panel to rear window		Gap dimension A	15.5 mm		



Rear centre panel to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
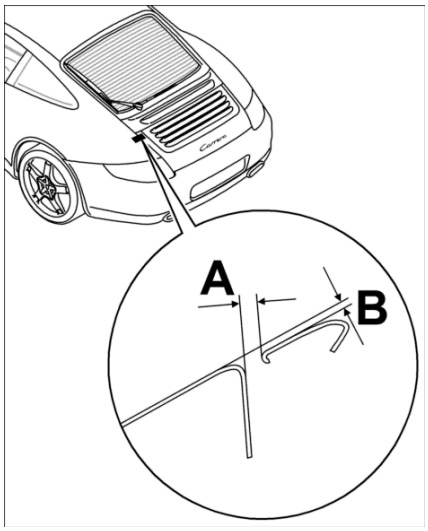
Rear centre panel to outer side panel		Gap dimension A	4 mm	+/-1 mm	
Rear centre panel to outer side panel	Only lowered	Gap dimension B	1.9 mm	+/-1 mm	



Rear centre panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
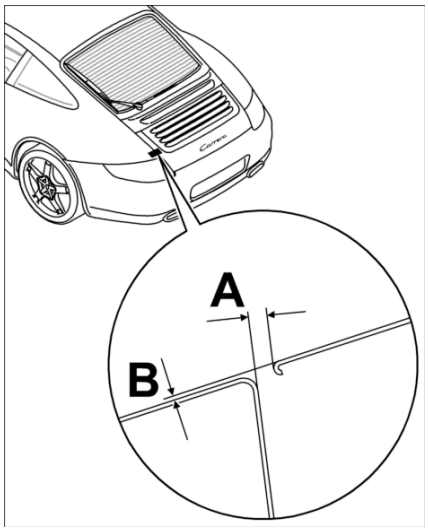
Rear centre panel to rear lid		Gap dimension A	4 mm	+/-1.5 mm	



Outer side panel to rear centre panel lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side panel to rear centre panel lid		Gap dimension A	4 mm	+/-1 mm	
Outer side panel to rear centre panel lid	Only lowered	Gap dimension B	1.3 mm		

Outer side panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side panel to rear lid		Gap dimension A	4 mm	+/-1 mm	
Outer side panel to rear lid	Only lowered	Gap dimension B	1.3 mm		

Outer side panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side panel to rear lid		Gap dimension A	4.2 mm	+/-1 mm	
Outer side panel to rear lid	Only lowered	Gap dimension B	0.6 mm

Cowl panel frame to front roof frame

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
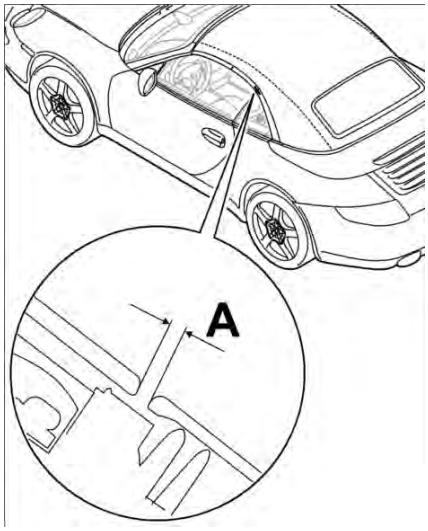
Cowl panel frame to front roof frame	Roof frame only lowered	Gap dimension A	7 mm	+/-1 mm	
			1.7 mm		

Cowl panel frame to front roof frame	Roof frame only lowered	Gap dimension B			



Front roof frame to centre roof frame

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
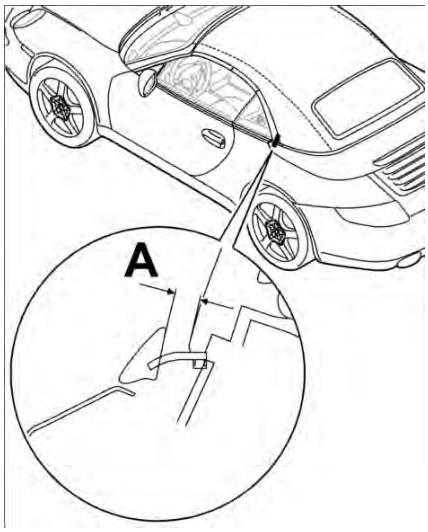
Front roof frame to centre roof frame		Gap dimension A	3 mm	+/-0.5 mm	



Door window to side of roof frame

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
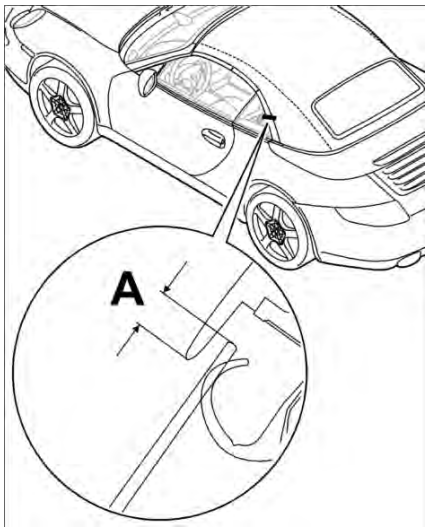
Door window to side of roof frame		Gap dimension A	7 mm	+/-1 mm	
Door window to side of roof frame		Gap dimension B	6 mm	+/-1 mm	



Centre roof frame to rear roof frame

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
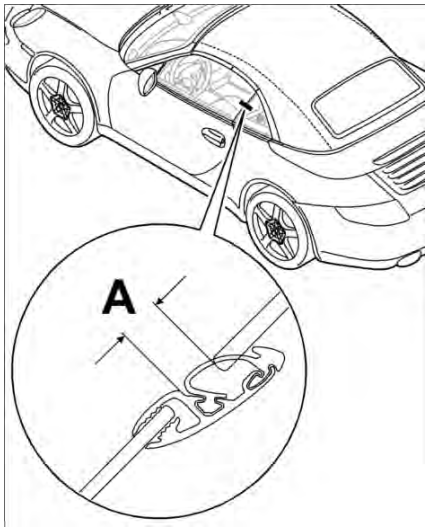
Centre roof frame to rear roof frame		Gap dimension A	3.2 mm	+0.5 mm	



Rear roof frame to side of convertible-top compartment lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
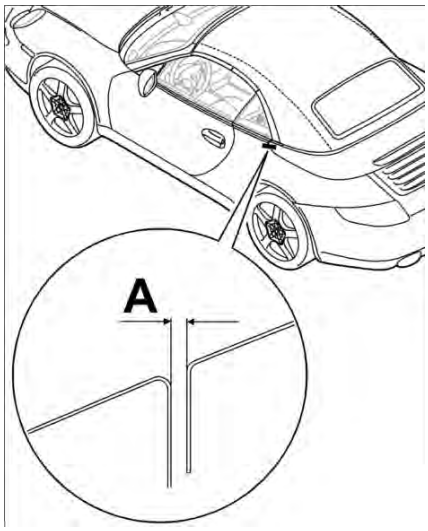
Rear roof frame to side of convertible-top compartment lid		Gap dimension A	5 mm		



Rear roof frame to side window

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
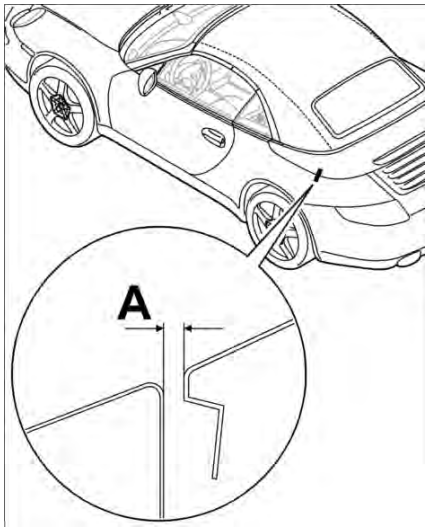
Rear roof frame to side window	Max. closing depth	Gap dimension A	10 mm	+9 mm	



Door window to side window

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
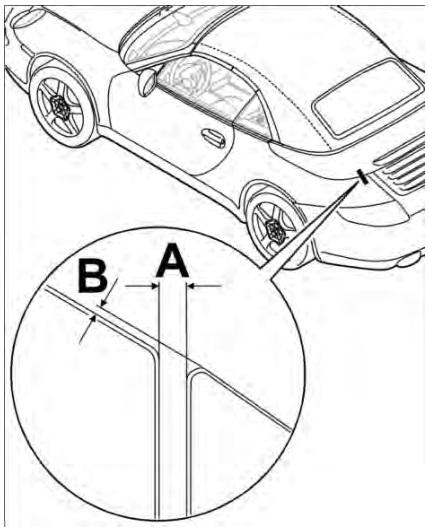
Door window to side window		Gap dimension A	9 mm	+/-1 mm	



Convertible-top compartment lid to side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
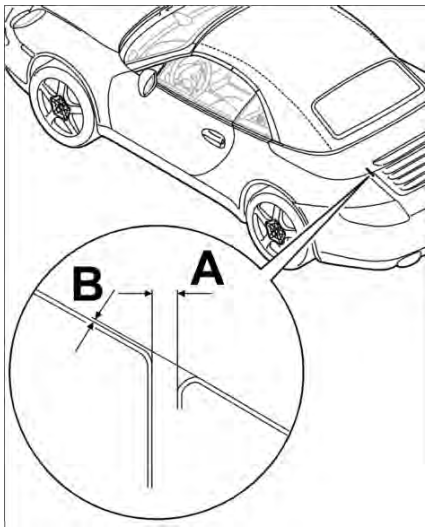
Convertible-top compartment lid to side panel	Continuous seam joining line	Gap dimension A	4 mm	+/-1 mm	



Convertible-top compartment lid to side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
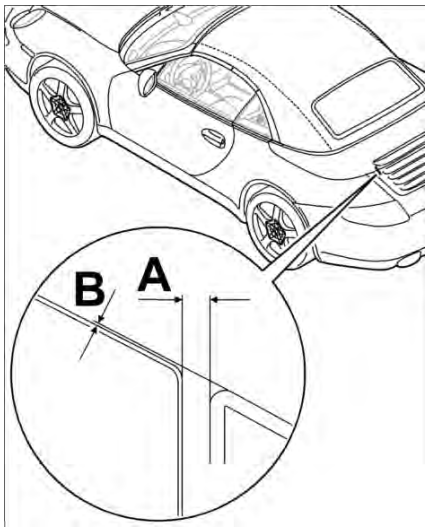
Convertible-top compartment lid to side panel	Continuous seam joining line	Gap dimension A	4 mm	+/-1 mm	



Convertible-top compartment lid to side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
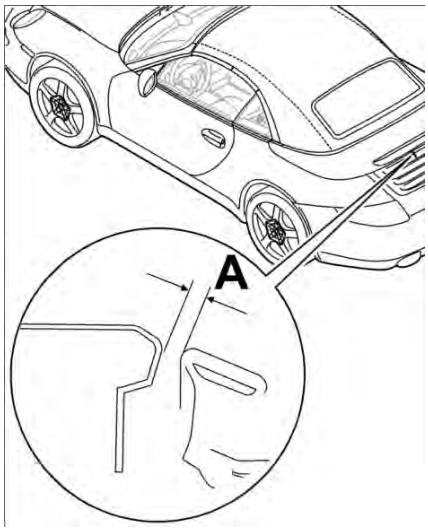
Convertible-top compartment lid to side panel	Continuous seam joining line	Gap dimension A	5 mm	+/-1 mm	
Convertible-top compartment lid to side panel	Only lowered	Gap dimension B	1.5 mm		



Convertible-top compartment lid to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
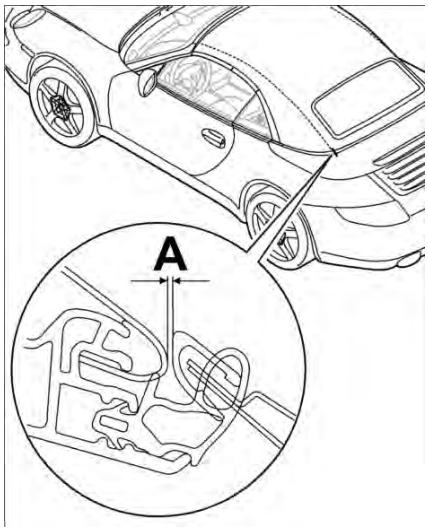
Convertible-top compartment lid to rear lid		Gap dimension A	5 mm	+/-1 mm	
Convertible-top compartment lid to rear lid	Only lowered	Gap dimension B	0.4 mm		



Convertible-top compartment lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
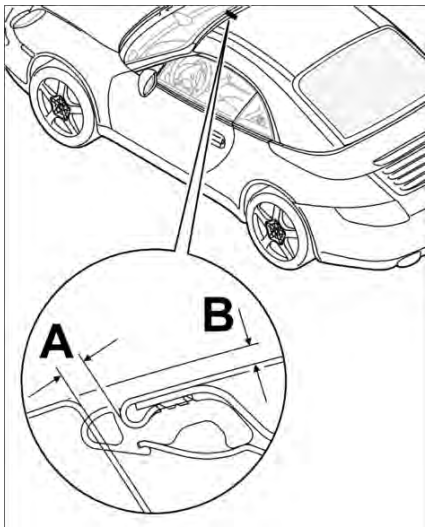
Convertible-top compartment lid to spoiler top section		Gap dimension A	4 mm	+/-1 mm	
Convertible-top compartment lid to spoiler top section	Only lowered	Gap dimension B	0.3 mm		

Convertible-top compartment lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Convertible-top compartment lid to spoiler top section		Gap dimension A	4 mm	+/-1 mm	



Convertible top to convertible-top compartment lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Convertible-top compartment lid to spoiler top section	Continuous seam joining line	Gap dimension A	1 mm	+4 mm

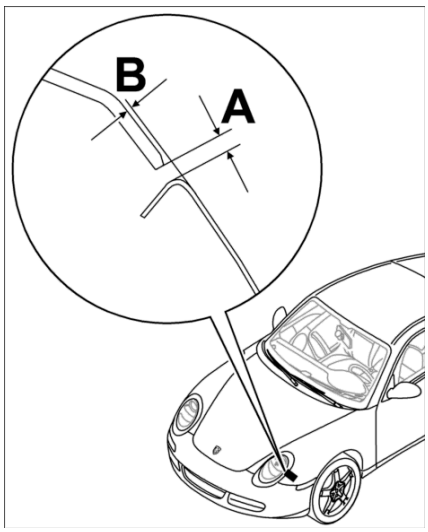
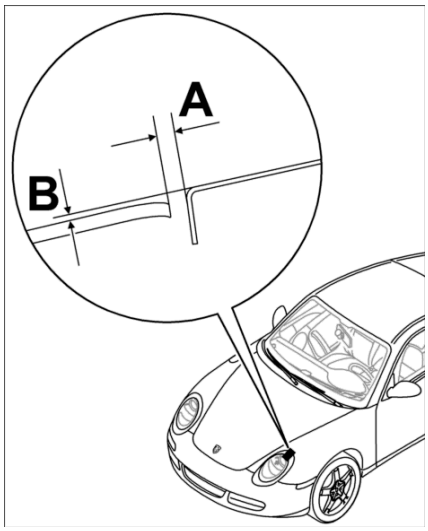
Front lid to front apron

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Front lid to front apron		Gap dimension A	4.5 mm	+/-1 mm	
Front lid to front apron	Lid only lowered	Gap dimension B	2 mm		



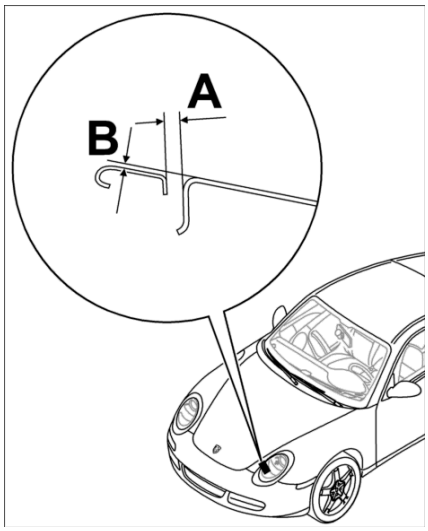
Main headlight to inner wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Main headlight to inner wing	Determine left and right gap	Gap dimension A	4.5 mm	+/-1 mm	



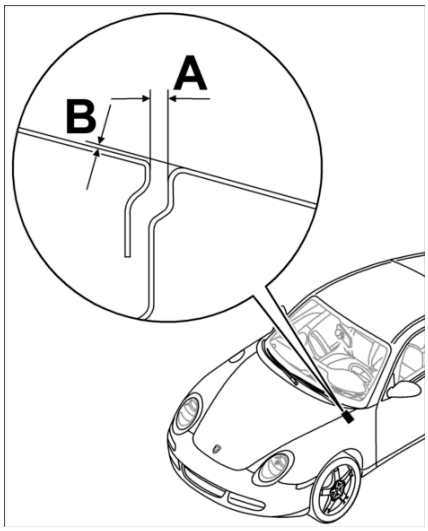
Main headlight to front apron

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Main headlight to front apron		Gap dimension A	4 mm	+/-1.5 mm	



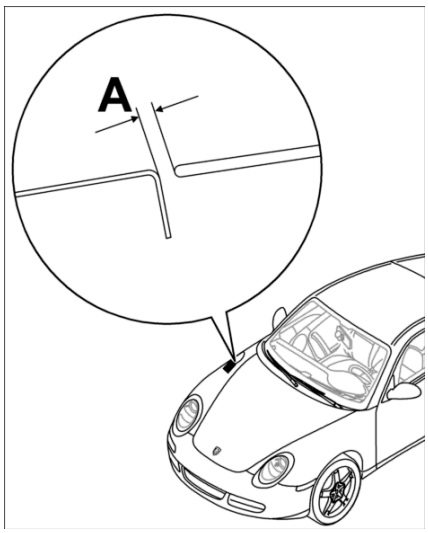
Main headlight to external wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Main headlight to external wing		Gap dimension A	4 mm	+1 mm	
Main headlight to external wing	Only lowered	Gap dimension B	1 mm		



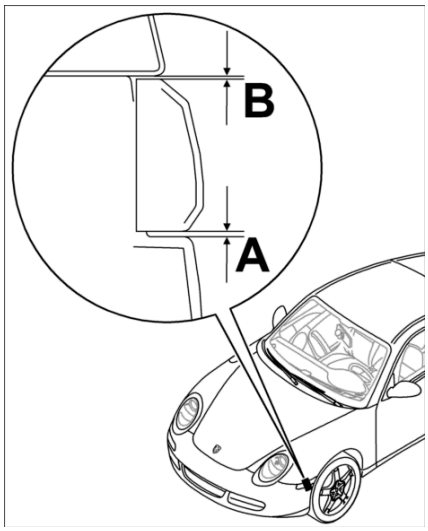
Main headlight to top wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Main headlight to top wing		Gap dimension A	4 mm	+/-1 mm	
Main headlight to top wing	Only lowered	Gap dimension B	1 mm		



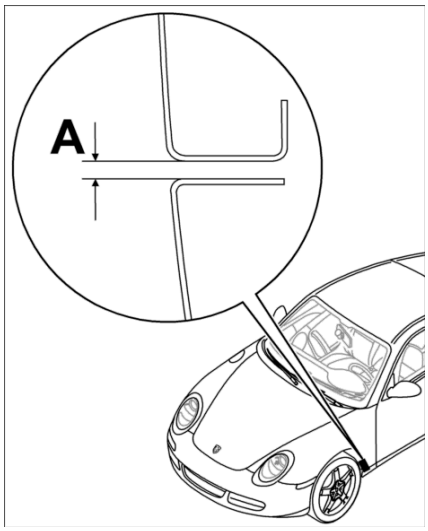
Front lid to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Front lid to wing		Gap dimension A	4 mm	+/-1 mm	
Front lid to wing	Only lowered	Gap dimension B	0.5 mm		



Wing to front lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Wing to front lid	Determine left and right gap	Gap dimension A	4 mm	+1 mm	
Wing to front lid	Only lowered	Gap dimension B	0.5 mm		



Filler flap to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Filler flap to wing	All the way round	Gap dimension A	3.5 mm	+/-0.5 mm	

Front apron to side direction indicator

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Front apron to side direction indicator		Gap dimension A	1.5 mm		
Wing to side direction indicator		Gap dimension B	0.5 mm	+0.5 mm	

Wing to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Wing to outer side panel	Even transition from front to rear	Gap dimension A	4.5 mm	+/-1 mm

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
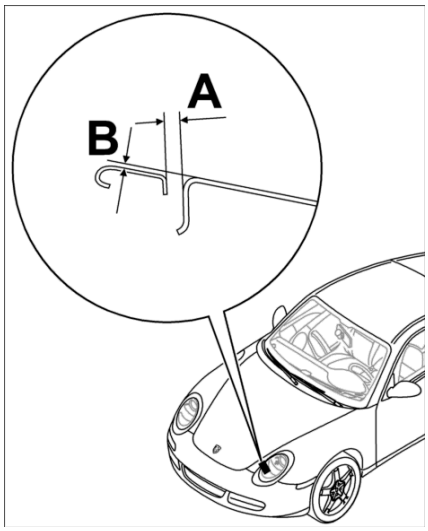
Main headlight to front apron		Gap dimension A	4 mm	+/-1.5 mm	



Main headlight to external wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
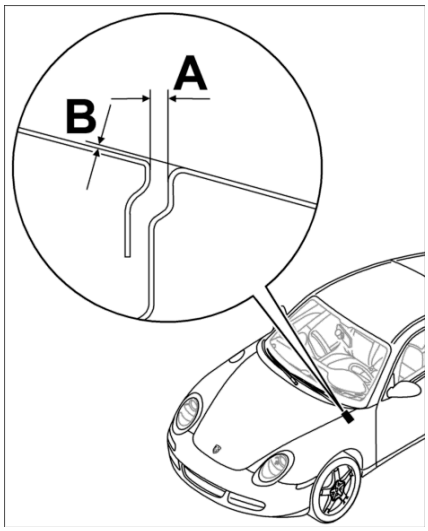
Main headlight to external wing		Gap dimension A	4 mm	+1 mm	
Main headlight to external wing	Only lowered	Gap dimension B	1 mm		



Main headlight to top wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
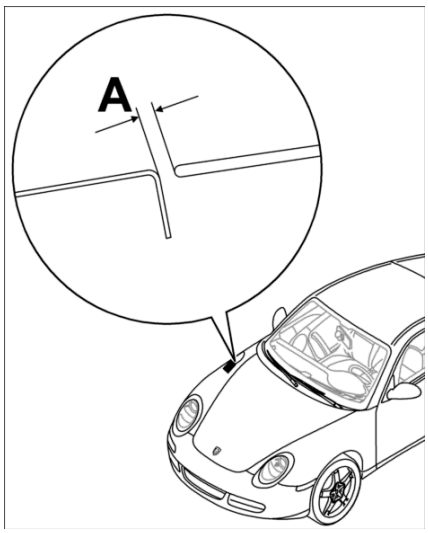
Main headlight to top wing		Gap dimension A	4 mm	+/-1 mm	
Main headlight to top wing	Only lowered	Gap dimension B	1 mm		



Front lid to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
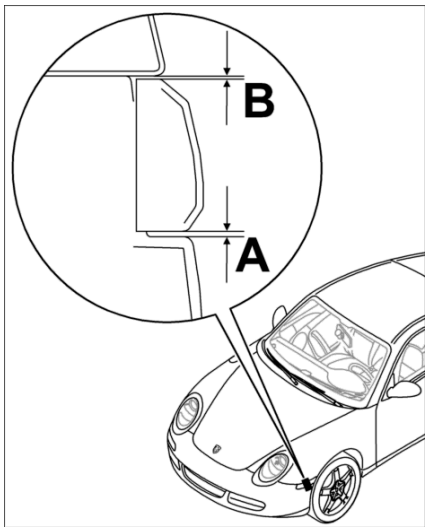
Front lid to wing		Gap dimension A	4 mm	+/-1 mm	
Front lid to wing	Only lowered	Gap dimension B	0.5 mm		



Wing to front lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
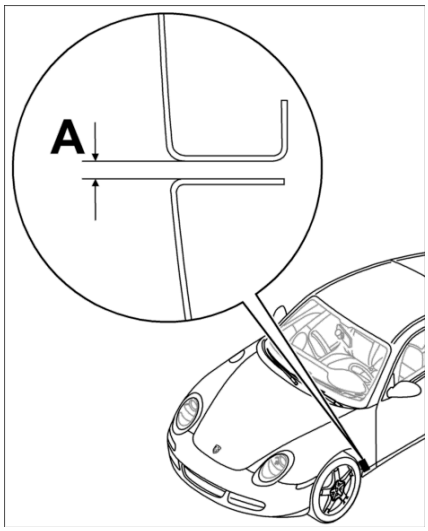
Wing to front lid	Determine left and right gap	Gap dimension A	4 mm	+1 mm	
Wing to front lid	Only lowered	Gap dimension B	0.5 mm		



Filler flap to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Filler flap to wing	All the way round	Gap dimension A	3.5 mm	+/-0.5 mm	

Front apron to side direction indicator

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Front apron to side direction indicator		Gap dimension A	1.5 mm		
Wing to side direction indicator		Gap dimension B	0.5 mm	+0.5 mm	

Wing to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Wing to outer side panel	Even transition from front to rear	Gap dimension A	4.5 mm	+/-1 mm

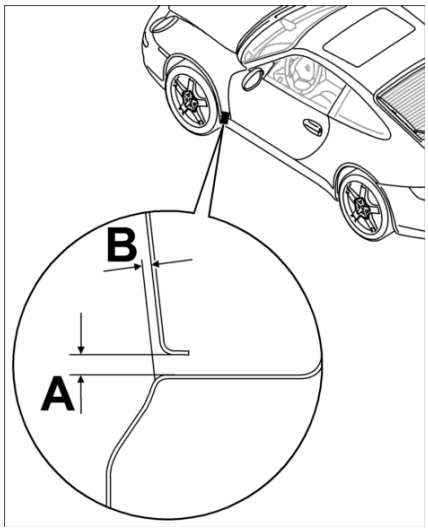
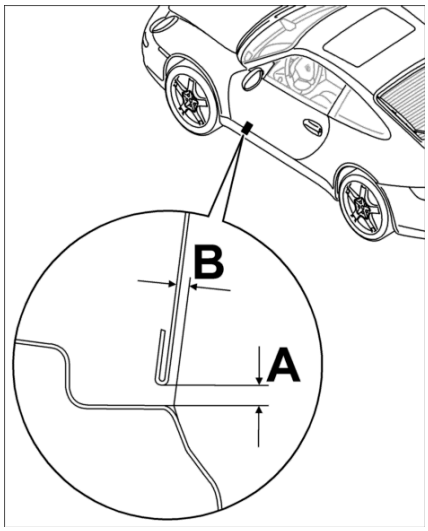
Diagram - body centre gap dimensions

Gap dimensions, body centre



Note

- *Set gap dimensions on the lids, doors and covers, or accessories in accordance with the gap specifications.*
- *Given a clearance in the opening that is too great or too small, the movable body or the accessories must be centred accordingly.*
- *Ensure that the gaps do not taper or do not narrow at local points.*
- *The given values are guidelines which should be observed as far as possible.*
- *The guidelines apply to repair and assembly work.*
- *Use star gauges to measure the gap dimensions,* ***Star gauges for body gap dimensions NR.127-1***



Door to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
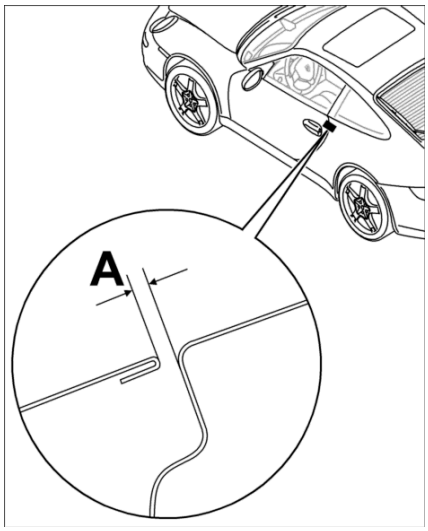
Door to wing		Gap dimension A	4 mm	+/-0.5 mm	



Wing to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
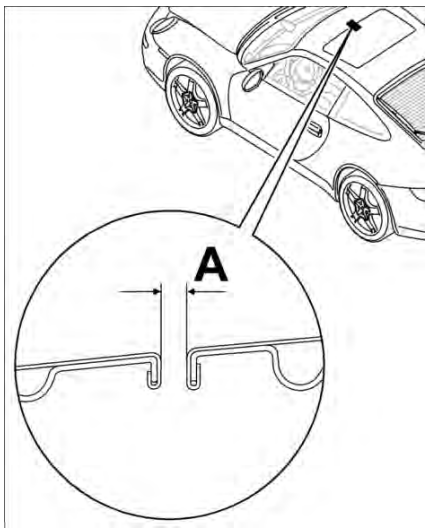
Wing to outer side panel		Gap dimension A	4.5 mm	+/-1 mm	
Wing to outer side panel	Only lowered	Gap dimension B	2 mm		



Door to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
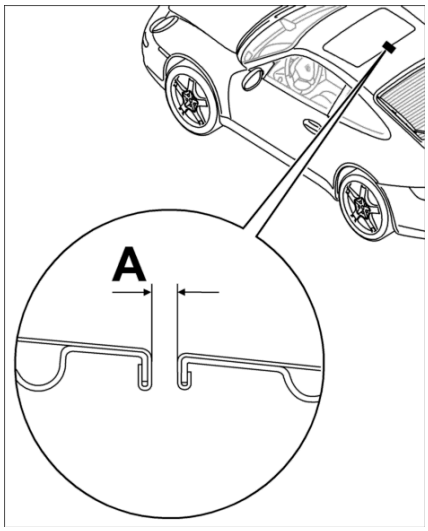
Door to outer side panel		Gap dimension A	4.5 mm	+/-1 mm	
Door to outer side panel	Doors only lowered	Gap dimension B	2 mm		



Door to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
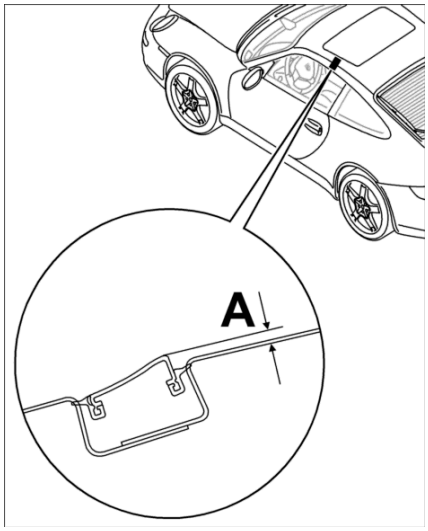
Door to outer side panel	Doors only raised	Gap dimension A	4 mm	+/-0.8 mm	



Sliding-roof panel at front to outer roof panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
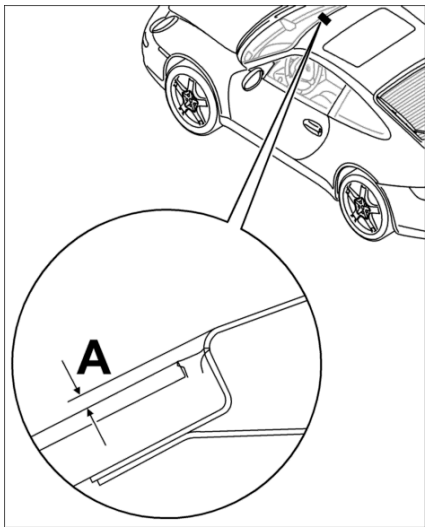
Sliding roof panel at front to outer roof panel	Only lowered at front	Gap dimension A	5 mm		



Sliding roof panel at rear to outer roof panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
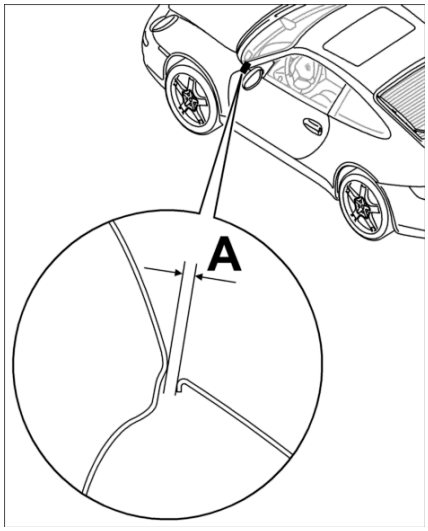
Sliding roof panel at rear to outer roof panel	Only raised at rear	Gap dimension A	6 mm		



Roof joint strip to outer roof panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
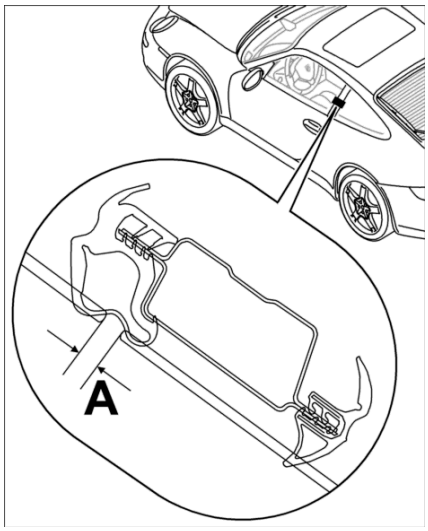
Roof joint strip to outer roof panel		Gap dimension A	2 mm		



Windscreen to windscreen frame

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Windscreen to windscreen frame	Only lowered	Gap dimension A	2 mm		

Cowl panel frame to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Cowl panel frame to wing	Continuous transition	Gap dimension A	3 mm	+/-1 mm	

Door window to side window

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Door window to side window	Door window lowered by max. 1 mm	Gap dimension A	7 mm	+/-1 mm

Tail light to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
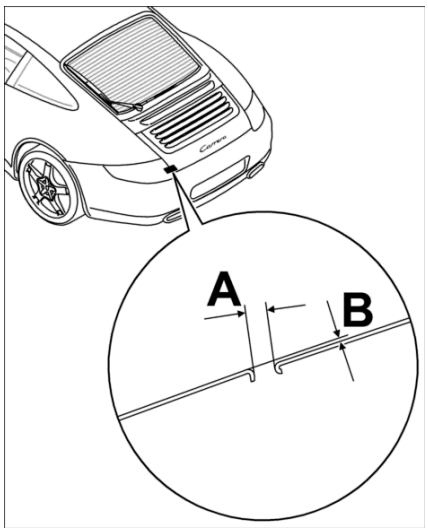
Tail light to outer side panel		Gap dimension A	4 mm	+/-1.5 mm	
Tail light to outer side panel		Gap dimension B	3.5 mm	+/-2 mm	



Tail light to centre side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
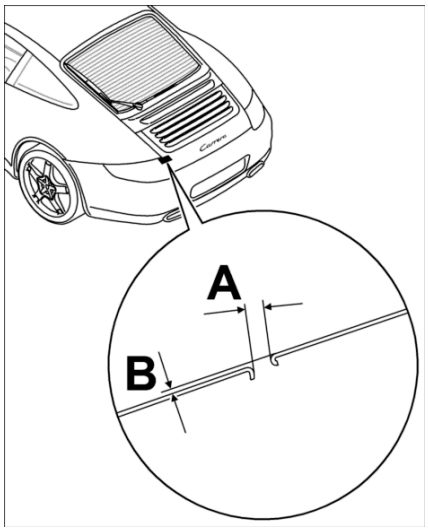
Tail light to centre side panel		Gap dimension A	3 mm	+/-0.8 mm	
Tail light to centre side panel	Tail light only lowered	Gap dimension B	0.8 mm	-1 mm	



Rear apron to tail light

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
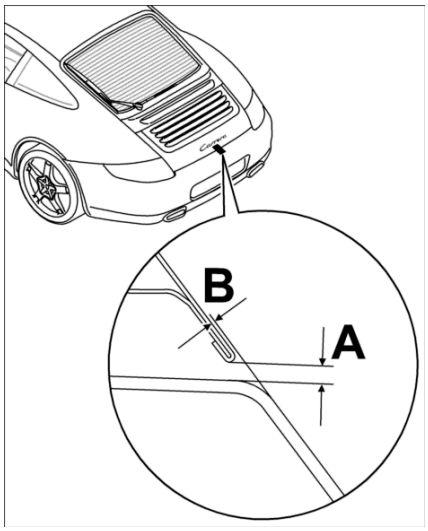
Rear apron to tail light		Gap dimension A	4 mm	+/-1.5 mm	



Tail light to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
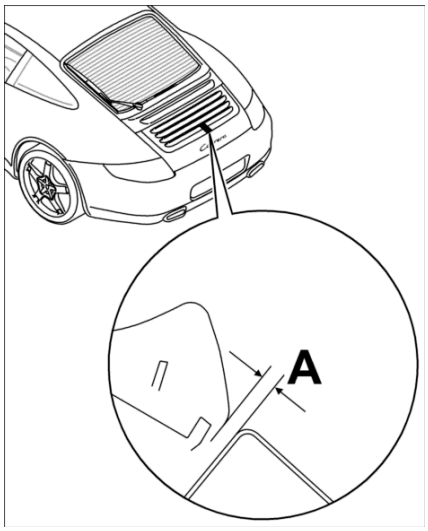
Tail light to rear lid	Determine gap	Gap dimension A	4.9 mm	+/-1 mm	
Tail light to rear lid	Only lowered	Gap dimension B	0.4 mm		



Tail light to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
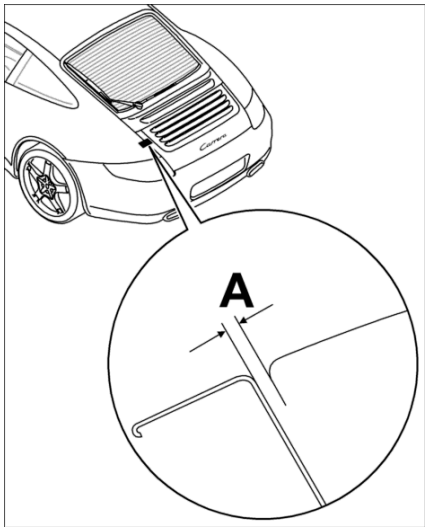
Tail light to rear lid	Determine gap	Gap dimension A	4.5 mm	+/-1 mm	
Tail light to rear lid	Only lowered	Gap dimension B	1.8 mm		



Rear lid to rear spoiler

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
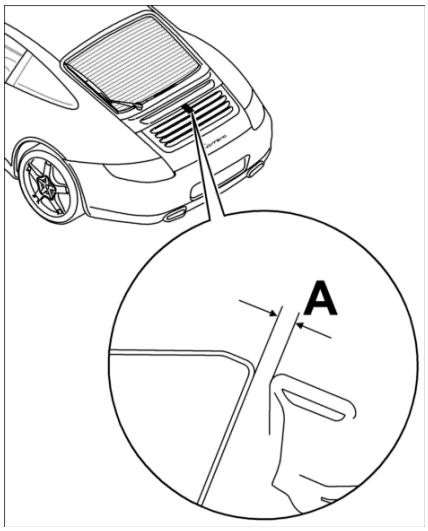
Rear lid to rear spoiler		Gap dimension A	4 mm	+/-1.5 mm	
Rear lid to rear spoiler	Only lowered	Gap dimension B	1 mm		



Rear lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
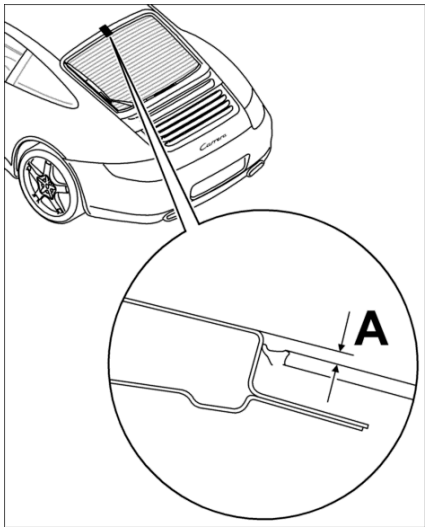
Rear lid to spoiler top section	Rear lid only lowered (max. 1 mm)	Gap dimension A	3.5 mm		



Rear lid to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
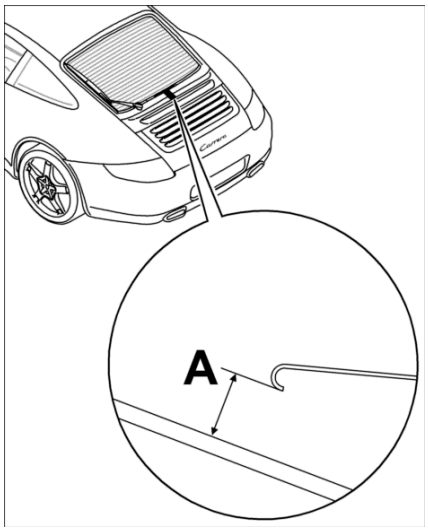
Rear lid to spoiler top section	Rear lid only lowered (max. 1 mm)	Gap dimension A	3.5 mm	+/-0.5 mm	



Rear centre panel to spoiler top section

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
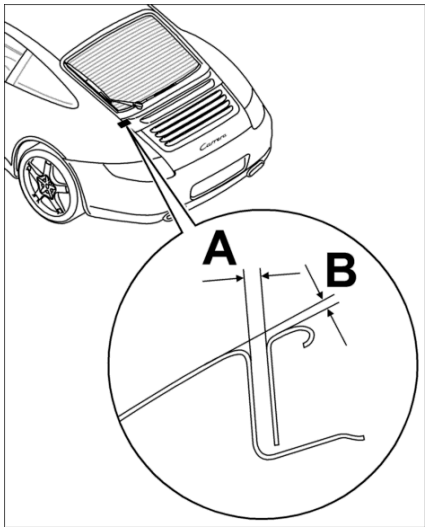
Rear centre panel to spoiler top section	Rear lid only lowered (max. +1 mm, - 3 mm)	Gap dimension A	4 mm	+/-1.5 mm	



Rear window to outer roof panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
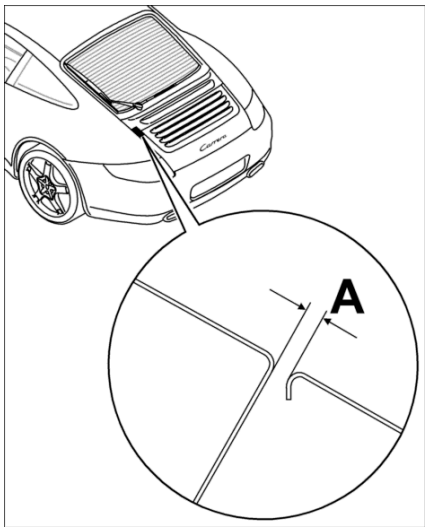
Rear window to outer roof panel	Only lowered	Gap dimension A	2 mm		



Rear centre panel to rear window

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
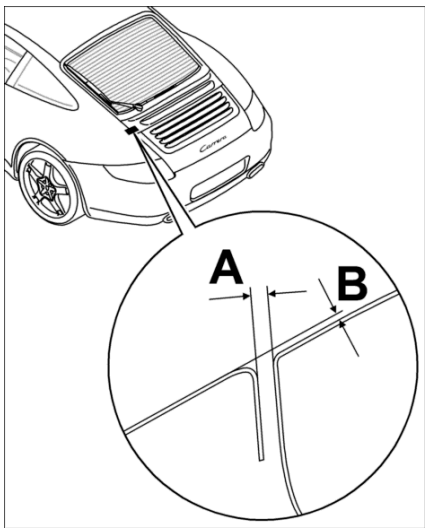
Rear centre panel to rear window		Gap dimension A	15.5 mm		



Rear centre panel to outer side panel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
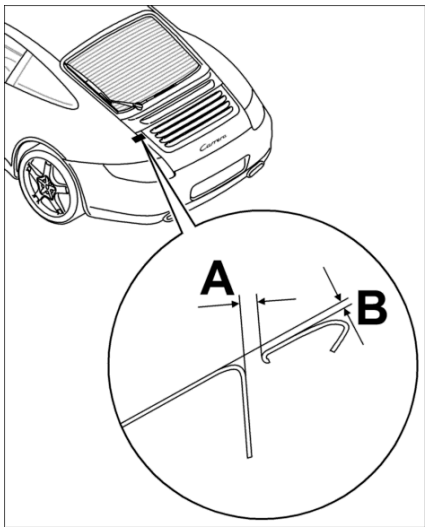
Rear centre panel to outer side panel		Gap dimension A	4 mm	+/-1 mm	
Rear centre panel to outer side panel	Only lowered	Gap dimension B	1.9 mm	+/-1 mm	



Rear centre panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
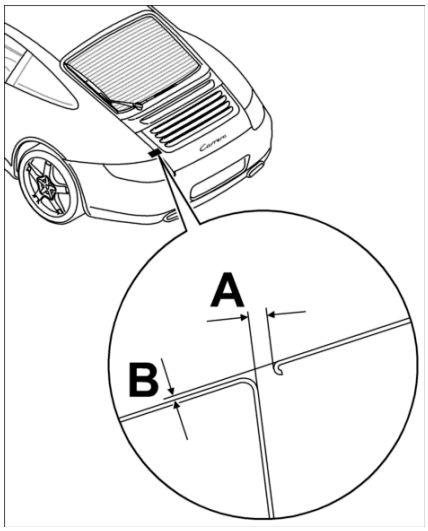
Rear centre panel to rear lid		Gap dimension A	4 mm	+/-1.5 mm	



Outer side panel to rear centre panel lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side section to rear centre panel		Gap dimension A	4 mm	+/-1 mm	
Rear centre panel to outer side panel	Only lowered	Gap dimension B	1.7 mm	+/-1 mm	

Outer side panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side panel to rear lid		Gap dimension A	4 mm	+/-1 mm	
Outer side panel to rear lid	Only lowered	Gap dimension B	1.7 mm	+/-1 mm	

Outer side panel to rear lid

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Outer side panel to rear lid		Gap dimension A	4.2 mm	+/-1 mm	
Outer side panel to rear lid	Only lowered	Gap dimension B	0.3 mm

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**

- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

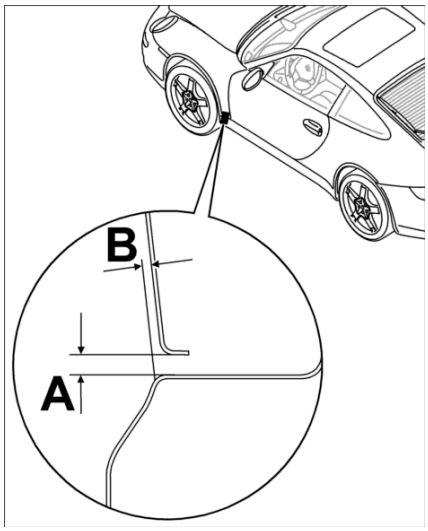
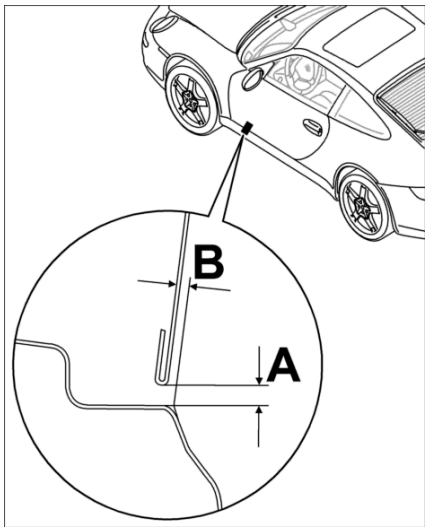
Diagram - body centre gap dimensions

Gap dimensions, body centre



Note

- *Set gap dimensions on the lids, doors and covers, or accessories in accordance with the gap specifications.*
- *Given a clearance in the opening that is too great or too small, the movable body or the accessories must be centred accordingly.*
- *Ensure that the gaps do not taper or do not narrow at local points.*
- *The given values are guidelines which should be observed as far as possible.*
- *The guidelines apply to repair and assembly work.*
- *Use star gauges to measure the gap dimensions,* ***Star gauges for body gap dimensions NR.127-1***



Door to wing

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2

WARNUNG
Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING
Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**

- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

50 IN Vehicle identification number - as of MY 2005

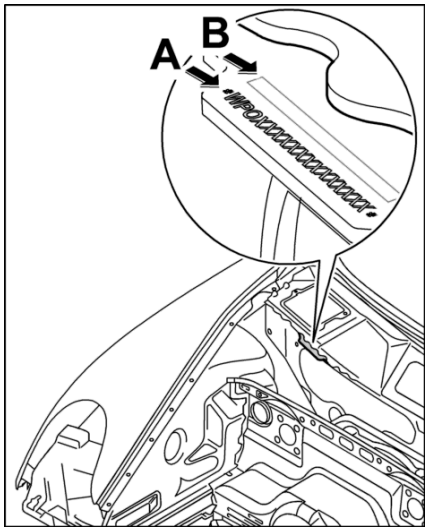
- Re-imprinting new vehicle identification number

Tools

Designation	Type	Number	Explanation	
Handschlagstempel	special tool	96930		
8 mm letter/digit embossing tool with DIN 1451 closely spaced lettering, letter set	commercially available tool	NR.128-1		

top of page

Re-imprinting new vehicle identification number



Vehicle identification number

After replacing the body or the sheetmetal parts in the area of the vehicle identification number (firewall), the original vehicle identification number must be reimprinted onto the new body or the new sheet metal part.
The documentation of the imprinted vehicle identification number in the vehicle supplementary document or legally permissible treatment can be obtained from the importer of the respective country.
An incorrectly imprinted (stamped) vehicle identification number should be permanently crossed through with a X so that it remains legible. The vehicle identification number to be newly imprinted should be imprinted above the crossed through identification number.

Spacer for replacing the vehicle identification number

The spacer for applying the vehicle identification number is in the front, right firewall. Two sections are intended for use.

– Section 1 **-A-** is the standard spacer.

Vehicle identification number

– Section 2 **-B-** is the spare spacer for a corrected vehicle identification number.

Re-imprinting new vehicle identification number

Note

- *Only imprint vehicle identification number in a cathodic-dip coated sheetmetal part.)*
- *The area should be countered when imprinting the vehicle identification number.*

1. Stamp the vehicle identificaiton number to be replaced with **8 mm letter/digit embossing tool with DIN 1451 closely spaced lettering, letter set NR.128-1** and the Porsche star **Handschlagstempel 96930** in den Platzhalter einschlagen.
2. Mask imprinted vehicle identification number.
3. Apply exterior paintwork.
4. Remove the vehicle identification number mark.
5. Paint repair area with clear lacquer.

1) Cathodic-dip coating is the primer applied to the sheetmetal parts at the factory

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

50 IN Corrosion protection measures during repairs - as of MY 2005

- Measures for maintaining long-term body protection
- Prerequisite for ensuring validity of the long-life guarantee

top of page

Measures for maintaining long-term body protection

Measures for maintaining long-term body protection

Note

- *After repair work, the standard corrosion-inhibiting coating should only be restored with the corrosion-inhibiting agents approved by the manufacturer. The following points must be observed for body repairs.*

- Always apply welding primer to both sides of the welding flange when resistance spot welding.
- Prime repair areas from outside. Prime on both sides in the accessible areas.
- Seal all sheetmetal overlaps, sheetmetal edges, butt joints, weld seams etc. with body sealant.
- Only apply body sealant to primed sheetmetal parts.
- Apply top coat paint to the inside of the outer sheetmetal shell before welding. See "Paint build-up": →"Paint Manual"
- Build up paint on bright sheetmetal panels according to the painting methods described in the →"Paint manual".
- Repair or create standard undersealing by applying long-life undersealing material.
- Preserve cavities in the repair area with cavity preservative after applying a top coat paint.
- Check that the standard water drains (plugs) function correctly or clean them after the cavity preservation material has dried.

top of page

Prerequisite for ensuring validity of the long-life guarantee

Prerequisite for ensuring validity of the long-life guarantee

Porsche long-life guarantee conditions

- All body repair work must be carried out correctly and according to the specific Porsche instructions for sheetmetal, paint and corrosion protection/preservation work.
- To prevent jeopardising the long-life guarantee, a Paint Condition Report is made out 2 years after delivery of the vehicle. This condition report must be drafted annually be every Official Porsche Centre.

Note on seam seals

Note

- *Due to modifications to the spare part range, in the case of repair work, accessories must be sealed before assembly (painting) according to the following illustrations.*
- *The sealing material →SEALING MATERIAL can be applied directly to accessories coated with KTL paint (cathodic dipbath coating).*
- *The seam seal can be painted over when it has reached approx. 70 % hardness (approx. 4 - 5 h at 20 °C, 50 % relative air humidity. Higher air humidity or dampening with water accelerates the hardening process).*
- *The hardening can be checked with a nail test. Press a finger nail gently into the hardened sealing mass; if this causes no damage to the sealing mass surface, the seam seal can be painted.*

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

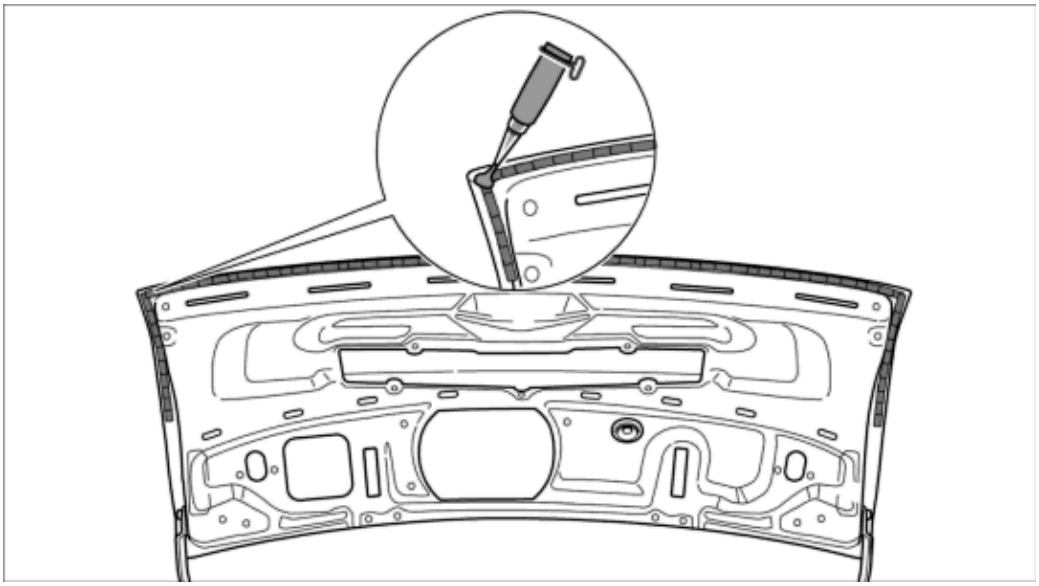
Accessories

Note on seam seals

Note



- *Due to modifications to the spare part range, in the case of repair work, accessories must be sealed before assembly (painting) according to the following illustrations.*
- *The sealing material →SEALING MATERIAL can be applied directly to accessories coated with KTL paint (cathodic dipbath coating).*
- *The seam seal can be painted over when it has reached approx. 70 % hardness (approx. 4 - 5 h at 20 °C, 50 % relative air humidity. Higher air humidity or dampening with water accelerates the hardening process).*
- *The hardening can be checked with a nail test. Press a finger nail gently into the hardened sealing mass; if this causes no damage to the sealing mass surface, the seam seal can be painted.*

50 IN Work sequence for accident repair - as of MY 2005

- Work sequence for accident repair

top of page

Work sequence for accident repair

Procedure for accident repairs.

1. Determine scope of damage
2. Expose the area to be repaired
3. Make an economic or technical decision: Should parts be repaired or replaced?
4. Determine the scope of replacement parts and order the parts
   See Repair
   See Replacement
5. If necessary, prime and seal the seam areas
6. If necessary, renew the stone impact protection
7. Paint the repaired area
8. If necessary, touch up the undersealing
9. Seal cavities
10. Fit accessories

Repair

1. Cover undamaged areas of the vehicle
2. Reshape damaged areas
3. Fill or soak reshaped areas
4. Apply fine filler on repair areas

Replacement

1. Cover undamaged areas of the vehicle so that they are protected against fire
2. Disconnect battery
3. Pre-paint new parts from the inside

4. Reshape damaged area by straightening so that adjacent contours or gap dimensions correspond to the standard condition
5. Roughly cut out damaged areas
6. Cut out remaining pieces
7. Fit new parts in, then check the gap dimensions with the accessories fitted
8. Protect spot-welded flanges against corrosion
9. Observe safety and quality instructions for welding
   →5 Safety instructions
10. Weld in new parts
11. Grind visible weld seams flat; if necessary apply body solder or filler

- Work sequence for determining scope of damage to vehicles involved in an accident

top of page

Work sequence for determining scope of damage to vehicles involved in an accident

Notes

Note

- *A body is constructed so that it has deformable zones in the front and rear areas. These deformable zones enable absorption of impact energy through their special design. The bearing structure in these areas is adapted by a specific cross section reduction to provide optimum energy reduction in the event of an impact.*
- *Due to the vehicle dimensions in the side area of the body, deformable zones cannot be provided for absorbing energy. The impact energy can only be absorbed to a lesser extent here through the deformation of doors and pillars. This is also the case for the roof area where only the roof skin can absorb impact energy to a very small extent. In these areas, passenger protection is guaranteed by a rigid design of the passenger cell.*
- *The aim of this design is to absorb the impact energy in defined areas to keep the passenger cell as free of damage as possible in the event of an accident. If the passenger cell has been deformed in the event of an accident, extremely large reshaping forces can be expected. Repair work is often only possible in this case by replacing body parts.*
- *In general, an impact occurs diagonally or offset to the vehicle axle so that mixed forms are usually the result of a front and side impact or a rear and side impact. The deformation is not always restricted to the impact area. Due to inertia forces of masses, such as running gear, drive line, occupants of the vehicle and load or the body itself, deformation can also occur in the opposite areas.*
- *The following work sequence should provide assistance to correctly determine the scope of damage of vehicles damaged in an accident.*

Work sequence for determining scope of damage to vehicles involved in an accident

1. Identify impact points on the outer shell or the wheels
2. Remove accessories which limit view of the impact area
3. Check unit mounts, running gear parts and steering parts for deformation and cracks
4. Determine scope of damage on the body

See Identifiable deformations on the body structure
See No identifiable deformations on the body structure

5. Repair vehicle, if necessary.

Identifiable deformations on the body structure

1. Visual inspection of the structural parts for creasing and bending, starting from the point of impact toward the centre of the vehicle
2. Visual inspection of the structural parts at the joints for gaping panel connections (e.g. entry area at the side member under the rubber seal of the door)
3. Drive vehicle onto a lifting platform and raise. Measure the measuring points or reference points specified in the repair check dimensions table diagonally, horizontally and vertically using a beam compass or an electronic measuring system and compare with the specified values.
   →5 Check dimensions for body repair
4. Decide whether vehicle is technically repairable
5. Decide whether vehicle is economically repairable

Repair vehicle, if necessary.

No identifiable deformations on the body structure

1. Check seam joining line on the accessories
   →5 Diagram - Body gap dimensions
2. Check accessories for paint abrasion (accessories which have been in contact during the impact)
3. Drive vehicle onto a lifting platform and raise. Measure the measuring points or reference points specified in the repair check dimensions table diagonally, horizontally and vertically using a beam compass or an electronic measuring system and compare with the specified values.
   →5 Check dimensions for body repair
4. Determine scope of any existing damage to vehicle parts
   If necessary, measure running gear electronically
   →449503 Performing front and rear suspension alignment
5. Decide whether vehicle has to be repaired

Repair vehicle, if necessary.

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

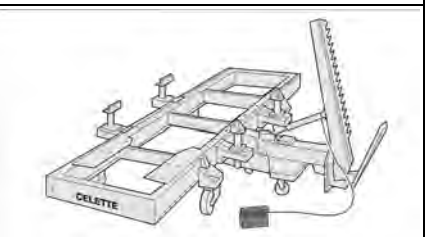
Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.



- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

- Information
- Technical values

top of page

Information

Brake hoses and lines

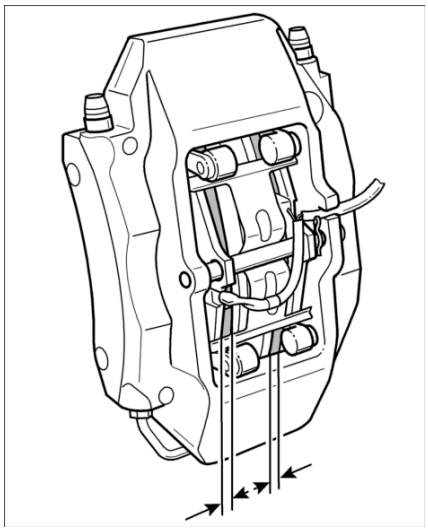
– Carry out visual inspection for leaks, damage, routing and corrosion.

Brake system: visual inspection of the brake pads and brake discs for wear

 WARNING

Risk of accident if brake pads and/or brake discs are not replaced in time.

- **Injury and material damage due to impaired braking effect.**



→ The brake pads must be replaced when the brake pad warning indicator lights up, but no later than when there is a residual pad thickness of 2 mm.

→ Brake discs must be replaced on reaching the wear limits.

 **Note**

- *If brake pad wear is indicated by the warning light, the warning contact (sender including wire and plug connection) must also be replaced.*
- *Replacing the warning contact can be avoided by replacing the brake pads no later than when the pad thickness is 2.5 mm.*
- *Warning contacts must be replaced if the core of the line is worn.*
- *However, if only the plastic part of the warning contact is worn, there is no need to replace it.*

1. To check the brake pads, remove the wheels →440519 Removing and installing wheel.

Checking brake pads

2. Visually inspect the brake pads for wear **-arrows-** (wear limit 2 mm).
3. Carry out visual inspection of the brake discs for wear *→03 TW Running gear maintenance: visual inspection - brake lines/brake pads/brake discs - chapter on "Technical values"*

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo**

risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

Ignition system

Designation	997	997 S
Ignition	DME, individual spark coils, knock control	
Firing order	1 - 6 - 2 - 4 - 3 - 5	
Spark plugs	Bosch FRG 5KQEO	
Electrode gap	1.6 ± 0.05 mm	

Ignition system tightening torques

Designation	997	997 S
Spark plug	→**Tightening torque: 22 ftlb +2 ftlb**	
Spark plug	→**Tightening torque: 19 ftlb +2 ftlb**	
Ignition coil	→**Tightening torque: 7.5 ftlb**

as of MY 2005
Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

Technical values

Brake pressure line

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing brake pressure line to brake master cylinder M12 x 1		Tightening torque	15 ftlb.		
Screw connection for securing brake pressure line to hydraulic unit M12 x 1		Tightening torque	12 ftlb.		
Screw connection for securing brake pressure line to hydraulic unit M10 x 1		Tightening torque	9 - 10.5 ftlb.		
Screw connection for securing brake pressure line to distributor, brake hose and brake calliper M10 x 1		Tightening torque	9 - 10.5 ftlb.		
Screw connection for securing brake pressure line to intermediate piece M10 x 1	Centre underbody	Tightening torque	9 - 10.5 ftlb.		
Screw connection for securing brake pressure line to intermediate piece M12 x 1	Centre underbody	Tightening torque	15 ftlb.		

Master brake cylinder / brake booster

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Brake booster to body screw connection M8		tightening torque	17 ftlb		

Brake unit support to body screw connection M8		tightening torque	17 ftlb		
Brake master cylinder to brake booster screw connection M14		tightening torque	36 ftlb		
Brake pressure line to brake master cylinder screw connection M12 x 1		tightening torque	15 ftlb		

Hydraulic unit

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing bracket for hydraulic unit to body M6		Tightening torque	3 ftlb.		
Screw connection for securing hydraulic unit to bracket M6		Tightening torque	4 ftlb.		
Screw connection for securing brake pressure line to hydraulic unit M10 x 1		Tightening torque	9 - 10.5 ftlb.		
Screw connection for securing brake pressure line to hydraulic unit M12 x 1		Tightening torque	12 ftlb.		

Brake calliper

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing brake calliper to wheel carrier M12 x 1.5	Replace screws on front and rear axle whenever removed.	Tightening torque	63 ftlb.		
Screw connection for securing brake pressure line to brake calliper M10 x 1		Tightening torque	9 - 10.5 ftlb.		
Screw connection for securing connecting line to brake calliper M10 x 1		Tightening torque	9 ftlb.		
Screw connection for securing bleeder screw to brake calliper M10 x 1		Tightening torque	6 - 9 ftlb.

top of page

Technical values

Tightening torques for mechanical brake

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Replace brake calliper to front and rear axle screw connection M12 x 1.5	bolts on front and rear axle after each removal.	tightening torque	63 ftlb		
Brake disc to wheel hub screw connection (front and rear axle) M6		tightening torque	7.5 ftlb		
Brake cover plate to front and rear axle screw connection M6		tightening torque	7.5 ftlb		
speed sensor to front and rear axle screw connection M6		tightening torque	7.5 ftlb		
Brake unit to body screw connection (aluminium interm. part) M8		tightening torque	17 ftlb		
Brake unit support to body screw connection M8		tightening torque	17 ftlb		
			17 ftlb		

Parking brake console to body screw connection M8		tightening torque			
Bracket for hydraulic unit to body screw connection M6		tightening torque	3 ftlb		
Hydraulic unit to holder screw connection M6		tightening torque	4 ftlb		
Wheel to wheel hub screw connection	Thinly grease thread, shank and under head (between screw head bearing surface and spherical cap ring) of the wheel bolts with Optimoly TA (aluminium paste). Do not grease bearing surface of the spherical cap facing wheel. If heavily contaminated, clean bolts first with a lint-free cloth.	tightening torque	96 ftlb		

Tightening torques for brake pedal/pedal bearing axle

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Brake pedal to brake pushrod (threaded bolt M8x1)		Tightening torque	7.5 ftlb.		
Brake pushrod to brake booster (collar nut M6)		Tightening torque	7.5 ftlb.		
Brake pushrod to adjusting piece (lock nut) M12 x 1.5		Tightening torque	22 ftlb.		
Pedal bearing axle in pedal block		Tightening torque	6 to 7.5 ftlb.		
Locknut pedal bearing axle to pedal block right M8		Tightening torque	7.5 ftlb.		
Locknut pedal bearing axle to pedal block left M14		Tightening torque	34 ftlb.

42 Tightening torques for rear axle - as of MY 2005

- Tightening torques for rear axle

top of page

Tightening torques for rear axle

Tightening torques for carrier side section/cross member

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Stud screw connection for securing carrier side section to body (front) M12 x 1.5 x 133	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Screw-in torque	34 ftlb.		
Screw connection for securing carrier side section to body (front) M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		
Screw connection for securing carrier side section to body (middle and rear) M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		
Screw connection for securing cross member to carrier side section M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		
Screw connection for securing transverse strut to carrier side section (front) M10 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	48 ftlb.		
Screw connection for securing brake hose holder to carrier side section M6	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		
Screw connection for securing diagonal brace to body M10 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	48 ftlb.		

Screw connection for securing diagonal brace to cross member M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		
Screw connection for securing diagonal brace to carrier side section (collar nut) M10 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	17 ftlb.		

Tightening torques for axle strut

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing control arm 2 (toe control arm) to wheel carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	56 ftlb.		
Screw connection for securing control arm 2 (toe control arm) to cross member (toe eccentric) M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	74 ftlb.		
Screw connection for securing control arm (lower control arm) to wheel carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	56 ftlb.		
Screw connection for securing control arm (lower control arm) to carrier side section (camber eccentric) M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	74 ftlb.		
Screw connection for securing diagonal arm to control arm M14 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	118 ftlb.		
Screw connection for securing diagonal arm to carrier side section M14 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	133 ftlb.		
Screw connection for securing control arm 3 and control arm 4 (upper control arm) to carrier side section M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		

Screw connection for securing control arm 3 and control arm 4 (upper control arm) to wheel carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	81.5 ftlb.		

Tightening torques for wheel carrier

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing wheel bearing to wheel carrier (lid) M8	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	27 ftlb.		
Screw connection for securing speed sensor to wheel carrier M6	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		
Screw connection for securing brake cover plate to wheel carrier M6	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		
Screw connection for securing brake disc to wheel hub M6	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		
Screw connection for securing brake calliper to wheel carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour. Replace screws on front and rear axle whenever they have been removed.	Tightening torque	63 ftlb.		
Screw connection for securing combination wire holder to wheel carrier M6	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		

Tightening torques for spring strut

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing spring strut to body M10	Please note: Do not grease screwed connections in	Tightening torque	46 (34 ftlb.)		

	Dacromet finish - aluminium colour.		Nm		
Screw connection for securing spring strut to wheel carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	110 (81.5 ftlb.) Nm		
Screw connection for securing shock absorber to mount (piston rod) - with and without PASM (M12 x 1 fastening nut)	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	32 (24 ftlb.) Nm		

Tightening torques for stabilizer

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing stabiliser to side section M8	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	17 ftlb.		
Threaded connection for securing stabilizer mount to stabilizer (collar nut M10)	Please note: Observe three-stage tightening procedure! Do not grease threaded connection in Dacromet finish - aluminium colour.	Three-stage tightening procedure (First stage: initial tightening to 37 ftlb. Second stage: loosen by 90 degrees. Third stage: final tightening to 48 ftlb.)	48 ftlb.		
Threaded connection for securing stabiliser mount to wheel carrier M10	Please note: Observe three-stage tightening procedure! Do not grease threaded connections in Dacromet finish - aluminium colour.	Three-stage tightening procedure (First stage: initial tightening to 37 ftlb. Second stage: loosen by 90 degrees. Third stage: final tightening to 48 ftlb.)	48 ftlb.		

Tightening torques for unit mount

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2

Screw connection for securing engine mount to body M8	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	17 ftlb.		
Screw connection for securing engine carrier to engine M10	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	34 ftlb.		
Screw connection for securing engine mount to engine carrier M12 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	63 ftlb.		
Screw connection for securing transmission support to body M10 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	48 ftlb.		
Stud for securing transmission support to body M10	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	15 ftlb.		
Screw connection for securing longitudinal support to body M10	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	48 ftlb.		
Screw connection for securing mount to longitudinal support M10	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	48 ftlb.		

Tightening torques for drive shaft

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Screw connection for securing drive shaft to transmission M10	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	60 ftlb.		
Screw connection for securing drive shaft to wheel hub M22 x 1.5	Please note: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	340 ftlb.		

Tightening torques for plug-in couplings for steering hydraulics

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Steering pressure line	Wrench size 15 mm	Tightening torque	30 (22 ftlb.) Nm		
Steering return line	Wrench size 19 mm	Tightening torque	40 (30 ftlb.) Nm		

Tightening torques for plug-in couplings for clutch hydraulic system

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Clutch line	Wrench size 15 mm	Tightening torque	30 (22 ftlb.) Nm		

Tightening torques for wheel mounting

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Wheel to wheel hub M14 x 1.5	Thinly grease thread, shank and under head (between screw head bearing surface and spherical cap ring) of the wheel bolts with Optimoly TA (aluminium paste). Do not grease bearing surface of the spherical cap facing wheel. If heavily contaminated, clean bolts first with a lint-free cloth.	tightening torque	96 ftlb

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

48 Tightening torques for steering - as of MY 2005

- Tightening torques for steering

Tightening torques for steering

Tightening torques for power-steering gear

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Steering gear to cross member M10 x 45	Replace screws after each removal.	Tightening torque	48 ftlb.		
Universal joint (steering shaft) to steering gear M8 x 35	Replace fit bolt after each removal.	Tightening torque	17 ftlb.		
Tie rod (axial joint) to steering rack M16 x 1.5		Tightening torque	59 ftlb.		
Aluminium tie rod to axial joint (lock nut) M14 x 1.5		Tightening torque	37 ftlb.		
Tie rod (ball joint) to wheel carrier (at steering arm) M12 x 1.5		Tightening torque	56 ftlb.		
Steering line to upper steering gear (union nut) M10		Tightening torque	7.5 ftlb.		
Steering line to lower steering gear (union nut) M10		Tightening torque	7.5 ftlb.		
Combination holder for pressure and return lines to engine M6 x 12		Tightening torque	7.5 ftlb.		
Pressure and return lines to steering gear (tension shackle) M10 x 20		Tightening torque	17 ftlb.		
Threaded connection, plug-in couplings for steering hydraulics M16 x 1.5 (a/f 15)	a/f = width across flats a/f 15 pressure line	Tightening torque	22 ftlb.		
Threaded connection, plug-in couplings for steering hydraulics	a/f = width across flats a/f 19 return line	Tightening torque	30 ftlb.		

M20 x 1.5 (a/f 19)					

Tightening torques for steering train/steering wheel

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Upper universal joint to steering shaft M8 x 35	Replace fit bolt after each removal.	Tightening torque	17 ftlb.		
Steering train to upper pedal block M10 x 100		Tightening torque	34 ftlb.		
Steering train to lower pedal block (pedal bearing axle in pedal block)		Tightening torque	6 to 7.5 ftlb.		
Steering train to lower pedal block (locknut pedal bearing axle to pedal block right M8)		Tightening torque	7.5 ftlb.		
Steering train to lower pedal block (locknut pedal bearing axle to pedal block left M8)		Tightening torque	34 ftlb.		
Locking-mechanism housing to steering outer tube upper and lower M6 x 18		Tightening torque	5.5 ftlb.		
Steering lock to steering train		Tightening torque	4.5 ftlb.		
Transverse support to retaining frame M6		Tightening torque	7.5 ftlb.		
Steering wheel to steering shaft M18 x 26	Replace internal serration screw after each removal.	Tightening torque	37 ftlb.		
Tab washer to steering wheel M6		Tightening torque	4.5 ftlb.

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

40 Tightening torques for front axle - as of MY 2005

-

top of page

Tightening torques for cross member/side member (one component)

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Threaded connection, cross member to body (front) M12 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	74 ftlb.		
Threaded connection, cross member with diagonal arm to body (front) M 14 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	Tightening torque	118 ftlb.		
Threaded connection, cross member to body rear (two screws each side) M 14 x 1.5	Caution: Do not grease threaded connections in Dacromet finish - aluminium colour.	Tightening torque	118 ftlb.		

Tightening torques for diagonal brace

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Diagonal brace to body screw connection M12 x 1.5	Caution: Do not grease screw connection with Dacromet finish - aluminium colour.	tightening torque	74 ftlb		
Diagonal brace to cross member / side member hexagon nut screw connection M12	Caution: Do not grease screw connection with Dacromet finish - aluminium colour.	tightening torque	74 ftlb		

Tightening torques for axle strut

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Control arm to cross member / side member screw connection M12 x 1.5	Caution: Do not grease screw connection with Dacromet finish - aluminium colour.	tightening torque	89 ftlb		
Control arm to diagonal arm screw connection M14 x 1.5	Caution: Do not grease screw connection with Dacromet finish - aluminium colour.	tightening torque	118 ftlb		
Control arm to wheel carrier (ball joint) screw connection M12 x 1.5	Caution: Do not grease screw connection with Dacromet finish - aluminium colour.	tightening torque	56 ftlb		

Tightening torques for spring strut

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Spring strut on wheel carrier (stabiliser mount to shock absorber pipe) M12 x 1.5 (911 Carrera)	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	85 (63 ftlb.) Nm		
Spring strut on wheel carrier (shock-absorber tube clamp to wheel carrier) M12 x 1.5 (911 Carrera 4)	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	85 (63 ftlb.) Nm		
Spring strut mount to body M8	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	33 (24 ftlb.) Nm		
Spring strut mount to piston rod M14 x 1.5	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	80 (59 ftlb.) Nm		

Tightening torques for wheel carrier

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Threaded connection, brake cover plate to wheel carrier M6	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	7.5 ftlb.		
Threaded connection, brake disc to wheel hub M6	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	7.5 ftlb.		
Threaded connection, brake caliper to wheel carrier M12 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour. Replace bolts on front and rear axle after each removal.	tightening torque	63 ftlb.		
Threaded connection, speed sensor to wheel carrier M6	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	7.5 ftlb.		
Threaded connection, combination coupling to wheel carrier M6	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	7.5 ftlb.		
Threaded connection, brake hose bracket to wheel carrier M6	Caution: Do not grease threaded connections in Dacromet finish - aluminium colour.	Tightening torque	7.5 ftlb.		
Threaded connection, retainer plate for wheel bearing to wheel carrier M8	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour.	tightening torque	27 ftlb.		
Threaded connection, wheel hub to wheel carrier (tension bolt) M22 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour! Replace lock nut after each removal.	tightening torque	340 ftlb.		

Tightening torques for stabilizer

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Stabilizer to cross member M10 x 60	Caution: Do not grease threaded connection in	Tightening torque	65 (48 ftlb.)		

	Dacromet finish - aluminium colour.		Nm		
Suspension/stabiliser mount to stabilizer M10	Please note: Observe three-stage tightening procedure! Do not grease screwed connection in Dacromet finish - aluminium colour.	Three-stage tightening procedure (1st stage: tighten to 50 Nm (37 ftlb.). 2. stage: loosen 90 degrees. 3. stage: tighten to 65 Nm (48 ftlb.).	65 (48 ftlb.) Nm		
Suspension/stabiliser to absorber pipe/wheel carrier M12 x 1.5	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	85 (63 ftlb.) Nm		
Suspension/stabiliser to spring strut plate M10 (911 Carrera 4)	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	65 (48 ftlb.) Nm		

Tightening torques for steering

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Tie rod(ball-joint pin) on lever M12 x 1.5	Caution: Do not grease screwed connections in Dacromet finish - aluminium colour.	Tightening torque	75 (56 ftlb.) Nm		
Aluminium tie rod to axial joint (lock nut) M14 x 1.5	Caution: When using special tool P9730 (socket wrench insert), observe the changed tightening torque! 50 Nm (37 ftlb.) at the lock nut corresponds to a setting of approx. 32.5 Nm (24 ftlb.) on the torque wrench.	Tightening torque	50 (37 ftlb.) Nm		
Universal joint (steering shaft) to steering gear M8 x 35	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour! Replace fit bolt after each removal.	Tightening torque	23 (17 ftlb.) Nm		
Steering gear to cross member M10 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour! Replace fastening screws after each removal.	Tightening torque	65 (48 ftlb.) Nm		

Tightening torques for wheel mounting

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Threaded connection, wheel to wheel hub M14 x 1.5	Caution: Do not grease threaded connection in Dacromet finish - aluminium colour! Thinly grease thread, shank and under head (between screw head bearing surface and spherical cap ring) of the wheel bolts with Optimoly TA (aluminium paste). Do not grease bearing surface of the spherical cap facing the wheel. If heavily contaminated, clean bolts first with a lint-free cloth. Replace damaged wheel bolts (no rework permitted).	Tightening torque	96 ftlb.

44 Adjustment values for suspension alignment - C2/C2S - as of MY 2005

Vehicle height

Note

- *The following values relate to the empty weight, i.e. full fuel tank, vehicle with tools, but without driver and without additional weights!*

Vehicle height	RoW/USA: Series C2/C2S	RoW/USA: PASM C2/C2S	RoW: Performance C2/C2S
Front axle			
Height with 18-inch wheels	→**Nominal value: 141 mm +/-10 mm**	→**Nominal value: 131 mm +/-10 mm**	→**Nominal value: 121 mm +/-10 mm**
Height with 19-inch wheels	→**Nominal value: 143 mm +/-10 mm**	→**Nominal value: 133 mm +/-10 mm**	→**Nominal value: 123 mm +/-10 mm**
From road contact surface to lower edge of hexagon-head bolt of cross-member screw connection to the body.			
Rear axle			
Height with 18-inch wheels	→**Nominal value: 165 mm +/-10 mm**	→**Nominal value: 155 mm +/-10 mm**	→**Nominal value: 145 mm +/-10 mm**
Height with 19-inch wheels	→**Nominal value: 163 mm +/-10 mm**	→**Nominal value: 153 mm +/-10 mm**	→**Nominal value: 143 mm +/-10 mm**
From wheel contact surface to the locating bore in the rear-axle side section (between toe and camber eccentrics).			

Wheel alignment values

WARNING

Risk of accident due to incorrect functioning of steering angle sensor if it is uncalibrated or incorrectly calibrated.

- **There is a risk of accidents causing physical damage to persons or objects in the PSM testing area.**

→ After working on wheel suspension parts, when replacing the steering-angle sensor and after changing the wheel alignment values, calibrate the steering angle sensor with the front wheels in straight-ahead position using the PIWIS tester.

→ Check the actual value of the steering angle sensor after a suspension alignment where no changes were made to the wheel alignment values.

Note

- *The following values relate to the empty weight, i.e. full fuel tank, vehicle with tools but without driver or additional weights.*
- *The toe-difference angle value is also influenced by the vehicle height. For this reason the measured result must be evaluated accordingly. No action is necessary in the case of small deviations from the toe-difference angle's required value as long as the value to the right and left is almost the same.*

Wheel alignment values	RoW/USA: Series C2/C2S	RoW/USA: PASM C2/C2S	RoW: Performance C2/C2S
Front axle			
Toe unpressed (total)	+ 5' ± 5'	+ 5' ±5'	+ 5' ± 5'
Toe difference angle at 20° lock	- 1° 40' ± 30'	- 1° 50' ± 30'	- 2° 15' ± 30'
Camber (with wheels in straight-ahead position)	- 15' ± 15'	- 15' ± 15'	- 30' ± 15'
max. difference, left to right	20'	20'	20'
Caster	8° 00' ± 30'	8° 10' ± 30'	8° 20' ± 30'
max. difference, left to right	40'	40'	40'
Rear axle			
Toe per wheel	+ 10' ± 5'	+ 10' ± 5'	+ 10' ± 5'
max. difference, left to right	10'	10'	10'
Camber	- 1° 10' ± 15'	- 1° 10' ± 15'	- 1° 40' ± 15'
max. difference, left to right	20'	20'	20'

997110, 997111, 997120, 997121, 997310, 997311, 997320, 997321

General warning notes for airbag and belt tensioner units

Disposal of airbag and belt tensioner units

Note

Country-specific statutory regulations and legislation based on them which go beyond these instructions must always be observed and take precedence over these instructions!

- *Airbag units are pyrotechnical items and can pose an environmental hazard!*
- *For this reason, non-ignited airbag units or entire vehicles must not be disposed of as normal scrap, refuse or in other final storage facilities!*
- *If the vehicle suffered fire damage which caused one or several airbags or belt tensioners to be triggered, additional ignition with the adapter cable must be carried out in order to ensure that only parts without pyrotechnical contents are scrapped!*
- *In the case of airbag units which cannot be ignited or if the conditions for safe ignition are insufficient, always return the airbag units to Porsche or the respective importer in their original packaging!*

Safety procedures when igniting airbag units

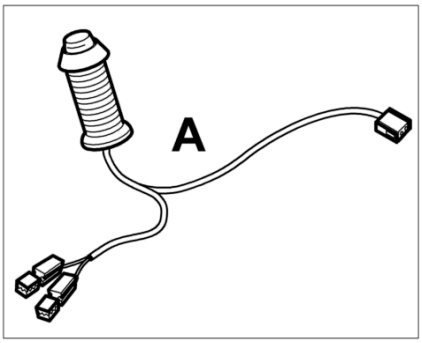
ATTENTION

Uncontrolled triggering of airbag units.

- **Danger of injury and damage to property as a result of incorrect handling of airbag units.**

→ Before disposal, render the airbag units harmless by electrical ignition and while observing all precautionary measures, thereby preventing them being used incorrectly!
→ Ignition and preparations may only be carried out by skilled staff, supervised by a second responsible person!
→ Other normal accident prevention regulations must also be observed!
→ Ignite airbag units only in their securely installed, original condition in the vehicle!
→ Carry out ignition only in suitable, free areas!
→ Use only the ignition tool intended for that purpose!
→ All loose objects must first be removed from the expansion area of the airbag!
→ Each ignition circuit of all airbag units and belt tensioners must be ignited individually.
→ Persons possibly affected must be informed of the resulting noise beforehand!
→ Use ear protectors!
→ Maintain a safety distance by utilising the entire cable length of the ignition tool!
→ Do not connect the voltage source until all other preparations are complete!
→ Choose a place in front of the vehicle. This also applies to persons not involved!
→ Perform ignition with the doors closed and the side windows open!
→ Do not approach the vehicle until after a waiting period (approx. 3 minutes) if ignition fails!
→ Allow airbag units to cool down under observation following ignition!
→ Avoid skin contact with ignited airbag units!

 ATTENTION
Unintentional triggering when ignition tool is connected.



- **Danger of injury and damage to property as a result of incorrect handling of airbag units.**

→ Remove ignition key. Disconnect and insulate the ground line on the battery. → *Work instructions after disconnecting the battery*
→ After the battery is disconnected, always wait for 1 minute before disconnecting the airbag plugs.

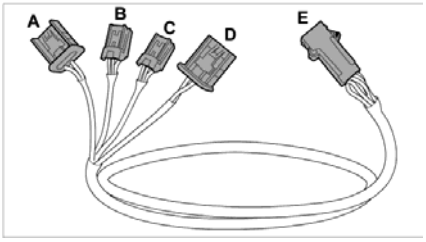
Tools and materials

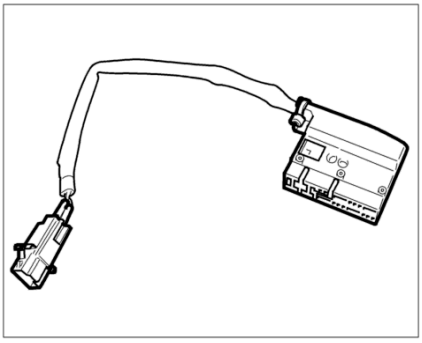


Tools for airbag units and belt tensioners

Ignition device 9257

The **ignition device 9257** is used for triggering the airbag units.

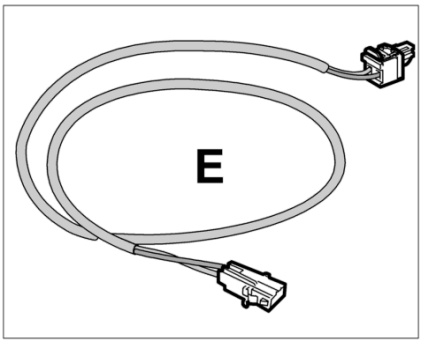
A - Ignition device 9257



Driver's airbag adapter cable 9257/4

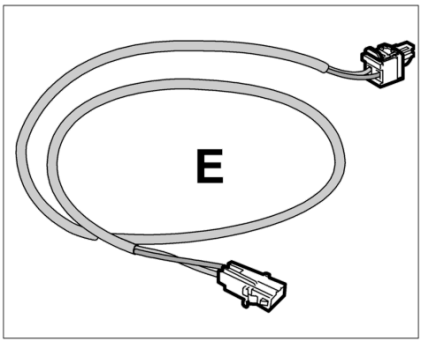
The **adapter cable 9257/4** is used for the driver's airbag.

B - Marking A - adapter for 1st stage of driver's airbag unit



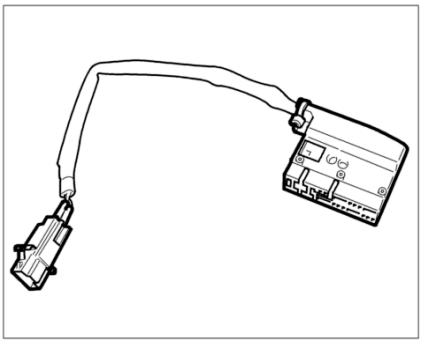
C - Marking B - adapter for 2nd stage of driver's airbag unit

E - Adapter for ignition device



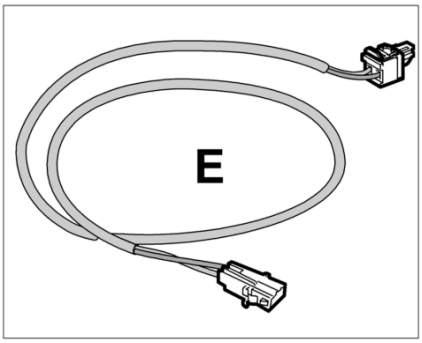
Adapter cable of side airbag in the seat

Adapter cable of side airbag in the seat



Passenger's airbag adapter cable, left side

The **adapter cable 9257/3 -E-** is used for the passenger's airbag, **left side**.
The **adapter cable 9257/5** is used for the passenger's airbag, **right side**.



Head airbag adapter cable

The **adapter cable 9257/3 -E-** is used for the head airbag.

Adapter cable of side airbag in the seat

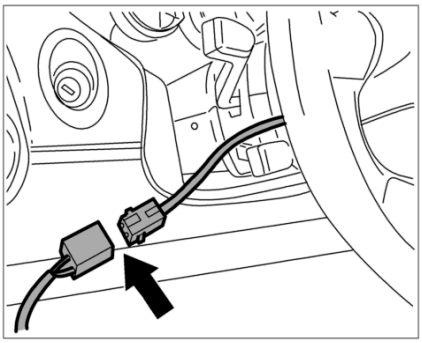
The **adapter cable 9257/6** is used for the side airbag in the seat.

Belt tensioner adapter cable

The **adapter cable 9257/3 -E-** is used for the belt tensioner.

Designation	Special tool	Explanation
Ignition device	9257	
Adapter cable	9257/4	For driver's airbag
Adapter cable	9257/3	Passenger's airbag, **left side**
Adapter cable	9257/5	Passenger's airbag, **right side**
Adapter cable	9257/3	Head airbag
Adapter cable	9257/6	Side airbag
Adapter cable	9257/3	Belt tensioner

top of page



Connecting ignition tool

Driver's side

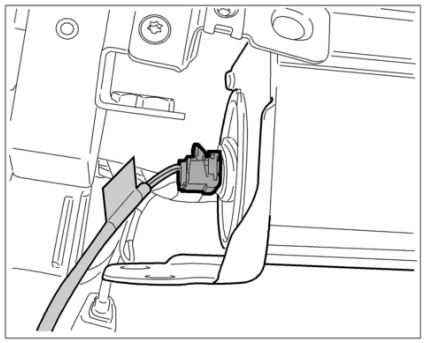
Note

This is a two-stage airbag module which must be ignited separately.

- *Remove trim panel for steering column. →481319 Removing and installing trim.*

Driver's side

1. Disconnect plug from the airbag at the steering column switch and first insert the plug with marking **A** (1st stage) of adapter cable No. 9257/4.
2. Connect ignition device No. 9257 to the 2-pin plug **E** of adapter cable No. 9257/4.
3. Place the ignition device in front of the vehicle through the door gap.
4. After triggering, repeat the work step with the plug with the marking **B** (2nd stage).



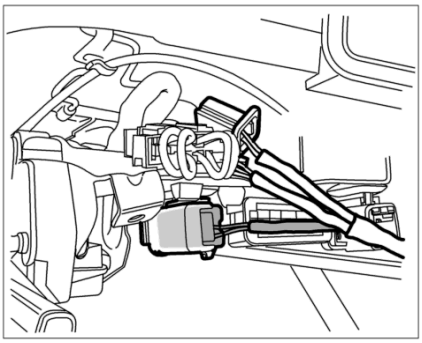
Passenger's side

Note

Deformation of the instrument panel bracket must be expected after triggering of the passenger's airbag unit. An installed airbag unit should be intentionally triggered in installed state only if the vehicle is to be scrapped. If the instrument panel bracket is deformed in the area of the airbag mount, the instrument panel bracket will have to be replaced.
This is a two-stage airbag module which must be ignited separately.

- *Remove glove compartment →681519 Removing and installing glove compartment*
- *Remove passenger's airbag unit. → 21 Removing and installing passenger's airbag unit - Removing*

1. If the instrument panel is to be re-used, remove the instrument panel. →701819 Removing and installing the instrument panel - Removing



2. Connect the adapter cables 9257/3 (left) and 9257/5 (right) to the removed airbag unit. Re-install airbag unit with the adapter cables.
3. Connect ignition device No. 9257 to the 2-pin plug **E** of adapter cable No. 9257/3.
4. Place the ignition device in front of the vehicle through the door gap.
5. After triggering, repeat the work step with adapter cable No. 9257/5.

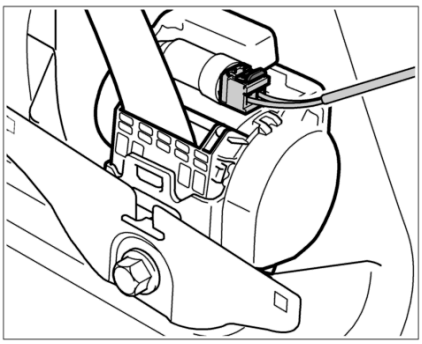
Side airbag

Note

Before disconnecting the battery, move the seat to the uppermost position.

Side airbag

1. Unlock and separate the electrical plug for the seat.
2. Connect plug of adapter cable 9257/6 to the electrical plug for the seat.
3. Connect ignition device No. 9257 to the 2-pin plug of adapter cable No. 9257/6.
4. Place the ignition device in front of the vehicle through the door gap and trigger it.



Head airbag

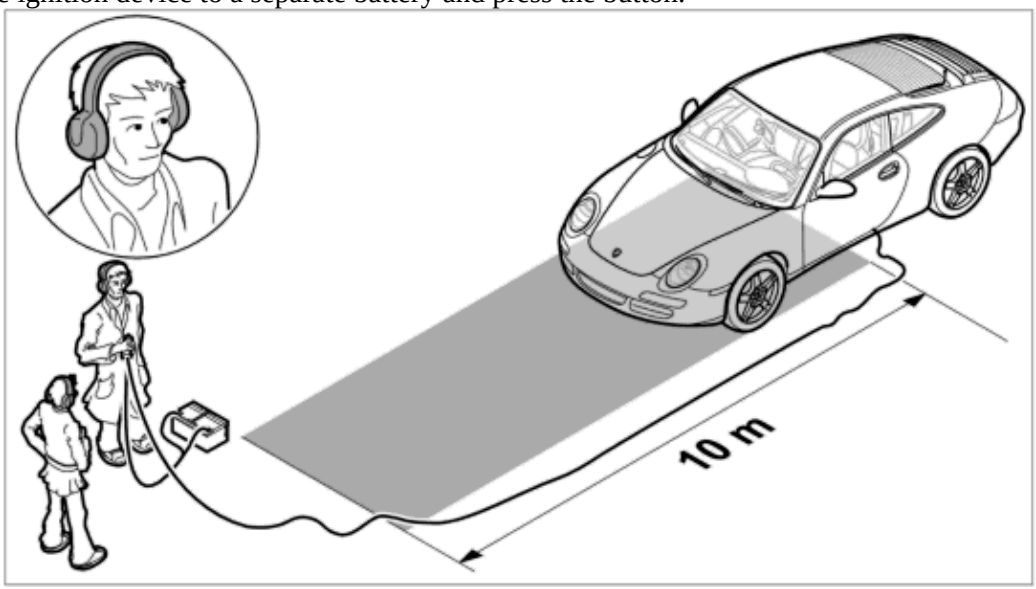
Remove door trim panel. → *21 Removing and installing the door trim panel - Removing*

1. Connect plug of adapter cable 9257/3 to the head airbag.
2. Connect ignition device No. 9257 to the 2-pin plug of adapter cable No. 9257/3.
3. Place the ignition device in front of the vehicle through the door gap and trigger it.

Belt tensioner

Remove the side panel lining at rear. →707519 Removing and installing rear side panel lining [997310 997311 997320 997321 997610 997611 997620 997621]→707519 Removing and installing rear side panel lining [997110 997111 997120 997121 997410 997411 997430 997431]

1. Connect plug of adapter cable 9257/3 to the belt tensioner.
2. Connect ignition device No. 9257 to the 2-pin plug of adapter cable No. 9257/3.
3. Place the ignition device in front of the vehicle through the door gap and trigger it.



Triggering of airbag units

WARNING
Detonation of airbag units.

- **Danger of injury from emerging objects, e.g. splinters.**
- **Hearing impairment by explosion noises.**
- **Danger of burns from hot airbag units.**
- **Danger of poisoning by emerging gases.**

→ Observe a safety distance of at least 10 m.
→ Wear hearing protection.
→ Each airbag unit, the respective ignition stages 1 and 2, and each belt tensioner must be triggered individually.
→ Allow airbag units to cool down for the appropriate time.
→ Open the vehicle doors to allow the gases to escape.

Connect the ignition device to a separate battery and press the button.

Triggering of airbag units

WARNUNG
Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

40 Lifting the vehicle - as of MY 2005

- Preliminary work

top of page

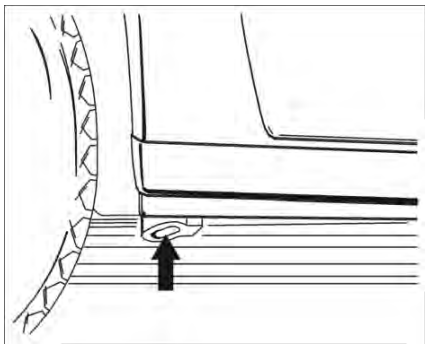
Preliminary work

Lifting the vehicle

WARNING

Inappropriate raising of the vehicle or inaccuracy driving onto the platform.

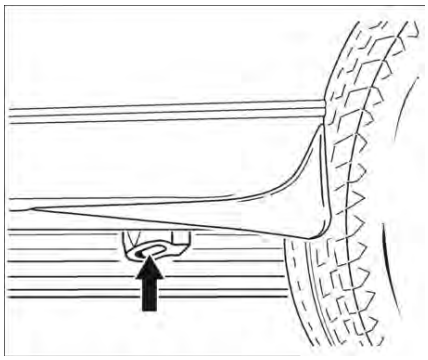
- **Risk of damage to property, e.g. damage to door sills and side member panels.**



→ Lift vehicle only at the take-up points shown .

→ Make sure the screw connections for the diagonal braces are accessible.

→ When driving onto a lifting platform, ensure that there is sufficient distance between the lifting platform and the vehicle.



→ In order to avoid damage to the side members and side member panels, the mounting plates of the platform lift must be raised.

→ Under no circumstances should the vehicle be lifted by the engine, transmission or axles.

Mounting point front

Align the platform of the platform lift so that it lines up with the illustrated jacking point **-arrow-** . Repeat procedure on the other side.

Jacking point rear

Align the platform of the platform lift so that it lines up with the illustrated jacking point **-arrow-** . Repeat procedure on the other side.

01 Interior equipment: visual inspection for damage and soiling - as of MY 2005

- Checking seat belts

Check interior equipment

Note

- *The following items can be checked by simple visual inspection, no assembly work required.*

1. Check whether transport protection has been completely removed and ensure that no film remains in the component joints or under seals.
2. Check interior equipment of vehicle for noticeable damage such as scores, scratches, notches and scrapes.
3. Check interior equipment of vehicle for soiling.

top of page

Checking seat belts

Functional Check

Note

- *The following requirements must be met when fitting the seat belt*
- *If one of the requirements listed below is not met, the seat belt or the buckle must be replaced.*

It must be possible to unroll the belt strap smoothly from the belt retractor via the deflector fitting by pulling evenly.
The tongue of the seat belt must engage audibly in the buckle.
An abrupt pull on the belt strap must lock the belt retractor.

Condition inspection

Visually inspect the belt strap for damage by unrolling it completely.
If it displays evidence of damage in the form of cuts, fraying, seam tears etc., the seat belt must be replaced.

44 Wheels and tyres/tyre pressure - as of MY 2005

-

top of page

Wheels, tyres: visual inspection for damage

Check tyres for sufficient tread depth, foreign bodies, pricks, cracks and bulges in the sidewall (ply breakage). Check age of the tyres. Replace tyres if necessary.

Checking wheel mounting

Use suitable commercially available tools (wrench size 19 mm) together with a tested torque wrench, covering the range up to 130 Nm (96 ftlb.). Never use an impact bolter.
Do not undo the wheel bolts to check whether they are secure. Tighten the wheel bolts to 130 Nm (96 ftlb.) and check that they fit securely.

Tyre pressure for cold tyres (approx. 20 ° C)

 DANGER

Tyre damage due to insufficient tyre pressure in conjunction with driving at high speeds, due to tyres that are too old and/or tyres which do not meet Porsche requirements.

- **Increased risk of accidents.**

→ Adjust the tyre pressure according to specifications. Never allow the pressure to fall below the minimum pressure.
→ Carry out a visual inspection and check tyre age. Replace tyres older than 6 years .
→ Use only tyres recommended by Porsche.

 **Note**

- *Valve caps protect the valve from dust and dirt and therefore from leaks! Always screw caps tight and replace any missing caps.*

Summer and winter tyres - 911 Carrera, 911 Carrera S

18-inch front wheels	→**: 2.5 bar**
18-inch rear wheels	→**: 3,0 bar**

19-inch front wheels	→**partially loaded: 2.3 bar**
19-inch front wheels	→**fully loaded: 2.5 bar**
19-inch rear wheels	→**partially loaded: 2.7 bar**
19-inch rear wheels	→**fully loaded: 3.0 bar**

Partially loaded applies to up to 2 persons without luggage. Fully loaded applies to more than 2 persons with luggage.
Summer and winter tyres - 911 Carrera 4, 911 Carrera 4S.

18-inch and 19-inch front wheels	→**partially loaded: 2.3 bar**
18-inch and 19-inch front wheels	→**fully loaded: 2.5 bar**
18-inch and 19-inch rear wheels	→**partially loaded: 2.7 bar**
18-inch and 19-inch rear wheels	→**fully loaded: 3.0 bar**

Partially loaded applies to up to 2 persons without luggage. Fully loaded applies to more than 2 persons with luggage.

- Spare wheel/collapsible wheel not available! However there is a tire repair kit in the luggage compartment which can be used to repair the damaged tire in the event of damage!
- For repairs in the event of damage, observe without fail the safety and operating instructions !

The chart of tyres and wheels for summer and winter should be taken from Technical Information (TI) Group 4!
When replacing summer tyres, pay close attention to the tyre specification number! The specification characters N1, N2, N3 or N0 distinguish the summer tyres specially authorised by Porsche from other models of the same tyre type and size!

Notes on mounting tyres

- When fitting tyres, the direction of rotation and the inner and outer sides should be noted!
- If there are no mounting instructions on the tyre sidewall, the tyre must be mounted so that the DOT code is visible from the outside.

24 AW Precautionary measures when handling oxygen sensors - as of MY 2005

Precautionary measures when handling oxygen sensors

 ATTENTION

Improper handling of oxygen sensors.

- **Material damage**

→ Do not remove the plastic cap on the thread until just prior to fitting the oxygen sensor. The thread grease must never come into contact with the connector.

→ Protect sensors - before and after fitting - against mechanical shocks.

→ Sensors that were dropped on the floor must not be used owing to the risk of a broken ceramic insulator.

→ The cables must not be twisted or kinked when the sensors are screwed in. Avoid pulling on the cable and connector.

→ Cleanliness in the housing of the plug connections is of utmost importance for the oxygen sensor to function properly. Particles of dirt can impair the function of the oxygen sensor. The connector must therefore be protected against any and all types of soiling.

→ Sensors with a soiled or damaged connector must no longer be used.

→ Protect the cables and plugs when carrying or moving the exhaust system with the sensors already fitted.

→ High-pressure cleaning equipment must not be used in the area of the sensors and plug connections.

→ Contact and corrosion agents, e.g. Stabilant, must not be applied to the plug contacts of the oxygen sensors.

27 06 Check battery - as of MY 2005

- General warning notes

top of page

General warning notes

General warning notes for the battery

 ATTENTION

Emerging battery acid.

- **Danger of injury and risk of damage to materials coming into contact with battery acid.**

→ Wear suitable protective clothing and goggles!

→ Do not tip battery; acid can emerge from the vent openings!

→ Only illuminate the inside of the battery with a torch. Danger of explosion!

→ Do not handle a naked flame or lit cigarette near the battery!

→ Do not tilt battery when removing it. Risk of caustic burns as a result of emerging acid!

→ Protect the vehicle exterior and interior against battery acid. Cover areas if necessary.

→ Rinse acid splashes in the eyes immediately with clean water for a few minutes. Consult a doctor immediately.

→ Neutralise acid splashes on the skin, clothing or objects immediately with soap suds and rinse again with plenty of water.

→ If acid has been drunk unintentionally, consult a doctor immediately.

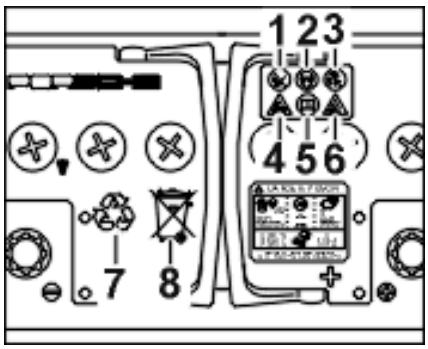
 ATTENTION

Ignition of the battery during charging.

- **Danger of injury and risk of damage to materials coming into contact with battery acid when the battery is being charged.**

→ The battery plugs must always be screwed in correctly when charging and during voltage measurement and load measurement.

→ Rooms in which batteries are being charged should not be entered with a naked flame or when smoking. Gases form through the charging process in the batteries which are highly flammable.



Note

To prevent contact corrosion, only approved bolts, nuts, washers, etc. should be used. These elements have a special surface coating and must be stored separately.
The battery is one of the most important electrical components in the vehicle. Fault-free functioning of the battery contributes greatly to customer satisfaction. To guarantee long and efficient operation, the battery must be checked and maintained according to the description in this chapter.
Besides the starting function, the battery also has the tasks of buffer and supplier of electrical energy for the entire vehicle electrical system.

Note

Warning notes and safety regulations for lead-acid batteries
-1- Fire, sparks, naked flames and smoking are forbidden:

- *Avoid sparking when using cables and electrical devices.*
- *Avoid short circuits.*
- *In batteries with central venting, there is an increased concentration of oxyhydrogen gas at the hose opening. The venting hose should not be bent or blocked by dirt.*

Battery with warnings and safety regulations

- *In batteries with central venting, there is an increased concentration of oxyhydrogen gas at the hose opening.*

-2- Wear eye protection.
Lead-acid **-3-** , Keep children away from acid and batteries.
-4- Danger of caustic burns:

- *Battery acid is highly caustic, therefore wear protective gloves.*
- *Do not tip battery; acid can emerge from the vent openings.*

First aid: Rinse acid splashes in the eyes immediately with clean water for a few minutes. Consult a doctor immediately. Neutralise acid splashes on the skin, clothing or objects immediately with soap suds and rinse

again with plenty of water. If acid has been drunk unintentionally, consult a doctor immediately.
-5- Observe information on the battery, in the Technical Manual and in the Driver's Manual.
-6- Danger of explosion:

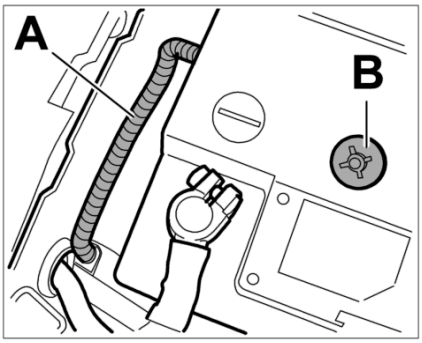
- *A highly explosive detonating gas mixture is formed when charging batteries.*

-7- Disposal:

- *Hand in old batteries at a collection point.*

-8- Never dispose of old batteries in the domestic rubbish.

Battery handling requirements



Low-maintenance battery

– Battery terminals do not need to be greased.
– The battery terminal clamps should only be attached manually, without excessive force, to prevent damage to the battery housing.
– The tightening torque for the battery terminals is 5 Nm (3.5 ftlb.).
– If the battery is to be reconnected, proceed according to → *Work instructions after disconnecting the battery*.
– To ensure that the battery does not leak, it is essential to ensure that the original plugs supplied with the battery are screwed into the battery openings.
– In the event of loss or damage, only original plugs of the same design should be used.
– The plugs must be fitted with an O-ring seal.

Battery central venting

Note

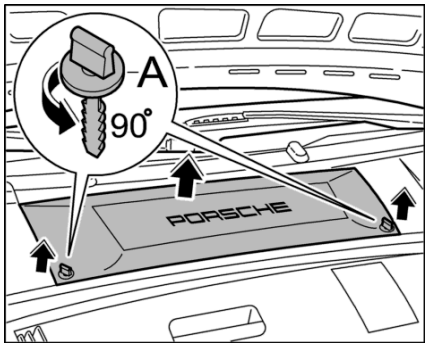
- *State of the art batteries are fitted with central venting* ***-A-*** .
- *The gas generated during charging emerges centrally through an opening on the upper cover side. The backfire protection is integrated at the same position, which prevents the ignition of the combustible gas present in the battery.*

Central venting

- *In batteries with hose/pipe **-A-** for the central venting, ensure that the hose is not pinched. Only then can the battery be freely vented.*

Visual inspection of battery

Before measurements such as open-circuit voltage, gravity of electrolyte or the battery load test are carried out, a visual inspection of the battery must be performed.
Through this check, it can be determined:



- Whether the housing of the battery is damaged. Acid can leak out due to damage of the housing.
- Whether the battery terminals (battery line connections) are damaged. Contact of the line connections cannot be guaranteed if the battery terminals are damaged. This can cause a line fire and malfunctions in the electrical system.

Checking acid level of low-maintenance battery

Note

- *Use a commercially available battery filling bottle.*
- *The correct acid level of the battery is an important factor for long and efficient operation of the battery.*
- *When the acid level is too low, a capacity loss (performance loss) of the battery occurs, which is caused by the cell plates drying out. If the cell plates are not surrounded by electrolyte (battery acid), this will lead to corrosion of the lead plates, the plate bridges and the cell connectors. The result of the corrosion is that battery functioning cannot be guaranteed. The battery will become unserviceable.*
- *If the acid level is too high, damage can occur by the battery acid (sulphuric acid/water mixture) leaking out of the battery.*

1. Switch off ignition and remove ignition key.

Removing battery cover

2. Remove battery cover.

Emerging battery acid. Observe →270601 Checking battery - General warning notes.

3. Unscrew battery plugs.
4. Shine a torch into the battery. The acid level of the battery must be at the protruding lug.

– If the acid level is too low, refill with distilled water using the battery filling bottle.

5. Screw in battery plugs again and ensure that they are seated correctly.
6. Remount battery cover.

Checking gravity of electrolyte

Note

- *Only for low-maintenance batteries.*

Note

- *Use commercially available battery acid tester.*
- *The acid density test provides information about the state of the battery in conjunction with the battery load test.*
- *The temperature of the battery acid must be at least 10°C .*

The gravity of electrolyte must be checked as follows in all battery cells (low-maintenance battery) :

1. Switch off ignition and remove ignition key.

Emerging battery acid. Observe →270601 Checking battery - General warning notes.

2. Unscrew all battery plugs (plugs of the battery cells).
3. Dip the acid siphon or the pipette into the battery cell and take up the battery acid.
4. Read off the gravity of electrolyte in kg/dm³ on the scale of the battery acid tester and compare with the following table.

Battery charge state in normal climatic zones	Spec. gravity in kg/dm³
discharged	1.12
half charged	1.20
well charged	1.28

Battery charge state in tropical climatic zones (hot countries)	Spec. gravity in kg/dm³
discharged	1.08
half charged	1.16
well charged	1.23

The gravity of electrolyte must be at least 1.24 kg/dm³ in normal climatic zones.

– If the gravity of electrolyte is too low, charge battery.
– After charging the battery, repeat the electrolyte gravity test.

The measured values for the gravity of electrolyte of the individual battery cells should not deviate by more than 0.03 kg/dm³ from each other.

Examples of non-permissible specific gravity of electrolyte deviations:						
Battery cell:	1	2	3	4	5	6
	Gravity of electrolyte per cell in kg/dm³					
Example 1:	1.24	1.25	1.25	1.10	1.24	1.25
Example 2:	1.26	1.26	1.25	1.14	1.18	1.24

Example 1: The gravity of electrolyte in cell 4 is too low.
Example 2: The gravity of electrolyte in cells 4 and 5 is too low. The specific gravity of electrolyte deviations between the battery cells is greater than 0.03 kg/dm³.

– If the nominal values are not achieved, replace battery.
– If the nominal values are achieved, screw in the original plugs again.

Open-circuit voltage measurement

Note

- *Use a hand-held multimeter to measure the battery voltage.*

Note

- *After charging and waiting for at least 2 hours, during which time the battery should neither be loaded nor charged:*

1. Switch off ignition and remove ignition key.
2. Disconnect ground strap on the battery.
3. Measure the battery voltage with a hand-held multimeter.

– The battery open-circuit voltage should not fall below 12.5V.
– If the hand-held multimeter shows 12.5V or more, the battery voltage is OK.
– If the hand-held multimeter shows a battery voltage below 12.5V: Charge battery.

Battery load test

Note

- *The acid density test provides information about the state of the battery in conjunction with the battery load test.*
- *A battery test device is required for the load test.*
- *The battery need not be removed or disconnected.*
- *The battery must be charged before the load test is performed.*

Carrying out battery load test:

1. Switch off ignition and remove ignition key.
2. Observe the information in the operating instructions of the battery test device.
3. Connect the clamps of the test lines to the battery terminals as described in the operating instructions of the test device.

– As the load current varies, the current must be set depending on the battery capacity (operating instructions of test device).

4. Perform the battery load test in accordance with the operating instructions.

– The result of the battery load test is a voltage value that must be compared with the specified minimum voltage (limit value).

Table:	
Battery capacity:	80 Ah
Cold test current	380A
Load current	300A
Minimum voltage (limit value)	9.5V

5. If the minimum voltage is not attained, replace battery.

Remarks on battery load test:
The battery voltage sinks during this test due to the severe load on the battery.
If the battery is in order, the voltage value only decreases to the minimum voltage.
If the battery is faulty, the battery voltage will sink very quickly below the specified minimum voltage.
After the test has taken place, the low voltage value remains over a long period of time; the voltage increases again slowly.

Charging battery

 **Note**

- *A battery charging device is required.*
- *Observe charging device operating instructions.*
- *The battery must have a minimum temperature of 10°C.*
- *If possible, do not fast charge batteries as this can damage them.*
- *If exhaustively discharged batteries are charged quickly, they will not take up a charge current or they will be identified too early as full due to the so-called "surface charge".*

1. Switch off battery charging device.
2. Switch off ignition and remove ignition key.
3. First disconnect the ground strap of the battery, then the positive battery line.
4. Connect positive line of the battery charging device to the positive terminal of the battery.
5. Connect negative line of the battery charging device to the negative terminal of the battery.
6. Set the charge current on the battery charging device according to the battery capacity.
7. Switch on battery charging device.

Procedure for charging totally discharged batteries:
Batteries which are not in operation for a long period of time discharge.
A battery is totally discharged if the open-circuit voltage has sunk below 11.6 V.
In totally discharged batteries, the battery acid (sulphuric acid and water mixture) consists of virtually only water, as the sulphuric acid proportion is considerably reduced.
Totally discharged batteries sulphatise, i.e. the entire plate surfaces of the batteries harden.
If totally discharged batteries are immediately recharged after an exhaustive discharge, the sulphatisation recedes again.
If these batteries are not recharged, the plates continue to harden and charge take-up ability is limited. A reduction in the battery performance is the result.
Totally discharged batteries must be charged with a low charge current as follows:
–

Set charge current at maximum 10% of battery capacity, i.e. with a 80 Ah battery the charge current is maximum 8 A.

8. Charge battery.

Safety instructions for raising vehicles

Danger of injury when raising vehicles

 DANGER

Risk of fatal injury due to vehicles slipping or tilting off lifting platforms!

- **Risk of injury due to vehicles slipping or tilting off lifting platforms may be caused by improper alignment of the lifting platform arms or support plates, and by raising, supporting or removing units on raised vehicles!**

→ Align the vehicle evenly between the lifting platform columns.

→ Lift the vehicle only at the take-up points provided.

→ Check the correct seating of the support plates by raising the vehicle slightly and conducting a visual inspection.

→ In order to ensure that the vehicle is not lifted off the support plates during assembly work, the vehicle must be secured on the lifting platform, or the shift in the centre of gravity must be offset by a corresponding load in the vehicle, when units are removed or supported.

→ In addition, the guidelines of the lifting platform manufacturers and the legal accident prevention regulations and those of the mutual indemnity association (VGB 14) must be observed.

Damage when raising vehicles

 ATTENTION

Danger of material damage if the vehicle is raised incorrectly!

- **Lift the vehicle only at the approved take-up points!**
- **Raising the vehicle in the sill area will lead to the deformation of body parts and to leakage in the underbody area!**

→ Lifting or supporting the vehicle at unsuitable take-up points can lead to material damage on the vehicle!

Safety instructions for welding

Danger of injury when welding

 DANGER

Risk of fatal injury from high voltage during electric welding!

- **Danger of explosion and fire when welding in the area of highly inflammable materials.**
- **Irritation to respiratory tracts from toxic zinc oxide emitted when welding galvanised steel!**
- **Danger of injury from weld spatters and UV light when welding!**
- **Danger of injury from unintentional triggering of pyrotechnical safety components!**

→ Do not perform welding work in a damp environment or on wet ground; there is a risk of fatal injury from the voltage being conducted through the human body. Persons with heart pacemakers should not perform welding work. Use insulating underlays.

→ Remove highly flammable materials from the work area; if necessary, remove units with fuel-carrying parts and protect work areas in the vehicle that are at risk of catching fire using fire-proof covers.

→ Ventilate the work area well.

→ Remove smoke gases with a suitable extraction system (refer to Workshop Equipment Manual).

→ Wear suitable protective equipment, such as protective clothing, gloves, a welding shield and, if necessary, a protective mask.

→ For welding work, always disconnect both terminals on the battery. In the case of welding work in the immediate vicinity of the control modules for pyrotechnical safety systems, remove the control modules before beginning work.

→ In addition, the guidelines of the welding equipment manufacturer and the legal accident prevention regulations and those of the mutual indemnity association (BGV D1) must be observed.

Safety instructions for flying sparks during grinding and welding work

 ATTENTION

Danger of explosion and fire from flying sparks during grinding and welding work!

- **Danger of injury and danger of damage to vehicle parts and other vehicles due to flying sparks!**

→ Cover vehicle parts such as battery, fuel system, paintwork, glass and passenger compartment parts with fire-proof covers and, if necessary, remove batteries and fuel-carrying components.

→ No other vehicles may be left unprotected in areas used for body repair!

Safety instructions for fuel tank

 ATTENTION

Risk of fire and explosion due to open flames and sparks in area of fuel tank!

- **Danger of fire due to fuel tank or fuel-carrying parts heating up during grinding and welding work!**

→ When carrying out grinding and welding work near the fuel tank or fuel-carrying parts, make sure that these parts do not heat up!

→ It is recommended to remove endangered parts!

→ Cover the welding area generously with fire-proof covers!

Safety instructions for air conditioning

 ATTENTION

Danger of injury due to the filled air-conditioning system bursting!

- **Danger of injury due to the filled air-conditioning system bursting during welding and brazing work!**
- **In the case of extreme heating of filled air-conditioning systems, a very strong overpressure may be caused in the system which may lead to an explosion.**

→ No welding, braying or hot-air heating may be performed on parts of the filled air-conditioning system!

→ While drying after painting work, the temperature burden on the vehicle must not exceed two hours at a maximum temperature of 80 °C!

→ Make sure that parts of the air-conditioning system do not heat up during welding or brazing work on the vehicle!

top of page

Safety instructions for adhesive bonding

Danger of poisoning and injury when adhesive bonding

 ATTENTION

Danger of poisoning and injury when handling adhesive!

- **Danger of poisoning when breathing in vapours or from swallowing adhesive.**
- **Risk of injury due to contact with skin or eyes.**

→ Ventilate the work area well.

→ Do not eat, drink, or smoke while carrying out work.

→ Avoid direct contact with eyes and skin. Wear suitable protective equipment, such as protective clothing, gloves, and if necessary, a protective mask.

→ If clothing is soiled with resin residues, change clothing immediately and only use again after they have been cleaned.

→ Also observe the product-specific processing and safety instructions on the packing container and packing container imprints.

→ In case of eye contact: Rinse eyes immediately and thoroughly with luke-warm running water and consult an eye doctor.

→ In case of skin contact: Rinse contacted skin areas immediately with luke-warm running water and soap.

→ If adhesive is swallowed: Rinse mouth and consult a doctor.

Safety instructions for Teromix-6700 two-component adhesive

 ATTENTION

Material damage! Setting time of adhesive is not observed!

- **Danger of damage to side section if setting time of adhesive is not observed!**

→ The new part must be welded in within 30 minutes!

top of page

Safety instructions for installation work

Safety instructions for sharp-edged body and unit parts

 ATTENTION

Danger of injury! Sharp-edge burrs on body and unit parts!

- **Danger of injury from sharp edges on body and unit parts!**

→ Wear protective gloves when working in the area of sharp-edged body and unit parts!

Safety instructions for airbag system

 ATTENTION

Danger of injury! Unintentional activation of airbag units!

- **Serious injury due to unintentional activation of airbag units!**

→ The ground strap of the battery must be disconnected during work on the airbag system and alignment bench jobs when the body is being repaired!

→ After the battery is disconnected, assembly work or work on the vehicle with a hammer or similar tools must not be started until after a waiting period of 1 minute!

Safety instructions for door

 ATTENTION

Material damage! Incorrect installation of the door lock!

- **Danger of material damage if the door lock is installed incorrectly! Malfunctions in the alarm system!**

→ The door lock should be installed only when the actuating lever is in basic position!

 ATTENTION

Damage to plug connection lugs during door removal!

- **Damage to plug connection lugs during door removal! Damage to lugs when pulling the plug connection out of the A-pillar!**

→ The locking element at the bottom part of the plug connection must be pulled out before the plug connection is disconnected!

 ATTENTION

Damage to the bowden cable when removing door trim panel!

- **Damage to the bowden cable when removing door trim panel! Damage by bending the bowden cable at the hook!**

→ Pull the hook out of the end piece only after installation in the inner door release!

 ATTENTION

Danger of injury! Malfunction of the door window!

- **There is a danger of injury if fingers or hands are trapped by the door window when the comfort function is triggered: lower and raise door window!**

→ When carrying out assembly work in the area of the connection piece, the door handle and the door lock, the fuse No. 1 in row D must be removed!

top of page

Safety instructions for corrosion protection

Safety instructions for plug location plan (body)

 ATTENTION

Material damage when removing plugs!

- **Danger of corrosion and of uncontrolled water penetration when removing plugs!**

→ The body apertures are sealed with plugs at the factory, and must be sealed with the plugs provided once more following disassembly or repair work!

Safety instructions for water drains (body)

 ATTENTION

Danger of material damage when cleaning the water drainage hoses!

- **Water drainage hoses can be pushed out or pressed in by blowing them out of the body during cleaning!**

→ When cleaning, only blow the water drainage hoses out with light compressed-air pressure!

→ The water hoses should only be blown out when the sliding/tilting roof is closed.

Safety instruction for deformation element

 ATTENTION

Danger of injury by damaged deformation elements!

- **Danger of injury by damaged deformation elements after an accident!**

→ It is impermissible to perform repairs on the deformation element.

→ The deformation elements must be replaced in the event of visible damage or pressure marks.

Possible separation points on inner side member

 WARNING

Possible separation points on inner side member

- **Danger of material damage and injury**

→ The possible separation points on the inner side member are **30 mm in front of the tailored blanks (laser weld) against the direction of travel.**

Baked hardening

WARNING

This affects torsion resistance, resistance to bending and crash safety

- **Danger of injury and material damage**

→ The spare parts are heat-treated. "Original Porsche parts" attain their final strength only after the production stage of cathodic immersion painting and drying.

→ Only "Original Porsche parts" or sections of "Original Porsche parts" may be used for repair work!

The indicated body parts attain their final strength only through the temperature effects of the production stage of cathodic immersion painting and drying.

as of MY 2005
Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

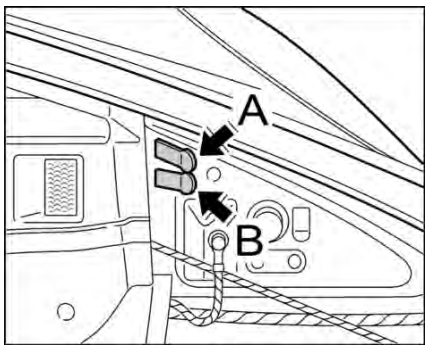
- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

01 Checking the function of the vehicle's lights - as of MY 2005

Check lighting

Turn on ignition, switch on all vehicle lights one after another and check that the individual lights are working.
Lights to be checked:

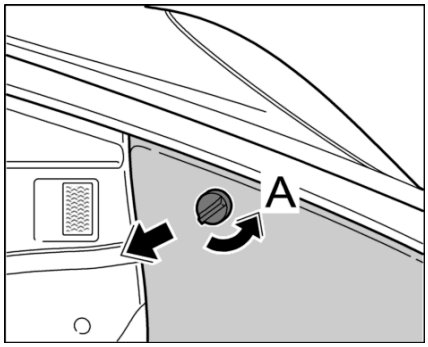


- Main headlights
- Fog lights
- Side direction indicator light
- Tail light
- Number plate light
- Additional brake light

Adjusting main headlights

Note

- *The distance between the headlights and the adjustment unit should be as small as possible!*
- *It should not exceed 30 cm, because at greater distances it is no longer possible to define the formation of the light/dark limit in the adjustment unit clearly!*



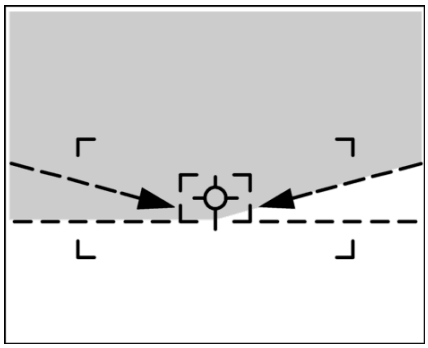
The vehicle must be on a horizontal surface!
Make the adjustment with the regulator switch set to 0 (headlight beam adjustment)!
Use a standard 5 mm ball-head screwdriver to make the headlight adjustment (free blade length 150 mm).
Only the lower screw may be turned for height adjustment; for lateral adjustment the upper and lower screws must be turned in the same direction and for the same number of rotations!

Make the adjustment with the vehicle ready for driving (fuel tank full, driver's seat occupied by a person or → **: 75 kg** , the tyre pressure must correspond to the specified values) using a headlight adjustment unit.

A - Lateral adjustment

B - Height and lateral adjustment

1. Undo and pull out the plastic nut **-A-** for the carpet trim.
2. Turn on the ignition, turn on dipped beam and high beam headlights.
3. Check setting and adjust if necessary.



Adjusting:

Set headlight adjustment unit to 10 cm/10 m (1%)!

With this alignment, preference must be given to the central zone around the salient point of the light/dark limit!

First, make the height/side adjustment of the dipped beam/high beam.

4. To do this, line up the light/dark borderline running upwards at an angle on the right-hand side with the dotted 15° line of the adjustment unit.
5. Next, perform the horizontal adjustment of the dipped beam headlights.

To do this, line up the left, horizontal section of the light/dark limit (when driving on the right) with the dotted horizontal line of the adjustment unit.

6. In the case of Xenon headlights, the ignition must be switched off and on after the adjustment has been made with the lights switched on.
7. After this, the adjustment must be checked again.
8. Fit the carpet again and insert plastic nut.

Adjusting the main headlights, USA version

– Vertical and horizontal adjustment must be carried out with a headlight adjustment unit.

Checking horn function

Press horn actuation on steering wheel and check the function and sound of horn.

Check and adjust clock

Check current time, adjust if necessary.

1. The clock is set in the multi-function display.
2. Press clock button on instrument cluster.
3. Set the time using the rocker switch on the wiper switch.
4. Press reset switch on the wiper switch.

Compare time displayed in instrument cluster with time displayed in PCM (if available) and adjust the time in PCM also if necessary.

01 Windscreen washer/headlight cleaning system: Check operation, nozzle settings - as of MY 2005

- Windscreen washer/headlight cleaning system: Check operation, nozzle settings

top of page

Windscreen washer/headlight cleaning system: Check operation, nozzle settings

Windscreen washer/headlight cleaning system: Check operation, nozzle settings

 ATTENTION

Surface of headlights can be damaged if not cleaned correctly.

→ Use only soapy water to clean the exterior lights and the plastic headlight lenses.
→ Never use chemical cleaning agents.
→ To avoid scratches, do not rub with dry or only damp cloths, paper towels or insect-removal sponges.

 **Note**

- *The headlight washer nozzles are pre-set!*
- *Generally, it is not necessary to adjust them!*

 **Note**

The spray nozzles for the windscreen washer system are not adjustable!
Sharp objects (needles) must not be inserted in the nozzle holes!

– Check function, fluid levels and nozzle settings. If the settings of the spray nozzles for the windscreen washer system are not okay, they must be replaced.

Mix ratio of fluids for windscreen washer system

Fluid:	Mix ratio:
Water	Undiluted
Water/isopropanol	1 : 1
	2 : 1
	3 : 1
Water/ethanol	1 : 1
	2 : 1
	3 : 1

Checking wiper blades

Check the wiper blades for any deformities and tears.

1. Turn on the ignition, operate the spray nozzles and check the quality of the wipers.

01 IN Alarm system: checking that the control equipment is working - as of MY 2005

check operation of indicators

Vehicle must be unlocked and the sales check item - Diagnosis system: systems activated and fault memory read out - must be performed.

1. Lock vehicle with the remote control. Shortly after locking, no warning tone must be emitted by the alarm system horn. If a warning tone is emitted, check exterior covers, glove compartment cover, centre console cover and all doors; open and close these items in turn.
2. As soon as the vehicle is locked, the LED - between the two air vents at the centre of the instrument panel - must flash quickly for several seconds and then flash slowly.

Fault display:

3. LED flashes quickly for 2 seconds, lights up for 28 seconds and then flashes slowly >> connect the System Tester and read out the fault memory.

01 IN Checking electrical equipment such as control and warning lights for functionality. - as of MY 2005

Checking electrical equipment

- Turn ignition key and check function of warning and indicator lights (visual inspection).
- Actuate power windows and check operation.
- Check that rear window heater is in working order.
- Adjust heater blower and fans to high and low and check the air vents for air throughput.
- Check operation of front seats.
- Check audio function.
- Check operation of door mirror, check adjustment options.
- Check operation of orientation lights.
- Actuate central locking and check operation.
- Operate cigarette lighter and check that it is in working order.

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

87 IN Instructions for repairing air-conditioning systems and storing spare parts - as of MY 2005

Instructions for repairing air-conditioning systems and storing spare parts

Note

Close all openings immediately upon starting work on the refrigerant circuit.
Store all spare parts in a dry and sealed-off area.
Blast air-conditioning components with nitrogen before refitting.
When fitting parts, do not remove plugs until shortly before installation. Do not remove the protective foil from the dryer until shortly before installation. The dryer absorbs moisture from the air and is then useless.
Do not carry out repairs in the open in damp weather.
Replace the dryer after each occasion of working on the refrigerant circuit.
Moisture in the refrigerant circuit not only leads to poor cooling. Supersaturation can also cause the dryer to disintegrate and contaminate the air-conditioning from inside. This may lead to expensive and complicated repairs.
Replace the dryer every 3-4 years.
Evacuate the refrigerant circuit according to regulations.
Use a pressure reducer when working with nitrogen.

997110, 997111, 997120, 997121, 997310, 997311, 997320, 997321, 997410, 997411, 997430, 997431, 997610, 997611, 997620, 997621

87 AW Safety regulations for working on air-conditioned vehicles and dealing with refrigerant R134a - as of MY 2005

General safety regulations for refrigerants

 ATTENTION

Extreme heating of air-conditioning system e.g. from sunlight shining into the vehicle or as a result of welding and soldering work.

- **Danger of fire due to excessive heating of air conditioning.**
- **Danger of environmental pollution due to emerging refrigerant.**

→ When carrying out repairs on the air-conditioning system, the system must be emptied by suction and the refrigerant must be purified. Chlorine-free refrigerants must also not be allowed to escape into the atmosphere and must be disposed of correctly.

→ Due to their chemical composition, different refrigerants must not be mixed with each other! This also applies for smaller quantities.

→ No welding, soldering or hot-air heating may take place on parts of the filled air-conditioning system or in its immediate vicinity.

→ While drying after painting work, the temperature burden on the vehicle must not exceed two hours at a maximum temperature of 80°C.

→ Whether or not the system is filled with refrigerant, the heating causes a very strong overpressure which can cause damage to the system or even lead to an explosion.

→ R 134a is completely non-toxic at normal temperatures, but it decomposes upon contact with a flame or at high temperatures.

→ Refrigerant bottles must not be thrown and must not be subjected to direct sunlight or other heat sources for an extended period when full.

→ The maximum permissible temperature of a filled refrigerant bottle must not exceed 45 °C.

→ Risk of injury! High temperatures from open flames or hot solids causes chemical breakdown of refrigerant gas. Inhalation of the resulting breakdown products leads to coughing and nausea.

 WARNING

Contact with liquid or gaseous refrigerant.

- **The refrigerant attacks the skin and damages the skin's surface.**

→ Wear rubber gloves to protect your hands.

→ Treat affected skin in the same way as in the case of freezing. Rinse immediately and then consult a physician.

→ Wear safety goggles to protect your eyes.
→ If refrigerant still gets in your eyes, consult a physician immediately.

 WARNING
The intensive effect of refrigerant on unprotected body parts can cause freezing.

→ Keep an eye-rinse bottle with clear water at hand.
→ If liquid refrigerant gets into your eyes, rinse them thoroughly with water for about 15 minutes.
→ Then consult a doctor immediately.
→ The physician must be informed which refrigerant has caused the freezing.

 **Note**

- *The following safety measures should be followed for refrigerant R134a (additional regulations may apply in certain countries).*

If repair work necessitates opening the refrigerant circuit, the refrigerant circuit is first to be emptied. Avoid all contact with liquid or gaseous refrigerants. If refrigerant should escape despite all safety measures having been taken, the resulting refrigerant/air mixture should not be breathed in. Therefore, switch on extraction systems, protect hands with rubber gloves and protect eyes with protective goggles.
If refrigerant gets onto any other body parts despite all safety measures having been taken, these should also be rinsed immediately and thoroughly with water for at least 15 minutes.
Although refrigerant R134a is non-flammable, smoking, welding, soldering and hard-soldering is prohibited in a room containing refrigerant.

Emptying the refrigerant circuit

 **Note**
Refrigerant R134a contributes to the greenhouse effect as soon as it is released into the Earth's atmosphere. Refrigerant should not be released into the environment but is to be extracted from the refrigerant circuit using an extraction or service station. The extracted refrigerant is then prepared again on-site or returned to the manufacturer for environmentally-friendly disposal (varying or additional regulations may apply in certain countries).

Working on the refrigerant circuit

 ATTENTION
Emerging refrigerant in poorly ventilated rooms and erection pits.

- **Danger of suffocation from odourless refrigerant.**

→ The leaking refrigerant is not only colourless and odourless, but is also heavier than air and therefore displaces oxygen. In poorly ventilated rooms and erection pits there is therefore an undetectable risk of suffocation.
→ The gas/air mixture formed when refrigerant escapes should not be breathed in but rather extracted via suitable extraction systems (workshop extraction system).
→ There should be no erection pits, shafts or cellar stairs within a radius of 5 metres.

Painting work on vehicles with air-conditioning

 WARNING
Painting work on vehicles with air-conditioning

- **Material damage due to the air-conditioning system bursting.**

→ When carrying out repairs involving painting work, object temperatures in the drying oven or its preheating zone should not exceed 80 °C.

Notes on general repairs

The refrigerant circuit of the air-conditioning is only to be emptied and opened if this is necessary due to safety measures or if components of the refrigerant circuit have to be replaced.
The air-conditioning refrigerant circuit also remains closed during all other standard vehicle repair work.
Contact corrosion!
For this reason, the manufacturer only fits connecting elements with a special surface coating.
Contact corrosion can occur if unsuitable connecting elements (screws, nuts, washers, rivets, plugs, adhesives, etc.) are used.
Only use original Porsche parts!

87 Safety regulations for extraction and filling systems - as of MY 2005

Safety regulations for extraction and filling systems

 WARNING

Improper handling of the filling system for the air conditioning.

- **Unnecessary damage to the environment due to emerging refrigerant.**

→ Before connecting the filling system to the air-conditioning, make sure that the manual shut-off valves are closed.

→ Before disconnecting the filling system from the air-conditioning, make sure that the process is complete so that no refrigerant can escape into the atmosphere.

→ After the purified refrigerant has been filled into an external compressed gas bottle from the filling system, the manual shut-off valves on the bottle and on the filling system should be closed.

→ Do not expose the filling system to moisture or use in a damp environment.

→ Shut off the power supply at the filling system before carrying out maintenance work.

→ An extension cable with cross-sectional area of at least 2.5 mm ^{2} should be used only when absolutely necessary.

→ In the case of fire, the external bottle should be removed.

→ Fill the oil extracted from the air-conditioning system into a suitable closable container (the refrigerant oil contains small quantities of refrigerant).

→ The filling system must be secured to prevent rolling.

50 Body parts of various sheet-steel strengths - as of MY 2005

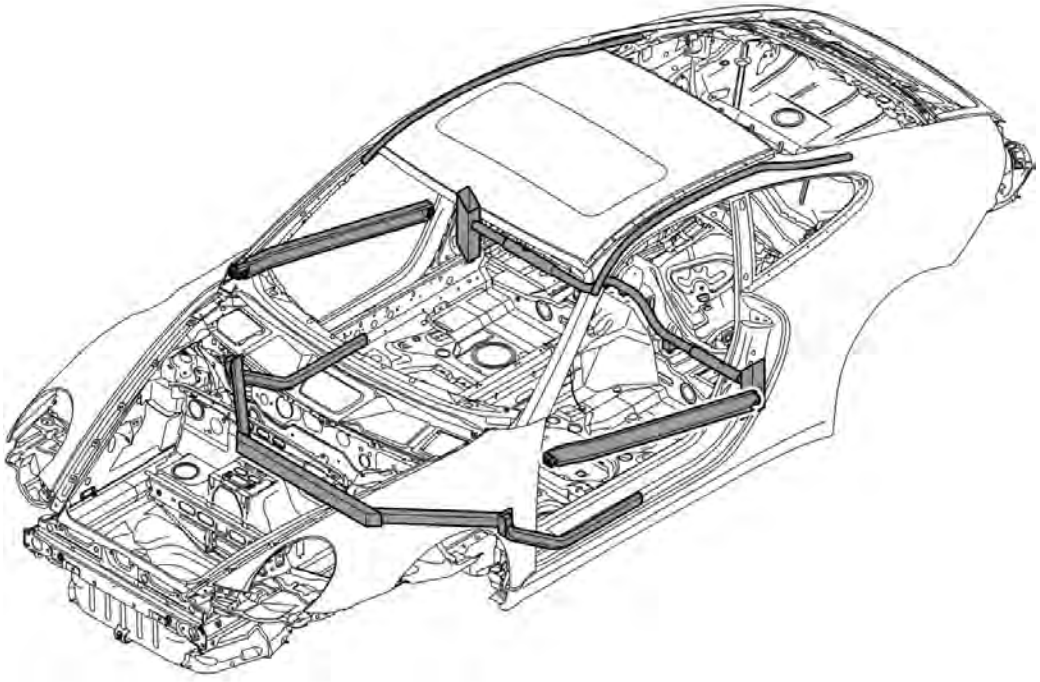
High-strength steel plates

Note

- *Only "Original Porsche parts" must be used for repair work!*

Body parts of high-strength steel contribute to better protection of the passenger compartment and thus increase protection of the passengers. In addition to improved crash safety, these parts also have a positive influence on fatigue strength. In terms of crash behaviour, body parts made from high-strength sheet steel are characterised by their higher energy absorption. But this also means that higher reshaping force must be applied in reshaping work.

High-strength steel plates

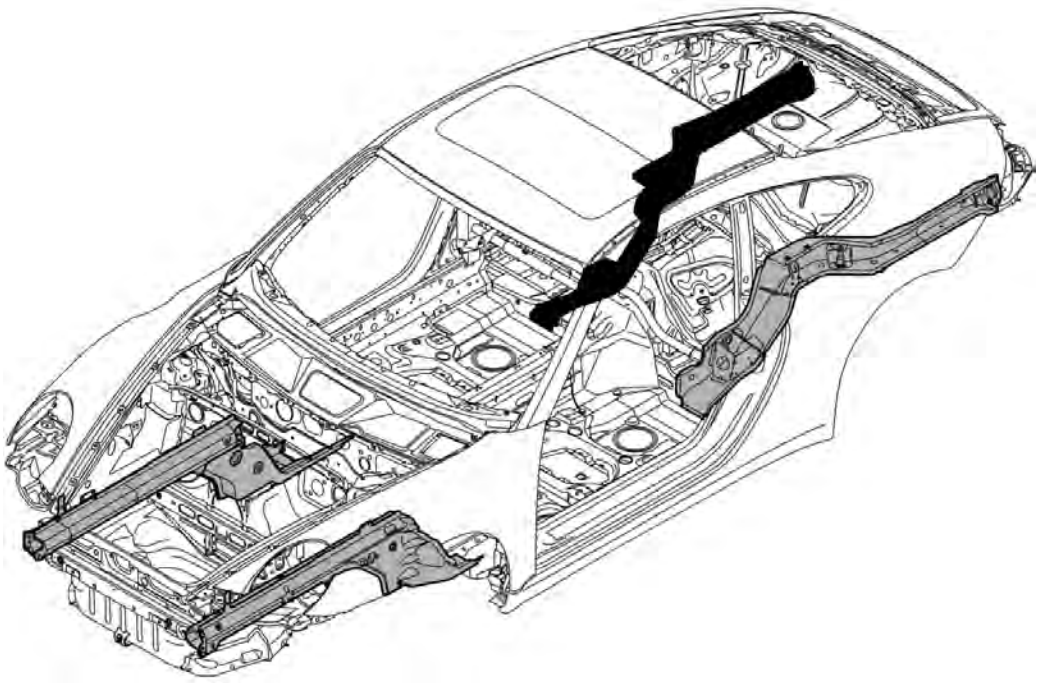


Highest-strength steel plates

WARNING

This affects torsion resistance, resistance to bending and crash safety

- **Danger of injury and material damage**



→ Body parts made of highest-strength steel plate cannot be reshaped. Highest-strength body parts cannot be straightened or reshaped!

Highest-strength steel plates

Tailored blanks

The indicated body parts are made by welding together plates of different thicknesses and characteristics and then deep-drawing these parts. In their crash behaviour, these body parts are characterised by their high energy absorption.

Tailored blanks

Baked hardening

WARNING

This affects torsion resistance, resistance to bending and crash safety

- **Danger of injury and material damage**

→ The spare parts are heat-treated. "Original Porsche parts" attain their final strength only after the production stage of cathodic immersion painting and drying.

→ Only "Original Porsche parts" or sections of "Original Porsche parts" may be used for repair work!

The indicated body parts attain their final strength only through the temperature effects of the production stage of cathodic immersion painting and drying.

Straightening body parts

Note

Only "Original Porsche parts" or sections of "Original Porsche parts" may be used!

The body and floor assembly are produced in series from deep-drawn panels. For this reason, accident damage must be reshaped in the same way. Body repairs by reshaping are not possible if these body parts are correspondingly deformed. Here, the repair must be carried out using new parts or by means of sectional repairs. The separation of damaged body parts after reshaping against the accident direction should not take place until after connection pieces have been straightened.

Welding work

Note

- *The use of the oxyacetylene welding process is not permissible for body parts made of high-strength steel!*
- *Test welding must be carried out in the case of resistance spotwelding (RP) of different panel strengths!*

The body parts made from high-strength steel can be welded using the RP resistance spot-welding and MIG welding processes that are customary in workshops.

Reshaping

Note

- *Only "Original Porsche parts" or sections of "Original Porsche parts" may be used for repair work!*
- *The separation of damaged body parts should not take place until after reshaping against the accident direction has taken place and connection pieces have been straightened!*

Body repairs by reshaping are not possible if these body parts are correspondingly deformed. Here, the repair must be carried out using new parts or by means of sectional repairs.

Separation points

Note

- *Separation points which influence the strength of the body, and thus also the operating and traffic safety of the vehicle, must be carried out according to the specifications of the relevant Technical Manual covering body repair!*

- *Body reinforcements can be separated or joined together only if this is specified in the method descriptions. Otherwise, a damaged reinforcement must always be replaced with a new one!*

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

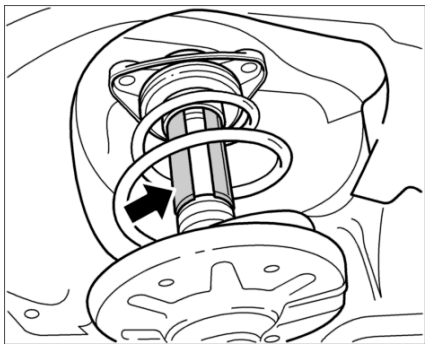
Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

01 Removing transport lock (spring strut locking devices) - as of MY 2005 - as of MY 2005

- General
- Removing spring strut locking devices



top of page

General

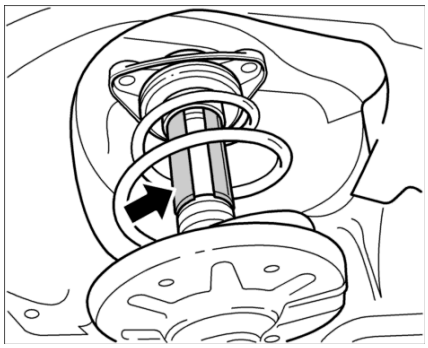
WARNING
Increased risk of accident due to installed spring strut locking devices.

- **Worsening of handling and driving safety.**

→ Remove spring strut locking devices before a test drive or before the vehicle is handed over to the customer.

Front spring strut locking devices

Note
In order to avoid damage to the floorpan assembly during transport (e.g. during loading and unloading), spring strut locking devices (new version) **-arrow-** are installed in new vehicles on the front axle. This increases the ground clearance of the vehicle.
Depending on the vehicle equipment, the spring strut locking devices are coloured white, yellow, green, blue, red, or orange.
On the rear axle, no spring strut locking devices are necessary.
Do not send removed spring strut locking devices back to Porsche. Dispose of them on-site.



top of page

Removing spring strut locking devices

Note

- *The wheels need not be removed!*

1. Lift the vehicle (wheels at the front axle must be free). →*401000 Lifting the vehicle*

Front spring strut locking device

2. Remove the spring strut locking device **-arrow-** . To do this, twist the spring strut locking device until the slot points toward the luggage compartment.
3. Beginning at the lower end, press the spring strut locking device away from the piston rod via the slot and guide it out of the spring.
4. Repeat the procedure on the spring strut.

45 60 Initialising and calibrating steering-angle sensor - as of MY 2005

- General warning notes
- Checking steering-angle sensor
- Adjusting steering-angle sensor

top of page

General warning notes

 ATTENTION

Increased risk of accident whever power supply is interrupted. PSM does not function.

→ The steering-angle sensor must be initialised (taught) whenever the battery is disconnected.

 **Note**

- *The steering-angle sensor is integrated into the steering column switch and records the movements of the steering wheel (steering wheel angle) using light switches. The data is transmitted to the PSM control unit via the CAN bus.*
- *During initialisation, the steering angle sensor learns its current position (straight-ahead position).*
- *The steering-angle sensor must always be initialised if terminal 30 was interrupted (for example, battery replacement, undervoltage, steering column switch disconnected, relevant fuse removed)!*
- *Calibration must be performed when working on or carrying out subsequent work on the chassis. This is described in detail in the next chapter →456005 15 Initialising and calibrating steering-angle sensor - section on "Calibrating".*
- *The calibration results in zero point balancing (exactly straight ahead).*
- *The steering angle sensor is calibrated when first fitted and when any work has been carried out on steering and chassis. Examples of this would be opening the steering wiring and alterations to toe and camber.*
- *Calibration includes initialisation.*

top of page

Checking steering-angle sensor

Initialise steering-angle sensor

1. Turn wheels to straight-ahead position.
2. Start
   engine.
3. From the straight-ahead position, turn steering wheel approx. 20° to the left and 20° to the right (past straight-ahead position).
4. Drive the vehicle straight ahead for at least three seconds at a speed above 6 km/h (3.7 mph).

After successful initialisation, the stored fault code is erased from the fault memory. The PSM indicator light in the instrument cluster goes out.
After initialisation has been completed, the battery must not be disconnected, the relevant fuse must not be removed and there must not be undervoltage. Otherwise, initialisation will have to be carried out again.

top of page

Adjusting steering-angle sensor

Calibrating steering-angle sensor

Note

- *The steering-angle sensor must be recalibrated on the measuring platform following repairs to or work on the chassis/steering or if the steering-angle sensor/steering column switch/hydraulic unit is replaced.*
- *In order to be able to calibrate the steering angle sensor correctly, the vehicle must be on the measuring platform, the wheel alignment values correct and the steering in the straight-ahead position.*
- *The security code is displayed in thePIWIS tester under Menu >> PSM >> Actual values.*

The steering angle sensor must be calibrated using the menu with PIWIS tester under the specified test conditions:

1. Switch on ignition.
2. Turn wheels or steering wheel to straight-ahead position. In the straight-ahead position, the steering wheel must deviate by no more than ± 2.0° from the horizontal position (steering centre position).
3. Before calibrating, first turn the steering wheel from the straight-ahead position approx. 20° to the left and 20° to the right (past straight-ahead position).

4. Turn wheels or steering wheel to straight-ahead position and calibrate the steering-angle sensor. To calibrate, you must enter the security code in the actual values menu.

- Checking exterior equipment and paintwork

top of page

Checking exterior equipment and paintwork

Checking exterior equipment

Note

- *The following items can be checked by simple visual inspection, no assembly work is required.*

Check that the vehicle transport protection has been completely removed and ensure that no film remains in the body joints or under seals.

1. Check vehicle for secure fit of accessories such as trim strips, doors mirrors, front and rear spoilers.
2. Check underbody for noticeable areas where undersealing material is missing (e.g. scrapes).
3. Check lower side member of body flange for deformation of jacking points.
4. Check outer shell of vehicle for noticeable soiling by cavity sealing wax.

Checking paintwork

1. Check outer shell of vehicle for noticeable sheetmetal damage such as dents and bulges.
2. Check painted surfaces of vehicle for noticeable defects such as scores, scratches, notches, scrapes, pores, bubbles or signs that the bodywork is coming through the paint.

01 Checking lid and doors - as of MY 2005

- Checking lid and doors

top of page

Checking lid and doors

Checking lid lock, front and rear

Check that the lid locks engage when the lids (front and rear) are closed by engaging the lock upper parts and that they disengage again when the lid releases are activated.

Checking safety hook, front lid

1. Check that the front lid is held down by the safety hook (locking hook) after the lid lock is opened.
2. Check whether the return spring on the upper part of the lock pulls back the safety hook as far as the stop.

Door lock function test

Check that the door locks engage in two stages when the doors are closed and that they disengage again when the door handles are operated (inside and outside).

Functional check of tank cap lock

Lock the vehicle.
Check that tank cap is locked by the tank cap lock in the closed position.

- Checking

top of page

Checking

Checking bellows

Note

- *The bellows on the steering gear can be damaged by outside influences, for example by stone damage or during assembly work.*
- *The steering gear can become leaky if dirt or moisture enters a leaky bellows.*

– Visually inspect the bellows for damage.

Tie rod ends: check play and dust bellows

1. Lift vehicle *→40 Lifting the vehicle.*

Note

- *The rubber dust bellows and tie rods can be damaged by external influences, e.g. stone impact, or during assembly work.*
- *If a rubber dust bellow leaks, the joint or the tie rod must be replaced because any dirt or moisture that seeps in will destroy the joint.*

2. Check play and dust bellows.
3. Check dust bellows and joints are in working order and free of leaks.

03 IN Running gear maintenance: axle joints/drive shafts - as of MY 2005

- Information

top of page

Information

Axle joints: checking play and dust boots

1. Check play.
2. Visually inspect the dust boots for damage.

Note

- *When doing so, the rubber dust boots should be pressed down with the fingers to reveal hidden cracks.*
- *If a rubber dust boot leaks, the corresponding joint or control arm must be replaced, because any dirt or moisture that seeps in will destroy the joint.*

3. Inspect the dust boots of the axle joints (ball joints) on the wheel suspension (front and rear) as follows:

- Place the vehicle on a lifting platform with the steering lock disengaged.
- Perform a visual inspection after cleaning.

Note

- *Over a small area in the vicinity of the brake cover panels, no visual inspection is possible.*
- *Check this area by touch.*

The procedure for the front axle is as follows:

- Turn the front wheels as far as they will go
- Perform a visual inspection of the visible surfaces on the left and right
- After turning the front wheels to the other steering stop, check the other half of each rubber dust boot.

Drive shafts: visual inspection of boots

– Perform a visual inspection of the boots for leaks and damage.

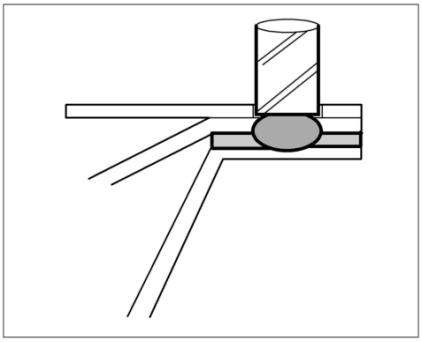
Information on the use of structural adhesives in vehicle construction

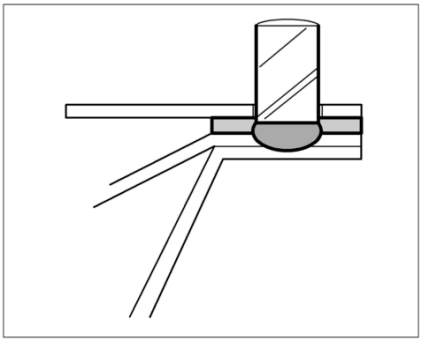


General

Structural bonding in the body shell means that the adhesive assumes functions of stiffness, crash strength and endurance strength, whereby the characteristics of the body shell are positively influenced in a significant way. In a conventional steel body shell, use is made of a high-strength, heat-hardening single-component epoxy resin adhesive that fully hardens in the cathodic immersion paint drying oven. In the case of a repair, this adhesive is replaced by a cold-hardening two-component epoxy resin adhesive, since the hardening temperatures necessary for the single-component epoxy resin adhesive are not conceivable on an assembled vehicle. For both series production of bodies-in-white and repair, structural bonded joints are regularly used in combined jointing processes.

Resistance spot-welding combined with adhesive bonding and mechanical jointing processes

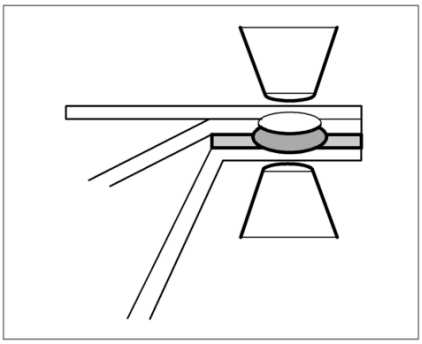
In the case of spot weld bonding for repair and series production, the entire extent of adhesive surfaces and spot welds is replaced. In this case, before actually spot weld bonding, the unhardened adhesive must be displaced from the joint area by an appropriate squeeze time. In the case of two-component adhesives, the hardening reaction starts immediately after mixing and application; this increases the viscosity and so there is only a certain time window in which spot weld bonding can be performed if the process is to be reliable. For this reason, all time-intensive preliminary work (drilling, cutting to size, fixing etc.) on the parts to be joined must be performed before application of adhesive and jointing. This also applies to mechanical jointing processes where the adhesive has to be displaced from the joint area.



Separating body components

Processing structural body adhesive

Separating body components

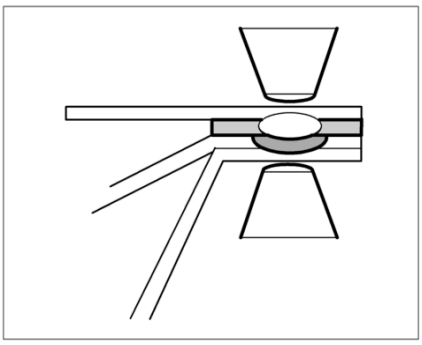


In the case of 3-layer spot-welded panel joints with a hardened bonded layer in which only the outer panel needs to be replaced, drill the outer panel in the area of the spotwelds sufficiently well without damaging the spotweld and bonded joint in the second component layer.

Separating bonded body components

In the case of 3-layer spot-welded panel joints with a hardened bonded layer on the outer panel, drill the outer panel in the area of the spotwelds sufficiently well without damaging the spotweld in the second component layer. After removing the loosened body part, old adhesive must be removed and any uneven spots sanded down. The flange area must then be pre-treated for bonding.

Welding in body components



Spot-welding body components

Note

- *In areas in which bonded flanges are spot-welded in an unhardened state, suction devices must be used due to combustion products.*
- *Areas that can only be accessed from one side must be joined with MAG plug-welds or MAG welded seams. In these cases, no adhesive can be used in the vicinity of the welded seam because this would burn and would have a negative effect on the joint.*
- *The areas without adhesive must be protected using appropriate anti-corrosion and sealing measures.*

Once the spare parts have been attached, repair spotwelds must be placed on the old spotwelds because there

is no current flow possible in areas with a hardened bonded layer. Welding procedures other than resistance spot-welding are not permitted since the thermal effect would destroy the bonded joint over a wide area.

Spot-welding body components

top of page

Processing adhesives

ATTENTION

Danger of poisoning and injury when handling adhesive!

- **Danger of poisoning from breathing in vapours or from swallowing adhesive.**
- **Risk of injury due to contact with skin or eyes.**

→ Ventilate the work area well.

→ Do not eat, drink, or smoke while carrying out work.

→ Avoid direct contact with eyes and skin. Wear suitable protective equipment, such as protective clothing, gloves, and if necessary, a protective mask.

→ If clothing is soiled with adhesive, change clothing immediately and only use again after they have been cleaned.

→ Also observe the product-specific processing and safety instructions on the packing container and packing container imprints.

→ In case of eye contact: Rinse eyes immediately and thoroughly with lukewarm running water and consult an eye doctor.

→ In case of skin contact: Rinse contacted skin areas immediately with lukewarm running water and soap.

→ If adhesive is swallowed: Rinse mouth and consult a doctor.

Note

- *Bonding surfaces must be free from oil, old adhesive, dirt, moisture, and layers of paint and oxide.*
- *Body structural adhesive and primer must only be used on bare metal parts.*

- *Ensure that clean gloves are worn when touching cleaned surfaces to avoid transferring sweat from the hands and dirt onto the bonding area.*

- *The jointing operation must take place directly after application of the adhesive in order to guarantee a high quality and reliable bond. Otherwise the adhesive bead must be removed, with pre-treatment of the surface and application of the adhesive being repeated.*

- *After adhesive has hardened, carefully prime accessible bonding areas and seal with body sealant. Protect bonding areas in cavities with cavity preservation against corrosion.*

Preparing adhesive flanges
To improve adhesion, the bonding surfaces must be roughened using sandpaper with a grain of 100 to 150. Remove paint layers (cathodic immersion painting) using dry sandpaper or fibre discs with a grain of 100 to 150. The bare bonding surface must then be cleaned with a lint-free cloth soaked in acetone. Leave cleaned areas to dry for approx. 1 - 2 minutes; bonding surfaces must be completely dry. Apply primer to the cleaned surfaces. → 2-K-SIP
Bonding operation
Minimum ambient and material temperature during working and hardening is 18° C. The coating thickness of approx. 1 mm should not be exceeded; if necessary, spread the mixed adhesive on the bonding surface with a spatula. Areas not covered by cathodic immersion painting and exposed body panels in cavities must be brushed or filled with structural adhesive.
Jointing operation
Join, fix and resistance spot-weld parts within the working time. The jointing operation must take place directly after application of the adhesive in order to guarantee a high quality and reliable bond. Otherwise the adhesive bead must be removed, with pre-treatment of the surface and application of the adhesive being repeated.
Remove excess material
Remove most of the excess material with paper or cloth. Finish cleaning visible surfaces with a cloth soaked in acetone. Hardened material can only be removed mechanically.
Hardening
The body structural adhesive used hardens at room temperature. Hardening can be accelerated by heat (e.g. with an infra-red radiator in a painting booth). Do not load bonded parts until hardening is complete.

	Betamate 2096 adhesive set
Initial strength at 23 °C	Approx. 10 h 1)
Initial strength at 60 °C	Approx. 2 h 1)
Hardening time at room temperature (23 °C)	Approx. 170 h

1) After this time assembly work is permitted

Corrosion protection
After adhesive has hardened, carefully prime accessible bonding areas and seal with body sealant. Protect bonding areas in cavities with cavity preservation against corrosion.
Further work on the vehicle
The time from joining the repaired components to handing over the vehicle to the customer must be at least 48 hours. After repairs with adhesive, allow at least ten hours before moving or carrying out further work on the vehicle (leave standing overnight) to avoid damage to the bonded joint by premature loading.

Disposal
Small amounts remaining after mixing and complete hardening may be disposed of as industrial waste.
Dispose of used acetone-soaked cleaning cloths as special-category waste.

top of page

Handling primer

General

For processing during body repairs, the following primer system is recommended by Porsche AG.

2-component SIP

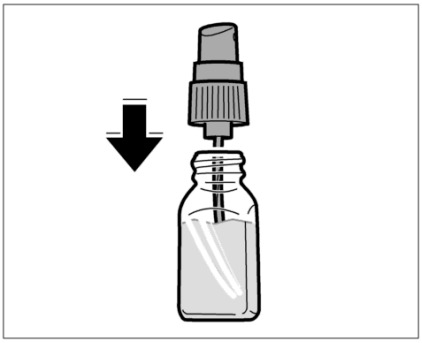
ATTENTION
Adhesion of the bonded joint will be impaired if the primer is not processed correctly.

→ Process mixed primer within eight hours; do not keep any leftover primer.
→ The adhesive flange must be coated thinly and evenly with primer. Remove excess material.
→ Protect primed surfaces from soiling.

Note

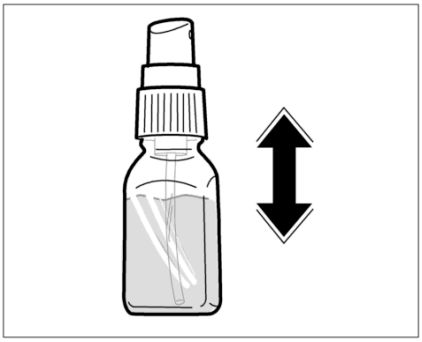
- *Primed surfaces can be stored in the open for a maximum of three days before undergoing further processing. When doing so, make sure that the surfaces are not soiled by the surrounding environment. After standing in the open for more than three days, the primer must be removed and reapplied. For this reason, body parts must be stuck immediately after the primer has been applied.*

1. Prepare adhesive flange for sticking. (see Processing adhesives)



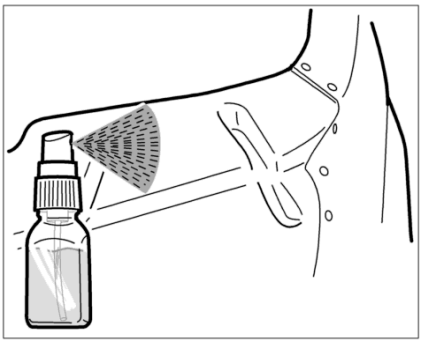
Opening bottle

2. Open bottle for component A.



Filling with component B

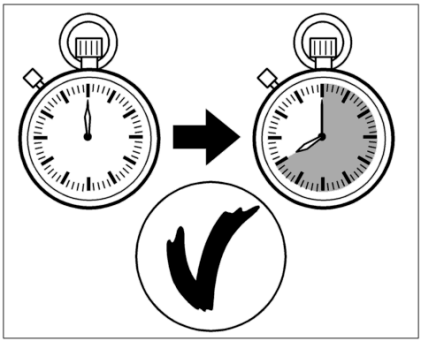
3. Fill bottle completely with component B.



Screwing on spray head

4. Screw on spray head.

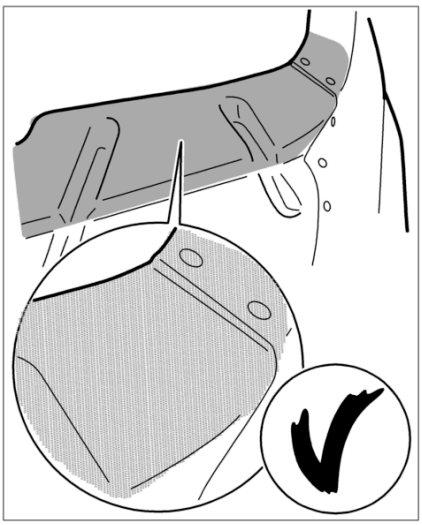
Mixing components



5. Mix components together by shaking vigorously.
6. Clean adhesive flange with isopropanol and allow it to flash off.

Applying primer

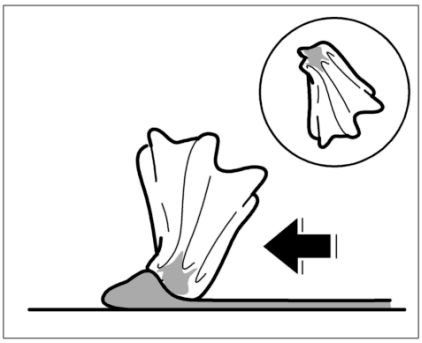
7. Spray on primer in the area around the adhesive flange.



7.1. Process mixed primer within eight hours; do not keep any leftover primer.

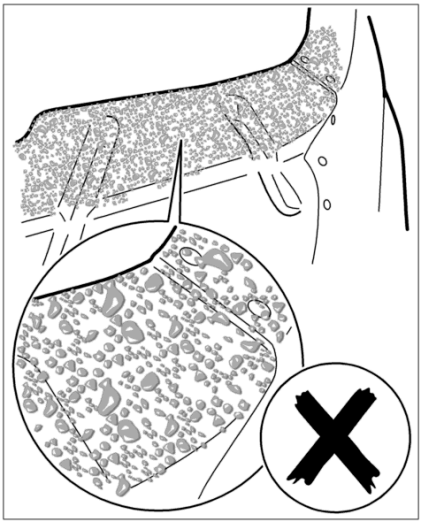
Working time of 2-component SIP

8. Check primer application.



Adhesive flanges are coated evenly with primer:

Primer application OK



result is OK.

Remove excess primer with a clean, dry cloth.

Removing excess primer

A thin, violet-coloured coating of primer is sufficient for the adhesive flanges.
Adhesive flanges are not evenly coated (droplet formation):
result is not OK.

Primer application incorrect

Using wet sandpaper (approx. 200 grit) or a sanding fleece, rub the primer film, which is still damp, around the flange area until an even application of primer is achieved. If an even application of primer is not obtained, the adhesive flange must be completely cleaned, sanded and primed once again.

9. Dry primer.

9.1. Allow primer to flash off; it must be dust-dry before any adhesive is applied.

Location	Explanation	Type	Basic value	Tolerance 1	Tolerance 2
Primer		Flash-off time	5 min		

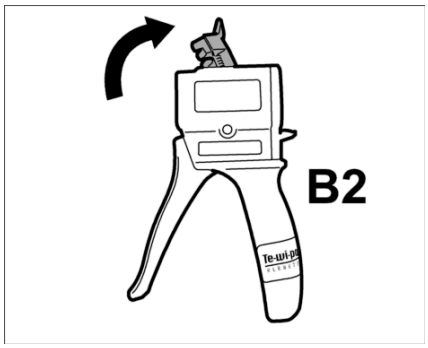
10. Process adhesive.

top of page

Handling processing devices

Processing nozzle

ATTENTION

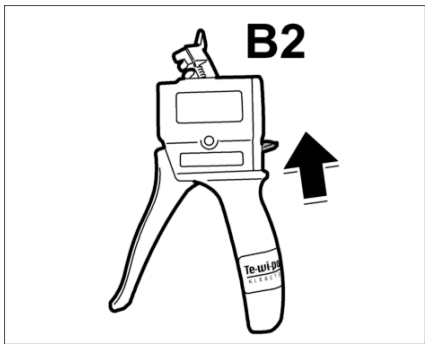


→ Observe the safety instructions of the individual adhesive set components.

Note

- *In addition to this manual, observe the relevant job descriptions for body repairs!*

Note

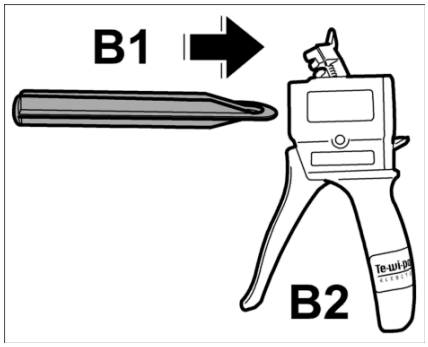


- *In addition to this manual, observe the relevant job descriptions for body repairs!*

Releasing holder

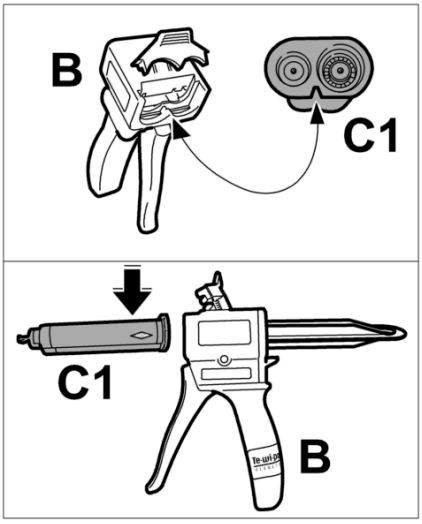
1. Open holder.

1.1. Release holder **-arrow-** and fold up.



Pressing sliding lock

2. Press sliding lock upwards

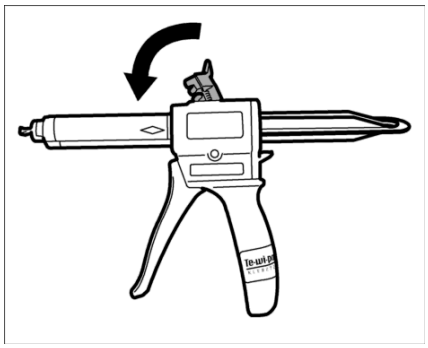


2.1. Press sliding lock upwards in direction of arrow **-arrow-** .

3. Insert piston rod.

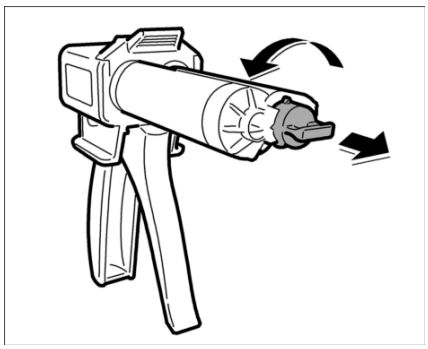
3.1. Hold sliding lock pressed and insert piston rod **-B1-** completely into the gun grip **-B1-** .

Inserting piston rod



Inserting cartridge

4. Insert mixing cartridge.



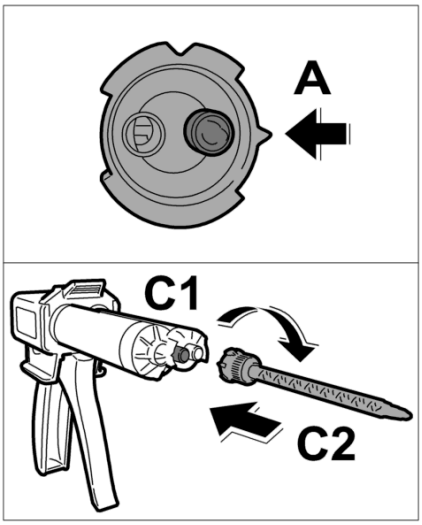
4.1. Insert double cartridge **-C1-** into the gun **-B-** from above. Insert the cartridge until the muzzle of the gun engages in the groove of the cartridge.

5. Engage holder.

5.1. Swivel holder downward and engage on handle of gun.

Engaging holder

Opening cartridge



6. Open cartridge.

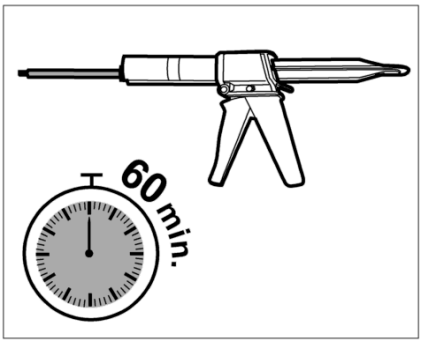
6.1. Turn screw cap 90 ° counter-clockwise and remove.

7. Squeeze adhesive to the front.

7.1. By activating the valve of the gun grip, allow the piston rod to move out slowly until both components emerge equally.

7.2. Wipe off any adhesive that emerges.

Fitting processing nozzle



8. Fit processing nozzle.

8.1. Before fitting the processing nozzle, ensure that the muzzle **-A-** and the mixing channels are aligned on one level, if necessary turn the bayonet locking mechanism on the processing nozzle through 90°.

8.2. Position processing nozzle **-C2-** and turn clockwise 90°.

9. Mix adhesive components.

9.1. By activating the valve of the gun grip, allow the piston rod to move out slowly until the adhesive is visible in the processing pipe.

Working time of structural adhesive

10. Bond the body part.

Note

- *In order to ensure that the substance is completely mixed, apply a 30 mm long adhesive bead of fresh adhesive to a piece of cardboard before processing.*
- *Process the adhesive within the processing period. The adhesive must be applied and the body part must be jointed within this period. Any resistance welding to be carried out in the area of the bonding must be performed within this period as well.* →***Working time: 60 min***
- *Do not load bonded parts until hardening is complete!*
- *If the contents of the cartridge are not used up completely, the processing nozzle must be kept on the cartridge until the adhesive hardens. In the event of later processing, a new processing nozzle must be used.*

10.1.

 AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

 ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

 ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**

- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

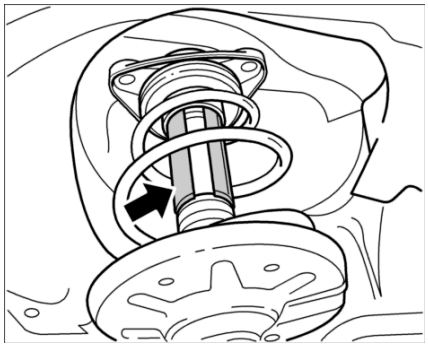
Removing transport lock (spring strut locking devices) - as of MY 2005



General information on removing the transport arrangement (spring strut locking device)

WARNING

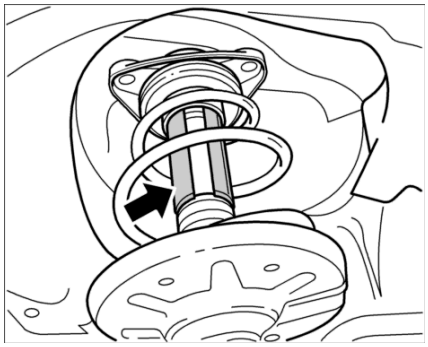
Increased risk of accident due to installed spring strut locking devices.

- **Worsening of handling and driving safety.**

→ Remove spring strut locking devices before a test drive or before the vehicle is handed over to the customer.

Front spring strut locking devices

Note



In order to avoid damage to the floorpan assembly during transport (e.g. during loading and unloading), spring strut locking devices (new version) **-arrow-** are installed in new vehicles on the front axle. This increases the ground clearance of the vehicle.
Depending on the vehicle equipment, the spring strut locking devices are coloured white, yellow, green, blue, red, or orange.
On the rear axle, no spring strut locking devices are necessary.
Do not send removed spring strut locking devices back to Porsche. Dispose of them on-site.

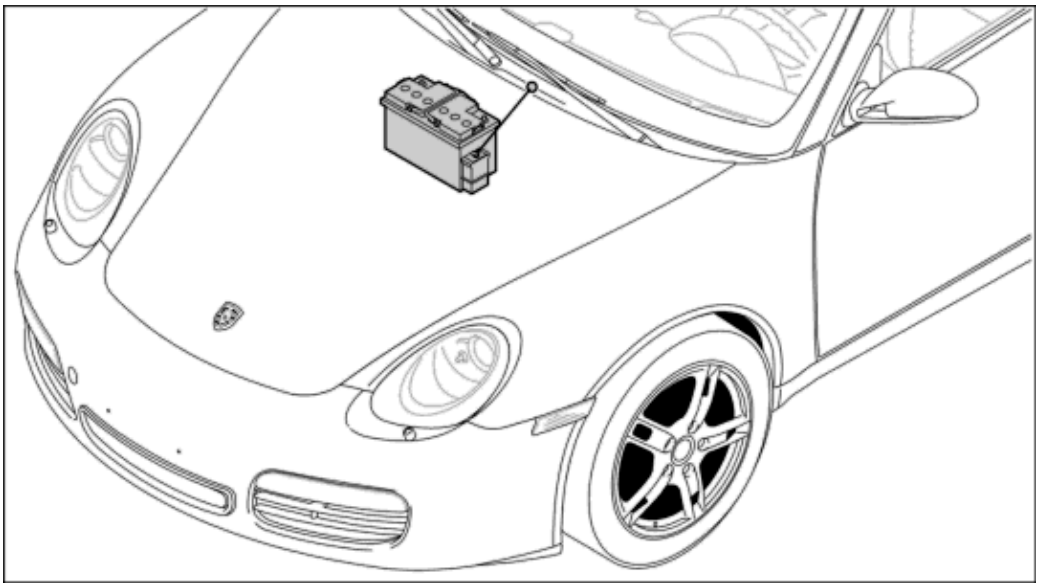
Removing spring strut locking devices

Note

- *The wheels need not be removed!*

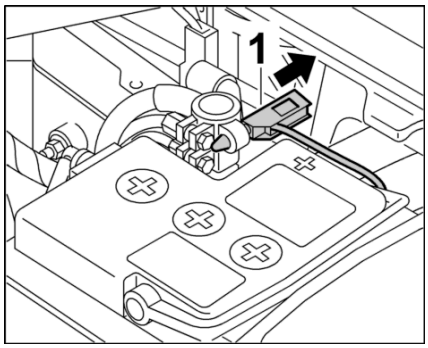
1. Lift the vehicle (wheels at the front axle must be free). *→401000 Lifting the vehicle*

Front spring strut locking device



2. Remove spring strut locking device **-arrow-** . To do this, twist the spring strut locking device until the slot points toward the luggage compartment.
3. Beginning at the lower end, press the spring strut locking device away from the piston rod via the slot and guide it out of the spring.
4. Repeat the procedure on the spring strut.

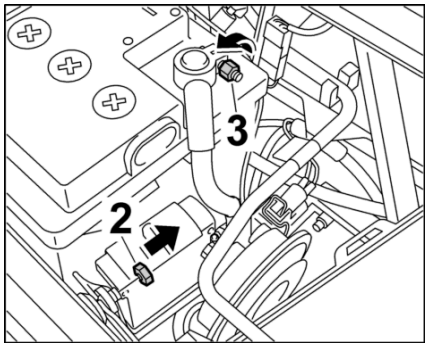
top of page



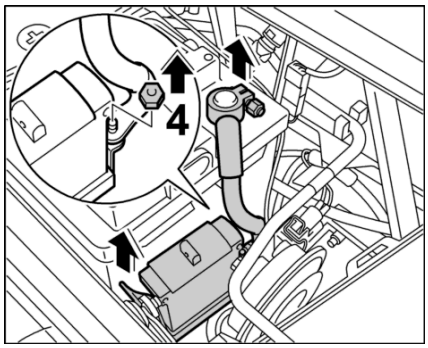
Removing main switch for power supply

Removing main power supply switch

Installation Location:

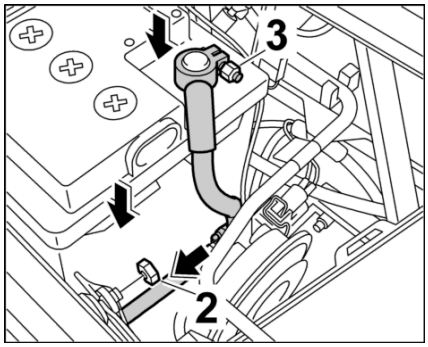


Installation position



Plug for the main switch

1. Pull off the B+ plug **-1-** for the main switch (battery disconnect switch) from the battery positive terminal.

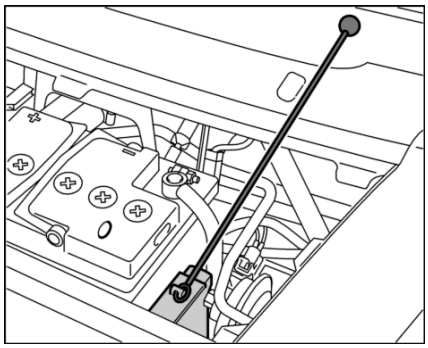


Unscrewing the ground point

2. Unscrew the fastening nut **-2-** for the ground point on the body and disconnect the negative terminal **-3-** from the battery.
3. Cover the negative terminal on the battery with a soft, dry cloth.

Removing the battery disconnect switch

4. Remove battery disconnect switch together with the lead for the negative terminal and unscrew the fastening nut **-4-** . Remove lead for the negative terminal.



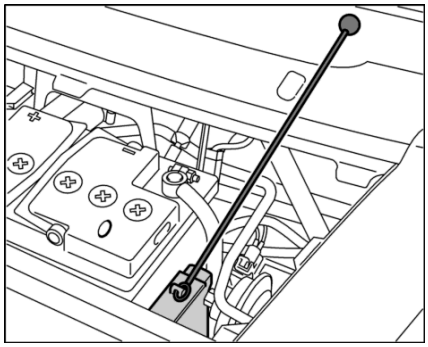
Routing and securing lead for negative terminal

5. Position lead for the negative terminal on the battery again and screw it firmly into place **-3-** . → **Tightening torque: 3.5 ftlb.**
6. Position lead for the negative terminal on the bulkhead and secure with the fastening nut **-2-** . → **Tightening torque: 11 ftlb.**
7. Place and fit the battery cover included with the vehicle.
8. Carry out →*271000 Work instructions after disconnecting the battery*.

top of page

Information

Vehicle electrical system - switching on



Battery disconnect switch with external switch lever

The battery disconnect switch, which is supplied via the positive terminal, is closed manually using the external switch lever and locked electromagnetically. The luggage compartment lid must not be open when doing this.

Vehicle electrical system - switching off

The vehicle electrical system switches off:
If the battery voltage falls below 12.6 V for approx. 10 min.
Immediately, if the voltage supply of the main power supply switch (battery disconnect switch) is disconnected from the positive terminal.

Vehicle electrical system - switching off

Immediately, if the main power supply switch (battery disconnect switch) is mechanically released.

Tools and materials

Tools

Closed-circuit current should be measured using an analogue ammeter or a digital multimeter with a long integration time (to filter out voltage peaks).

Item	Special tool designation	Explanation
-1-	**Multimeter 155**	→"Gr. 2,5; Workshop Equipment Manual "

top of page

Measurement of closed-circuit current

Preliminary work on vehicle

Note

Before measuring the closed-circuit current, determine the vehicle equipment (I numbers) and establish the expected closed-circuit current with the aid of the attached table.

1. Open the front luggage compartment.
2. Using a suitable tool, e.g. upper part of lock with a suitable handle, close lower part of luggage compartment lock while keeping the luggage compartment lid open.
3. Remove ignition key, close doors and rear lid, **do not lock** vehicle.
4. Set the measuring instrument to the highest possible current-measuring range.
5. With two alligator clips, connect the measuring instrument to the battery ground and to the unoccupied second body ground which is always available for RHD or LHD.
6. Remove ground strap from the body and secure against contact with the body. The entire vehicle current now flows through the ammeter.

Testing

Select a measuring range which ensures that the pointer of the instrument is in the upper third of the scale, as far as possible. Switch over measuring range without interruption. Read off the measuring values after the waiting period specified in the table.
Do not switch on any electrical loads when measuring.

Note

- *If the value of the closed-circuit current is higher than the value determined in the table, the cause must be established systematically.*
- *Recommended troubleshooting procedure: With the measuring device connected, remove the fuses of terminal 30 and the relays successively. Observe the display values of the measuring instrument when removing in order to recognise a reduction in current.*
- *After troubleshooting, screw the ground strap back onto the body in the proper manner.*
- *The measured values could vary by approx. 20%.*
- *The values listed in the table depend on the condition of the battery, the room temperature and the engine temperature.*

Reading off the measuring range:
Read off the measuring range only after at least 60 minutes have passed since locking the vehicle.

From	to	mA
Approx. 60 min	until battery is empty	up to approx.

70 IN Notes for the care of soft-look paint surfaces - as of MY 2005

- Light soiling (e.g. dust)
- Information

ATTENTION

Risk of damage to the soft-look paint coat if the cleaning agents or solvents available as accessories for cleaning the vehicle interior are used. This also applies to the use of plastic polish from the Tequipment care set. The contents of these agents etch the paint coat (paint swells, rubber-like texture).

- **Consequently, the paint coat can separate from the substrate when a mechanical load is applied. Furthermore, the surface may shine brightly after using the cleaning agents.**

→ The following procedure is recommended for the care or cleaning of soft-look paint surfaces.

top of page

Light soiling (e.g. dust)

It is possible to clean light soiling by selecting an option from the following cleaning tools and cleaning fluids:

Cleaning tools	Cleaning fluid	Cleaning procedure
Soft household sponge	Clear water	Gentle wiping movements, do not apply pressure
Soft, lint-free cloth	Water with small amount of commercially available washing-up liquid added	
	Interior window cleaner (from Porsche care set) Note Observe cleaning instructions, wipe down with clear water if necessary	

top of page

Information

It is possible to clean heavy soiling by selecting an option from the following cleaning tools and cleaning fluids:

Cleaning tools	Cleaning fluid	Cleaning procedure
Soft household sponge	Water with small amount of commercially available washing-up liquid added	Gentle wiping movements, do not apply pressure
Soft, lint-free cloth	Interior window cleaner (from Porsche care set) Note Observe cleaning instructions, wipe down with clear water if necessary	
	Solvent naphtha Note: Use solvent naphtha only, other solvents are not permissible!

Country C00, C02, C05, C07, C08, C09, C10, C11, C12, C13, C14, C15, C16, C18, C19, C20, C21, C22, C23, C24, C25, C26, C27, C28, C32, C33, C34, C35, C36, C37, C38, C39, C45, C46, C98, C99

 WARNUNG

Gefahr des Verlusts der Text-Bild-Zuordnung beim Ausdruck.

- **Aus technischen Gründen kann derzeit nicht ausgeschlossen werden, dass trotz einwandfreier Darstellung auf dem Bildschirm beim Ausdruck der Zusammenhang von Text und zugehörigem Bild verloren geht.**
- **Wird der Fehler nicht bemerkt, besteht die Gefahr, daß Arbeiten nicht korrekt durchgeführt werden und es dadurch zu Personen- und Sachschäden kommt.**

→Vergleichen Sie deshalb nach dem Druckvorgang unbedingt die Ausdrucke mit der Bildschirmdarstellung. Korrigieren Sie die Ausdrucke im Fehlerfall so, daß der Inhalt der Bildschirmdarstellung zutreffend wiedergegeben wird.

 WARNING

Danger of losing text-figure correspondence when printing out.

- **For technical reasons, it can currently not be ruled out that the correspondence between text and associated figure can be lost when it is printed out, even though the display on the screen is correct.**
- **If the fault is not noticed, there is the danger that work will not be performed correctly which can cause injury and damage.**

→Therefore, always compare printouts with the screen display after printing them out. Correct the printouts if they are faulty so that the content of the screen display matches that on the printouts.

AVERTISSEMENT

Risque de perte de la correspondance texte-illustration lors de l'impression papier.

- **Pour des raisons techniques, il ne peut pas être exclu à l'heure actuelle que, même en cas d'affichage correct à l'écran, la correspondance entre le texte et l'illustration puisse être erronée sur l'impression papier.**
- **Si l'erreur passe inaperçue, on court le risque d'exécuter certaines opérations de manière incorrecte pouvant conduire à des dommages corporels et matériels.**

→Comparez impérativement pour cette raison les impressions papier avec l'affichage à l'écran. Corrigez-les en cas d'erreur de manière à reproduire correctement l'affichage à l'écran.

ATTENZIONE

Pericolo di perdita dell'abbinamento testo-immagine nella stampa.

- **Per motivi tecnici non è escluso che, nonostante la rappresentazione sullo schermo risulti perfetta, durante la stampa venga persa la corrispondenza fra testo e relativa immagine.**
- **Se tale difetto non viene rilevato vi è il pericolo che i lavori non siano eseguiti correttamente; ciò può avere come conseguenza lesioni e danneggiamenti.**

→Per questo motivo, dopo la stampa è assolutamente necessario confrontare le stampe con la rappresentazione sullo schermo. In caso di errore si prega di correggere le stampe, così da garantire la riproduzione esatta della rappresentazione sullo schermo.

ADVERTENCIA

Al imprimir se corre el riesgo de perder la correcta asignación de las figuras al texto.

- **Por motivos técnicos, por el momento no se puede descartar que, aun siendo correcta la imagen que aparezca en la pantalla, al imprimir se pierda la correlación entre el texto y la figura correspondiente.**
- **Si este error pasara desapercibido, existe el riesgo de que los trabajos no se ejecuten de forma correcta y, por tanto, se produzcan daños personales y materiales.**

→Por ello le rogamos que tras el proceso de impresión compare siempre las copias impresas con la imagen de la pantalla. En caso de error, corrija las copias impresas de forma que se correspondan con el contenido de la imagen de la pantalla.

46 Brake disc measurement sheet - as of MY 2005

- Information

top of page

Information

Brake disc measurement sheet

Note

Notes on checking and measurement points can be found in:

- *→461000 Technical data/Brake wear limit*
- *→465002 Checking front brake disc*
- *→465302 Checking rear brake discs (wear assessment)*

To document the measured result, a copy or print of the data card illustrated can be used. The data cards cannot be ordered.

1. Make a copy or print of the data card shown.

Note

- *Actual values that are identical in all versions are already entered!*
- *In the course of further development these values may change. If necessary, carry out a check and insert the new values accordingly. →461000 Technical data/Brake wear limit*

2. Before measurement (Test 1 through Test 3), enter the general data, vehicle type and the missing nominal values (new brake disc thickness / brake disc wear limit) into the data card.
3. Carry out measurements (actual status) and enter the values in the alignment card.
4. If brake discs are to be replaced, carry out Test 2 with the new discs again and enter the latest values in a new data card.

Measuring prerequisites

– Note the labour operation numbers.
– Measuring brake discs: 80 time units per axle.

Brake disc measurement

44 Adjustment values for suspension alignment - C4/C4S - as of MY 2006

Vehicle height

Note

- *The following values relate to the empty weight, i.e. full fuel tank, vehicle with tools, but without driver and without additional weights!*

Vehicle height	RoW/USA: Series C4/C4S	RoW/USA: PASM C4/C4S	RoW: Performance C4/C4S
Front axle			
Height with 18-inch wheels	→**Nominal value: 141 mm +/-10 mm**	→**Nominal value: 131 mm +/-10 mm**	→**Nominal value: 121 mm +/-10 mm**
Height with 19-inch wheels	→**Nominal value: 143 mm +/-10 mm**	→**Nominal value: 133 mm +/-10 mm**	→**Nominal value: 123 mm +/-10 mm**
From road contact surface to lower edge of hexagon-head bolt of cross-member screw connection to the body.			
Rear axle			
Height with 18-inch wheels	→**Control value: 164 mm +/-10 mm**	→**Control value: 154 mm +/-10 mm**	→**Control value: 144 mm +/-10 mm**
Height with 19-inch wheels	→**Control value: 165 mm +/-10 mm**	→**Control value: 155 mm +/-10 mm**	→**Control value: 145 mm +/-10 mm**
From wheel contact surface to the locating bore in the rear-axle side section (between toe and camber eccentrics).			

Wheel alignment values

WARNING

Risk of accident due to incorrect functioning of steering angle sensor if it is uncalibrated or incorrectly calibrated.

- **There is a risk of accidents causing physical damage to persons or objects in the PSM testing area.**

→ After working on wheel suspension parts, when replacing the steering-angle sensor and after changing the wheel alignment values, calibrate the steering angle sensor with the front wheels in straight-ahead position using the PIWIS tester.

→ Check the actual value of the steering angle sensor after a suspension alignment where no changes were made to the wheel alignment values.

Note

- *The following values relate to the empty weight, i.e. full fuel tank, vehicle with tools but without driver or additional weights.*
- *The toe-difference angle value is also influenced by the vehicle height. For this reason the measured result must be evaluated accordingly. No action is necessary in the case of small deviations from the toe-difference angle's required value as long as the value to the right and left is almost the same.*

Wheel alignment values	RoW/USA: Series C4/C4S	RoW/USA: PASM C4/C4S	RoW: Performance C4/C4S
Front axle			
Toe unpressed (total)	+ 5' ± 5'	+ 5' ± 5'	+ 5' ± 5'
Toe difference angle at 20° lock	- 1° 15' ± 30'	- 1° 38' ± 30'	- 2° 02' ± 30'
Camber (with wheels in straight-ahead position)	- 15' ± 15'	- 15' ± 15'	- 30' ± 15'
max. difference, left to right	20'	20'	20'
Caster	8° 00' ± 30'	8° 10' ± 30'	8° 20' ± 30'
max. difference, left to right	40'	40'	40'
Rear axle			
Toe per wheel	+ 10' ± 5'	+ 10' ± 5'	+ 10' ± 5'
max. difference, left to right	10'	10'	10'
Camber	- 1° 30' ± 15'	- 1° 30' ± 15'	- 1° 40' ± 15'
max. difference, left to right	20'	20'	20'

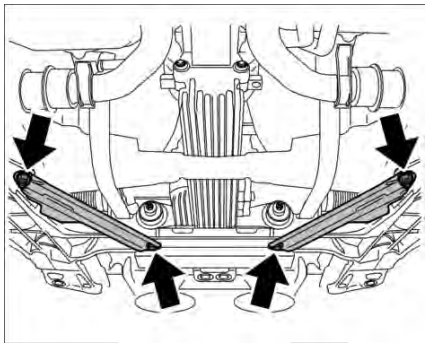
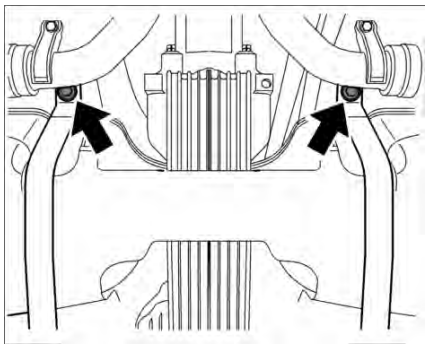
40 09 Removing and installing front-axle cross member - as of MY 2006



- Preliminary work
- Removal
- Installation
- Subsequent work

top of page

Preliminary work

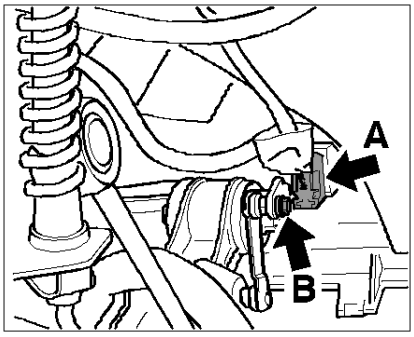


Preliminary work

1. Put steering wheel with wheels in straight ahead position and remove ignition key (steering wheel fixed.)
2. Raise the vehicle *→401000 Lifting the vehicle* and remove front wheels →440519 Removing and installing wheel.
3. Remove front cover and centre cover (underbody protection) →519219 Removing and installing front cover →519319 Removing and installing centre cover.

Diagonal braces

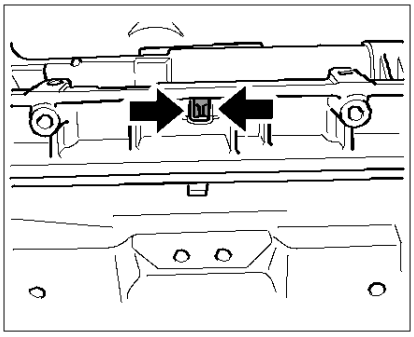
4. Remove diagonal braces. Also remove crash support for the Carrera 4.



Cover

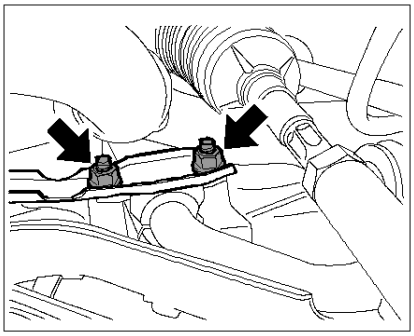
5. Remove front cover.

top of page



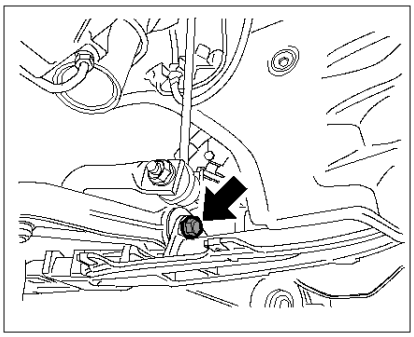
Removal

Removing front-axle cross member



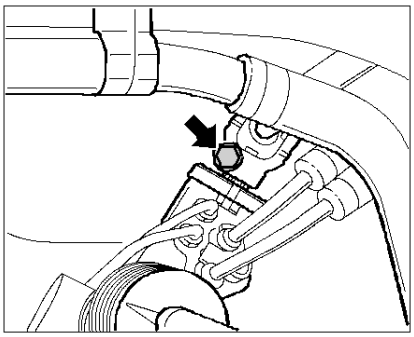
HBA sensor

1. Pull connector **-A-** from sensor for HBA and loosen threaded joint **-B-** on control lever.



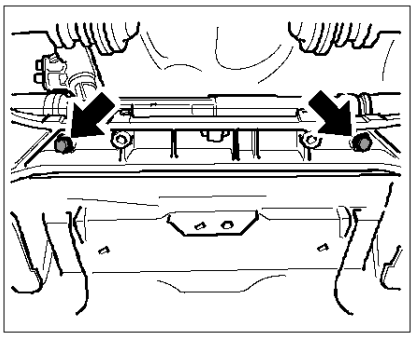
Support for coolant pipes

2. Loosen support for coolant pipes (screwed on 4x) and press together the support for coolant pipes in the centre **-arrows-** and unclip.



Front anti-roll-bar mount

3. Loosen anti-roll-bar mount **-arrows-** and allow anti-roll bar to hang.

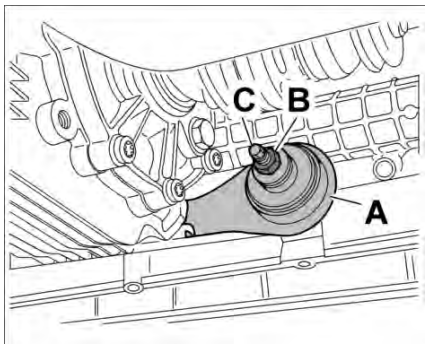


Trailing arm mount for axle cross member

4. Loosen trailing arm on front-axle cross member **-arrow -** and pull out of the mount.

Universal joint

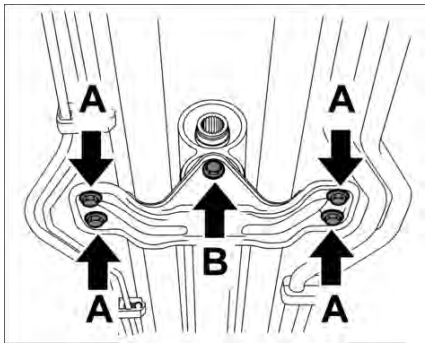
5. Remove screw **-arrow-** from universal joint (steering column). Carefully push steering column upward until the universal joint loosens from the steering gear.



Fastening points for the steering

6. Remove the steering mount **-arrows -** .

Note

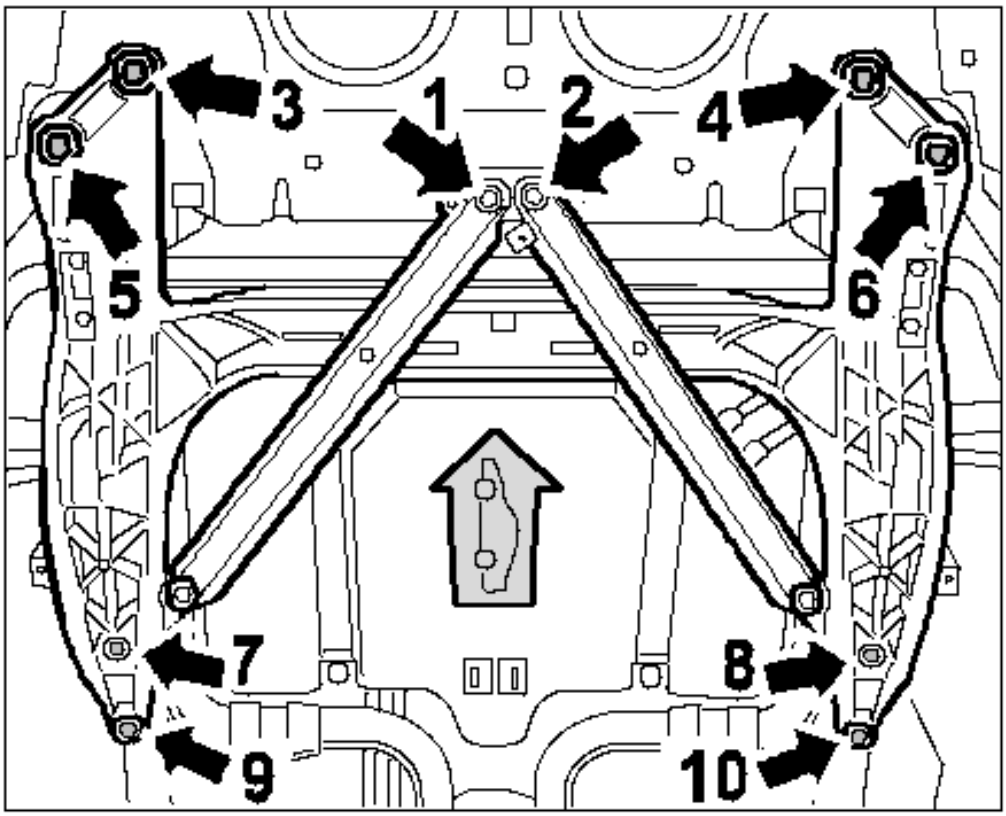


Step 7, 8, and 9 are only for Carrera 4.

7. Front-axle final drive with transmission jack.

Final drive mount

8. Loosen fastening nuts **-B-** for front bracket **-A-** and unscrew the studs **-C-** .



Fastening screws for support (for the sake of clarity, cardan shaft removed in figure!)

9. Unscrewing fastening screws **-A-** for support.

A - Fastening screws for support

B - Support/transmission mount screw. Do not loosen!

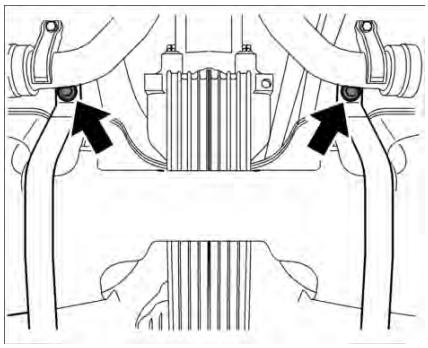
10. Remove the front-axle cross member mounts **-3 to 10-** and carefully lower (2 workers required!). If necessary for the Carrera 4, slightly lower the front-axle final drive and extend the front-axle cross member forward (2 workers required!).

Cross member with diagonal brace to body

top of page

Installation

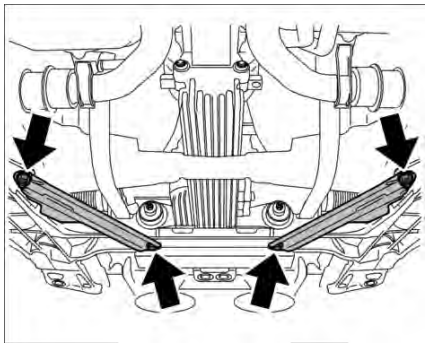
Installing front-axle cross member



Note
Always replace the screw for the universal joint of the steering column.
Observe correct tightening torques.

Installation is in reverse order.

top of page



Subsequent work

Subsequent work

Cover

Install front cover.

Diagonal braces

Fit diagonal braces. Also install crash support for the Carrera 4.
Fit front cover and centre cover (underbody protection) →519219 Removing and installing front cover →519319 Removing and installing centre cover.
Fit front wheels →440519 Removing and installing wheel.

Note

Check the steering-angle sensor setting.

Adjust toe →449503 Performing front and rear suspension alignment. Calibrate steering-angle sensor if necessary.

Installing the threaded bushing

Installing repair threaded bushing for seat cross member

Installation Location:

Installation position of threaded bushing for seat cross member

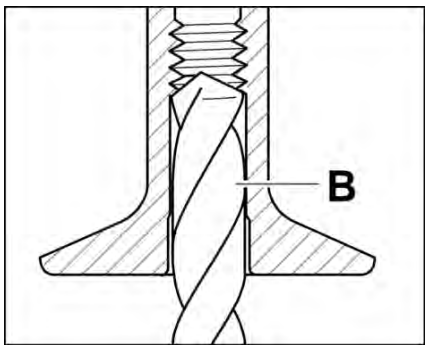
1 - Pickup point for seat mounting

WARNING

Danger of material damage and personal injury when repairing threads!

- **Danger of material damage and personal injury!**

→ Thread repairs must only be performed using the Time-Sert thread repair kit

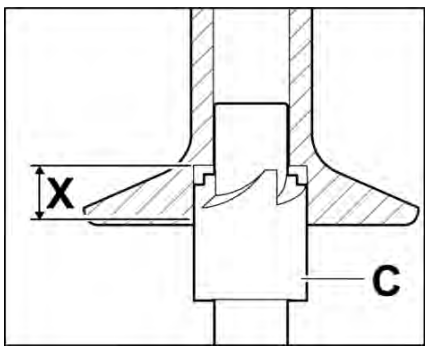


Note

The repair bushing must be installed recessed. To mill in the respective shoulder, the tool with the designation **Spot facer for Time-Sert thread repair kit NR.122-2** for M8, M10, M12 or M14 must be used. The tool provided with the complete set supplied must not be used in this case!

Note

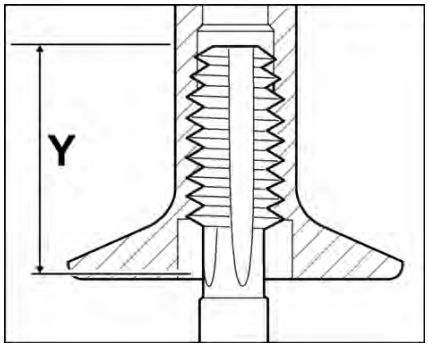
While pressing in the base thread, a noticeably larger amount of force is required on the screw-in tool to form the internal thread. Pressing is finished when the screw-in tool can be turned further more easily.



1. Drilling out thread

Drilling out thread

Select kit M10.
Drill out old thread with drill contained in kit M10 **B** as far as the base of the thread.

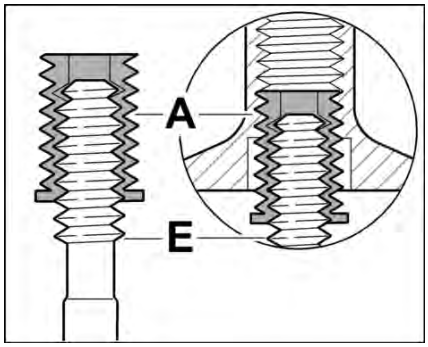


2. Milling in shoulder

Milling in shoulder

Select kit M10.
Mill out bore hole with spot facer **C** up to dimension **X**, see: Table. Milling in can only be performed using the tool **Spot facer for Time-Sert thread repair kit NR.122-2**. For milling, use an electronically controlled power drill set to a speed of approx. 250 $^{1}/_{min}$.

3. Cutting thread



Cutting thread

Cut thread using a cutting tool **D** up to dimension **Y** into the chassis bushing, see Table ?????. Clean the thread on the chassis bushing (blow it out).

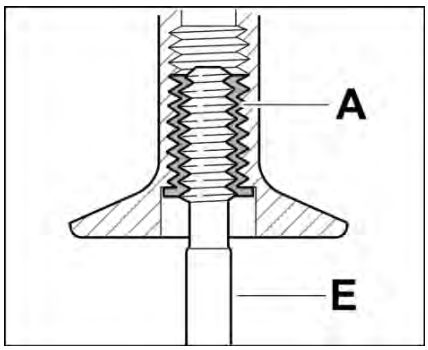
4. Positioning threaded bushing on the screw-in tool

   Clean the thread on the bushing and screw-in tool.

   Oil the screw-in tool **E**.

Positioning threaded bushing on the screw-in tool

Screw the threaded bushing **A** onto the screw-in tool **E** by hand.



5. Screwing in threaded bushing

Screwing in threaded bushing

Completely screw in threaded bushing **A** (note bushing length classification) with the screw-in tool **E**.

6. Pressing threaded bushing

Pressing threaded bushing

Form and press threaded bushing **E** by turning further with the screw-in tool **D** in the base thread.

7. Unscrewing the screw-in tool

   Unscrew screw-in tool **E** from the threaded bushing **A**.

Table classification for seat cross member repairs

Designation	Bore stroke measured from outer edge of sheet to tip of drill bit	Milling depth **X**	Thread depth **Y**	Bushing length	Note
Threaded bushing **1** screwed point, mounting for front and rear seat	20 mm	2.5 mm	13 mm	14 mm	Measured from the outer edge of sheetmetal thread M10 x 1.5

Preconditions for using workshop documentation for Porsche vehicles

This data comprises technical information as well as instructions on repairs for Porsche vehicles and documentation for training purposes. The descriptions are intended for the exclusive use by workshops and their workshop staff.

Note

- The Dr. Ing. h.c. F. Porsche AG retains sole ownership of the copyright.
- It may not be transmitted to third parties.
- Graphics and text may not be duplicated or used in other electronic or printed publications without the express consent of the Dr. Ing. h.c. F. Porsche AG.

General preconditions for repairing Porsche vehicles

The descriptions form the basis for professional and correct maintenance and repair work. The content of the work procedures described is based on the level of training of a fitter with a sound knowledge of the product. The fitter must have obtained knowledge of the product at training programs and courses offered by the Dr. Ing. h.c.F. Porsche AG which are specific to the product and assembly before carrying out any of the work. This level of knowledge is the precondition for carrying out the work described. The Dr. Ing. h.c. F. Porsche AG will not be held liable if the described repair work is carried out without this knowledge.

Preconditions for body work on Porsche vehicles

The described repair work only applies to standard cases. Body repairs must only be carried out by skilled persons who are specialised for such work. Given the overall picture of the damages, the workshop itself must decide whether it is possible to return the vehicle to its proper condition. Repair works on Porsche vehicles must be carried out with the tools and workshop equipment recommended and approved by the Dr. Ing. h.c. F. Porsche AG. All body repair work must be carried out correctly and according to the Dr. Ing. h.c. F. Porsche AG instructions for sheetmetal, paint and corrosion protection/preservation work.

Warning notes and safety instructions

The warning notes and safety instructions are classified by the respective signalising word (Danger, Warning, Caution) beside the warning symbol.

DANGER

Warns against death or very serious injury which will certainly occur if the instructions are not observed.

WARNING

Warns against death or very serious injury which may occur if the instructions are not observed.

CAUTION

Warns against minor injury or damage to property if the instructions are not observed.

To prevent injury and restricted operating and traffic safety of the vehicle, or damage to the vehicle as the result of incorrect work, read these warning notes and safety instructions carefully and observe them without fail.

It is not possible for Dr. Ing. h.c. F. Porsche AG to give a detailed evaluation of all danger situations for the persons carrying out the work. It is therefore imperative that all persons carrying out repair and maintenance work on Porsche vehicles use their specialist knowledge to ensure that their own safety is not at risk and the procedure chosen will not have any negative effects on the vehicle - especially with regard to safety.

It is therefore expressly specified that all work involved in the work procedures described should be carried out only in accordance with the valid guidelines and regulations of the local authorities responsible with

respect to health and accident prevention and environmental protection, and in compliance with the applicable legal requirements and regulations.

Notes

Notes contain advisory information related to the work procedure which makes the fitter's work easier. The following pictogram indicates this information:

 **Note**

- Contains advisory information which makes the work procedure easier.

Due to the continuous development and improvement of our vehicles, there may be discrepancies between the actual technical status of the vehicles and the work descriptions. Any existing deviations are corrected by means of supplements, and the scope of the descriptions is extended with supplements.

The Dr. Ing. h.c. F. Porsche AG retains the right to implement changes at any time and without prior notice.
